701—73.14(425) Household. Household includes the claimant and the claimant's spouse if living with the claimant at any time during the base year. "Living with" does not include a temporary visit. Only one claimant per household is entitled to a credit or reimbursement.

This rule is intended to implement Iowa Code section 425.17(5) as amended by 1999 Iowa Acts, chapter 152, and section 425.22.

701—73.15(425) Homestead. A person who owns a homestead but is confined to a care facility shall be considered as occupying the owned homestead provided the person does not lease or otherwise receive profits from others for the use of the homestead. The person shall be eligible for a property tax credit but shall not be eligible for a rent reimbursement.

This rule is intended to implement Iowa Code subsection 425.17(4).

701—73.16(425) Household income. Household income includes income of the claimant and the claimant's spouse and actual monetary payments made to the claimant by any other person living with the claimant. Household income does not include Social Security benefits received by the claimant's child and given to the claimant.

Monetary payments do not include goods and services provided to the claimant by a person living with the claimant.

This rule is intended to implement Iowa Code section 425.17(6) as amended by 1994 Iowa Acts, chapter 1165, and section 425.17(7).

701—73.17(425) Timely filing of claims. If a timely mailed property tax credit or rent reimbursement claim is not received by the county treasurer or the department of revenue or is received after the June 1 filing deadline, the claim will be considered to have been timely filed if the claimant complies with the provisions of Iowa Code section 622.105. The county treasurer may extend the time for filing a claim for property tax credit through September 30 of the same year. The director may also extend the filing deadline for property tax credit and rent reimbursement claims through December 31 of the following year. Late property tax credit claims will be reimbursed by the director directly to the claimant upon proof of tax payment.

In the case of a claim for property tax credit, the claimant must own and occupy the homestead at the time the claim for credit is filed or if a late claim, own and occupy the homestead on June 1 of the claim year.

This rule is intended to implement Iowa Code section 425.20 as amended by 1996 Iowa Acts, chapter 1167.

701—73.18(425) Separate homestead—husband and wife rent reimbursements. If a husband and wife are both qualified claimants renting separate and distinct homesteads, and rent is paid by each, each is eligible to file an individual reimbursement claim for rent constituting property tax paid.

This rule is intended to implement Iowa Code subsection 425.17(4).

701—73.19(425) Gross rent/rent constituting property taxes paid. Gross rent means the total amount of rent paid for use of the homestead by the claimant and rent constituting property taxes paid means 23 percent of the gross rent.

This rule is intended to implement Iowa Code sections 425.17(3) and 425.17(9) as amended by 1994 Iowa Acts, chapter 1125.

701—73.20(425) Leased land. An individual who owns a dwelling located on land owned by another may claim a credit of property taxes due on the dwelling and a reimbursement of rental payments made for the use of the land if the land has been assessed for taxation.

This rule is intended to implement Iowa Code subsection 425.17(4).

701—73.21(425) Property: taxable status. In order to be eligible to file a rent reimbursement claim, the property upon which the claimant resided during the base year must have been in a taxable status during the base year. If the property was taxable for only part of the base year, the rent reimbursement must be prorated accordingly. (OP.ST. BD. Tax Rev. 187). However, this restriction does not apply to property that became tax-exempt on or after July 1, 1986, provided the claimant received a reimbursement of rent constituting property taxes paid on the property when it was in a taxable status and continues to reside in the same property.

This rule is intended to implement Iowa Code subsection 425.17(4).

701—73.22(425) Special assessments. The claimant may include as a portion of the taxes due during the fiscal year next following the base year an amount equal to the unpaid special assessment installment due, plus interest, during the fiscal year next following the base year.

This rule is intended to implement Iowa Code subsection 425.17(10).

701—73.23(425) Suspended, delinquent, or canceled taxes. No property tax credit shall be allowed to any person whose taxes have been canceled pursuant to Iowa Code section 427.8. A property tax credit shall be allowed to an eligible claimant whose taxes have been suspended pursuant to Iowa Code sections 427.8 and 427.9.

A property tax credit shall be allowed to an eligible claimant even though the claimant's taxes for a previous fiscal year are delinquent. The claimant may receive a reimbursement for delinquent taxes paid provided the taxes are paid by December 31 following the fiscal year in which the taxes became delinquent.

This rule is intended to implement Iowa Code section 425.17(8).

701—73.24(425) Income: spouse. The income of a spouse does not have to be reported on the claimant's return unless the spouse lived with the claimant at the property upon which the property tax credit or rent reimbursement is claimed. If the spouse lived with the claimant for only a portion of the base year, only that portion of the spouse's income which was received while living with the claimant must be reported as income on the claimant's return. If the spouse is eligible to claim a credit or reimbursement, the spouse does not have to include any income that was reported on the other claimant's (spouse's) return.

This rule is intended to implement Iowa Code subsection 425.17(6).
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—73.25(425) Common law marriage. A common law marriage is a social relationship between a man and a woman that meets all the necessary requisites of a marriage except that it was not solemnized, performed or witnessed by an official authorized by law to perform marriages. The necessary elements of a common law marriage are: (a) a present intent of both parties freely given to become married, (b) a public declaration by the parties or a holding out to the public that they are husband and wife, (c) continuous cohabitation together as husband and wife (this means consummation of the marriage), and (d) both parties must be capable of entering into the marriage relationship. No special time limit is necessary to establish a common law marriage.

This rule is intended to implement Iowa Code section 425.17.

701—73.26 Rescinded, effective October 2, 1985.

701—73.27(425) Special assessment credit.

73.27(1) Property taxes due. Any person whose special assessment is paid by the department of revenue pursuant to Iowa Code subsection 425.23(3) cannot include the special assessment as property taxes due under Iowa Code subsection 425.17(10) for purposes of determining a property tax credit.

73.27(2) Special assessments eligible for credit. As used in Iowa Code section 425.23(3), the term "special assessment" means special assessments made pursuant to Iowa Code sections 384.37 to 384.79.

73.27(3) Special assessment credit qualifications. No special assessment credit claim shall be allowed pursuant to Iowa Code section 425.23(3) unless at the time the application for credit is filed the property upon which the levy is made includes a homestead dwelling as defined in Iowa Code section 425.17(4) and the claimant's household income does not exceed the indexed amount determined pursuant to Iowa Code section 425.23(4).

73.27(4) Special assessment installment due in current fiscal year. The amount of a special assessment credit claim to be reimbursed by the Iowa department of revenue pursuant to Iowa Code section 425.23 is limited to the amount of the installment payable during the current fiscal year for persons described in Iowa Code section 425.17, subsection 2, paragraph "a," or one-half of that amount for persons described in Iowa Code section 425.17, subsection 2, paragraph "b."

73.27(5) Audit by department of revenue. The director of revenue may audit the books and records of the county treasurer to determine if the amounts certified by the county treasurer to the director of revenue pursuant to Iowa Code section 425.23(3) are true and correct. The director of revenue may also initiate investigations or assist the county treasurer's investigations into eligibility of a claimant for the special assessment credit in accordance with Iowa Code section 425.27. Upon investigation, the director of revenue may order the county treasurer to reimburse the state of Iowa any amounts that were erroneously paid to the county treasurer or issue a reimbursement directly to the claimant if it is

determined the claimant did not receive the benefits to which entitled pursuant to Iowa Code section 425.23(3).

This rule is intended to implement Iowa Code section 425.23(3) and is effective for special assessment credit claims filed on or after January 1, 1999.

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—73.28(425) Credit applied. The county treasurer shall apply the property tax credit equally to the claimant's first and second half tax liabilities.

This rule is intended to implement Iowa Code sections 425.16 to 425.40.

701—73.29(425) Deceased claimant. A claim for property tax credit or rent reimbursement may be filed on behalf of a deceased person by the person's spouse, attorney, guardian or the executor or administrator of the person's estate.

This rule is intended to implement Iowa Code section 425.17(2) as amended by 1999 Iowa Acts, chapter 152, and section 425.18.

701—73.30(425) Audit of claim.

73.30(1) Authority. The director of revenue may audit the records of the county treasurer to determine the accuracy of claims filed for property tax credits. The director may also investigate the eligibility of a claimant for a property tax credit or rent reimbursement.

73.30(2) Recomputed rent reimbursement claim. If it is determined a computed rent reimbursement is in error, the director shall collect any overpayment from the claimant or reimburse the claimant for any underpayment. If a claimant fails to reimburse the department for an overpayment, the amount of overpayment shall be deducted from any future rent reimbursement to which the claimant is entitled.

73.30(3) Recomputed property tax credit claim. If it is determined a computed property tax credit has been overpaid, the director shall notify the claimant and county treasurer of the overpayment. The county treasurer shall collect the overpayment from the claimant as if it were an unpaid property tax and reimburse the director for the amount of overpayment. However, if the property upon which the credit was allowed is no longer owned by the claimant, the director shall collect the amount of overpayment directly from the claimant. If it is determined a computed property tax credit has been underpaid, the director shall reimburse the claimant directly for the amount of underpayment.

This rule is intended to implement Iowa Code section 425.27.

701—73.31(425) Extension of time for filing a claim. The granting of an extension of time for filing a claim for reimbursement or credit does not extend the time within which or the dates on or by which eligibility requirements must be satisfied.

This rule is intended to implement Iowa Code section 425.20.

701—73.32(425) Annual adjustment factor. Beginning with claims filed in 2000, the income levels used for determining the allowable percent of property tax credit or rent reimbursement, special assessment credit, or the amount of the mobile home reduced tax rate shall be adjusted each year to reflect the inflation factor as computed pursuant to Iowa Code section 422.4.

This rule is intended to implement Iowa Code sections 425.23 and 435.22(2).

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—73.33(425) Proration of claims. If the director determines that the amount of funding provided pursuant to Iowa Code section 425.39 will be insufficient to pay all property tax credit and rent reimbursement claims filed, the director shall estimate the percentage at which the claims will be paid and shall prorate the payment of each property tax credit and rent reimbursement claim by the same estimated percentage. The county treasurer shall, pursuant to Iowa Code section 25B.7, be required to extend to the claimant only that portion of the credit estimated by the department to be funded by the state appropriation.

This rule is intended to implement Iowa Code sections 25B.7 and 425.39.

701—73.34(425) Unreasonable hardship. In order to avoid any unreasonable hardship to a claimant, the director may review the facts and circumstances of the claim as set forth by the claimant. The director may investigate all factors related to the specific case as deemed appropriate by the director. If the director is satisfied that the claim qualifies as an undue hardship for the claimant, the claim will be approved by the director.

This rule is intended to implement Iowa Code section 425.37.

CHAPTER 74
MOBILE, MODULAR, AND MANUFACTURED HOME TAX
[Prior to 12/17/86, Revenue Department[730]]

701—74.1(435) Definitions.

1. “*Mobile home*” means any vehicle without motive power used or so manufactured or constructed as to permit its being used as a conveyance upon the public streets and highways and so designed, constructed, or reconstructed as will permit the vehicle to be used as a place for human habitation by one or more persons; but shall also include any such vehicle with motive power not registered as a motor vehicle in Iowa. A “mobile home” is not built to a mandatory building code, contains no state or federal seals, and was built before June 15, 1976.

2. “*Manufactured home*” is a factory-built structure built under authority of 42 U.S.C. § 5403, is required by federal law to display a seal from the United States Department of Housing and Urban Development, and was constructed on or after June 15, 1976.

3. “*Modular home*” means a factory-built structure which is manufactured to be used as a place of human habitation, is constructed to comply with the state of Iowa building code for modular factory-built structures, and must display the seal issued by the state building code commissioner.

4. “*Mobile home park*” means any land upon which three or more mobile or manufactured homes, or a combination of such homes, are placed on developed spaces and operated as a for-profit enterprise with water, sewer or septic, and electrical services available. It does not include homes where the owner of the land is providing temporary housing for the owner’s employees or students.

5. “*Manufactured home community*” means any site, lot, field, or tract of land under common ownership upon which ten or more occupied manufactured homes are harbored, either free of charge or for revenue purposes, and shall include any building, structure, or enclosure used or intended for use as part of the equipment of the community. The term shall not be construed to include homes, buildings, or other structures temporarily maintained by any individual, educational institution, or company on their own premises and used exclusively to house their own labor or students. A “manufactured home community” means the same as a “land-leased community” defined in Iowa Code sections 335.30A and 414.28A.

Wherever used in this chapter, “home” means a mobile home, a manufactured home, or a modular home unless specific reference is made to a particular type of home.

This rule is intended to implement Iowa Code section 435.1 as amended by 2001 Iowa Acts, House File 656.

701—74.2(435) Movement of home to another county. If one or both installments of the tax for the current fiscal year have been paid and subsequently the home is moved to another county, the tax paid shall remain in the county in which originally collected. No reimbursement shall be made either to the owner of the home or to the county to which the home is moved. If only the first installment has been paid and the home is moved prior to January 1, the second installment shall be made to the county to which the home is moved.

This rule is intended to implement Iowa Code section 435.24.

701—74.3(435) Sale of home. If the owner of a home has paid one or both installments of the tax for the current fiscal year and subsequently sells the home, no reimbursement shall be made to the seller for any portion of the tax paid. If only the first installment has been paid and the home is sold prior to January 1, the purchaser is responsible for the second installment.

This rule is intended to implement Iowa Code section 435.24.

701—74.4(435) Reduced tax rate.

74.4(1) Claimant. The reduced rate of tax for Iowa residents who were at least 23 years of age on December 31 of the base year shall be computed as provided in Iowa Code subsection 435.22(2). The claimant’s name must appear on the title to the home.

74.4(2) *Income.* In determining eligibility for the reduced tax rate, the claimant's income and that of the claimant's spouse shall be the income received during the base year, or the income tax accounting period ending during the base year, and must be less than the indexed amount determined pursuant to Iowa Code section 435.22(2). The base year is the calendar year immediately preceding the year in which the claim is filed.

74.4(3) *Claims.* Claims for the reduced tax rate must be filed with the county treasurer on or before June 1 immediately preceding the fiscal year during which the taxes are due. The county treasurer may extend the time for filing a claim for reduced tax rate through September 30 of the same calendar year if good cause exists. The director of revenue may also extend the time for filing a claim through December 31 of the same calendar year if good cause exists. Late reduced tax rate claims will be reimbursed by the director directly to the claimant upon proof of tax payment. The claimant must own and occupy the home at the time the claim for credit is filed or, if the claimant is deceased, at the time of the claimant's death or, if a late claim, on June 1 of the claim year. The claim forms shall be provided by the department of revenue.

74.4(4) *Reports to department of revenue.* On or before November 15 of each year, the county treasurer of each county shall report to the department of revenue the amount of taxes not to be collected for the current fiscal year as a result of the reduced tax rate provided in Iowa Code subsection 435.22(2). All reports shall be made on forms provided by the department of revenue.

74.4(5) *Payment of claims.* On December 15 of each year the department of revenue shall remit to each county treasurer an amount equal to the taxes not collected during the current fiscal year as a result of the granting of the reduced tax rate.

This rule is intended to implement Iowa Code section 435.22 as amended by 1999 Iowa Acts, chapter 152, and is effective for reduced tax rate claims filed on or after January 1, 2000.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—74.5(435) Taxation—real estate. Homes located outside of mobile home parks or manufactured home communities must be placed on a permanent foundation and are subject to assessment and taxation as real estate. The homes are eligible for all property tax credits and exemptions applicable to other real estate. The assessor shall collect the title to a home only when a security interest is noted on the title and the secured party is given a mortgage on the land on which the home is located. Homes located outside mobile home parks or manufactured home communities as of July 1, 1994, are not subject to the permanent foundation requirements unless the home is relocated.

This rule is intended to implement Iowa Code section 435.26.

701—74.6(435) Taxation—square footage. Homes located within mobile home parks or manufactured home communities are subject to a square footage tax at the rates specified in Iowa Code section 435.22. It shall be the responsibility of the owner to provide the county treasurer with appropriate documentation to verify eligibility for the reduced tax due to the home's age. Modular homes placed in mobile home parks or manufactured home communities that were not in existence on or before January 1, 1998, shall be subject to assessment and taxation as real estate.

The mobile home park or manufactured home community owner or manager shall make an annual report with the county treasurer by June 1 listing the owner and address of each home sited in the park or community. An additional report shall be filed by December 1 if any homes are moved in or out of the park or community or there are any changes in home ownership.

This rule is intended to implement Iowa Code sections 435.22 and 435.24(3).

701—74.7(435) Audit by department of revenue. The director of revenue may audit the books and records of the county treasurer to determine if the amounts certified by the county treasurer to the director of revenue as tax not collected due to the reduced tax rate are true and correct. Upon investigation, the director of revenue may order the county treasurer to reimburse the state of Iowa any amounts that were erroneously paid to the county treasurer. The director of revenue may also require that additional

payments be made to the county treasurer by the owner of a home if investigation reveals that the county treasurer did not receive the full amounts due in accordance with Iowa Code section 435.22.

The director of revenue may initiate investigations or assist the county treasurer's investigations into eligibility of a claimant for the reduced tax rate in accordance with Iowa Code section 435.22. Upon investigation, the director of revenue may order a claimant to reimburse the state of Iowa any amount erroneously claimed as a reduced tax rate which was reimbursed by the department of revenue to the county treasurer in accordance with Iowa Code section 435.22. The director of revenue may also issue a reimbursement directly to the claimant if it is determined the claimant did not receive the full benefits to which entitled pursuant to Iowa Code section 435.22.

This rule is intended to implement Iowa Code section 435.22.

701—74.8(435) Collection of tax.

74.8(1) *Partial payment of tax.* Partial payments of taxes may be allowed at the discretion of the county treasurer. If the treasurer elects to permit partial payments, the authorization shall apply to all taxpayers within the county. If the partial payments made are insufficient to fully satisfy an installment due by the delinquency date, the unpaid portion of the installment shall draw interest as provided in Iowa Code section 445.39. Current year taxes may be paid at any time regardless of any prior year delinquent taxes. The minimum payment for delinquent taxes must be equal to or exceed the interest, fees, and costs of the installment being paid.

74.8(2) *When delinquent.* The date on which unpaid taxes become delinquent is to be determined as follows:

a. If the home is put to use between January 1 and March 31, the prorated tax for the period from the date the home is put to use through June 30 becomes delinquent on April 1.

b. If the home is put to use between April 1 and June 30, the prorated tax for the period from the date the home is put to use through June 30 becomes delinquent on October 1.

c. If the home is put to use between July 1 and September 30, the prorated tax for the period from the date the home is put to use through December 31 becomes delinquent on October 1.

d. If the home is put to use between October 1 and December 31, the prorated tax for the period from the date the home is put to use through December 31 becomes delinquent on April 1 of the following calendar year.

e. For purposes of this rule, a home is "put to use" upon its acquisition from a dealer or its being brought into Iowa for immediate use by a person who is not engaged in the business of manufacturing, sale, or transportation of homes.

74.8(3) *Collection of delinquent tax.* Delinquent taxes shall be collected by offering the home at tax sale in accordance with Iowa Code chapter 446.

This rule is intended to implement Iowa Code Supplement section 435.24 and Iowa Code sections 435.25 and 445.37.

CHAPTER 75
PROPERTY TAX ADMINISTRATION

701—75.1(441) Tax year. The assessment date is January 1 for taxes for the fiscal year which commences 6 months after the assessment date and which become delinquent during the fiscal year commencing 18 months after the assessment date. For example, taxes payable in fiscal year 1991-1992 are for fiscal year 1990-1991 and are based on the January 1, 1990, assessment.

This rule is intended to implement Iowa Code section 441.46.

701—75.2(445) Partial payment of tax. Partial payments of taxes may be allowed at the discretion of the county treasurer. If the treasurer elects to permit partial payments, the authorization shall apply to all taxpayers within the county. If the partial payments made are insufficient to fully satisfy an installment due by the delinquency date, the unpaid portion of the installment shall draw interest at the rate specified in Iowa Code section 445.39. Current year taxes may be paid at any time regardless of any outstanding prior year delinquent tax. The minimum payment for delinquent taxes must be equal to or exceed the interest, fees, and costs of the installment being paid.

This rule is intended to implement Iowa Code Supplement section 445.36A.

701—75.3(445) When delinquent. The first half installment of taxes shall become delinquent if not received by the county treasurer on or before the last business day preceding October 1, and the second half installment shall become delinquent if not received by the county treasurer on or before the last business day preceding April 1. If mailed, the payment envelope must bear a postmark date preceding October 1 or April 1 to avoid delinquency. If paid electronically, the payment must be initiated by midnight on the last day of the month preceding the delinquent date to avoid interest on the taxes. However, in those instances when the last day of September or March is a Saturday or Sunday, the taxes become delinquent on the second business day of October or April, whichever is applicable. Delinquent taxes shall draw interest at the rate specified in Iowa Code section 445.39.

This rule is intended to implement Iowa Code section 445.37.

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—75.4(446) Payment of subsequent year taxes by purchaser. Taxes for a subsequent year may not be paid by the purchaser of the property sold at tax sale until 14 days following the date from which an installment becomes delinquent.

This rule is intended to implement Iowa Code section 446.32 as amended by 1993 Iowa Acts, chapter 73.

701—75.5(428,433,434,437,437A,438,85GA,SF451) Central assessment confidentiality. The release of information contained in any reports filed under Iowa Code chapters 428, 433, 434, 437, 437A, and 438 and 2013 Iowa Acts, Senate File 451, sections 10 to 30, or obtained by the department in the administration of those chapters, is governed by the general provisions of Iowa Code chapter 22 since there are no specific provisions relating to confidential information contained in those chapters. Any request for information must be made pursuant to rule 701—6.2(17A). See rule 701—6.3(17A).

Any request for information pertaining to a taxpayer's business affairs, operations, source of income, profits, losses, or expenditures must be made in writing to the director. The taxpayer to whom the information relates will be notified of the request for information and will be allowed 20 days to substantiate any claim of confidentiality under Iowa Code chapter 22 or any other statute such as Iowa Code section 422.72. If substantiated, the request will be denied; otherwise, the information will be released to the requesting party. This rule will not prevent the exchange of information between state and federal agencies.

This rule is intended to implement Iowa Code chapters 428, 433, 434, 437, 437A, and 438 and 2013 Iowa Acts, Senate File 451, sections 10 to 30.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—75.6(446) Tax sale. The county treasurer shall hold the annual tax sale on the third Monday in June. If, for good cause, the treasurer is unable to hold the tax sale on that date, the treasurer may designate a different date in June for the sale.

This rule is intended to implement Iowa Code section 446.7 as amended by 1999 Iowa Acts, chapter 4, section 1.

701—75.7(445) Refund of tax. The board of supervisors shall order the county treasurer to refund taxes found to have been erroneously or illegally collected. A claim for refund must be presented to the board within two years of the date the tax was due or if appealed within two years of the final decision.

This rule is intended to implement Iowa Code section 445.60 as amended by 1999 Iowa Acts, chapter 174, section 6.

701—75.8(614) Delinquent property taxes. A county is immune from the statute of limitations when collecting delinquent property taxes levied on or after April 1, 1992 (*Fennelly v. A-1 Machine and Tool Co.*, No. 73/04-1232—10/6/06).

This rule is intended to implement Iowa Code section 614.1 as amended by 2007 Iowa Acts, Senate File 450.

CHAPTER 76
DETERMINATION OF VALUE OF RAILROAD COMPANIES
[Prior to 12/17/86, Revenue Department[730]]

701—76.1(434) Definitions of terms.

76.1(1) The term “*railroad*” shall mean and include all individuals or corporations engaged in the operation of a railway in this state and subject to valuation pursuant to Iowa Code chapter 434.

76.1(2) The term “*unit value*” or “*unit market value*” shall mean the market value arrived at by using the appraisal method of valuing an entire operating property, considered as a whole and capable of performing the function for which it was created, such as (by way of illustration and not limitation) transporting freight over rail.

76.1(3) The term “*operating property*” shall mean all property owned by or leased to a railroad company, not otherwise taxed separately or made nontaxable by law, which is necessary to and without which the railroad could not perform the activities for which the railroad is formed, such as (by way of illustration and not limitation) transporting freight over rail. With regard to property whose identity as “operating” or “nonoperating” property is not clearly ascertainable, the property shall be considered operating property if the railroad could not reasonably be expected to perform the referenced activities in the absence of such property.

76.1(4) The term “*nonoperating property*” shall mean all property owned by a railroad not defined by subrule 76.1(3) as “operating property.”

76.1(5) The term “*comparable sales*” shall mean actual sales transactions, between willing buyers and willing sellers, neither being under any compulsion to buy or sell, of property which is similar in purpose, function and design to the property to which the comparison is being made. Where the determination of a unit value is being made, the sale of a portion of a unit which is nominally similar in purpose and function to the unit being valued shall not be considered a comparable sale, absent proof by evidence other than the terms of the sale itself, that the sales price was based on some unit of measurement which is common both to the property sold and the property being valued and which is not affected by the fact that less than the entire unit is being sold, such as (by way of illustration and not limitation) (1) the price per mile of track and (2) the price per square foot of the property.

76.1(6) The term “*income approach to unit value*” shall mean the estimate of unit market value obtained by dividing an appropriate income stream by an appropriate and compatible discount rate.

76.1(7) The term “*stock and debt approach to unit value*” shall mean the estimate of unit market value determined by combining the estimate of market value of the stock, debt, current liabilities, other liabilities, including capital leases, and deferred credits associated with the operating property of a railroad company.

76.1(8) The term “*cost approach to unit value*” shall mean the estimate of value determined by combining the original cost less a depreciation allowance for the operating property of a railroad company.

76.1(9) The term “*respondent*” shall include the railroad company whose property is to be valued.

76.1(10) The term “*leased assets*” shall mean capital leases.

76.1(11) The term “*original cost*” shall mean the actual cost of the property to its present owner, not the first cost at the time it was originally constructed and placed in service.

This rule is intended to implement Iowa Code chapter 434.

701—76.2(434) Filing of annual reports.

76.2(1) Annual reports required to be filed by the reporting railroad company shall be on forms prescribed and supplied by the department. It shall be the responsibility of the railroad company to obtain the forms supplied by the department.

76.2(2) Additional schedules or attachments submitted by respondent shall be identified as to subject matter, shall be typed on paper of similar size to that used in the annual report, and all data contained in the schedules or attachments shall be adequately explained and documented as to source. When such additional schedules or attachments are submitted, they shall be considered part of the annual report.

76.2(3) The director may require the filing of additional information if deemed necessary. The request for additional information shall be answered completely and in accordance with instructions therein specified. Additional information required shall be considered part of the annual report.

This rule is intended to implement Iowa Code chapter 434.

701—76.3(434) Comparable sales. Sale prices of comparable property in normal transactions shall be taken into consideration in arriving at its market value. In the event comparable sales are not available, the market value of operating property shall be determined by utilizing the three recognized unit approaches to value (i.e., stock and debt approach, income capitalization approach and the cost approach).

This rule is intended to implement Iowa Code section 434.15.

701—76.4(434) Stock and debt approach to unit value.

76.4(1) The stock and debt approach to unit value estimates the market value of the operating property by combining the market values of the common stock, preferred stock, debt, current liabilities, other liabilities, leases, and deferred credits associated with the operating property of the railroad company, on the basis that the market value of these items may be used as a surrogate for the market value of the operating property itself.

76.4(2) The market value of the long-term debt associated with the operating property shall be calculated by first determining a ratio, based on book values, whose numerator shall be the operating property and whose denominator shall be the total property of the railroad company. This ratio shall then be multiplied times the gross market value of the long-term debt and the result obtained shall be the market value of the long-term debt associated with the operating property.

The market value of publicly traded debt shall be determined by utilizing an average of the monthly high and low value of the debt for the 12 months preceding the valuation date. The values to be utilized shall be obtained by reference to any acceptable reporter of the market on which the securities are traded. If all or some of the securities are not publicly traded, the value of the securities shall be determined by appropriate comparable securities. The comparable securities shall be publicly traded and shall have a similar maturity date and coupon rate, as well as risk indicators similar to the untraded security. In each instance, the railroad company shall provide the department a statement of the market value of all securities and an explanation of how that market value was derived, including the identity of any comparable securities utilized. In the event that any utility is unable to utilize the foregoing rule to value its securities, it may provide the department with its own determination of the fair market value of its untraded securities together with a complete explanation of why the foregoing rule was not used and a detailed explanation of the method used.

76.4(3) The market value of the preferred stock associated with the operating property shall be calculated by first determining a ratio, based on book values, whose numerator shall be the operating property and whose denominator shall be the total property of the railroad company. This ratio shall then be multiplied times the gross market value of the preferred stock and the result obtained shall be the market value of the preferred stock associated with the operating property.

The market value of publicly traded shares of preferred stock shall be determined by utilizing an average of the monthly high and low value of the preferred stock for the 12 months preceding the valuation date. The values to be utilized shall be obtained by reference to any acceptable reporter of the market on which the preferred stock is traded. If all or some series of the preferred stock are not publicly traded, the value of such preferred stock shall be determined by appropriate comparable securities. The comparable securities shall be publicly traded and shall have the same or a similar dividend rate, as well as risk indicators similar to the untraded preferred stock. In each instance, the railroad company shall provide to the department a statement of the market value of its preferred stock and an explanation of how that market value was derived, including the identity of any comparable securities utilized. In the event that any railroad company is unable to utilize the foregoing rule to value its securities, it may provide the department with its own determination of the fair market value of its untraded securities together with a

complete explanation of why the foregoing rule was not used and a detailed explanation of the method used.

76.4(4) The market value of the common equity of a railroad company associated with the company's operating property shall be determined by capitalizing the income available to the common equity holders from the operating property, by an appropriate and compatible common equity return rate, all of which shall be determined as follows:

a. The calculation of the income to be capitalized shall begin with the railroad company's net income after taxes but before interest charges and preferred dividends for the 12-month period preceding the valuation date. The net income after taxes, but before interest charges and preferred dividends, shall be determined from the railroad company's regulatory report, or if no regulatory report is filed, from the audited financial statements of the railroad company. In the event the railroad company has no income or has a negative income, an alternative method shall be used to determine the market value of the common equity.

b. The income determined in 76.4(4) "a" shall be adjusted by deducting any net income included therein received from nonoperating property and, conversely, the referenced income shall be increased to account for any net loss created by any nonoperating property.

c. The income determined in 76.4(4) "a" shall be further reduced by that portion of the preferred dividends serviced by the income generated by the operating property, which shall be calculated by multiplying the total preferred dividend requirement by the ratio determined in 76.4(3).

d. The income determined in 76.4(4) "a" shall be further reduced by that portion of the debt service provided by the income generated by the operating property, which shall be calculated by multiplying the total debt service by the ratio determined in 76.4(2).

e. If there are any other interest payments required, a determination shall be made as to whether the underlying obligation was used to purchase operating or nonoperating assets. If no direct determination can be made, the interest payment shall be allocated in the same fashion as the debt service and preferred dividends. If the underlying obligation can be shown to be associated particularly, or in some specific proportion, to operating or nonoperating property, the interest payment shall be allocated either entirely or in such proportion to operating or nonoperating property. It shall be the obligation of the railroad company, in its reports to the department, to identify and detail any interest payments which are particularly associated with operating or nonoperating property, and if the railroad company fails to do so, the department may determine that all such payments may be allocated between operating and nonoperating property in the same ratio as is the debt service and preferred stock dividends (see subrules 76.4(2) and 76.4(3)).

f. Any extraordinary item affecting the income determined herein shall be eliminated in the calculation of the income shown under this rule.

g. The equity rate of return for the railroad company shall be determined by the use of the capital asset pricing model although where appropriate discounted cashflow models may be utilized as an alternative. Only in circumstances where these models are not able to be utilized will reliance be placed on a risk premium model or upon an earnings-price ratio, or other similar model, for determining the expected market rate of return on equity.

h. The income attributable to operating property available to the common equity holder as determined in 76.4(4) "a" to "f" shall then be divided by the equity rate as determined in 76.4(4) "g," and the result shall be the market value of the common equity associated with the operating property.

76.4(5) In the event the railroad company has entered into capital leases of operating property, the market value of the property leased shall be determined by calculating the net present value of the leases or net book value of the leases. The net present value shall be accomplished by discounting the future lease payments for each lease. The following is offered as an illustration of the calculation of such market value:

Length of Lease	Annual Lease Payments
1. Lease (a) 5 years	\$1,500,000
2. Lease (b) 7 years	\$ 800,000
3. Lease (c) 3 years	\$ 120,000
Net present value of leases (assuming 8 percent rate)	
Lease (a) = $1,500,000 \div (1.08)^1 + 1,500,000 \div (1.08)^2 \dots 1,500,000 \div (1.08)^5$	
Lease (b) = $800,000 \div (1.08)^1 + 800,000 \div (1.08)^2 \dots 800,000 \div (1.08)^7$	
Lease (c) = $120,000 \div (1.08)^1 + 120,000 \div (1.08)^2 \dots 120,000 \div (1.08)^3$	
Net Present Value of Lease (a)	= \$ 5,989,065
Net Present Value of Lease (b)	= \$ 4,165,096
Net Present Value of Lease (c)	= <u>\$ 309,251</u>
Total Lease Values	\$10,463,412

The discount rate shall be equal to the railroad company's overall market debt rate of return.

76.4(6) In the event the railroad company has other sources of capital including, but not limited to, other liabilities, capital leases, and accumulated investment tax credits which cannot be identified as having been utilized to purchase specific assets, the market value of the sources of capital shall be allocated between operating and nonoperating assets in the same manner as long-term debt or preferred stock. Current liabilities and accumulated deferred income taxes are not to be included in this calculation. The book value of accumulated deferred income taxes should be deducted from the market value of the stock and debt approach before making this calculation. Likewise, current liabilities should be deducted from current assets and the resulting figure, if positive, should be added to the market value of the stock and debt approach and, if negative, should be deducted. The resulting figure, "net working capital," shall be allocated in the same manner as long-term debt or preferred stock (see subrules 76.4(2) and 76.4(3)). If any source of capital was created specifically for the purchase of property which can be identified as operating property or nonoperating property, the railroad company must identify the sources of capital in its annual report to the department, together with the appropriate evidence. If the railroad company fails to provide the information, the department may determine that the sources of capital may be allocated in the same manner as long-term debt or preferred stock (see subrules 76.4(2) and 76.4(3)). The market value of any source of capital, in the absence of evidence to the contrary submitted by the railroad with its annual report, shall be the book value.

76.4(7) The value determined by summing the portions of the enumerated sources of capital associated with the operating property of the railroad company provided in subrules 76.4(2) to 76.4(6) shall be the unit value of the operating properties determined by the stock and debt approach to unit value.

This rule is intended to implement Iowa Code section 434.15.

701—76.5(434) Income capitalization approach to unit value.

76.5(1) The income capitalization approach to unit value estimates the market value of the operating property by dividing the income stream generated by the operating assets by a market-derived capitalization rate based on the costs of the various sources of capital utilized or available for use to purchase the assets generating the income stream. The net railway operating income to be capitalized shall be a weighted average net railway operating income. The weighted average net railway operating income shall consist of an average of the three 12-month periods immediately preceding the valuation date. Each of the three preceding 12-month periods shall be weighted by multiplying the first preceding period by 60 percent, the second preceding period by 30 percent, and the third preceding period by 10 percent. There shall be no adjustment for the company's current-year deferred income taxes to this income stream.

The director may also utilize a “free cash flow model” in calculating the railway operating income to be capitalized. The “free cash flow model” shall consist of an average of the five 12-month periods immediately preceding the valuation date. Each of the five preceding 12-month periods shall be given equal weighting in the calculation of the five-year average railway operating income to be capitalized. Each year the net railway operating income shall be adjusted by adding the current-year deferred income taxes associated with maintenance expenditures, adding the current-year depreciation expense, and subtracting the current-year capital expenditures necessary to maintain the plant.

The director may give consideration to both calculations of operating income as described in this subrule to determine the railway operating income to be capitalized. The director may also consider, in both calculations, adjustments for extraordinary, unusual, and infrequent items. These adjustments would not be expected to occur annually and are different from the typical railroad business operations. The purpose and intent of the income indicator of value is to match income with sources of capital and therefore every source of capital utilized or available to be utilized to purchase assets should be reflected in the capitalization rate determination as well as all operating income. The director shall not include a separate adjustment to either income stream for noncapitalized operating leases. In the event the railroad company has no income or has a negative income, the indicator of value set forth in this subrule shall not be utilized.

76.5(2) If any operating property is clearly not income producing and, therefore, is not reflected in the income stream, the value of that asset shall be determined separately and added to the value of the other operating property as determined using the income indicator of value. The capitalization rate shall be adjusted, if necessary, for the market rate of return for the sources of capital utilized to purchase such non-income-producing properties where the sources can be clearly identified; otherwise the cost of the sources of capital shall be presumed to be equal to the overall market-weighted costs of the other sources of capital.

76.5(3) If the railroad company is one which can earn a return on assets purchased with sources of capital, excluding the company’s deferred income taxes, the income will reflect the earnings on those assets, and as a consequence, a separate adjustment to the capitalization rate is required. The capitalization rate shall be determined by utilizing, where appropriate, market rates of return weighted according to a market determined capital structure. All sources of capital shall be considered in the capital structure as well as market costs associated with each source of capital; otherwise the cost of the sources of capital shall be presumed to be equal to the overall market-weighted costs of the identified sources of capital. The following is an example of the application of this rule.

	(1)	(2)	(3)	(4)
	Market Value	Market Rate of Return	% to Total	Component (Col. 2 × Col. 3)
Common Stock	60,000	15%	66.67	10.00
Preferred Stock	5,000	13%	5.55	.72
Debt	25,000	12%	27.78	3.33
	<u>90,000</u>		<u>100.00</u>	<u>14.05</u>

This rule is intended to implement Iowa Code section 434.15.

701—76.6(434) Cost approach to unit value. The cost approach to unit value shall be determined by combining the cost of the operating properties of the railroad and deducting therefrom an allowance for depreciation calculated on a straight-line basis. Other forms of depreciation may be deducted if found to exist.

This rule is intended to implement Iowa Code section 434.15.

701—76.7(434) Correlation. In making a final determination of value, the director shall give consideration to each of the methodologies described in these rules, the use of which will result in the determination of the fair and reasonable market value of the railroad company's entire operating property. The stock and debt indicator of value and the income indicator of value shall each be weighted at 50 percent. In this particular circumstance, when the director utilizes the stock and debt indicator and the income indicator in the correlation process, the cost indicator will be given no weighting. If circumstances dictate that a particular method is inappropriate for a specific company, that method shall be given little or no weight in the final correlation of value.

This rule is intended to implement Iowa Code section 434.15.

701—76.8(434) Allocation of unit value to state.

76.8(1) Allocation by director. The director shall allocate that portion of the total unit value of the railroad company's operating property to the state of Iowa based on factors which are representative of the ratio that the railroad company's property and activity in the state of Iowa bear to the railroad company's total property and activity. These factors are:

- a. Gross operating revenue weighted 40 percent.
- b. All track mileage weighted 35 percent.
- c. Revenue traffic units weighted 15 percent.
- d. Car and locomotive mileage weighted 10 percent.

76.8(2) Alternative methods. In the event that the allocation prescribed by subrule 76.8(1) does not fairly and reasonably allocate unit value of the railroad company's operating property to the state of Iowa, the director shall consider such other factors as the director deems appropriate by the exercise of sound appraisal judgment.

This rule is intended to implement Iowa Code section 434.15.

701—76.9(434) Exclusions.

76.9(1) From the estimate of value pursuant to rule 76.8(434), there shall be a deduction for pollution control property provided in Iowa Code section 427.1(32).

76.9(2) From the estimate of value pursuant to rule 76.8(434), there shall be a deduction for interstate bridges and other locally assessed property. Locally assessed property shall mean all property subject to an assessing authority pursuant to Iowa Code section 441.54. The respondent shall supply a schedule providing the actual value as determined by the local assessor on or nearest to the current assessment date.

76.9(3) From the estimate of value determined under rule 76.8(434), the value of Iowa personal property shall be deducted pursuant to Burlington Northern Railroad Company vs. Gerald D. Bair, Director of the Department of Revenue of Iowa—United States District Court Order-Civil No. 83-100-A. The computation for the percentage of personal property shall be equal to the ratio of the net book value of personal property divided by the net book value of the total property.

76.9(4) From the estimate of value determined under rule 76.7(434), the intangible value shall be deducted pursuant to Burlington Northern Railroad Company vs. Gerald D. Bair, Director of the Department of Revenue of Iowa—United States District Court Order No: 4-90CV-60406. The deduction shall be equal to 6.6 percent of the correlated system value for the stock and debt indicator and the income indicator.

This rule is intended to implement Iowa Code sections 427.1(32), 434.15 and 434.20.

CHAPTER 77
DETERMINATION OF VALUE OF UTILITY COMPANIES

[Prior to 12/17/86, Revenue Department[730]]

701—77.1(428,433,437,438) Definition of terms.

77.1(1) The term “*utility company*” shall mean and include all persons engaged in the operating of gasworks, waterworks, telephones, including telecommunication companies and cities that own or operate a municipal utility providing local exchange services pursuant to Iowa Code chapter 476, pipelines, electric transmission lines, and electric light or power plants, as set forth in Iowa Code chapters 428, 433, 437, and 438. Any utility company subject to taxation under Iowa Code chapter 437A shall not be subject to valuation under this chapter. Beginning with property tax assessment years and replacement tax years beginning on or after January 1, 2013, any utility company subject to taxation under 2013 Iowa Acts, Senate File 451, sections 10 to 30, shall not be subject to valuation under this chapter.

77.1(2) The term “*unit value*” or “*unit market value*” shall mean the market value arrived at by using the appraisal method of valuing an entire operating property, considered as a whole and capable of performing the function for which it was created, such as (by way of illustration and not limitation) (1) generating, transmitting and distributing electricity; or (2) transporting or distributing natural gas.

77.1(3) The term “*operating property*” shall mean all property owned by or leased to a utility company, not otherwise taxed separately, made nontaxable by law, or property leased to companies valued and assessed pursuant to Iowa Code chapter 428, which is necessary to and without which the utility could not perform the activities for which the utility is formed, such as (by way of illustration and not limitation) (1) generating, transmitting and distributing electricity; or (2) transporting or distributing natural gas. With regard to property whose identity as “operating” or “nonoperating” property is not clearly ascertainable, the property shall be considered operating property if the utility could not reasonably be expected to perform the referenced activities in the absence of such property.

77.1(4) The term “*nonoperating property*” shall mean all property owned by a utility not defined by subrule 77.1(3) as “operating property.”

77.1(5) The term “*comparable sales*” shall mean actual sales transactions, between willing buyers and willing sellers, neither being under any compulsion to buy or sell, of property which is similar in purpose, function and design to the property to which the comparison is being made. Where the determination of value is being made, the sale of a portion of a unit which is nominally similar in purpose and function to the unit being valued shall not be considered a comparable sale, absent proof by evidence other than the terms of the sale itself, that the sales price was based on some unit of measurement which is common both to the property sold and the property being valued and which is not affected by the fact that less than the entire unit is being sold, such as (by way of illustration and not limitation) the price per square foot of the property.

77.1(6) The term “*income approach to unit value*” shall mean the estimate of unit market value obtained by dividing an appropriate income stream by an appropriate discount rate.

77.1(7) The term “*stock and debt approach to unit value*” shall mean the estimate of unit market value determined by combining the market value of the stock, debt, current liabilities, other liabilities, including leases, except those leases of companies valued and assessed pursuant to Iowa Code chapter 428, and deferred credits associated with the operating property of a utility company.

77.1(8) The term “*cost approach to unit value*” shall mean the estimate of value determined by combining the original cost less a depreciation allowance for the operating property of a utility company.

77.1(9) The term “*respondent*” shall include the utility company whose property is to be valued.

77.1(10) The term “*leased assets*” shall mean both operational and capital leases.

77.1(11) The term “*original cost*” shall mean the actual cost of the property to its present owner, not the first cost at the time it was originally constructed and placed in service.

77.1(12) “*Long distance telephone company*” means an entity that provides telephone service and facilities between local exchanges and has been classified as such by the utilities board of the department of commerce, but does not include a cellular service provider or a local exchange utility holding a

certificate issued under Iowa Code section 476.29(12). The rules contained in 701—Chapter 71, rather than this chapter, apply to the assessment of long distance telephone company property first assessed for taxation on or after January 1, 1996.

77.1(13) The term “*replacement cost new less depreciation*” or “*RCNLD*” shall mean the cost to the present owner of acquiring or constructing at current prices a property that is the functional equivalent of an existing property less an allowance for depreciation.

This rule is intended to implement Iowa Code chapters 428, 437, and 438 and sections 433.12 and 476.1D(10).

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—77.2(428,433,437,438) Filing of annual reports.

77.2(1) Annual reports required to be filed by the reporting utility company shall be on forms prescribed and supplied by the department. It shall be the responsibility of the utility company to obtain the forms supplied by the department.

77.2(2) Additional schedules or attachments submitted by respondent shall be identified as to subject matter, shall be typed on paper of similar size to that used in the annual report, and all data contained in the schedules or attachments shall be adequately explained and documented as to source. When such additional schedules or attachments are submitted, they shall be considered part of the annual report.

77.2(3) The director may require the filing of additional information if deemed necessary. The request for additional information shall be answered completely and in accordance with instructions therein specified. Additional information required shall be considered part of the annual report.

This rule is intended to implement Iowa Code sections 428.23, 433.1, 433.2, 437.2, 437.4, 437.14, 438.3, 438.4, 438.5 and 438.6.

701—77.3(428,433,437,438) Comparable sales. Sale prices of comparable property in normal transactions shall be taken into consideration in arriving at its market value. In the event comparable sales are not available, the market value of operating property shall be determined by utilizing the three recognized unit approaches to value (i.e., stock and debt approach, income capitalization approach and the cost approach).

This rule is intended to implement Iowa Code sections 428.28, 433.1, 433.2, 437.2, 437.4, 437.14, 438.3, 438.4, 438.5 and 438.6.

701—77.4(428,433,437,438) Stock and debt approach to unit value.

77.4(1) The stock and debt approach to unit value estimates the market value of the operating property by combining the market values of the common stock, preferred stock, debt, current liabilities, other liabilities, leases, and deferred credits associated with the operating property of the utility company, on the basis that the market value of these items may be used as a surrogate for the market value of the operating property itself.

77.4(2) The market value of the long-term debt associated with the operating property shall be calculated by first determining a ratio, based on book values, whose numerator shall be the operating property and whose denominator shall be the total property of the utility company. This ratio shall then be multiplied times the gross market value of the long-term debt and the result obtained shall be the market value of the long-term debt associated with the operating property. The market value of publicly traded debt shall be determined by utilizing an average of the monthly high and low value of the debt for the 12 months preceding the valuation date. The values to be utilized shall be obtained by reference to any acceptable reporter of the market on which the securities are traded. If all or some of the securities are not publicly traded, the value of the securities shall be determined by appropriate comparable securities. The comparable securities shall be publicly traded and shall have a similar maturity date and coupon rate, as well as risk indicators similar to the untraded security. In each instance, the utility company shall provide the department a statement of the market value of all securities and an explanation of how that market value was derived, including the identity of any comparable securities utilized. In the event that any utility is unable to utilize the foregoing rule to value its securities, it may

provide the department with its own determination of the fair market value of its untraded securities together with a complete explanation of why the foregoing rule was not used and a detailed explanation of the method used.

77.4(3) The market value of the preferred stock associated with the operating property shall be calculated by first determining a ratio, based on book values, whose numerator shall be the operating property and whose denominator shall be the total property of the utility company. This ratio shall then be multiplied times the gross market value of the preferred stock and the result obtained shall be the market value of the preferred stock associated with the operating property.

The market value of publicly traded shares of preferred stock shall be determined by utilizing an average of the monthly high and low value of the preferred stock for the 12 months preceding the valuation date. The values to be utilized shall be obtained by reference to any acceptable reporter of the market on which the preferred stock is traded. If all or some series of the preferred stock are not publicly traded, the value of such preferred stock shall be determined by appropriate comparable securities. The comparable securities shall be publicly traded and shall have the same or a similar dividend rate, as well as risk indicators similar to the untraded preferred stock. In each instance, the utility company shall provide the department a statement of the market value of its preferred stock and an explanation of how that market value was derived, including the identity of any comparable securities utilized. In the event that any utility is unable to utilize the foregoing rule to value its securities, it may provide the department with its own determination of the fair market value of its untraded securities together with a complete explanation of why the foregoing rule was not used and a detailed explanation of the method used.

77.4(4) The market value of the common equity of a utility company associated with the company's operating property shall be determined by capitalizing the income available to the common equity holders from the operating property, by an appropriate common equity return rate, all of which shall be determined as follows:

a. The calculation of the income to be capitalized shall begin with the utility company's net income after taxes but before interest charges and preferred dividends for the 12-month period preceding the valuation date. The net income after taxes, but before interest charges and preferred dividends, shall be determined from the utility company's regulatory report, or if no regulatory report is filed, from the audited financial statements of the utility company. In the event that the respondent has no income or has negative income, an alternative method may be utilized to estimate the market value of the common equity.

b. For rate base regulated companies which do not earn a return on construction-work-in-progress, the income determined in subrule 77.4(4) shall be increased by the amount of income associated with the construction-work-in-progress which will be placed into service within one year of the assessment date. The income associated with the construction-work-in-progress shall be determined by multiplying the cost of said construction by the latest overall cost of capital as determined by the regulatory agency.

c. The income determined in 77.4(4) "a" shall be further reduced by that portion of the preferred dividends serviced by the income generated by the operating property, which shall be calculated by multiplying the total preferred dividend requirement by the ratio determined in 77.4(3).

d. The income determined in 77.4(4) "a" shall be further reduced by that portion of the debt service provided by the income generated by the operating property, which shall be calculated by multiplying the total debt service by the ratio determined in 77.4(2).

e. If there are any other interest payments required, a determination shall be made as to whether the underlying obligation was used to purchase operating or nonoperating assets. If no direct determination can be made, the interest payment shall be allocated in the same fashion as the debt service and preferred dividends. If the underlying obligation can be shown to be associated particularly, or in some specific proportion, to operating or nonoperating property, the interest payment shall be allocated either entirely or in such proportion to operating or nonoperating property. It shall be the obligation of the utility company, in its reports to the department, to identify and detail any interest payments which are particularly associated with operating or nonoperating property, and if the utility company fails to do so, the department may determine that all such payments may be allocated between

operating and nonoperating property in the same ratio as is the debt service and preferred stock dividends (see subrules 77.4(2) and 77.4(3)).

f. The income determined in 77.4(4) “a” shall be adjusted by deducting any net income included therein received from nonoperating property and, conversely, the referenced income shall be increased to account for any net loss created by any nonoperating property.

g. The income determined in 77.4(4), paragraph “a,” for pipeline companies shall be further reduced by deducting the current year net adjustment expense for investment tax credits.

h. Any extraordinary item affecting the income determined herein shall be eliminated in the calculation of the income shown under this rule. Any construction-work-in-progress not placed into service within one year of the assessment date shall be separately valued by the department.

i. The equity rate of return for the utility company shall be determined by the use of the capital asset pricing model although where appropriate discounted cashflow model (commonly called the Gordon Growth Model - $r = \frac{D_1}{P_0} + g$) may be utilized as an alternative.

Only in circumstances where these models are not able to be utilized will reliance be placed on a risk premium model or upon an earnings-price ratio, or other similar model, for determining the expected market rate of return on equity.

j. The income attributable to operating property available to the common equity holder as determined in 77.4(4) “a” to “g” shall then be divided by the equity rate as determined in 77.4(4) “h,” and the result shall be the market value of the common equity associated with the operating property.

77.4(5) In the event the utility company has entered into leases of operating property, the market value of the property leased shall be determined by calculating the net present value of the leases, which shall be accomplished by discounting the future lease payments for each lease. The following is offered as an illustration of the calculation of such market value:

Length of Lease	Annual Lease Payments
1. Lease (a) 5 years	\$1,500,000
2. Lease (b) 7 years	\$ 800,000
3. Lease (c) 3 years	\$ 120,000
Net present value of leases (assuming 8 percent rate)	
Lease (a) = $1,500,000 \div (1.08)^1 + 1,500,000 \div (1.08)^2 + \dots + 1,500,000 \div (1.08)^5$	
Lease (b) = $800,000 \div (1.08)^1 + 800,000 \div (1.08)^2 + \dots + 800,000 \div (1.08)^7$	
Lease (c) = $120,000 \div (1.08)^1 + 120,000 \div (1.08)^2 + \dots + 120,000 \div (1.08)^3$	
Net Present Value of Lease (a)	= \$ 5,989,065
Net Present Value of Lease (b)	= \$ 4,165,096
Net Present Value of Lease (c)	= <u>\$ 309,251</u>
Total Lease Values	<u>\$10,463,412</u>

The discount rate shall be equal to the utility company’s overall market cost of capital.

77.4(6) In the event the utility company has other sources of capital, such as (by way of illustration and not limitation) current liabilities and accumulated investment tax credits which cannot be identified as having been utilized to purchase specific assets, the market value of such sources of capital shall be allocated between operating and nonoperating assets in the same manner as long-term debt or preferred stock (see subrules 77.4(2) and 77.4(3)). Accumulated deferred income taxes are not included in this adjustment. The book value for accumulated deferred income taxes should be removed from the stock and debt approach before making this calculation. If any such source of capital was created specifically for the purchase of property which can be identified as operating property or nonoperating property, the utility company must identify such sources of capital in their annual report to the department, together

with the appropriate evidence of such. If the utility company fails to provide such information, the department may determine that such sources of capital may be allocated in the same manner as long-term debt or preferred stock (see subrules 77.4(2) and 77.4(3)). The market value of any such source of capital, in the absence of evidence to the contrary submitted by the utility with its annual report, shall be the book value.

77.4(7) The value determined by summing the portions of the enumerated sources of capital associated with the operating property of the utility company provided in subrules 77.4(2) to 77.4(6) shall be the unit value of the operating properties determined by the stock and debt approach to unit value.

This rule is intended to implement Iowa Code sections 428.29, 433.4, 437.6, 437.7, and 438.14.

701—77.5(428,433,437,438) Income capitalization approach to unit value.

77.5(1) The income capitalization approach to unit value estimates the market value of the operating property by dividing the income stream generated by the operating assets by a market derived capitalization rate based on the costs of the various sources of capital utilized or available for use to purchase the assets generating the income stream. The purpose and intent of the income indicator of value is to match income with sources of capital and, therefore, every source of capital used or available to be used to purchase assets should be reflected in the capitalization rate determination as well as all operating income.

The net operating income to be capitalized for pipeline companies shall be a weighted average net operating income. The weighted average net operating income shall consist of an average of the three 12-month periods immediately preceding the valuation date. Each of the three preceding 12-month periods shall be weighted by multiplying the first preceding period by three, the second preceding period by two, and the third preceding period by one. The income stream for pipeline companies shall be further reduced by deducting the current year net adjustment expense for investment tax credits.

If the utility company has no income or has a negative income, the indicator of value set forth in this subrule shall not be utilized.

If the utility company is one which is not allowed to earn a return on assets purchased with sources of capital such as the company's deferred income taxes, the income will not reflect the earnings on those assets, and as a consequence, a separate adjustment to the income indicator of value must be made to account for the value of those assets. In such instances, the income indicator of value shall be increased by an amount equal to the book value of the source of capital involved, such as the accumulated deferred income taxes. The adjustment to the income approach for accumulated deferred income taxes shall not be made for pipeline companies. If any other operating property is clearly not income producing and, therefore, not reflected in the income stream, the value of that asset shall be determined separately and added to the value of the other operating property as determined using the income indicator of value. The capitalization rate shall be adjusted, if necessary, for the market rate of return for the sources of capital utilized to purchase such non-income-producing properties where the sources can be clearly identified. Otherwise, the cost of the sources of capital shall be presumed to be equal to the overall market weighted costs of the identified sources of capital.

77.5(2) If the utility company is one which can earn a return on assets purchased with sources of capital such as the company's deferred income taxes, the income will reflect the earnings on those assets, and as a consequence, a separate adjustment to the capitalization rate is required. The capitalization rate shall be determined by utilizing, where appropriate, market rates of return weighted according to a market-determined capital structure, with the exception of deferred credits whose market value shall be equal to its value on the company's books and whose cost shall be zero. All sources of capital shall be considered in the capital structure as well as market costs associated with each source of capital, otherwise, the cost of the sources of capital shall be presumed to be equal to the overall market-weighted costs of the identified sources of capital. The following is an example of the application of this rule:

	(1)	(2)	(3)	(4)
	Market Value	Market Rate of Return	% to Total	Component (Col. 2 × Col. 3)
Common Stock	60,000	15%	62.50	9.38
Preferred Stock	5,000	13%	5.21	.68
Debt	25,000	12%	26.04	3.12
Deferred Credits	6,000	—0—	6.25	—0—
	<u>96,000</u>		<u>100.00</u>	<u>13.18</u>

This rule is intended to implement Iowa Code sections 428.29, 433.4, 437.6, 437.7, and 438.14.

701—77.6(428,433,437,438) Cost approach to unit value. The cost approach to unit value shall be determined by combining the cost of the operating properties of the utility and deducting therefrom an allowance for depreciation calculated on a straight-line basis. Other forms of depreciation may be deducted if found to exist. The director may use the replacement cost new less depreciation (RCNLD) valuation methodology for determining the assessed value of the Iowa operating property required under Iowa Code chapter 433.

This rule is intended to implement Iowa Code sections 428.29, 433.4, 437.6, 437.7, and 438.14.

701—77.7(428,433,437,438) Correlation. In making a final determination of value the director may give consideration to each of the methodologies described in these rules, the use of which will result in the determination of the fair and reasonable market value of the utility company's entire operating property. Generally, for other than pipeline companies, the stock and debt indicator of value shall be considered to be the most useful, the income indicator the next most useful and the cost indicator the least useful. If circumstances dictate that a particular indicator is inappropriate or less reliable for a particular company, the correlation of the indicators of value shall be adjusted accordingly. The correlation for pipeline companies will consider the cost indicator to be the most useful, the income indicator the next most useful, and the stock and debt indicator the least useful. In making the final determination of value, the director will weigh the stock and debt indicator of value at 10 percent, the income indicator of value at 40 percent and the cost indicator of value at 50 percent.

This rule is intended to implement Iowa Code sections 428.29, 433.4, 437.6, 437.7, and 438.14.

701—77.8(428,433,437,438) Allocation of unit value to state.

77.8(1) Allocation by director. The director shall allocate that portion of the total unit value of the utility company's operating property to the state of Iowa based on factors which are representative of the ratio that the utility company's property and activity in the state of Iowa bear to the utility company's total property and activity. These factors are:

- a. Gross operating property weighted 75 percent, and
- b. Gross operating revenues, or MCF miles, or barrel miles weighted 25 percent. The selection of the property and use factor to be utilized shall depend on the type of utility being valued.

77.8(2) Alternative methods. In the event that the allocation prescribed by subrule 77.8(1) does not fairly and reasonably allocate unit value of the utility company's operating property to the state of Iowa, the director shall consider such other factors as the director deems appropriate by the exercise of sound appraisal judgment.

This rule is intended to implement Iowa Code sections 428.29, 433.4, 437.6, 437.7, and 438.14.

CHAPTER 78
REPLACEMENT TAX AND STATEWIDE PROPERTY
TAX ON RATE-REGULATED WATER UTILITIES

REPLACEMENT TAX

701—78.1(85GA,SF451) Who must file return. Beginning with property tax years and replacement tax years beginning on or after January 1, 2013, each taxpayer, as defined in 2013 Iowa Acts, Senate File 451, section 11(13), shall file a true and accurate return with the director. The return shall include all of the information prescribed in 2013 Iowa Acts, Senate File 451, section 13(1) “a” and “b,” and any other information or schedules requested by the director. The return shall be signed by an officer or other person duly authorized by the taxpayer and must be certified as correct. If the taxpayer was inactive or ceased the conduct of any activity subject to the replacement tax during the tax year, the return must contain a statement to that effect.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.2(85GA,SF451) Time and place for filing return. The return must be filed with the director on or before March 31 following the tax year. There is no authority for the director to grant an extension of time to file a return. Therefore, any return which is not filed on or before March 31 following the tax year is untimely.

A taxpayer whose replacement tax liability before credits is \$300 or less is not required to file a return. A taxpayer should not file a replacement tax return under such circumstances.

When the due date falls on a Saturday or Sunday, the return will be due the first business day following the Saturday or Sunday. If a return is placed in the mails, properly addressed and postage paid in ample time to reach the director or the department on or before the due date for filing, no penalty will attach should the return not be received until after the due date for filing. The functional meaning of this requirement is that if the return is placed in the mails, properly addressed and postage paid, on or before the due date for filing, no penalty will attach. Mailed returns should be addressed to Department of Revenue, Attention: Property Tax Division, Hoover State Office Building, Des Moines, Iowa 50319. [ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.3(85GA,SF451) Form for filing. Returns must be made by taxpayers on forms supplied by the department. Taxpayers not supplied with the proper forms shall make application for proper forms to the department in ample time to have the taxpayers’ returns made, verified and filed on or before the due date. Each taxpayer shall carefully prepare the taxpayer’s return so as to fully and clearly set forth the data required. All information shall be supplied and each direction complied with in the same manner as if the forms were embodied in these rules.

Failure to receive the proper forms does not relieve the taxpayer from the obligation of making the replacement tax return.

Returns received which are not completed, but merely state “see schedule attached,” “no tax due,” or some other conclusionary statement are not considered to be properly filed returns and may be returned to the taxpayer for proper completion. This may result in the imposition of penalties and interest due to the return’s being filed after the due date.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.4(85GA,SF451) Payment of tax. Payment of tax shall not accompany the filing of the replacement tax return with the director. Payment of tax shall not be made to the director or the state of Iowa. Payment of the proper amount of tax due shall be made to the appropriate county treasurer upon notification by the county treasurer to the taxpayer of the taxpayer’s replacement tax obligation.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.5(85GA,SF451) Statute of limitations.

78.5(1) The director has three years after a return is filed to determine the tax due if the return is found to be incorrect and to give notice to the taxpayer of the determination. This three-year statute of limitations does not apply in the instances specified in subrule 78.5(2).

78.5(2) If a taxpayer files a false or fraudulent return with the intent to evade any tax, the correct amount of tax due may be determined by the director at any time after the return has been filed.

78.5(3) If a taxpayer fails to file a return, the three-year statute of limitations does not begin until the return is filed with the director.

78.5(4) Waiver of statute of limitations. The department and the taxpayer may extend the three-year period of limitations provided in subrule 78.5(1) above by signing a waiver agreement form provided by the department. The agreement shall designate the period of extension and the tax year for which the extension applies. The agreement shall provide that the taxpayer may file a claim for refund of replacement tax at any time prior to the expiration of the agreement.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.6(85GA,SF451) Billings.**78.6(1) Notice of adjustments.**

a. Authorization to send notice of adjustments. An agent, auditor, clerk, or employee of the department, designated by the director to examine returns and make audits, who discovers discrepancies in returns or learns that items subject to tax may not have been listed or included as taxable, in whole or in part, or that no return was filed when one was due is authorized to notify the taxpayer of this discovery by ordinary mail. This notice is not an assessment. It informs the taxpayer what amount would be due if the information discovered is correct. A copy of such notice shall also be sent to the appropriate county treasurer.

b. Right of taxpayer upon receipt of notice of adjustment. A taxpayer who has received notice of an adjustment in connection with a return may pay the additional amount stated to be due to the appropriate county treasurer. If payment is made, and the taxpayer wishes to contest the matter, the taxpayer should file a timely claim for refund. However, payment will not be required until an assessment has been made, although interest will continue to accrue if timely payment is not made. If no payment has been made, the taxpayer may discuss with the agent, auditor, clerk, or employee who notified the taxpayer of the discrepancy, either in person or through correspondence, all matters of fact and law which may be relevant to the situation. The taxpayer may also ask for a conference with the Department of Revenue, Property Tax Division, Hoover State Office Building, Des Moines, Iowa. Documents and records supporting the taxpayer's position may be required.

c. Power of agent, auditor, or employee to compromise tax claim. No employee of the department has the power to compromise any tax claims. The power of the agent, auditor, clerk, or employee who notified the taxpayer of the discrepancy is limited to the determination of the correct amount of tax.

78.6(2) Notice of assessment. If, after following the procedure outlined in paragraph 78.6(1) "b," no agreement is reached and the taxpayer does not pay the amount determined to be correct to the appropriate county treasurer, a notice of the amount of tax due shall be sent to the taxpayer. This notice of assessment shall bear the signature of the director and will be sent by ordinary mail to the taxpayer with a copy sent to the appropriate county treasurer.

A taxpayer has 60 days from the date of the notice of assessment to file a protest according to the provisions of rule 701—7.8(17A) or, if the taxpayer fails to timely appeal a notice of assessment, the taxpayer may make payment pursuant to rule 701—7.8(17A) to the appropriate county treasurer and file a refund claim with the director within the applicable period provided in 2013 Iowa Acts, Senate File 451, section 19(1) "b," for filing such claims.

78.6(3) Supplemental assessments and refund adjustments. The director may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the director shall notify the appropriate county treasurer. Such resolution shall preclude the director and the taxpayer from making a supplemental assessment or refund adjustment concerning the same issue involved in the appeal for the same tax year unless there is a showing of mathematical or clerical error or showing of fraud or misrepresentation.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.7(85GA,SF451) Refunds.

78.7(1) A claim for refund of replacement tax may be made on a form obtainable from the department. All claims for refund should be filed with the director and not with the county treasurer. In the case of a refund claim filed by an agent or representative of the taxpayer, a power of attorney must accompany the claim. All claims for refund must be in writing.

78.7(2) A taxpayer shall not offset a refund or overpayment of tax for one tax year as a prior payment of tax of a subsequent tax year on the tax return of a subsequent year unless the provisions of 2013 Iowa Acts, Senate File 451, section 13(5), are applicable.

78.7(3) Refunds—statute of limitations. The statute of limitations with respect to which refunds or credits may be claimed are:

a. The later of three years after the due date of the tax payment upon which the refund or credit is claimed or one year after which such payment was actually made.

b. Ninety days after the due date of the tax payment upon which refund or credit is claimed if the tax is alleged to be unconstitutional.

78.7(4) No credit or refund of taxes alleged to be unconstitutional shall be allowed if such taxes were not paid to the appropriate county treasurer under written protest which specifies the particulars of the alleged unconstitutionality.

78.7(5) The taxpayer responsible for paying the tax, or the taxpayer's successors, are the only persons eligible to file claims for refund or credit of the tax with the director and are the only persons eligible to receive such refunds or credits.

78.7(6) The director will promptly notify the appropriate county treasurer of the acceptance or denial of any refund claim or credit. The county treasurer shall pay the refund claim or portion thereof accepted by the director.

78.7(7) A taxpayer has 60 days from the date of the notice of denial of a refund or credit, in whole or in part, to file a protest according to the provisions of rule 701—7.8(17A).

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.8(85GA,SF451) Abatement of tax. The provisions of rule 701—7.31(421) are applicable to replacement tax. In the event that the taxpayer files a request for abatement with the director, the appropriate county treasurer shall be notified. The director's decision on the abatement request shall be sent to the taxpayer and the appropriate county treasurer.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.9(85GA,SF451) Taxpayers required to keep records.

78.9(1) Records required by taxpayers taxed under 2013 Iowa Acts, Senate File 451, sections 10 to 30. The records required in this rule must be made available for examination upon request by the director or the director's authorized representative. The records must include all of those which would support the entries required to be made on the tax return. These records include but are not limited to:

a. Records associated with the total number of gallons of water carried through the taxpayer's distribution system during the tax year and during each of the immediately preceding five calendar years. For calendar years prior to tax year 2013, the total number of gallons of water carried through the taxpayer's distribution system is calculated as though 2013 Iowa Acts, Senate File 451, sections 10 to 30, was in effect for such calendar year.

b. Records associated with the total amount of nonrevenue water, as that term is defined in 2013 Iowa Acts, Senate File 451, section 11(9), carried through the taxpayer's distribution system during the

tax year and during each of the immediately preceding five calendar years. For calendar years prior to tax year 2013, the total number of gallons of nonrevenue water carried through the taxpayer's distribution system is calculated as though 2013 Iowa Acts, Senate File 451, sections 10 to 30, was in effect for such calendar year.

c. Records associated with the total taxable gallons of water delivered by the taxpayer to consumers, as that term is defined in 2013 Iowa Acts, Senate File 451, section 11(2), within the service area during the tax year and during each of the immediately preceding five calendar years. For calendar years prior to tax year 2013, the total taxable gallons delivered by the taxpayer to consumers by the water utility is the difference between the gallons of water calculated in paragraphs 78.9(1) "a" and "b."

d. For tax years 2013, 2014, and 2015, records associated with property tax amounts due and payable as the result of assessment years 2010 and 2011.

e. Records associated with the taxpayer's calculation of the tentative replacement taxes due for the tax year and required to be shown on the tax return.

f. Records associated with increases or decreases in the tentative replacement tax required to be shown to be due where the replacement delivery tax rates are subject to recalculation under the provisions of 2013 Iowa Acts, Senate File 451, section 13(5).

g. All work papers associated with any of the records described in this subrule.

h. Records pertaining to any additions or deletions of property described as exempt from local property tax in 2013 Iowa Acts, Senate File 451, section 21.

i. Records associated with allocation of property described in paragraph 78.9(1) "h" above among local taxing districts.

78.9(2) The records required to be maintained by this rule shall be maintained by taxpayers for a period of ten years following the later of the original due date for the filing of a tax return in which the replacement taxes are reported or the date on which such return is filed. Upon application to the director and for good cause shown, the director may shorten the period for which any records should be maintained by a taxpayer.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.10(85GA,SF451) Credentials. Employees of the department have official credentials, and the taxpayer should require proof of the identity of persons claiming to represent the department. No charges shall be made nor gratuities of any kind accepted by an employee of the department for assistance given in or out of the office of the department.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.11(85GA,SF451) Audit of records. The director or the director's authorized representative shall have the right to examine or cause to be examined the books, papers, records, memoranda or documents of a taxpayer for the purpose of verifying the correctness of a tax return filed or of information presented or for estimating the tax liability of a taxpayer. When a taxpayer fails or refuses to produce the records for examination upon request, the director shall have authority to require, by a subpoena, the attendance of the taxpayer and any other witness(es) whom the director deems necessary or expedient to examine and compel the taxpayer and witness(es) to produce books, papers, records, memoranda or documents relating in any manner to the replacement tax.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.12(85GA,SF451) Information confidential. 2013 Iowa Acts, Senate File 451, sections 19(2) and 19(3), apply generally to the director, deputies, auditors, and present or former officers and employees of the department. Disclosure of the gallons of water delivered by a taxpayer taxed under 2013 Iowa Acts, Senate File 451, sections 10 to 30, in a service area disclosed on a tax return, return information, or investigative or audit information is prohibited. Other persons having acquired this confidential information will be bound by the same rules of secrecy under these Iowa Code provisions as any member of the department and will be subject to the same penalties for violations as provided by law.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

STATEWIDE PROPERTY TAX

701—78.13(85GA,SF451) Who must file return. Each taxpayer shall file a true and accurate return with the director. The return shall include all of the information prescribed in 2013 Iowa Acts, Senate File 451, section 26, and any other information or schedules requested by the director. The return shall be signed by an officer or other person duly authorized by the taxpayer and must be certified as correct. If the taxpayer was inactive or ceased the conduct of any activity for which the taxpayer's property was subject to the statewide property tax during the tax year, the return must contain a statement to that effect. [ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.14(85GA,SF451) Time and place for filing return. The return must be filed with the director on or before March 31 following the tax year. There is no authority for the director to grant an extension of time to file a return. Therefore, any return which is not filed on or before March 31 following the tax year is untimely.

When the due date falls on a Saturday or Sunday, the return will be due the first business day following the Saturday or Sunday. If a return is placed in the mails, properly addressed and postage paid in ample time to reach the director or the department on or before the due date for filing, no penalty will attach should the return not be received until after that date. The functional meaning of this requirement is that if the return is placed in the mails, properly addressed and postage paid, on or before the due date for filing, no penalty will attach. Mailed returns should be addressed to Department of Revenue, Attention: Property Tax Division, Hoover State Office Building, Des Moines, Iowa 50319. [ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.15(85GA,SF451) Form for filing. Rule 701—78.3(85GA,SF451) is incorporated herein by reference. [ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.16(85GA,SF451) Payment of tax. Payment of the tax required to be shown due on the statewide property tax return shall accompany the filing of the return. All checks shall be made payable to Treasurer, State of Iowa. Failure to pay the tax required to be shown due on the tax return by the due date shall render the tax delinquent. [ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.17(85GA,SF451) Statute of limitations. Rule 701—78.5(85GA,SF451) is incorporated herein by reference. [ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.18(85GA,SF451) Billings.

78.18(1) Notice of adjustments. Subrule 78.6(1) is incorporated herein by reference.

78.18(2) Notice of assessment. If, after following the procedure outlined in paragraph 78.6(1) "b," no agreement is reached and the person does not pay the amount determined to be correct to the director, a notice of the amount of tax due shall be sent to the taxpayer. This notice of assessment shall bear the signature of the director and will be sent by ordinary mail to the taxpayer.

A taxpayer has 60 days from the date of the notice of assessment to file a protest according to the provisions of rule 701—78.8(17A) or, if the taxpayer fails to timely appeal a notice of assessment, the taxpayer may make payment pursuant to rule 701—78.8(17A) to the director and file a refund claim with the director within the applicable period provided in 2013 Iowa Acts, Senate File 451, sections 19 and 27, for filing such claims.

78.18(3) Supplemental assessments. Subrule 78.6(3) is incorporated herein by reference. [ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.19(85GA,SF451) Refunds. Subrules 78.7(1) to 78.7(3), 78.7(5) and 78.7(7) are incorporated herein by reference.

No credit or refund of taxes alleged to be unconstitutional shall be allowed if such taxes were not paid under written protest which specifies the particulars of the alleged unconstitutionality.
[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.20(85GA,SF451) Abatement of tax. The provisions of rule 701—7.31(421) are applicable to the statewide property tax.
[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.21(85GA,SF451) Taxpayers required to keep records.

78.21(1) Records required. The records required in this rule must be made available for examination upon request by the director or the director's authorized representative. The records must include all of those which would support the entries required to be made on the tax return. These records include but are not limited to:

- a. Records associated with the assessed value and base year assessed value of property subject to the statewide property tax.
- b. Records associated with the computation of the statewide property tax required to be shown due on the tax return.
- c. Records associated with the book value of the local amount of any major addition by the local taxing district.
- d. Records associated with the book value of the statewide amount of any major addition.
- e. Records associated with the transfer or disposal of all operating property, as that term is defined in 2013 Iowa Acts, Senate File 451, section 11(10), in the preceding calendar year, by local taxing district.
- f. Records associated with the book value of all other taxpayer property subject to the statewide property tax.
- g. Records associated with the book value of any major addition, by situs, eligible for the urban revitalization exemption provided for in Iowa Code chapter 404.
- h. All work papers associated with any of the records described in this rule.
- i. Records associated with allocation of property subject to statewide property tax among local taxing districts.

78.21(2) The records required to be maintained by these rules shall be maintained by taxpayers for a period of ten years following the later of the original due date for the filing of a tax return in which the statewide property tax is reported or the date on which such return is filed. Upon application to the director and for good cause shown, the director may shorten the period for which any records should be maintained by a taxpayer.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.22(85GA,SF451) Credentials. Rule 701—78.10(85GA,SF451) is incorporated herein by reference.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

701—78.23(85GA,SF451) Audit of records. Rule 701—78.11(85GA,SF451) is incorporated herein by reference.

[ARC 0965C, IAB 8/21/13, effective 8/2/13; ARC 1105C, IAB 10/16/13, effective 11/20/13]

These rules are intended to implement 2013 Iowa Acts, Senate File 451.

CHAPTER 79
REAL ESTATE TRANSFER TAX AND DECLARATIONS OF VALUE
[Prior to 12/17/86, Revenue Department[730]]

701—79.1(428A) Real estate transfer tax: Responsibility of county recorders.

79.1(1) Forms. County recorders shall use only forms provided by the department of revenue for the collection of real estate transfer tax and the recording and reporting of such tax collections.

79.1(2) Monthly reports. County recorders shall submit a report to the department of revenue on or before the tenth day of each month enumerating real estate transfer tax collection information for the preceding month. This report shall be submitted on forms prescribed by the department of revenue and shall contain such information as is deemed necessary by the department.

79.1(3) Evidence of payment. The recorder or authorized employee of the recorder must enter the tax payment amount on the face of the instrument of conveyance presented for recording.

79.1(4) Recording refused. The county recorder shall refuse to record any deed, instrument, or writing regardless of any statement by the grantor, grantee, or their agents that the transaction is exempt pursuant to Iowa Code section 428A.2, if, in the recorder's judgment, additional facts are necessary to clarify the taxable status of the transfer or determine the full consideration paid for the property. The county recorder may request from the grantor, grantee, or their agents, any information necessary to determine the taxable status of the transfer or the full amount of consideration involved in the transaction. County recorders under no circumstance shall record any deed or instrument of conveyance for which the proper amount of real estate transfer tax has not been collected. This applies to the collection of tax in excess of the amount due for the actual amount of consideration as well as situations in which an insufficient amount of tax has been collected.

79.1(5) Refunds or underpayments.

a. Refunds. County recorders shall not refund any overpayment of a real estate transfer tax. The grantor of the real property for which the real estate transfer tax has been overpaid shall petition the state appeal board for a refund of the overpayment amount paid to the treasurer of state. A refund of the remaining portion of the overpayment shall be petitioned from the board of supervisors of the county in which the tax was paid.

b. Underpayments. The county recorder shall collect any amount of tax found to be due. If the county recorder is unable to collect the tax, the director of revenue shall collect the tax in the same manner as income taxes are collected and pay the county its proportionate share.

79.1(6) Multiple parcels. If the real estate conveyance contains multiple parcels and the parcels are located in more than one county, the tax is to be paid to each county in which the property parcels are located based on the consideration paid for each property parcel or proportionate parcel located in each county.

This rule is intended to implement Iowa Code chapter 428A as amended by 2009 Iowa Acts, Senate File 288, section 17.

[ARC 7726B, IAB 4/22/09, effective 5/27/09; ARC 8358B, IAB 12/2/09, effective 1/6/10]

701—79.2(428A) Taxable status of real estate transfers.

79.2(1) Federal rules and regulations. In factual situations not covered by these rules and involving those portions of Iowa law which are consistent with the former federal statutes (26 USCA 4361) that imposed a real estate transfer tax, the department of revenue and county recorders shall follow the federal rules and regulations in administering the provisions of Iowa Code chapter 428A. (1968 O.A.G. 643)

79.2(2) Transfer of realty to a corporation or partnership. Capital stock, partnership shares and debt securities received in exchange for real property constitutes consideration which is subject to the real estate transfer tax. Where the value of the capital stock is definite or may be definitely determined in a dollar amount, the specific dollar amount is subject to the tax. Where the value of the capital stock is not definitely measurable in a dollar amount, the tax imposed is to be calculated on the fair market value of the realty transferred. For purposes of this rule, fair market value shall be as defined in Iowa Code section 441.21. (1976 O.A.G. 776)

Real estate transfer tax is not due when real property is conveyed to a family corporation, partnership, limited partnership, limited liability partnership, or limited liability company as defined in Iowa Code section 428A.2 in an incorporation or organization action where the only consideration is the issuance of capital stock, partnership shares, or debt securities of the corporation, partnership, limited partnership, limited liability partnership, or limited liability company. Actual consideration other than these shares or debt securities is subject to real estate transfer tax.

79.2(3) *Trades of real estate.* Real estate transfers involving the exchange of one piece of real property for another are transfers subject to the real estate transfer tax. Each grantor of the real estate is liable for the tax based on the fair market value of the property received in the trade as well as other consideration including but not limited to cash and assumption of debt. (1972 O.A.G. 654)

For purposes of this rule, fair market value shall be as defined in Iowa Code section 441.21.

79.2(4) *Conveyance to the United States government or the state of Iowa.* Any conveyance of real estate to the United States or any agency or instrumentality thereof or to the state of Iowa or any agency, instrumentality, or political subdivision thereof not exempt from the real estate transfer tax pursuant to Iowa Code section 428A.2, is subject to the real estate transfer tax. (1968 O.A.G. 579) An exception to this rule is any conveyance to the United States Department of Agriculture, Farmers Home Administration, which is specifically exempted by federal law (7 USCS §1984).

79.2(5) *Conveyance of property on leased land.* The transfer of buildings or other structures located on leased land is subject to the real estate transfer tax. The fact that the person who owns a building or other structure does not own the land upon which the property is located does not exempt this type of conveyance from the real estate transfer tax. (1972 O.A.G. 318)

79.2(6) *Mortgage default.* In the factual situation where a defaulting mortgagor issues a deed or other conveyance instrument to the mortgagee as satisfaction of the mortgage debt, the transaction is subject to the real estate transfer tax. The consideration upon which the tax is calculated is the outstanding unsatisfied mortgage debt.

However, as an exception to this rule, a conveyance of real property to lienholders in lieu of forfeiture or foreclosure action is exempt from real estate transfer tax.

79.2(7) *Completion of contract.* A deed or other conveyance instrument given at the time of completion of a single real estate contract is subject to the real estate transfer tax. The tax is to be computed on the full amount of the purchase price as stated in the contract and not solely on the last installment payment made prior to the issuance of the deed or other conveyance instrument. If the original contract is assigned to a third party or parties prior to fulfillment of such contract, the tax is to be computed only on the original contract price upon completion of the contract.

When a single deed or other conveyance instrument is given at the time of completion of multiple successive real estate contracts, separate taxes are to be computed and paid based upon the full purchase price stated in each contract. For example, if A sells real estate to B on an installment contract, and then B sells the same property to C on another installment contract, and subsequently both A and B transfer their respective interests in the property to C via one deed, A is liable for a tax computed on the full purchase price stated in the original contract to which A was a party and B is liable for a tax computed on the full purchase price stated in the subsequent contract to which B was a party.

79.2(8) *Assignments of contract.* Assignments of real estate contracts by contract sellers and contract buyers are not subject to the real estate transfer tax. (1970 O.A.G. 605)

79.2(9) *Corporate and partnership dissolution.* A conveyance of realty by a corporation or partnership in liquidation or in dissolution to its shareholders or partners subject to the debts of the corporation or partnership is a conveyance subject to the real estate transfer tax. However, if there are no debts and the conveyance is made solely for the cancellation and retirement of the capital stock or dissolution, the tax does not apply.

Real estate transfer tax is not due when real property is conveyed from a family corporation, partnership, limited partnership, limited liability partnership, or limited liability company as defined in Iowa Code section 428A.2 to its shareholders, partners, or members in a dissolution action where the only consideration is capital stock, partnership shares, or debt securities of the corporation, partnership, limited partnership, limited liability partnership, or limited liability company, including the assumption

of debts by the shareholders, partners, or members. Actual consideration other than these shares or debt securities is subject to the real estate transfer tax.

79.2(10) Security instruments. Any deed or instrument given exclusively to secure a loan or debt is not subject to the real estate transfer tax.

79.2(11) Marriage dissolution exemption. Marriage dissolution exemption from the real estate transfer tax provided in Iowa Code section 428A.2(16) applies only to real property conveyances between former spouses specifically mandated by a dissolution decree.

79.2(12) Family debt cancellation exemption. The family debt cancellation exemption from the real estate transfer tax provided in Iowa Code section 428A.2(11) applies only to real estate conveyances between husband and wife, or parent and child and indebtedness between these parties.

The amount of indebtedness subject to exemption shall not exceed the fair market value of the property being transferred.

EXAMPLE 1. A son is indebted to his father for \$10,000. The son transfers real property with a fair market value of \$12,000 to his father as satisfaction of the indebtedness. No real estate transfer tax is due in this situation.

EXAMPLE 2. A son is indebted to his father for \$10,000. The son transfers real property with a fair market value of \$4,000 to his father as satisfaction of the indebtedness. Real estate transfer tax is due on \$6,000 in this situation.

79.2(13) Assumption of debt. Any outstanding debt on the property conveyed that is not assumed by the grantee is not to be included as consideration in computing the amount of real estate transfer tax due.

EXAMPLE. Property with a mortgage of \$40,000 is transferred from A to B. B pays A \$60,000 but does not assume the \$40,000 mortgage. The real estate transfer tax is to be computed on the \$60,000 cash payment only. If B had assumed the mortgage in addition to making the cash payment, the real estate transfer tax would be computed on \$100,000 (the sum of the payment and mortgage).

79.2(14) Mergers, consolidations, and reorganizations. Conveyances of real estate resulting from corporate or limited liability company mergers, consolidations, or reorganizations are exempt from the real estate transfer tax. The following definitions are intended to be general guidelines in determining eligibility for exemption under this subsection.

“*Merger*” means the uniting of two or more corporations or companies into one corporation or company in such manner that the corporation or company resulting from the merger retains its existence and absorbs the other constituent corporation(s) or company(ies) which thereby lose its or their existence.

“*Consolidation*” means the uniting of two or more corporations or companies into a single new corporation or company, all of the constituent corporations or companies thereby ceasing to exist as separate entities.

“*Reorganization*” means the transfer of substantially all of the assets of one corporation or company to another corporation or company where the persons having an interest in the old corporation or company maintain substantially the same interest in the new corporation or company.

This rule is intended to implement Iowa Code section 428A.1 as amended by 1996 Iowa Acts, chapter 1167, and section 428A.2 as amended by 1996 Iowa Acts, chapter 1170.

701—79.3(428A) Declarations of value: Responsibility of county recorders and city and county assessors.

79.3(1) Forms and procedures. County recorders and county and city assessors shall use only the declaration of value forms and procedures prescribed and provided by the director of revenue for reporting real estate transfers.

79.3(2) Report of sales. County recorders and city and county assessors shall complete the appropriate portions of the real estate transfer-declaration of value form for each real estate transfer for which a declaration of value has been completed by the buyer, seller, or agent. The completed real estate transfer-declaration of value forms shall be used in preparing the quarterly sales report to be submitted to the department as required by Iowa Code section 421.17(6).

79.3(3) Transmittal of forms. Real estate transfer-declaration of value forms filed with the county recorder shall be transmitted promptly to the appropriate assessor. City and county assessors shall

transmit to the department of revenue within 60 days of the end of each calendar quarter all real estate transfer-declaration of value forms received from the county recorder during that calendar quarter. Under no circumstances shall the assessor retain any real estate transfer-declaration of value form longer than designated in this subrule.

79.3(4) Completion of forms. County recorders and city and county assessors shall complete declaration of value forms in accordance with instructions issued by the department. The assessed values entered on the forms are to be the final values as of January 1 of the year in which the transfer occurred.

This rule is intended to implement Iowa Code section 428A.1.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—79.4(428A) Certain transfers of agricultural realty.

79.4(1) In determining whether agricultural realty is purchased by a corporation, limited partnership, trust, alien, or nonresident alien for purposes of providing information required for such transfers by Iowa Code section 428A.1, the definitions in this rule shall apply.

79.4(2) Corporation defined. “Corporation” means a domestic or foreign corporation and includes a nonprofit corporation and cooperatives.

79.4(3) Limited partnership defined. “Limited partnership” means a partnership as defined in Iowa Code section 488.102(13) and which owns or leases agricultural land or is engaged in farming.

79.4(4) Trust defined. “Trust” means a fiduciary relationship with respect to property, subjecting the person by whom the property is held to equitable duties to deal with the property for the benefit of another person, which arises as a result of a manifestation of an intention to create it. A trust includes a legal entity holding property as a trustee, agent, escrow agent, attorney-in-fact, and in any similar capacity.

Trust does not include a person acting in a fiduciary capacity as an executor, administrator, personal representative, guardian, conservator or receiver.

79.4(5) Alien defined. “Alien” means a person born out of the United States and unnaturalized under the Constitution and laws of the United States. (*Breuer v. Beery*, 189 N.W. 714, 194 Iowa 243, 244 (1922).)

79.4(6) Nonresident alien defined. “Nonresident alien” means an alien as defined in subrule 79.4(5) who is not a resident of the state of Iowa.

This rule is intended to implement Iowa Code section 428A.1.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—79.5(428A) Form completion and filing requirements.

79.5(1) *Real estate transfer—declaration of value form.* A real estate transfer—declaration of value form must be completed for any deed, contract, instrument or writing that grants, assigns, transfers or otherwise conveys real property, except those specifically exempted by law, if the document presented for recording clearly states on its face that it is a document exempt from the reporting requirements as enumerated in Iowa Code section 428A.2, subsections 2 through 5, 7 through 13, and 16 through 21, or subsection 6, except in the case of a federal agency or instrumentality, or if a transfer is the result of acquisition of property for public purposes through eminent domain, or is a deed given in fulfillment of a previously recorded real estate contract. A real estate transfer—declaration of value form is not required for any transaction that does not grant, assign, transfer or convey real property.

79.5(2) *Real estate transfer—declaration of value: Real estate transfer tax.* Requirements for completing real estate transfer-declaration of value forms or exceptions from filing the forms shall not be construed to alter the liability for the real estate transfer tax or the amount of such tax as provided in Iowa Code chapter 428A.

79.5(3) *Agent defined.* As used in Iowa Code section 428A.1, an agent is defined as any person designated or approved by the buyer or seller to act on behalf of the buyer or seller in the real estate transfer transaction.

79.5(4) *Government agency filing requirements.* The real estate transfer-declaration of value form does not have to be completed for any real estate transfer document in which the state of Iowa or any agency, instrumentality or political subdivision thereof is the grantor, assignor, transferor or conveyor

or for any transfer in which the state of Iowa or any agency, instrumentality or political subdivision thereof is the grantee or assignee where there is no consideration. However, any transfer in which any unit of government is the grantee or assignee where there is consideration is subject to the real estate transfer-declaration of value filing requirements (1980 O.A.G. 92) and any transfer to which the United States or any agency or instrumentality thereof is a party to the transfer is subject to the real estate transfer-declaration of value filing requirements. An exception to this subrule is conveyances for public purposes occurring through the exercise of the power of eminent domain.

79.5(5) *Recording refused.* The county recorder shall refuse to record any document for which a real estate transfer-declaration of value is required if the form is not completed accurately and completely by the buyer or seller or the agent of either. The declaration of value shall include the social security number or federal identification number of the buyer and seller and all other information required by the director of revenue, (*Iowa Association of Realtors et al v. Iowa Department of Revenue*, CE 18-10479, Polk County District Court, February 4, 1983.) However, if having made good faith effort, the person or person's agent completing the declaration of value is unable to obtain the social security or federal identification number of the other party to the transaction due to factors beyond the control of the person or person's agent, a signed affidavit stating that the effort was made and the reasons why the number could not be obtained shall be submitted with the incomplete declaration of value. The declaration of value with attached affidavit shall be considered sufficient compliance with Iowa Code section 428A.1 and the affidavit shall be considered a part of the declaration of value subject to the provisions of Iowa Code section 428A.15.

79.5(6) *Multiple parcels.* Separate declarations of value are to be submitted to each county recorder if the real estate conveyed consists of parcels located in more than one county. The consideration paid for each property must be separately stated on the declaration of value or the recorder shall refuse to record the instrument of conveyance.

This rule is intended to implement Iowa Code sections 428A.1 and 428A.2, and section 428A.4 as amended by 2009 Iowa Acts, Senate File 288, section 16.

[ARC 8358B, IAB 12/2/09, effective 1/6/10]

701—79.6(428A) Public access to declarations of value. Declarations of value are public records and must be made available for public inspection in accordance with Iowa Code chapter 22. However, if the declaration of value contains the social security number or federal tax identification number of the buyer or seller, the social security number or the federal tax identification number must be redacted by the government official in possession of the declaration of value form prior to its being released to the public.

This rule is intended to implement Iowa Code section 428A.7 as amended by 2009 Iowa Acts, House File 477, section 1.

¹ Effective date of subrule 79.1(4) was delayed by the Administrative Rules Review Committee 70 days and delay was lifted on November 14, 1979.

CHAPTER 80
PROPERTY TAX CREDITS AND EXEMPTIONS
[Prior to 12/17/86, Revenue Department[730]]

701—80.1(425) Homestead tax credit.

80.1(1) Application for credit.

a. No homestead tax credit shall be allowed unless the first application for homestead tax credit is signed by the owner of the property or the owner's qualified designee and filed with the city or county assessor on or before July 1 of the current assessment year. (1946 O.A.G. 37) Once filed, the claim for credit is applicable to subsequent years and no further filing shall be required provided the homestead is owned and occupied by the claimant or the claimant's spouse on July 1 of each year and, in addition, the claimant or the claimant's spouse occupies the homestead for at least six months during each calendar year in which the fiscal year for which the credit is claimed begins. It is not a requirement that the six-month period of time be consecutive. If the credit is disallowed and the claimant failed to give written notice to the assessor that the claimant ceased to use the property as a homestead, a civil penalty equal to 5 percent of the amount of the disallowed credit shall be assessed against the claimant in addition to the amount of credit allowed. The assessor, county auditor, and county board of supervisors shall act on the claim in accordance with Iowa Code section 425.3. A claim filed after July 1 of any calendar year applies to the following assessment year.

b. In the event July 1 falls on either a Saturday or Sunday, applications for the homestead tax credit may be filed the following Monday.

c. In the event July 1 falls on either a Saturday or Sunday, applications submitted by mail shall be accepted if postmarked on the following Monday.

d. An assessor may not refuse to accept an application for homestead tax credit. If it is the opinion of the assessor that a homestead tax credit should not be allowed, the assessor shall accept the application for credit and recommend disallowance.

e. If the owner of the homestead is on active duty in the armed forces of this state or of the United States, or is 65 years of age or older or is disabled, the application for homestead tax credit may be signed and delivered by a member of the owner's family or the owner's guardian, conservator or designated attorney-in-fact. For purposes of this rule, any person related to the owner by blood, marriage or adoption shall be considered a member of the owner's family.

f. If a person makes a false application for credit with fraudulent intent to obtain the credit, the person is guilty of a fraudulent practice and the claim shall be disallowed. If the credit has been paid, the amount of the credit plus a penalty equal to 25 percent of the amount of the disallowed credit and interest shall be collected by the county treasurer.

g. For purposes of the homestead tax credit statute, the occupancy of the homestead may constitute actual occupancy or constructive occupancy. However, more than one homestead cannot be simultaneously occupied by the claimant and multiple simultaneous homestead tax credits are not allowable. (Op. St. Bd. Tax Rev. No. 212, February 29, 1980.) Generally, a homestead is occupied by the claimant if the premises constitute the claimant's usual place of abode. Once the claimant's occupancy of the homestead is established, such occupancy is not lost merely because the claimant, for some valid reason, is temporarily absent from the homestead premises with an intention of returning thereto (1952 O.A.G. 78).

80.1(2) Eligibility for credit.

a. If homestead property is owned jointly by persons who are not related or formerly related by blood, marriage or adoption, no homestead tax credit shall be allowed unless all the owners actually occupy the homestead property on July 1 of each year. (1944 O.A.G. 26; Letter O.A.G. October 18, 1941)

b. No homestead tax credit shall be allowed if the homestead property is owned or listed and assessed to a corporation, other than a family farm corporation, partnership, company or any other business or nonbusiness organization. (1938 O.A.G. 441; *Verne Deskin v. Briggs*, State Board of Tax Review, No. 24, February 1, 1972)

c. A person acquiring homestead property under a contract of purchase remains eligible for a homestead tax credit even though such person has assigned his or her equity in the homestead property as security for a loan. (1960 O.A.G. 263)

d. A person occupying homestead property pursuant to Iowa Code chapter 499A or 499B is eligible for a homestead tax credit. (1978 O.A.G. 78-2-5; 1979 O.A.G. 79-12-2)

e. A person who has a life estate interest in homestead property shall be eligible for a homestead tax credit, provided the remainderman is related or formerly related to the life estate holder by blood, marriage or adoption or the reversionary interest is held by a nonprofit corporation organized under Iowa Code chapter 504A. (1938 O.A.G. 193)

f. A homestead tax credit may not be allowed upon a mobile home which is not assessed as real estate. (1962 O.A.G. 450)

g. A person occupying homestead property under a trust agreement is considered the owner of the property for purposes of the homestead tax credit. (1962 O.A.G. 434)

h. A remainder is not eligible to receive a homestead tax credit until expiration of the life estate to which such person has the remainder interest. (1938 O.A.G. 305)

i. In order for a person occupying homestead property under a contract of purchase to be eligible for a homestead tax credit, the contract of purchase must be recorded in the office of the county recorder where the property is located. A recorded memorandum or summary of the actual contract of purchase is not sufficient evidence of ownership to qualify a person for a homestead tax credit.

j. An owner of homestead property who is in the military service or confined in a nursing home, extended-care facility or hospital shall be considered as occupying the property during the period of service or confinement. The fact that the owner rents the property during the period of military service is immaterial to the granting of the homestead tax credit. (1942 O.A.G. 45) However, no homestead tax credit shall be allowed if the owner received a profit for the use of the property from another person while such owner is confined in a nursing home, extended-care facility or hospital.

k. A person owning a homestead dwelling located upon land owned by another person or entity is not eligible for a homestead tax credit. (1942 O.A.G. 160, O.A.G. 82-4-9) This rule is not applicable to a person owning a homestead dwelling pursuant to Iowa Code chapter 499B or a person owning a homestead dwelling on land owned by a community land trust pursuant to 42 U.S.C. Section 12773.

l. An heir occupying homestead property that is part of an estate in the process of administration is considered an owner of the property and is eligible for the homestead credit. (1938 O.A.G. 272)

80.1(3) Disabled veteran's homestead tax credit. The disabled veteran's homestead tax credit may be claimed by any person who acquired homestead property under 38 U.S.C. Sections 21.801 and 21.802 or Sections 2101 and 2102 provided the veteran's annual income and that of the veteran's spouse do not exceed \$35,000. The amount of the credit is equal to the entire amount of tax payable on the homestead. Even though this financial assistance is available to disabled veterans on only one homestead during their lifetime, the credit may be claimed upon the acquisition of other homesteads for which no financial assistance is available providing all qualifications have been met.

80.1(4) Application of credit.

a. Except as provided in 80.1(1) "a," if the homestead property is conveyed to another person prior to July 1 of any year, the new owner must file a claim for credit on or before July 1 to obtain the credit for that year. If the property is conveyed on or after July 1, the credit shall remain with the property for that year provided the previous owner was entitled to the credit. However, when the property is transferred as part of a distribution made pursuant to Iowa Code chapter 598 (Dissolution of Marriage) the transferee spouse retaining ownership and occupancy of the homestead is not required to refile for the credit.

b. A homestead tax credit may be allowed even though the property taxes levied against the homestead property have been suspended by the board of supervisors. (1938 O.A.G. 288)

c. A homestead tax credit shall not be allowed if the property taxes levied against the homestead property have been canceled or remitted by the board of supervisors. (1956 O.A.G. 78)

d. Only one homestead tax credit can be allowed per legally described tract of land. For purposes of this rule, a legally described tract of land shall mean all land contained in a single legal description. (1962 O.A.G. 435)

e. If the owner of homestead property is also eligible for a military service tax exemption and claims the exemption on the homestead property, the military service tax exemption shall be applied prior to the homestead tax credit when computing net property tax. (*Ryan v. State Tax Commission*, 235 Iowa 222, 16 N.W.2d 215)

f. If the homestead property contains two dwelling houses and one of the dwelling houses and a portion of the land is sold after a valid application for homestead tax credit has been filed, the assessor shall prorate the assessment so as to allow the seller a homestead tax credit on that portion of the property which is retained and also allow the purchaser a homestead tax credit on that portion of the property which is purchased, provided the purchaser files a valid application for homestead tax credit by July 1 of the claim year.

g. A homestead tax credit shall be allowed against the assessed value of the land on which a dwelling house did not exist as of January 1 of the year in which the credit is claimed provided a dwelling house is owned and occupied by the claimant on July 1 of that year.

h. The county treasurer shall, pursuant to Iowa Code section 25B.7, be required to extend to the claimant only that portion of the credit estimated by the department to be funded by the state appropriation.

This rule is intended to implement Iowa Code chapter 425 as amended by 2006 Iowa Acts, House File 2794.

701—80.2(22,35,426A) Military service tax exemption.

80.2(1) Application for exemption.

a. No military service tax exemption shall be allowed unless the first application for the military service tax exemption is signed by the owner of the property or the owner's qualified designee and filed with the city or county assessor on or before July 1 of the current assessment year (1970 O.A.G. 437). Once filed, the claim for exemption is applicable to subsequent years and no further filing shall be required provided the claimant or the claimant's spouse owns the property on July 1 of each year. The assessor, county auditor, and county board of supervisors shall act on the claim in accordance with Iowa Code section 426A.14. A claim filed after July 1 of any calendar year applies to the following assessment year.

b. In the event July 1 falls on either a Saturday or Sunday, applications for the military service tax exemption may be filed the following Monday.

c. In the event July 1 falls on either a Saturday or Sunday, applications submitted by mail shall be accepted if postmarked on the following Monday.

d. An assessor may not refuse to accept an application for a military service tax exemption. If it is the opinion of the assessor that a military service tax exemption should not be allowed, the assessor shall accept the application for exemption and recommend disallowance.

e. If the owner of the property is on active duty in the armed forces of this state or of the United States, or is 65 years of age or older or is disabled, the application for military service tax exemption may be signed and delivered by a member of the owner's family or the owner's guardian, conservator or designated attorney-in-fact. For purposes of this rule, any person related to the owner by blood, marriage or adoption shall be considered a member of the owner's family.

80.2(2) Eligibility for exemption.

a. A person who was discharged from the draft is not considered a veteran of the military service and is not entitled to a military service tax exemption. (1942 O.A.G. 79)

b. A military service tax exemption shall not be allowed to a person whose only service in the military was with a foreign government. (1932 O.A.G. 242; 1942 O.A.G. 79)

c. Former members of the United States armed forces, including members of the Coast Guard, who were on active duty for less than 18 months must have served on active duty during one of the war or conflict time periods enumerated in Iowa Code Supplement section 35.1. If former members were on active duty for at least 18 months, it is not necessary that their service be performed during one of the war or conflict time periods. Former members who opted to serve five years in the reserve forces of the United States qualify if any portion of their enlistment would have occurred during the Korean

Conflict (June 25, 1950, to January 31, 1955). There is no minimum number of days a former member of the armed forces of the United States must have served on active duty if the service was performed during one of the war or conflict time periods, nor is there a minimum number of days a former member of the armed forces of the United States must have served on active duty if the person was honorably discharged because of a service-related injury sustained while on active duty.

Former and current members of the Iowa national guard and reserve forces of the United States need not have performed any active duty if they served at least 20 years. Otherwise, they must have been activated for federal duty, for purposes other than training, for a minimum of 90 days. Also, it is not a requirement for a member of the Iowa national guard or a reservist to have performed service within a designated war or conflict time period.

d. With the exception of members of the Iowa national guard and members of the reserve forces of the United States who have served at least 20 years and continue to serve, a military service tax exemption shall not be allowed unless the veteran has received a complete and final separation from active duty service. (*Jones v. Iowa State Tax Commission*, 247 Iowa 530, 74 N.W.2d 563, 567-1956; *In re Douglas A. Coyle*, State Board of Tax Review, No. 197, August 14, 1979; 1976 O.A.G. 44)

e. As used in Iowa Code subsection 426A.12(3), the term minor child means a person less than 18 years of age or less than 21 years of age and enrolled as a full-time student at an educational institution.

f. A veteran of more than one qualifying war period is entitled to only one military service tax exemption, which shall be the greater of the two exemptions. (1946 O.A.G. 71)

g. The person claiming a military service tax exemption must be an Iowa resident. However, the veteran need not be an Iowa resident if such person's exemption is claimed by a qualified individual enumerated in Iowa Code section 426A.12. (1942 O.A.G. 140)

h. A person who has a life estate interest in property may claim a military service tax exemption on such property. (1946 O.A.G. 155; 1976 O.A.G. 125)

i. A remainder is not eligible to receive a military service tax exemption on property to which a remainder interest is held until expiration of the life estate. (1946 O.A.G. 155)

j. A military service tax exemption shall not be allowed on a mobile home which is not assessed as real estate. (1962 O.A.G. 450)

k. A divorced person may not claim the military service tax exemption of a former spouse who qualifies for the exemption. (Letter O.A.G. August 8, 1961)

l. A surviving spouse of a qualified veteran, upon remarriage, loses the right to claim the deceased veteran's military exemption as the surviving spouse is no longer an unremarried surviving spouse of the qualified veteran. (1950 O.A.G. 44)

m. An annulled marriage is considered to have never taken place and the parties to such a marriage are restored to their former status. Neither party to an annulled marriage can thereafter be considered a spouse or surviving spouse of the other party for purposes of receiving the military service tax exemption. (Op. Att'y. Gen. 61-8-10(L))

n. No military service tax exemption shall be allowed on property that is owned by a corporation, except for a family farm corporation where a shareholder occupies a homestead as defined in Iowa Code section 425.11(1), partnership, company or any other business or nonbusiness organization. (1938 O.A.G. 441)

o. In the event both a husband and wife are qualified veterans, they may each claim their military service tax exemption on their jointly owned property. (1946 O.A.G. 154) If property is solely owned by one spouse, the owner spouse may claim both exemptions on the property providing the nonowner spouse's exemption is not claimed on other property.

p. No military service tax exemption shall be allowed if on July 1 of the claim year, the claimant or the claimant's unremarried surviving spouse is no longer the owner of the property upon which the exemption was claimed.

q. A person shall not be denied a military service tax exemption even though the property upon which the exemption is claimed has been pledged to another person as security for a loan. (1960 O.A.G. 263)

r. A qualified veteran who has conveyed property to a trustee shall be eligible to receive a military service tax exemption on such property providing the trust agreement gives the claimant a beneficial interest in the property. (1962 O.A.G. 434)

s. A person owning property pursuant to Iowa Code chapter 499A or 499B is eligible for a military service tax exemption. (1978 O.A.G. 78-2-5; 1979 O.A.G. 79-12-2)

t. The person claiming the exemption shall have recorded in the office of the county recorder evidence of property ownership and either the military certificate of satisfactory service or, for a current member of the Iowa national guard or a member of the reserve forces of the United States, the veteran's retirement points accounting statement issued by the armed forces of the United States or the state adjutant general. The military certificate of satisfactory service shall be considered a confidential record pursuant to Iowa Code section 22.7.

u. An heir of property that is part of an estate in the process of administration is considered an owner of the property and is eligible for the military exemption.

80.2(3) Application of exemption.

a. When the owner of homestead property is also eligible for a military service tax exemption and claims the exemption on the homestead property, the military service tax exemption shall be applied prior to the homestead tax credit when computing net property tax. (*Ryan v. State Tax Commission*, 235 Iowa 222, 16 N.W.2d 215)

b. If a portion of the property upon which a valid military service tax exemption was claimed is sold on or before July 1 of the year in which the exemption is claimed, the seller shall be allowed a military service tax exemption on that portion of the property which is retained by the seller on July 1. The purchaser is also eligible to receive a military service tax exemption on that portion of the property which was purchased, provided the purchaser is qualified for the exemptions and files a valid application for the exemption on or before July 1 of the claim year.

c. A military service tax exemption may be allowed even though the taxes levied on the property upon which the exemption is claimed have been suspended by the board of supervisors. (1938 O.A.G. 288)

d. A military service tax exemption shall not be allowed if the taxes levied on the property upon which the exemption is claimed have been canceled or remitted by the board of supervisors. (1956 O.A.G. 78)

e. The county treasurer shall, pursuant to Iowa Code section 25B.7, be required to extend to the claimant only that portion of the exemption estimated by the department to be funded by the state appropriation.

This rule is intended to implement Iowa Code sections 22.7, 35.1, and 35.2 and chapter 426A.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.3(427) Pollution control and recycling property tax exemption.

80.3(1) To secure an exemption for pollution control or recycling property, an application must be filed with the assessing authority on or before February 1 of the assessment year for which the exemption is first claimed. It is the responsibility of the taxpayer to secure the necessary certification from the department of natural resources in sufficient time to file the application for exemption with the assessing authority on or before February 1. An exemption for new pollution control or recycling property can be secured by filing an application with the assessing authority by February 1 of the assessment year following the year in which the property is installed or constructed. If no application is timely filed in that year, the property will first qualify for exemption in any subsequent year in which an application is filed with the assessing authority on or before February 1.

80.3(2) In the event February 1 falls on either a Saturday or Sunday, applications for the exemption may be filed the following Monday.

80.3(3) In the event February 1 falls on either a Saturday or Sunday, applications submitted by mail shall be accepted if postmarked on the following Monday.

80.3(4) No exemption shall be allowed unless the application is signed by the owner of the property or the owner's qualified designee.

80.3(5) An assessor may not refuse to accept an application for a pollution control exemption if timely filed and if the necessary certification has been obtained from the department of natural resources.

80.3(6) The sale, transfer, or lease of property does not affect its eligibility for exemption as long as the requirements of Iowa Code subsection 427.1(19) and rule 701—80.3(427), Iowa Administrative Code, are satisfied.

80.3(7) No exemption shall be allowed unless the department of natural resources has certified that the primary use of the property for which the taxpayer is seeking an exemption is to control or abate air or water pollution or to enhance the quality of any air or water in this state or that the primary use of the property is for recycling. Recycling property is property used primarily in the manufacturing process and resulting directly in the conversion of waste glass, waste plastic, wastepaper products, waste paperboard, or waste wood products into new raw materials or products composed primarily of recycled material.

80.3(8) In the event that qualified property is assessed as a unit with other property not having a pollution control or recycling function, the exemption shall be limited to the increase in the assessed valuation of the unit which is attributable to the pollution control or recycling property.

EXAMPLE

Valuation of unit with pollution control or recycling property	\$100,000
Valuation of unit without pollution control or recycling property	<u>50,000</u>
Allowable amount of exemption	\$ 50,000

80.3(9) The value of property to be exempt from taxation shall be the fair and reasonable market value of such property as of January 1 of each year for which the exemption is claimed, rather than the original cost of such property.

80.3(10) An assessor shall not exempt property from taxation without first assessing the property for taxation and subsequently receiving an application for tax exemption from the taxpayer.

This rule is intended to implement Iowa Code Supplement section 427.1(19) as amended by 2006 Iowa Acts, House File 2633, and Iowa Code sections 427.1(18) and 441.21(1)(i).
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.4(427) Low-rent housing for the elderly and persons with disabilities.

80.4(1) As used in Iowa Code subsection 427.1(21), the term “nonprofit organization” means an organization, no part of the net income of which is distributable to its members, directors or officers.

80.4(2) As used in Iowa Code subsection 427.1(21), the term “low-rent housing” means housing the rent for which is less than that being received or which could be received for similar properties on the open market in the same assessing jurisdiction. Federal rent subsidies received by the occupant shall be excluded in determining whether the rental fee charged meets this definition.

80.4(3) As used in Iowa Code subsection 427.1(21), the term “elderly” means any person at least 62 years of age.

80.4(4) As used in Iowa Code subsection 427.1(21), the term “persons with physical or mental disabilities” means a person whose physical or mental condition is such that the person is unable to engage in substantial gainful employment.

80.4(5) The exemption granted in Iowa Code subsection 427.1(21) extends only to property which is owned and operated, or controlled, by a nonprofit organization recognized as such by the Internal Revenue Service. Property owned and operated, or controlled, by a private person is not eligible for exemption under Iowa Code subsection 427.1(21).

80.4(6) The income of persons living in housing eligible for exemption under Iowa Code subsection 427.1(21) shall not be considered in determining the property’s taxable status.

80.4(7) An organization seeking an exemption under Iowa Code subsection 427.1(21) shall file a statement with the local assessor pursuant to Iowa Code subsection 427.1(14).

80.4(8) The exemption authorized by Iowa Code subsection 427.1(21) extends only until the final payment due date of the borrower’s original low-rent housing development mortgage on the property or

until the borrower's original low-rent housing development mortgage is paid in full or expires, whichever is sooner. If the original mortgage is refinanced, the exemption shall apply only until what would have been the final payment due date under the original mortgage or until the refinanced mortgage is paid in full or expires, whichever is sooner. This exemption for refinanced projects applies to those projects refinanced on or after January 1, 2005.

80.4(9) In complying with the requirements of Iowa Code subsection 427.1(14), the provisions of rule 701—78.4(427) shall apply.

80.4(10) In determining the taxable status of property for which an exemption is claimed under Iowa Code subsection 427.1(21), the appropriate assessor shall follow rules 701—78.1(427,441) to 701—78.5(427).

80.4(11) If a portion of a structure is used to provide low-rent housing units to elderly persons and persons with disabilities and the other portion is used to provide housing to persons who are not elderly or disabled, the exemption for the property on which the structure is located shall be limited to that portion of the structure used to provide housing to the elderly and disabled. Vacant units and projects under construction that are designated for use to provide housing to elderly and disabled persons shall be considered as being used to provide housing to elderly and disabled persons. The valuation exempted shall bear the same relationship to the total value of the property as the area of the structure used to provide low-rent housing for the elderly and persons with disabilities bears to the total area of the structure unless a better method for determining the exempt valuation is available. The valuation of the land shall be exempted in the same proportion.

80.4(12) The property tax exemption provided in Iowa Code subsection 427.1(21) shall be based upon occupancy by elderly or persons with disabilities as of July 1 of the assessment year. However, nothing in this subrule shall prevent the taxation of such property in accordance with the provisions of Iowa Code section 427.19.

This rule is intended to implement Iowa Code section 427.1(14) and Supplement section 427.1(21).
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.5(427) Speculative shell buildings.

80.5(1) *Authority of city council and board of supervisors.* A city council or county board of supervisors may enact an ordinance granting property tax exemptions for value added as a result of new construction of speculative shell buildings or additions to existing buildings or structures, or may exempt the value of an existing building or structure being reconstructed or renovated and the value of the land on which the building or structure is located, if the reconstruction or renovation constitutes complete replacement or refitting of an existing building or structure owned by community development organizations, not-for-profit cooperative associations under Iowa Code chapter 499A, or for-profit entities. See Iowa Code Supplement section 427.1(27) as amended by 2008 Iowa Acts, Senate File 2419, for definitions. The value added exemption for new construction includes reconstruction and renovation constituting complete replacement or refitting of existing buildings and structures if the reconstruction or renovation is required due to economic obsolescence, or to implement industry standards in order to competitively manufacture or process products, or to market a building or structure as a speculative shell building. The exemption for reconstruction or renovation not constituting new construction does not have to meet these requirements but has to meet only the requirements set forth in the definition of a speculative shell building. The council or board in the ordinance authorizing the exemption shall specify if the exemption will be allowed to community development organizations, not-for-profit cooperative associations under Iowa Code chapter 499B, or for-profit entities, and the length of time the exemption is to be allowed.

80.5(2) *Eligibility for exemption.* The value added by new construction, reconstruction, or renovation and first assessed prior to January 1 of the calendar year in which an ordinance authorizing a tax exemption becomes effective is not eligible for exemption. However, the value added as of January 1 of the calendar year in which the ordinance becomes effective is eligible for exemption if the ordinance is in effect on February 1 of that calendar year. This subrule does not apply to new construction projects having received prior approval. For reconstruction and renovation projects not

constituting new construction, the ordinance authorizing the exemption must be in effect by February 1 of the year the project commences for the exemption to be allowable in the subsequent assessment year.

80.5(3) Application for exemption.

a. A community development organization, not-for-profit cooperative association, or for-profit entity must file an application for exemption with the assessor between January 1 and February 1, inclusive, of the year in which the value added for new construction is first assessed for the exemption to be allowable for that assessment year. For reconstruction and renovation projects not constituting new construction, an application for exemption must be filed by February 1 of the assessment year in which the project commences for the exemption to be allowable the following assessment year. If approved, no application for exemption is required to be filed in subsequent years for the value added exemption or the reconstruction or renovation exemption not constituting new construction. An application cannot be filed if a valid ordinance has not been enacted. If an application is not filed by February 1 of the year in which the value added for new construction is first assessed, the organization, association, or entity cannot receive, in subsequent years, the exemption for that value added. However, if the organization, association, or entity has received prior approval, the application must be filed by February 1 of the year in which the total value added for the new construction is first assessed.

b. If February 1 falls on either a Saturday or Sunday, applications for exemption may be filed the following Monday.

c. Applications submitted by mail must be accepted if postmarked on or before February 1 or, if February 1 falls on either a Saturday or Sunday, a postmark date of the following Monday is acceptable.

80.5(4) Prior approval. To obtain prior approval for a project, the proposal of the organization, association, or entity must be approved by a specific ordinance addressing the proposal and passed by the city council or board of supervisors. The original ordinance providing for the exemption does not constitute the granting of prior approval for a project. If an organization, association, or entity has obtained a prior approval ordinance from a city council or board of supervisors, the exemption for new construction cannot be obtained until the year in which all value added for the completed project is first assessed. Reconstruction and renovation projects constituting new construction must receive prior approval to qualify for exemption. Reconstruction and renovation projects that do not constitute new construction need not receive prior approval.

80.5(5) Termination of exemption. The exemption continues until the property is leased or sold, the time period for the exemption specified in the ordinance elapses, or the exemption is terminated by ordinance of the city council or board of supervisors. If the ordinance authorizing the exemption is repealed, all existing exemptions continue until their expiration and any projects having received prior approval for exemption for new construction are to be granted an exemption upon completion of the project. If the shell building or any portion of the shell building is leased or sold, the exemption for new construction shall not be allowed on that portion of the shell building leased or sold in subsequent years. If the shell building or any portion of the shell building is leased or sold, the exemption for reconstruction or renovation not constituting new construction shall not be allowed on that portion of the shell building leased or sold and a proportionate share of the land on which the shell building is located in subsequent years.

This rule is intended to implement Iowa Code Supplement section 427.1(27) as amended by 2008 Iowa Acts, Senate File 2419.

701—80.6(427B) Industrial property tax exemption.

80.6(1) Authority of city council and board of supervisors. A partial exemption ordinance enacted pursuant to Iowa Code section 427B.1 shall be available to all qualifying property. A city council or county board of supervisors does not have the authority to enact an ordinance granting a partial exemption to only certain qualifying properties (1980 O.A.G. 639). As used in this rule, the term “qualifying property” means property classified and assessed as real estate pursuant to 701—subrule 71.1(6), warehouses and distribution centers, research service facilities, and owner-operated cattle facilities. “Warehouse” means a building or structure used as a public warehouse for the storage of goods pursuant to Iowa Code sections 554.7101 to 554.7603, except that it does not mean a building

or structure used primarily to store raw agricultural products or from which goods are sold at retail. "Distribution center" means a building or structure used primarily for the storage of goods which are intended for subsequent shipment to retail outlets. Distribution center does not mean a building or structure used primarily to store raw agricultural products, used primarily by a manufacturer to store goods to be used in the manufacturing process, used primarily for the storage of petroleum products, or used for the retail sale of goods. A "research service facility" is one or more buildings devoted primarily to research and development activities or corporate research services. Research and development activities include, but are not limited to, the design and production or manufacture of prototype products for experimental use. A research service facility does not have as its primary purpose the providing of on-site services to the public. "Owner-operated cattle facility" means a building or structure used primarily in the raising of cattle and which is operated by the person owning the facility.

80.6(2) *Prior approval.* Only upon enactment of a partial property tax exemption ordinance in accordance with Iowa Code section 427B.1 may a city council or board of supervisors enact a prior approval ordinance for pending individual projects in accordance with Iowa Code section 427B.4. To obtain prior approval for a project, a property owner's proposal must be approved by a specific ordinance addressing the proposal and passed by the city council or board of supervisors. The original ordinance providing for the partial exemption does not constitute the granting of prior approval for a project. Also, prior approval for a project can only be granted by ordinance of the city council or board of supervisors; an official or representative of a city or county does not have the independent authority to grant prior approval for a project. If a taxpayer has obtained a prior approval ordinance from a city council or board of supervisors, the partial exemption cannot be obtained until the year in which all value added for the project is first assessed. (1980 O.A.G. 639)

80.6(3) *Repeal of ordinance.* A new construction project having received prior approval for exemption in accordance with subrule 80.6(2) shall be granted such exemption upon completion of the project even if the city council or board of supervisors subsequently repeals the ordinance passed in accordance with Iowa Code section 427B.1. (1980 O.A.G. 639)

80.6(4) *Annexation of property previously granted exemption.* A partial property tax exemption which has been granted and is in existence shall not be discontinued or disallowed in the event that the property upon which such exemption has been previously granted is located in an area which is subsequently annexed by a city or becomes subject to the jurisdiction of a county in which an ordinance has not been passed by the city council or county board of supervisors allowing such exemptions within that jurisdiction. The existing exemption shall continue until its expiration.

80.6(5) *Eligibility for exemption.*

a. The value added by new construction or reconstruction and first assessed prior to January 1 of the calendar year in which an ordinance authorizing a partial property tax exemption becomes effective, and new machinery and equipment assessed as real estate acquired and utilized prior to January 1 of the calendar year in which the ordinance or resolution becomes effective, are not eligible for exemption. However, the value added as of January 1 of the calendar year in which the ordinance becomes effective is eligible for exemption if the ordinance is in effect prior to February 1 of that calendar year and if all other eligibility and application requirements are satisfied.

EXAMPLE 1: A \$1,000,000 new construction project on qualifying property is begun in July 1984. \$500,000 in value of the partially completed project is completed in 1984 and first assessed as of January 1, 1985. The project is completed in 1985 adding an additional value of \$500,000 which is first assessed as of January 1, 1986, bringing the total assessed value of the completed project to \$1,000,000 as of the January 1, 1986, assessment.

A city ordinance authorizing the partial exemption program is passed and becomes effective January 15, 1987. This project is not eligible for a property tax exemption for any value added as a result of the new construction project.

EXAMPLE 2: Assuming the same factual situation as in Example 1, except that the ordinance authorizing the partial exemption program becomes effective on January 15, 1986, the \$500,000 in assessed value added as of the January 1, 1986, assessment is eligible for the partial exemption if an application is filed with the assessor between January 1 and February 1, 1986, inclusive.

EXAMPLE 3: Assuming the same factual situation as in Example 1, except that the ordinance authorizing the partial exemption program becomes effective on February 15, 1986. Since the statutory application filing deadline is February 1, no value added and first assessed as of January 1, 1986, is eligible for a partial exemption. The project in this example would receive no exemption for any value added as a result of the new construction.

This subrule does not apply to new construction projects having received prior approval in accordance with subrule 80.6(2).

b. New machinery and equipment assessed as real estate shall be eligible for partial exemption only if used primarily in the manufacturing process. For example, computer equipment used primarily to maintain payroll records would not be eligible for exemption, whereas computer equipment utilized primarily to control or monitor actual product assembly would be eligible.

c. If any other property tax exemption is granted for the same assessment year for all or any of the property which has been granted a partial exemption, the partial property tax exemption shall be disallowed for the year in which the other exemption is actually received.

d. Only qualifying property is eligible to receive the partial property tax exemption (O.A.G. 81-2-18).

e. A taxpayer cannot receive the partial property tax exemption for industrial machinery or equipment if the machinery or equipment was previously assessed in the state of Iowa. Industrial machinery and equipment previously used in another state may qualify for the partial exemption if all criteria for receiving the partial exemption are satisfied.

f. Industrial machinery and equipment is eligible to receive the partial property tax exemption if it changes the existing operational status other than by merely maintaining or expanding the existing operational status. This rule applies whether the machinery and equipment is placed in a new building, an existing building, or a reconstructed building. If new machinery is used to produce an existing product more efficiently or to produce merely a more advanced version of the existing product, the existing operational status would only be maintained or expanded and the machinery would not be eligible for the exemption. However, if the new machinery produces a product distinctly different from that currently produced, the existing operational status has been changed.

80.6(6) *Application for exemption.*

a. An eligible property owner shall file an application for exemption with the assessor between January 1 and February 1, inclusive, of the year for which the value added is first assessed for tax purposes. The amount of “actual value added” shall be the difference between the assessed value of the property on January 1 of the year value is added to the property and the assessed value of the property the following assessment year. An application cannot be filed if a valid ordinance has not been enacted in accordance with Iowa Code section 427B.1 (O.A.G. 82-3-5). If an application is not filed by February 1 of the year for which the value added is first assessed, the taxpayer cannot receive in subsequent years the partial exemption for that value added (O.A.G. 82-1-17). However, if a taxpayer has received prior approval in accordance with Iowa Code section 427B.4 and subrule 80.6(2), the application is to be filed by not later than February 1 of the year for which the total value added is first assessed as the approved completed project.

b. In the event that February 1 falls on either a Saturday or Sunday, applications for the industrial property tax exemption may be filed the following Monday.

c. Applications submitted by mail shall be accepted if postmarked on or before February 1, or in the event that February 1 falls on either a Saturday or Sunday, a postmark date of the following Monday shall be accepted.

80.6(7) *Change in use of property.* If property ceases to be used as qualifying property, no partial exemption shall be allowed as of January 1 of the year following the calendar year in which the change in use takes place or for subsequent years. If property under construction ceases to be constructed for use as qualifying property, no partial exemption shall be allowed as of January 1 of the year following the calendar year in which this cessation occurs. However, such a change in the use of the property

does not affect the validity of any partial exemption received for the property while it was used or under construction as qualifying property.

This rule is intended to implement Iowa Code sections 427B.1 to 427B.7.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.7(427B) Assessment of computers and industrial machinery and equipment.

80.7(1) Computers and industrial machinery and equipment are to be assessed at 30 percent of the property's net acquisition cost through the 1998 assessment year, 22 percent of the net acquisition cost in the 1999 assessment year, 14 percent of the net acquisition cost in the 2000 assessment year, and 6 percent of the net acquisition cost in the 2001 assessment year. The property will be exempt from tax beginning with the 2002 assessment year.

Computers and industrial machinery and equipment acquired after December 31, 1993, and not previously assessed in Iowa, are exempt from tax.

Computers and industrial machinery and equipment assessed pursuant to Iowa Code section 427B.17 are not eligible to receive the partial property tax exemption under Iowa Code sections 427B.1 to 427B.7.

80.7(2) Computers assessed under Iowa Code section 427A.1(1)“j” are limited to the percent of the computer's net acquisition cost as provided in Iowa Code section 427B.17 regardless of the classification of the real estate in which the computer is located.

80.7(3) For computers and industrial machinery and equipment, the net acquisition cost shall be the acquired cost of the property.

80.7(4) Computation of taxpayer's value. Assume a machine is acquired at a net acquisition cost of \$10,000. Assume also that the actual depreciated value of the machine is \$9,000. The value on which taxes would be levied would be limited to \$3,000 ($\$10,000 \times .30$). This percent will change over the course of the phaseout of the tax.

80.7(5) If all or a portion of the value of property assessed pursuant to Iowa Code section 427B.17 is eligible to receive an exemption from taxation, the amount of value to be exempt shall be subtracted from the net acquisition cost of the property before the taxpayer's value prescribed in Iowa Code section 427B.17 is determined. For example, if property has a net acquisition cost of \$30,000 and is eligible to receive a pollution exemption for \$15,000 of value, the taxable net acquisition cost would be \$15,000 and the taxpayer's value would be \$4,500 ($\$15,000 \times .30$). This percent will change over the course of the phaseout of the tax.

80.7(6) In the event the actual depreciated fair market value of property assessed pursuant to Iowa Code section 427B.17 is less than the valuation determined as a percent of the net acquisition cost of the property as provided in Iowa Code section 427B.17, the taxpayer's assessed value would be equal to the actual depreciated fair market value of the property.

80.7(7) Property ineligible for phaseout and exemption. Computers and industrial machinery and equipment, the taxes on which are used to fund a new jobs training project approved on or before June 30, 1995, do not qualify for the exemption provided in Iowa Code section 427B.17(2) nor the phaseout contained in Iowa Code section 427B.17(3) until the assessment year following the calendar year in which the funding obligations have been retired, refinanced, or refunded. At that time, the property will be subject to phaseout if acquired prior to January 1, 1994, or exempt from tax if acquired after December 31, 1993, and not previously assessed in Iowa. See subrule 80.7(1). The community college must notify the assessor by February 15 of each assessment year if the community college will be using a taxpayer's machinery and equipment taxes to finance a project that year. In any year in which the community college does rely on a taxpayer's machinery and equipment taxes for funding, the phaseout and exemption will not apply to that taxpayer that year.

80.7(8) County replacement.

a. For fiscal years beginning July 1, 1996, and ending June 30, 2001, the county replacement amount shall be equal to the difference between the assessed value of computers and industrial machinery and equipment as of January 1 of the previous calendar year and the assessed value of such property as of January 1, 1994, multiplied by the tax levy rate for that fiscal year. If there is an increase in valuation (the January 1, 1994, value is less), there will be no replacement for that fiscal year.

b. For fiscal years beginning July 1, 2001, and ending June 30, 2004, the county replacement amount shall be equal to the difference between the assessed value of computers and industrial machinery and equipment as of January 1 of the previous calendar year and the assessed value of such property as of January 1, 1994, less, if any, the increase in the assessed value of commercial and industrial property as of January 1 of the previous calendar year and the assessed value of such property as of January 1, 1994, multiplied by the tax levy rate for that fiscal year. If the calculation results in a negative amount, there will be no replacement for that fiscal year.

c. The replacement amounts shall be determined for each taxing district and a replacement claim summarizing the total amounts for the county prepared and submitted by the county auditor to the department of revenue by September 1 of each year. The department shall pay the replacement amount to the county treasurer in September and March of each year.

d. No replacement is allowable if a community college elects not to fund a new jobs training project with a tax on computers and industrial machinery and equipment.

This rule is intended to implement Iowa Code chapter 427B as amended by 2003 Iowa Acts, Senate File 453.

701—80.8(404) Urban revitalization partial exemption.

80.8(1) *Area designated.* An area containing only one building or structure cannot be designated as an urban revitalization area (1980 O.A.G. 786).

80.8(2) *Prior approval.* To obtain prior approval for a project, a property owner's proposal must be approved by a specific resolution addressing the proposal and passed by the city council or county board of supervisors. The original ordinance providing for the urban revitalization area does not constitute the granting of prior approval for any particular project. Also, prior approval for a project can only be granted by resolution of the city council or county board of supervisors; an official or representative of a city or county does not have the independent authority to grant prior approval for a project.

80.8(3) *Eligibility for exemption.* Improvements made as a result of a project begun more than one year prior to a city's or county's adoption of an urban revitalization ordinance are not eligible to receive the partial exemption even though some of the improvements are added during the time the area was designated as an urban revitalization area. For a project commenced within one year prior to the adoption of an urban revitalization ordinance, the partial exemption can be allowed only for those improvements constructed on or after the effective date of the ordinance. (1982 O.A.G. 358)

80.8(4) *Minimum value added.* Once the minimum value added required by Iowa Code section 404.3(7) has been assessed, any amount of additional value added to the property in subsequent years is eligible for the partial exemption. The value added subject to partial exemption for the first year for which an exemption is claimed and allowed shall include value added to the property for a previous year even if the value added in the previous year was not by itself sufficient to qualify for the partial exemption.

For example, assume that an urban revitalization project is begun on commercial property having an actual value of \$50,000 as of January 1, 1984. As a result of improvements made during 1984, the actual value of the property as of January 1, 1985, is determined to be \$55,000. Additional improvements made during 1985 increase the actual value of the property to \$70,000 for the 1986 assessment. In this example, no partial exemption can be allowed for 1985 since the value added for that year is less than 15 percent of the actual value of the property prior to construction of the improvements. A partial exemption can be allowed for 1986 and subsequent years for the \$20,000 value added in both 1985 and 1986, providing a valid application for the partial exemption is filed between January 1, 1986, and February 1, 1986, inclusive.

80.8(5) *Application for partial exemption.*

a. *Prior approval.* If a taxpayer has secured a prior approval resolution from the city council or the county board of supervisors, the partial exemption cannot be obtained until the year in which all value added for the project is first assessed. A partial exemption can be allowed only if an application is filed between January 1 and February 1, inclusive, of the year in which all value added for the project is first assessed. If an application is not filed during that period, no partial exemption can be allowed for that

year or any subsequent year. The submission to the city council or the county board of supervisors of a proposal to receive prior approval does not by itself constitute an application for the partial exemption.

For example, assume a city council or county board of supervisors approves a prior approval resolution in April 1984 for a revitalization project to be completed in September 1986. Assuming all construction on the project is completed in 1986, no partial exemption can be allowed until 1987 since that would be the year in which all value added for the project is first assessed. To receive the partial exemption, a valid application would have to be filed between January 1, 1987, and February 1, 1987, inclusive.

b. No prior approval. If a project has not received a prior approval resolution, a taxpayer has the option of receiving the partial exemption beginning with any year in which value is added to the property or waiting until all value added to the property is first assessed in its entirety. To secure a partial exemption prior to the completion of the project, an application must be filed between January 1 and February 1, inclusive, in each year for which the exemption is claimed.

For example, assume a revitalization project is begun in June 1984 and completed in September 1985, that no prior approval resolution for the project has been approved, and that a ten-year exemption period has been selected. Assume further that as a result of construction on the project, value is added for the assessment years 1985 and 1986. If an application is filed between January 1, 1985, and February 1, 1985, inclusive, a partial exemption could be allowed for the value added for 1985 beginning with the 1985 assessment and ending with the 1994 assessment. If an application is filed between January 1, 1986, and February 1, 1986, inclusive, a partial exemption could be allowed for the value added for 1986 beginning with the 1986 assessment and ending with the 1995 assessment. The partial exemption allowable for the years 1986 through 1995 would be against the value added for 1986 as a result of improvements made during calendar year 1985.

In the example above, the taxpayer may elect not to file an application for the partial exemption in 1985. In this situation, if an application is filed between January 1, 1986, and February 1, 1986, inclusive, a partial exemption could be allowed for the total value added for 1985 and 1986 and would apply to assessments for the years 1986 through 1995.

c. Filing deadline. If February 1 falls on a Saturday or Sunday, an application for the partial exemption may be filed the following Monday. Applications submitted by mail must be postmarked on or before February 1, or on or before the following Monday if February 1 falls on a Saturday or Sunday.

d. Extended filing deadline. The exemption is allowable for the total number of years in the exemption schedule if a claim for exemption is filed within two years of the original February 1 filing deadline. The city council or county board of supervisors may by resolution provide that an application for the partial exemption can be filed by February 1 of any assessment year the area is designated as an urban revitalization area. The exemption shall be allowed for the same number of years remaining in the exemption schedule selected as would have been remaining had the claim for exemption been timely filed.

80.8(6) Value exempt. The partial exemption allowed for a year in which an application is filed shall apply to the value added and first assessed for that year and any value added to the project and assessed for a preceding year or years and for which a partial exemption had not been received.

80.8(7) Minimum assessment. The partial exemption shall apply only to the value added in excess of the actual value of the property as of the year immediately preceding the year in which value added was first assessed. If the actual value of the property is reduced for any year during the period in which the partial exemption applies, any reduction in value resulting from the partial exemption shall not reduce the assessment of the property below its actual value as of January 1 of the assessment year immediately preceding the year in which value added was first assessed. This subrule applies regardless of whether the reduction in actual value is made by the assessor, the board of review, a court order, or an equalization order of the director of revenue.

80.8(8) Value added. As used in this rule, the term "value added" means the amount of increase in the actual value of real estate directly attributable to improvements made as part of a revitalization project. The amount of "actual value added" shall be the difference between the assessed value of the property on

January 1 of the year value is added to the property and the assessed value of the property the following assessment year. "Value added" does not include any increase in actual (market) value attributable to that portion of the real estate assessed prior to the year in which revitalization improvements are first assessed. The sales price of the property rather than the assessed value of the property may be used in determining the percentage increase required to qualify for exemption if the improvements were begun within one year of the date the property was purchased.

80.8(9) *Repeal of ordinance.* An urban revitalization project which has received proper prior approval shall be eligible to receive the partial exemption following completion of the project even if the city council or county board of supervisors subsequently repeals the urban revitalization ordinance before improvements in the project are first assessed (1980 O.A.G. 639).

This rule is intended to implement Iowa Code chapter 404 as amended by 2002 Iowa Acts, House File 2622.

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.9(427C,441) Forest and fruit-tree reservations.

80.9(1) *Determination of eligibility for exemption.* Property for which an application for exemption as a forest or fruit-tree reservation has been filed shall be inspected by the assessor or county conservation board. The county board of supervisors designates whether all inspections in the county are to be made by the assessor, including any city assessor, or by the county conservation board. When appropriate, aerial photographs may be used in place of an on-site inspection of the property. The assessment or exemption of the property is to be based upon criteria established by the state conservation commission and findings obtained by the inspection of the property or the examination of aerial photographs of the property.

80.9(2) *Application for exemption.*

a. An application for exemption must be filed with the appropriate assessor between January 1 and February 1, inclusive, of the assessment year for which the exemption is first claimed. If the inspection of the property is to be made by the county conservation board, the assessor shall forward the application to the board for its recommendation. Once the application has been accepted, the exemption is applicable to the current and subsequent assessment years and no further application shall be required so long as the property remains eligible for the exemption.

b. If February 1 falls on a Saturday or Sunday, an application for exemption may be filed the following Monday.

c. An application shall be considered to be timely filed if postmarked on or before February 1 or the following Monday if February 1 falls on a Saturday or Sunday.

80.9(3) *Notification to property owner.* If the property is to be inspected by the county conservation board, the board shall make every effort to submit its recommendation to the assessor in sufficient time for the assessor to notify the claimant by April 15. The assessor shall notify the claimant by April 15 of the disposition of the application for exemption. If because of the date on which an application is filed a determination of eligibility for the exemption cannot be made in sufficient time for notification to be made by April 15, the assessor shall assess the property and notify the property owner of the inability to act on the application. The notification shall contain the actual value and classification of the property and a statement of the claimant's right of appeal to the local board of review.

80.9(4) *Appeal of eligibility determination.* If a property for which a claim for exemption as a forest or fruit-tree reservation is assessed for taxation, the property owner may appeal the assessment to the board of review under Iowa Code section 441.37.

80.9(5) *Valuation of property.* For each assessment year for which property is exempt as a forest or fruit-tree reservation, the assessor shall determine the actual value and classification that would apply to the property were it assessed for taxation that year. In any year for which the actual value or classification of property so determined is changed, the assessor shall notify the property owner pursuant to Iowa Code sections 441.23, 441.26 and 441.28.

80.9(6) Recapture tax.

a. Assessment of property. If the county conservation board or the assessor determines a property has ceased to meet the eligibility criteria established by the state conservation commission, the property shall be assessed for taxation and subject to the recapture tax. The property shall be subject to taxes levied against the assessment made as of January 1 of the calendar year in which the property ceased to qualify for exemption. In addition, the property shall be subject to the tax which would have been levied against the assessment made as of January 1 of each of the five preceding calendar years for which the property received an exemption.

b. Assessment procedure. If the determination that a property has ceased to be eligible for exemption is made by the assessor by April 15, the assessor shall notify the property owner of the assessment as of January 1 of the year in which the determination is made in accordance with Iowa Code sections 441.23, 441.26, and 441.28. The assessment of the property for any of the five preceding years and for the current year, if timely notice by April 15 cannot be given, shall be by means of an omitted assessment as provided in Iowa Code section 443.6 (*Talley v. Brown*, 146 Iowa 360, 125 N.W. 243(1910)). Appeal of the omitted assessment may be taken pursuant to Iowa Code sections 443.7 and 443.8.

c. Computation of tax. The county auditor shall compute the tax liability for each year for which an assessment has been made pursuant to subrule 80.9(6), paragraph “b.” The tax liability shall be the amount of tax that would have been levied against each year’s assessment had the property not received the exemption. In computing the tax, the valuations established by the assessor shall be adjusted to reflect any equalization order or assessment limitation percentage applicable to each year’s assessment.

d. Entry on tax list. The tax liability levied against assessments made as of January 1 of any year preceding the calendar year in which the property ceased to qualify for exemption shall be entered on the tax list for taxes levied against all assessments made as of January 1 of the year immediately preceding the calendar year in which the property ceased to qualify for exemption. However, if those taxes have already been certified to the county treasurer, the recapture taxes shall be entered on the tax list for taxes levied against assessments made as of January 1 of the year in which the property ceased to qualify for exemption. The tax against the assessment made as of January 1 of the year in which the property ceased to qualify for exemption shall be levied at the time taxes are levied against all assessments made as of that date.

e. Delinquencies. Recapture taxes shall not become delinquent until the time when all other unpaid taxes entered on the same tax list become delinquent.

f. Exceptions to recapture tax.

(1) Fruit-tree or forest reservations. Property which has received an exemption as a fruit-tree or forest reservation is not subject to the recapture tax if the property is maintained as a fruit-tree or forest reservation for at least five full calendar years following the last calendar year for which the property was exempt as a fruit-tree or forest reservation.

(2) Property which has been owned by the same person or the person’s direct descendants or antecedents for at least ten years prior to the time the property ceases to qualify for exemption shall not be subject to the recapture tax.

(3) Property described in subparagraphs 80.9(6)“f”(1) and 80.9(6)“f”(2) is subject to assessment as of January 1 of the calendar year in which the property ceases to qualify for exemption.

This rule is intended to implement Iowa Code chapter 427C as amended by 2001 Iowa Acts, House File 736, and Iowa Code section 441.22.

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.10(427B) Underground storage tanks.

80.10(1) Authority of city councils and county boards of supervisors. A city council or county board of supervisors may provide by ordinance to grant property tax credits to small business owners for payment of underground storage tank cleanup costs. The ordinance is to designate the period of time over which the credit is to be granted (not to exceed ten years) and the percentage of credit to be granted each

year. If the ordinance is repealed, existing credits are to continue through their designated expiration date. A small business means a business with gross receipts of less than \$500,000 per year.

80.10(2) Application for credit. The small business owner is required to file an application for credit with the respective city council or county board of supervisors by September 30 of the year following the calendar year in which cleanup costs were paid and each succeeding year the credit is applicable. The application for credit shall be prescribed by the director of revenue and shall contain, but not be limited to, the small business owner's cleanup costs and gross receipts for the most recent tax year.

80.10(3) Allowance of credit. Credits granted by a county board of supervisors are applicable only to property located outside the corporate limits of a city and credits granted by a city council are only applicable to property located within the corporate limits of the city. The amount of the credit granted cannot exceed the small business owner's cleanup costs nor the amount of city or county taxes paid on the property where the underground storage tank is located for any fiscal year the credit is applicable. Upon approval of the application for credit, the city council or county board of supervisors shall direct its city clerk or county treasurer to reimburse the small business owner in the amount of the designated credit.

This rule is intended to implement Iowa Code sections 427B.20 to 427B.22.

701—80.11(425A) Family farm tax credit.

80.11(1) Eligibility for credit. Generally, the family farm tax credit is only intended to benefit tracts of agricultural land that are owned by certain individuals or enumerated legal entities if the owner or other specified persons are actively engaged in farming.

a. In order for a tract of land to qualify for the family farm tax credit, the following three criteria must be satisfied:

(1) The tract of land must be an "eligible tract of agricultural land" as defined in Iowa Code subsection 425A.2(5). This means the tract must be ten acres or more or contiguous to a tract of more than ten acres and used in good faith for agricultural or horticultural purposes. More than half of the acres in the tract must be devoted to the production of crops or livestock by a designated person. Contiguous tracts under the same legal ownership and located within the same county are considered one tract. Only tracts of land that are classified as agricultural real estate qualify for the credit.

(2) The tract of land must be owned by:

1. An individual or persons related or formerly related to each other, or
2. A partnership where all the partners are related or formerly related to each other, or
3. A family farm corporation as defined in Iowa Code subsection 9H.1(8), or
4. An authorized farm corporation as defined in Iowa Code subsection 9H.1(3).

The ownership criteria must be met on June 30 of the fiscal year prior to the fiscal year in which the application for credit is filed. For example, the ownership criteria must be met on June 30, 1990, for applications for credit filed in 1990.

(3) A designated person must be "actively engaged in farming" the tract during the fiscal year prior to the fiscal year in which the application for credit is filed. If the tract is owned by an individual or related persons, the designated person who is actively engaged in farming must be an owner of the tract, the owner's spouse, or the owner's relative within the third degree of consanguinity or their spouses. This includes the owner's child, stepchild, grandchild, great-grandchild, parent, grandparent, great-grandparent, brother, sister, uncle, aunt, niece, or nephew or their spouses. The only step relative that may qualify as a designated person is a stepchild. If the owner of the tract is a partnership, the designated person who is actively engaged in farming must be a partner or a partner's spouse. If the owner of the tract of land is a family farm corporation, the designated person who is actively engaged in farming must be a family member who is a shareholder of the family farm corporation or the shareholder's spouse. If the owner of the tract of land is an authorized farm corporation, the designated person who is actively engaged in farming must be the shareholder who owns at least 51 percent of the stock of the authorized farm corporation or that shareholder's spouse.

If the owner is an individual who leases the land to a family farm corporation or partnership, a shareholder of the corporation or a partner of the partnership shall be considered a designated person if

the combined stock of the family farm corporation or the combined partnership interest owned by the owner, the owner's spouse and persons related to the owner within the third degree of consanguinity and their spouses is equal to at least 51 percent of the stock of the family farm corporation or the ownership interest in the partnership.

b. In order to be "actively engaged in farming" the designated person must be personally involved in the production of crops or livestock on the "eligible tract" on a regular, continuous and substantial basis. Personal involvement in the production of crops or livestock includes not only field activities such as soil preparation and testing, planting, fertilizing, spraying, inspecting, cultivating and harvesting but also managerial decision-making activities relating to hybrid selection, crop rotation planning, crop selection, equipment purchases and marketing strategies. Personal involvement in the production of crops or livestock also includes activities pertaining to crop insurance selection, loan selection, and financial record maintenance and preparation. A person performing activities in the capacity of a lessor, whether under a cash or crop-share lease and whether under a written or oral lease, is not actively engaged in farming on the area of the tract covered by the lease.

c. Tracts subject to a federal program pertaining to agricultural land. In lieu of satisfying the "actively engaged in farming" test, a designated person may demonstrate that the person was in general control of the tract which was subject to a federal program pertaining to agricultural land during the prior fiscal year. This alternative test is intended to apply in circumstances where the active farming criteria cannot be met because the land is in the Conservation Reserve Program (commonly referred to as the CRP) or a program substantially similar to the 0/92 option where the tract has been taken out of production.

d. The following examples illustrate family farm tax credit eligibility under various circumstances:

EXAMPLE 1. A and B jointly own land and were both personally involved in the farming operation. They are not related. No credit is allowable because it is a requirement that individual owners be related. If A and B were brothers, the land would qualify for the credit.

EXAMPLE 2. A owns the land and is retired. A leased the land to B, his son. B was personally involved in the farming operation. The land is eligible for the credit even though a lease arrangement existed because the actively engaged in farming requirement can be satisfied through the activities of the owner's spouse, or the owner's relative within the third degree of consanguinity or the relative's spouse. See paragraph "a," subparagraph (3), of this subrule. No credit would be allowable if A and B were not related.

EXAMPLE 3. A owns two contiguous 40-acre tracts. A farmed all of one tract but only 15 acres of the other tract. The other 25 acres of the second tract were leased to a nondesignated person. Both tracts qualify for the credit because contiguous tracts under the same legal ownership are considered one tract and more than half of the total of 80 acres ($40 + 15 = 55$) were farmed by A.

EXAMPLE 4. The land is owned by a partnership in which the partners A, B, C and D are brothers. A and B farm the land but C and D have no involvement in the farming operation. The land is eligible for the credit because it makes no difference what level of involvement each partner had nor does it matter that one or more of the partners were not personally involved in the farming operation. The only requirement for qualifying for the credit is that at least one of the partners or one of the partners' spouses was personally involved in the farming operation. No credit would be allowable if all the partners were not related to each other.

EXAMPLE 5. The land is owned by a family farm corporation in which the stock is owned equally by A, B and C. A and B are brothers but not related to C. All three partners were personally involved in the farming operation. The land qualifies for the credit because it is only a requirement that a family member who is a shareholder in the family farm corporation be involved in the farming operation. The land would qualify for the credit even if B was not involved in the farming operation. However, no credit would be allowable if only C was involved in the farming operation.

EXAMPLE 6. The land is owned by an authorized farm corporation in which 60 percent of the stock is owned by A and 40 percent of the stock is owned by B. Both A and B were personally involved in the farming operation. The credit is allowable as long as the stockholder who owns at least 51 percent of

the stock was personally involved in the farming operation. No credit would be allowable if A was not personally involved in the farming operation.

80.11(2) *Application for credit.* To obtain the credit, the owner must file an application for credit with the assessor by November 1. If the claim for credit is approved, no further filing shall be required provided the ownership and the designated person actively engaged in farming the property remain the same during successive years. A new application for credit shall be required only if the property is sold or the designated person changes. The county board of supervisors shall review all claims and make a determination as to eligibility. The claimant may appeal a decision of the board to district court by giving written notice to the board within 20 days of the board's notice.

80.11(3) *Application of credit.* The county auditor shall certify to the department of revenue by April 1 the total amount of family farm tax credits due the county. The county auditor shall apply the credit to each eligible tract of land in an amount equal to the school district tax rate which is in excess of \$5.40 multiplied by the taxable value of the eligible tract.

80.11(4) *Penalty.* The owner shall provide written notice to the assessor if the designated person changes. Failure to do so shall result in the owner's being liable for the amount of the credit plus a penalty equal to 5 percent of the amount of the credit granted.

This rule is intended to implement Iowa Code chapter 425A as amended by 2001 Iowa Acts, House Files 712 and 713.

701—80.12(427) Methane gas conversion property.

80.12(1) *Application for exemption.* An application for exemption is required to be filed with the appropriate assessing authority by February 1 of each year. The assessed value of the property is to be prorated to reflect the appropriate amount of exemption if the property used to convert the methane gas to energy also uses another fuel. The first year exemption shall be equal to the estimated ratio that the methane gas consumed bears to the total fuel consumed times the assessed value of the property. The exemption for subsequent years shall be based on the actual ratio for the previous year.

80.12(2) *Eligibility for exemption.* To qualify for exemption, the property must be used either in an operation that decomposes waste and converts it to methane gas or other gases produced as a byproduct of waste decomposition, then collects the gases and converts them to energy; or in an operation that collects waste in order to decompose it to produce methane gas or other gases for conversion into energy. The exemption applies to both property used in connection with, or in conjunction with, a publicly owned sanitary landfill and to property not used in connection with, or in conjunction with, a publicly owned sanitary landfill.

The exemption for property not used in an operation connected with, or in conjunction with, a publicly owned sanitary landfill is limited to property originally placed in operation on or after January 1, 2008, and on or before December 31, 2012, and will be available for the ten-year period following the date the property was originally placed in operation.

This rule is intended to implement Iowa Code section 427.1(29) as amended by 2009 Iowa Acts, Senate File 478, section 224.

[ARC 7726B, IAB 4/22/09, effective 5/27/09; ARC 8358B, IAB 12/2/09, effective 1/6/10]

701—80.13(427B,476B) Wind energy conversion property.

80.13(1) *Special valuation allowed by ordinance.* A city council or county board of supervisors may provide by ordinance for the special valuation of wind energy conversion property. If the ordinance is repealed, the special valuation applies through the nineteenth assessment year following the first year the property was assessed. Once the ordinance has been repealed and the special valuation is no longer applicable, the property must be valued at market value rather than at 30 percent of net acquisition cost. The special valuation applies to property first assessed on or after the effective date of the ordinance. The local assessor must value the property in accordance with the schedule provided in Iowa Code section 427B.26(2). The property qualifies for special valuation provided the taxpayer files a declaration of intent with the local assessor by February 1 of the assessment year in which the property is first assessed for tax to have the property locally assessed. The property must not be assessed until the assessment

year following the year the entire wind plant is completed. A wind plant is completed when it is placed in service.

80.13(2) *Special valuation not allowed by ordinance.* If a city council or county board of supervisors has not passed an ordinance providing for the special valuation of wind energy conversion property, the property is to be assessed by the department of revenue for a period of 12 years, and the taxes payable on the facilities are to be paid to the department at the same time as regular property taxes. The owner of the facility must file an annual report with the department by May 1 of each year during the 12-year assessment period, and the department must certify the assessed value of the facility by November 1 of each year to the county auditor. The board of supervisors must notify the county treasurer to state on the tax statement that the property taxes are to be paid to the department. The board must also notify the department of those facilities that are required to pay the property taxes to the department. The department must notify the county treasurer of the date the taxes were paid within five business days of receipt, and the notification is authorization for the county treasurer to mark the record as paid in the county system.

This rule is intended to implement Iowa Code section 427B.26 and chapter 476B as amended by 2009 Iowa Acts, Senate File 456, sections 2 and 4.

[ARC 7726B, IAB 4/22/09, effective 5/27/09; ARC 8358B, IAB 12/2/09, effective 1/6/10]

701—80.14(427) Mobile home park storm shelter.

80.14(1) *Application for exemption.* An application for exemption must be filed with the assessing authority by February 1 of the first year the exemption is requested. Applications for exemption are not required in subsequent years if the property remains eligible for exemption.

80.14(2) *Eligibility for exemption.* The structure must be located in a mobile home park as defined in Iowa Code section 435.1.

80.14(3) *Valuation exempted.* If the structure is used exclusively as a storm shelter, it shall be fully exempt from taxation. If the structure is not used exclusively as a storm shelter, the exemption shall be limited to 50 percent of the structure's commercial valuation.

This rule is intended to implement Iowa Code Supplement section 427.1(30).

701—80.15(427) Barn and one-room schoolhouse preservation. The increase in value added to a farm structure constructed prior to 1937 or one-room schoolhouse as a result of improvements made is exempt from tax. An application must be filed with the assessor by February 1 of the first assessment year only and the exemption is to continue as long as the structure continues to be used as a barn or in the case of a one-room schoolhouse is not used for dwelling purposes. A "barn" is an agricultural structure that is used for the storage of farm products or feed or the housing of farm animals, poultry, or farm equipment.

This rule is intended to implement Iowa Code sections 427.1(31) and 427.1(32) as amended by 2000 Iowa Acts, House File 2560.

701—80.16(426) Agricultural land tax credit.

80.16(1) *Eligibility for credit.* The credit shall be allowed on land in tracts of ten acres or more, or land of less than ten acres if part of other land of more than ten acres, and used for agricultural or horticultural purposes.

80.16(2) *Application for credit.* No application for credit is required.

80.16(3) *Application of credit.* The county auditor shall certify to the department of revenue by April 1 the total amount of agricultural land tax credits due the county. The county auditor shall apply the credit to each eligible tract of land in an amount equal to the school district tax rate which is in excess of \$5.40 multiplied by the taxable value of the eligible tract.

This rule is intended to implement Iowa Code chapter 426 as amended by 2001 Iowa Acts, House File 713.

701—80.17(427) Indian housing property. Property owned and operated by an Indian housing authority, as defined in 24 CFR 950.102, is exempt from taxation provided the exemption has been

approved by the city council or county board of supervisors, whichever is applicable, and a valid claim for exemption has been filed pursuant to Iowa Code section 427.1(14) by February 1.

This rule is intended to implement Iowa Code section 427.1 as amended by 2001 Iowa Acts, Senate File 449.

701—80.18(427) Property used in value-added agricultural product operations. Fixtures used for cooking, refrigeration, or freezing of value-added agricultural products used in value-added agricultural processing or used in direct support of value-added agricultural processing are exempt from tax. Direct support includes storage by public refrigerated warehouses for processors of value-added agricultural products prior to the start of the value-added agricultural processing operation. The exemption does not apply to fixtures used primarily for retail sale or display. If the taxpayer is a retailer, there is a presumption that the fixtures are being used primarily for retail sale or display. The exemption applies only to fixtures that are attached in a manner set forth in Iowa Code section 427A.1(2).

The following definitions apply to this rule:

“*Fixture*” means property which was originally personal property but which by being physically attached to the realty becomes part of the realty and upon removal does not destroy the property to which it is attached.

“*Value-added agricultural processing*” means an operation whereby an agricultural product is subjected to some special treatment by artificial or natural means which changes its form, context, or condition, and results in a marketable agricultural product to be sold at retail. These operations are commonly associated with fabricating, compounding, germinating, or manufacturing.

“*Value-added agricultural product*” means an agricultural product which, through a series of activities or processes, may be sold at a higher price than its original purchase price.

This rule is intended to implement Iowa Code section 427A.1 as amended by 2001 Iowa Acts, House File 715.

701—80.19(427) Dwelling unit property within certain cities. Dwelling unit property owned and managed by a nonprofit community housing development organization that owns and manages more than 150 dwelling units in a city with a population of more than 110,000 is exempt from tax. The organization must be recognized by the state and the federal government pursuant to criteria contained in the HOME program of the federal National Affordable Housing Act of 1990 and must be exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code. The exemption does not extend to dwelling units located outside the city. The organization must file an application for exemption with the assessing authority not later than February 1 of the assessment year. Applications for exemption are not required in successive years if the property continues to qualify for the exemption.

This rule is intended to implement Iowa Code Supplement section 427.1(21A) as amended by 2006 Iowa Acts, House File 2792.

701—80.20(427) Nursing facilities. If the assessor determines that property is being used for a charitable purpose pursuant to Iowa Code section 427.1(8), it shall be fully exempt from tax if it is licensed under Iowa Code section 135C.1(13) by the department of inspections and appeals, exempt from federal income tax under Section 501(c)(3) of the Internal Revenue Code, and a valid application for exemption has been filed with the assessor by February 1 of the assessment year.

This rule is intended to implement Iowa Code Supplement section 427.1(14).

701—80.21(368) Annexation of property by a city. A city council may provide a partial tax exemption from city taxes against annexed property for a period of ten years. The exemption schedule is contained in Iowa Code Supplement section 368.11(3) “*m*.” All property owners included in the annexed area must receive the exemption if the city elects to allow the exemption.

This rule is intended to implement Iowa Code Supplement section 368.11(3) “*m*” as amended by 2006 Iowa Acts, House File 2794.

701—80.22(427) Port authority. The property of a port authority created pursuant to Iowa Code Supplement section 28J.2 when devoted to public use and not held for pecuniary profit is exempt from taxation.

This rule is intended to implement Iowa Code Supplement section 427.1(34).

701—80.23(427A) Concrete batch plants and hot mix asphalt facilities. A concrete batch plant includes the machinery, equipment, and fixtures used at a concrete mixing facility to process cement dry additive and other raw materials into concrete. A hot mix asphalt facility is any facility used to manufacture hot mix asphalt by heating and drying aggregate and mixing it with asphalt cements. These facilities shall not be assessed and taxed as real property regardless of the property's attachment to real estate. The land on which the facilities are located is taxable.

This rule is intended to implement Iowa Code section 427A.1 as amended by 2006 Iowa Acts, Senate File 2391.

701—80.24(427) Airport property. Property owned by a city or county at an airport and leased to a fixed base operator providing aeronautical services to the public is exempt from taxation.

This rule is intended to implement Iowa Code section 427.1(2) as amended by 2006 Iowa Acts, House File 2794.

701—80.25(427A) Car wash equipment. Property that is equipment used for the washing, waxing, drying, or vacuuming of motor vehicles and point-of-sale equipment necessary for the purchase of car wash services shall not be assessed and taxed as real property.

This rule is intended to implement Iowa Code section 427A.1 as amended by 2006 Iowa Acts, House File 2794.

701—80.26(427) Web search portal and data center business property. This exemption includes computers and equipment necessary for the maintenance and operation of a web search portal or data center business, including cooling systems, cooling towers, and other temperature control infrastructure; power infrastructure for transformation, distribution, or management of electricity, including but not limited to exterior dedicated business-owned substations, and power distribution systems which are not subject to assessment under Iowa Code chapter 437A; back-up power generation systems, battery systems, and related infrastructure; and racking systems, cabling, and trays. The exemption does not apply to land, buildings, and improvements. The web search portal or data center business must meet the requirements contained in Iowa Code section 423.3, subsection 92, subsection 93, or subsection 95, for the exemption to be allowable. The owner of the property must file a claim for exemption with the assessor by February 1 of the first year the exemption is claimed. Claims for exemption in successive years will be required only for property additions.

This rule is intended to implement Iowa Code sections 427.1(35) and 427.1(36) and section 427.1 as amended by 2009 Iowa Acts, Senate File 478, section 200.

[ARC 8358B, IAB 12/2/09, effective 1/6/10]

701—80.27(427) Privately owned libraries and art galleries. Claims for exemption for libraries and art galleries owned and kept by private individuals, associations, or corporations for public use and not for private profit must be filed with the local assessor by February 1 of the first year the exemption is requested. Once the exemption is granted, the exemption shall continue to be granted for subsequent assessment years without further filing of claims as long as the property continues to be used as a library or art gallery for public use and not for private profit.

This rule is intended to implement Iowa Code Supplement section 427.1(7) as amended by 2008 Iowa Acts, Senate File 2400.

701—80.28(404B) Disaster revitalization area. The governing body of a city or county may, by ordinance, designate an area of the city or county a disaster revitalization area if that area is within a county or portion of a county in which the governor has proclaimed a disaster emergency or the

United States president has declared a major disaster. All real property within a disaster revitalization area is eligible to receive a 100 percent exemption from taxation on the increase in assessed value of the property if the increase in assessed value is attributable to revitalization of the property occurring between May 25, 2008, and December 31, 2013. The amount of increase in value shall be the difference between the assessed value of the property on January 1, 2007, and the assessed value of the property on January 1, 2010, and subsequent assessment years. The exemption is for a period not to exceed five years, starting with an assessment year beginning on or after January 1, 2010. A city or county may adopt a tax exemption percentage different from the 100 percent exemption. The different percentage adopted must not allow a greater exemption, but may allow a smaller exemption. If the homeowner elects to take the exemption provided in this rule, the homeowner may not claim any other value-added exemption. An application must be filed for each revitalization project resulting in increased assessed value for which an exemption is claimed. The application for exemption must be filed by the owner of the property with the local assessor by February 1 of the first assessment year for which the exemption is requested. After the tax exemption is granted, the exemption will continue for succeeding years without the taxpayer's having to file an application for exemption unless additional revitalization projects occur on the property. The ordinance must expire or be repealed no later than December 31, 2016.

This rule is intended to implement 2009 Iowa Acts, Senate File 457, sections 23 to 30.
[ARC 8358B, IAB 12/2/09, effective 1/6/10]

701—80.29(427) Geothermal heating and cooling systems installed on property classified as residential.

80.29(1) *In general.* An exemption from property tax shall be allowed for any value added to property by any new construction or refitted installation of a geothermal heating or cooling system if the geothermal heating or cooling system is constructed or installed on or after July 1, 2012, on property classified as residential. The exemption shall also be allowed for a residential dwelling on agricultural land. The exemption does not have to be claimed the year subsequent to the year the geothermal system is constructed or installed. However, every individual claiming the exemption under this rule shall file with the appropriate assessor, not later than February 1 of the year for which the exemption is requested, an application for exemption. The assessor shall then allow or disallow the exemption.

Upon the filing and allowance of the claim, the claim shall be allowed on the property for ten consecutive years without further filing as long as the property continues to be classified as residential. However, if the property ceases to be classified as residential or if the geothermal heating and cooling system ceases to exist before the ten years have expired, no exemption is allowed for the year in which the change in classification took place or for any subsequent years. The exemption amount shall remain fixed at the same amount that was allowed in the first year the exemption was allowed.

The property tax exemption applies to any value added by the addition of mechanical, electrical, plumbing, ductwork, or other equipment, labor, and expenses included in or required for the construction or installation of the geothermal system that would not have been included in the home if not for the installation of the geothermal heating and cooling system. Additionally, the proportionate value of any well field associated with the system and attributable to the owner is exempt.

80.29(2) *Calculation of value added.* As used in this rule, the terms “any value added” and “value added” mean the amount of increase in the actual assessed value of the property that is directly attributable to the new construction or refit installation of a geothermal heating or cooling system as of the first year for which the geothermal heating and cooling system is actually assessed. “Any value added” does not include speculative or indirect increases in value which, for example, may be attributable to reductions in energy consumption or reductions in the negative impact to the environment. “Any value added” does not include changes in value which are attributable to general housing market fluctuations. Cost of the new construction or refit installation of the geothermal heating or cooling system is not determinative of the value added to a property. In the event the exemption is not filed in the same year the geothermal heating and cooling system is first assessed, the amount of the exemption, upon filing, shall be the same amount as it would have been had the exemption been filed in the year the geothermal heating and cooling system was first assessed.

In the case of new construction and refit installation of a geothermal heating or cooling system, the value added is the value that would not have been included in the home if not for the construction or refit installation of the geothermal heating and cooling system. That is, the value of mechanical, electrical, plumbing, ductwork, or other equipment, labor, and expenses that would have been included with a standard heating and cooling system shall not be considered in calculating the value added. To measure the value added by a geothermal heating and cooling system, the assessor shall compute the difference between the assessed value of the residential property if the property were outfitted with a non-geothermal (standard) heating and cooling system and the assessed value of the property outfitted with the geothermal system. In the case that the new construction or refit installation takes more than one year, the assessor shall make the comparison in the year the new construction or refit installation is completed.

EXAMPLE A: Mrs. Smith wants to upgrade her current standard heating and cooling system in her home with a geothermal system. The geothermal system installation is completed on August 1, 2012. On January 22, 2013, Mrs. Smith files a claim for exemption for the value added to her property that is directly attributable to the refit installation of the geothermal system. To determine the value added that is directly attributable to the geothermal system, the assessor shall compare the value of the home as though it was outfitted with the standard heating and cooling system which was upgraded with the value of the home outfitted with the geothermal heating and cooling system; the difference between the two values is the exemption amount. That exemption amount will remain fixed for the next ten years, until Mrs. Smith's home ceases to be classified as residential, or until the geothermal system ceases to exist, whichever occurs first. For years subsequent to 2013, any increase in the value of Mrs. Smith's home beyond the assessed value of the home outfitted with the geothermal heating and cooling system is not attributable to the geothermal system and is subject to property tax. The property tax exemption amount for the geothermal heating and cooling system will remain the same as the first year for which the exemption was received even if the assessed value of Mrs. Smith's home drops.

EXAMPLE B: Same facts as Example A, except that on January 1 of year seven, Mrs. Smith's home is reclassified as commercial property. No property tax exemption is allowed for the value added by the geothermal system for year seven or any subsequent years.

EXAMPLE C: Mr. Larson is building a new home and plans to construct a new geothermal system in lieu of a standard heating and cooling system. The home and geothermal system are completed on October 24, 2012. To determine the value added that is directly attributable to the installation of the geothermal system, the assessor shall assess the home as though it had been outfitted with a standard heating and cooling system and compare that value with the assessed value of the home outfitted with the geothermal heating and cooling system. The difference between the two amounts is the value added that is directly attributable to the geothermal system and is the exemption amount. In 2013, the assessed value of Mr. Larson's home with a standard heating and cooling system is \$200,000. The assessed value of Mr. Larson's home with the geothermal system is \$210,000. Therefore, the value added to the property that is directly attributable to the geothermal system is \$10,000. Mr. Larson may claim an exemption amount of \$10,000 starting in assessment year 2013. Mr. Larson does not lose the exemption if he fails to claim the exemption by February 1, 2013; he may claim the exemption in any year subsequent to the completion of the construction of the home. An exemption amount of \$10,000 will continue for ten consecutive years after the exemption is claimed, until the property ceases to be classified as residential, or until the geothermal system ceases to exist, whichever occurs first.

EXAMPLE D: Same facts as Example C, except that Mr. Larson claims the exemption in 2019. The exemption amount in 2019, and the nine subsequent years, is the value added in the year the geothermal heating and cooling system was first assessed; here, \$10,000 in 2013. The value added and exemption amount is not calculated in the year Mr. Larson claims the exemption. The \$10,000 exemption will then continue until 2028, until the property ceases to be classified as residential or until the geothermal system ceases to exist, whichever occurs first.

This rule is intended to implement Iowa Code section 427.1.
[ARC 0467C, IAB 11/28/12, effective 1/2/13]

701—80.30(426C) Business property tax credit.

80.30(1) Definitions. For purposes of this rule, the following definitions shall govern.

“*Contiguous parcels*” means any of the following:

1. Parcels that share a common boundary. There is a rebuttable presumption that parcels separated by a roadway, alley, or waterway do not share a common boundary. The burden of proof shall be upon the property owners to provide evidence or verification that parcels separated by a roadway, alley, or waterway share a common boundary. Parcels owned to the middle of a road, waterway, alley, or railway in fee simple title are considered to share a common boundary.

2. Parcels within the same building or structure regardless of whether the parcels share a common boundary.

3. Permanent improvements to the land that are situated on one or more parcels of land that are assessed and taxed separately from the permanent improvements if the parcels of land upon which the permanent improvements are situated share a common boundary. This arrangement is more commonly referred to as buildings or permanent improvements that are taxed as buildings upon leased land.

“*Dwelling unit*” means an apartment, group of rooms, or single room that is occupied as separate living quarters, or, if vacant, is intended for occupancy as separate living quarters, in which a tenant can live and sleep separately from any other persons in the building. A vacant dwelling unit that does not have active utility services is not considered to be intended for occupancy. Dwelling units do not include hotels, motels, inns, or other buildings where rooms are rented for less than one month.

“*Multiresidential property*” means, for valuations established on or after January 1, 2015, any of the following types of property:

1. Mobile home park as defined in Iowa Code section 435.1.

2. Manufactured home community and land-leased community as defined in Iowa Code sections 335.30A and 414.28A and 2013 Iowa Acts, chapter 123, section 28.

3. Assisted living facility as defined in Iowa Code section 231C.2. Assisted living facility also includes:

- A health care facility as defined in Iowa Code section 135C.1;
- A child foster care facility under Iowa Code chapter 237; or
- Property used for a hospice program as defined in Iowa Code section 135J.1.

4. Property primarily used or intended for human habitation containing three or more separate dwelling units.

5. That portion of a building that is used or intended for human habitation and a proportionate share of the land upon which the building is situated, regardless of the number of dwelling units located in the building, if the use for human habitation is not the primary use of the building and such building is not otherwise classified as residential property.

Multiresidential property does not include hotels, motels, inns, or other buildings where rooms or dwelling units are usually rented for less than one month.

“*Parcel*” means each separate item shown on the tax list, manufactured or mobile home tax list, schedule of assessment, or schedule of rate change or charge. For fiscal years beginning on or after January 1, 2016, “parcel” also means that portion of a parcel assigned to be commercial property, industrial property, or railway property pursuant to 2013 Iowa Acts, chapter 123, section 28.

“*Person*” means individual, corporation, limited liability company, government or governmental subdivision or agency, business trust, estate, trust, partnership or association, or any other legal entity.

“*Property unit*” means contiguous parcels all of which are located within the same county, with the same property tax classification, are owned by the same person, and are operated by that person for a common use and purpose.

80.30(2) In general. Except as provided in subrule 80.30(8), for property taxes due and payable in fiscal years beginning on and after July 1, 2014, one business property tax credit is available to each parcel classified and taxed as commercial property, industrial property, or railway property unless the parcel is part of a property unit for which a business property tax credit is claimed. For property taxes due and payable in fiscal years beginning on and after July 1, 2014, one business property tax credit is

available to each property unit made up of property assessed as commercial property, industrial property, or railway property.

80.30(3) Application for credit.

a. Notwithstanding paragraph 80.30(3)“*b*,” for a business property tax credit against property taxes due and payable during the fiscal year beginning July 1, 2014, the claim for credit shall be received in the office of the applicable city or county assessor not later than January 15, 2014.

b. For a business property tax credit against property taxes due and payable during fiscal years beginning on and after July 1, 2015, no business property tax credit shall be allowed unless the first application for business property tax credit is received in the office of the applicable city or county assessor on or before March 15 preceding the fiscal year during which the credit first is claimed. For example, the first application for a business property tax credit against property taxes due and payable during the fiscal year beginning July 1, 2016, must be received in the office of the applicable city or county assessor on or before March 15, 2016.

c. A claim filed after the filing deadlines set forth in paragraphs 80.30(3)“*a*” and 80.30(3)“*b*” will be applied against property taxes due and payable for the following year.

d. Once filed, the claim for credit is applicable to subsequent years, and no further filing shall be required as long as the parcel or property unit satisfies the requirements of the credit. If the parcel or property unit ceases to qualify for the credit, the owner shall provide written notice to the assessor by the date for filing claims in paragraph 80.30(3)“*b*” following the date on which the parcel or property unit ceases to qualify for the credit. When all or a portion of a parcel or property unit that is allowed a credit is sold or transferred or ownership otherwise changes, the buyer, transferee, or new owner who wishes to receive the credit shall refile the claim for credit. When a portion of a parcel or property unit that is allowed a credit is sold or transferred or ownership otherwise changes, the owner of the portion of the parcel or property unit for which ownership did not change shall refile the claim for credit.

e. In the event March 15 falls on either a Saturday or Sunday, applications for the business property tax credit may be received in the office of the applicable city or county assessor the following Monday.

f. In the event March 15 falls on a state holiday, applications for the business property tax credit may be received in the office of the applicable city or county assessor the following business day.

g. For assessment years 2013, 2014, and 2015, Table 1 shows the applicable claim receipt deadlines and the taxes toward which the claim applies.

Table 1

	Assessment Year 2013	Assessment Year 2014	Assessment Year 2015
Claim Receipt Deadline	January 15, 2014	March 16, 2015*	March 15, 2016
For Taxes Payable	September 2014 & March 2015	September 2015 & March 2016	September 2016 & March 2017

* March 15, 2015, falls on a Sunday.

h. An assessor may not refuse to accept an application for business property tax credit. Assessors shall remit claims for credit to the county auditor with a recommendation to allow or disallow the claim. If it is the opinion of the assessor that a business property tax credit should not be allowed, the assessor’s recommendation to the county auditor shall include in writing the reasons for recommending disallowance.

i. Upon receipt from the assessor of the claims and recommendations, the county auditor shall forward the claims to the board of supervisors. The board shall allow or disallow the claims. If the board disallows a claim for credit, the board shall send written notice by mail to the claimant at the claimant’s last-known address. The written notice shall state the reasons for disallowing the claim for

the credit. Notwithstanding the foregoing, the board is not required to send notice that a claim for credit is disallowed if the claimant voluntarily withdraws the claim.

80.30(4) Appeals.

a. Initial appeal. Any person whose claim is disallowed by the board of supervisors may appeal that action to the district court of the county in which the parcel or property unit is located. Notice of appeal must be given to the county auditor within 20 days from the date on which the notification of disallowance was mailed by the board of supervisors.

b. Reversal. If the board of supervisors' disallowance of the claim for credit is reversed upon appeal, the credit shall be allowed on the applicable parcel or property unit. The director of revenue, the county auditor, and the county treasurer shall provide the credit and change their books and records accordingly. If the claimant has paid one or both of the installments of the tax payable in the year or years in question, the county treasurer shall remit the amount of the credit to the claimant and submit a request to the department for reimbursement from the business property tax credit fund. The amounts payable as credits awarded on appeal shall be allocated and paid from the balance remaining in the business property tax credit fund established in Iowa Code section 426C.2.

80.30(5) Audit.

a. Authority and period. The director of revenue may audit any credit provided under 2013 Iowa Acts, chapter 123. However, the director shall not adjust a credit allowed more than three years from October 31 of the year in which the claim for credit was filed.

b. Recalculation or denial. If an audit reveals that the amount of the credit was incorrectly calculated or that the credit should not have been allowed, the director shall recalculate the credit, if applicable, and notify both the claimant and the county auditor of the recalculation and the reasons it is being made.

c. Recapture. If the credit has already been paid, the director shall notify the claimant, the county treasurer, and the applicable assessor of the recalculation or denial of the credit. If the claimant still owns the parcel or property unit for which the credit was claimed, the county treasurer shall collect the tax owed in the same manner as other due and payable property taxes are collected. If the claimant no longer owns the parcel or property unit for which the credit was claimed, the department may recover the amount of tax owed by filing a lien under Iowa Code section 422.26 or by issuing a jeopardy assessment under Iowa Code section 422.30. Upon collection, the amount of the erroneously allowed credit shall be deposited in the business property tax credit fund.

d. Appeal of recalculation or denial. The claimant or the board of supervisors may appeal any decision of the director to the state board of tax review. The state board shall review the director's decision in accordance with Iowa Code section 421.1, subsection 5. The claimant, the board of supervisors, and the director may all seek judicial review of the state board of tax review's decision pursuant to the provisions of Iowa Code chapter 17A.

e. False claim and penalty. Any person who makes a false claim for the purpose of obtaining a credit or who knowingly receives the credit without being legally entitled to it is guilty of a fraudulent practice. The claim for a credit for such a person shall be disallowed, and the director shall send a notice of disallowance. If the credit has been paid, the amount shall be recovered in the manner described in paragraph 80.30(5) "c."

80.30(6) Property eligible for credit.

a. Eligible parcels.

(1) Except as provided in subrule 80.30(8), individual parcels or multiple parcels that comprise a property unit that is classified and taxed as commercial property, industrial property, or railway property under Iowa Code chapter 434 are eligible for the business property tax credit for the unit.

(2) Parcels that, in part, would satisfy the requirements for classification as multiresidential property as defined in 2013 Iowa Acts, chapter 123, section 28, where the primary use of the building is not for human habitation with three or more units and the building is not otherwise classified as a residential property are eligible for the business property tax credit against valuations established prior to January 1, 2015.

b. Eligible property units. Except as provided in subrule 80.30(8), only property units made up of property assessed and taxed as commercial property, industrial property, or railway property under Iowa Code chapter 434 are eligible for the business property tax credit. To be eligible as a property unit, all of the parcels that make up the property unit must be:

- (1) Located within the same county;
- (2) The same property classification;
- (3) Owned by the same person;
- (4) Contiguous as defined in subrule 80.30(1); and
- (5) Operated by that person for a common use and purpose.

c. Taxable status of parcels and property units.

(1) A parcel that is fully exempt from property tax is not eligible to receive the business property tax credit. A property unit that is comprised of one or more parcels that are fully exempt from property tax is not eligible to receive the business property tax credit.

(2) An application for the business property tax credit shall be denied if a parcel or parcels are fully exempt from property tax at the time the application for credit is filed with the city or county assessor.

(3) Determination of eligibility of parcel or property unit based on taxable status.

1. The taxable status of the property on July 1 of the assessment year shall determine the eligibility of the parcel or property unit to receive the credit. If the parcel or property unit becomes exempt from property tax prior to July 1 of the assessment year, the credit shall be disallowed. If the parcel or property unit was taxable on July 1 of the assessment year, but becomes exempt after July 1, the parcel or property unit may receive the credit only in the prorated amount that corresponds to the amount of tax paid in that fiscal year, if any.

2. The assessor shall give notice to the auditor of partial credits allowed due to a change in taxable status of a parcel or property unit. The auditor shall update the auditor's file and give notice on forms prescribed by the department to the department of revenue of partial credits allowed due to a change in taxable status of a parcel or property unit.

(4) The owner of any parcel or property unit that has been granted the credit but becomes exempt from property tax prior to July 1 of the assessment year shall provide written notice to the city or county assessor by the date for filing claims.

(5) The taxable portion of any partially exempted property shall receive the credit only in an amount applicable to the taxable portion.

80.30(7) Common use and purpose. Whether parcels are operated for a common use and purpose depends on all the facts and circumstances of each set of parcels. The following nonexclusive examples illustrate common use and purpose.

EXAMPLE 1. ABC Properties is in the business of building, owning, leasing, and managing large retail spaces. ABC builds and owns a large shopping mall that covers contiguous parcels, all of which are located within the same county. Although the retail establishments that lease retail space in the shopping mall offer different products and services, the shopping mall is owned and operated by ABC for the common use and purpose of being a lessor. Thus, the parcels that make up the mall are eligible as a single property unit.

EXAMPLE 2. John's LLC owns four commercial parcels located within the same building, and they are, therefore, contiguous as defined in subrule 80.30(1). John's owns and operates two parcels as a beauty parlor. John's rents the other two parcels to a bicycle shop. The four parcels, together, do not have a common use and purpose. However, the two parcels used by John's as an owner-operator of the beauty parlor business are operated with the common use and purpose of providing beauty services and are eligible as one property unit. The two parcels that John's rents to the bicycle shop are operated with the common use and purpose of being rented out for profit as a landlord and are eligible as a second property unit.

80.30(8) Property ineligible for credit. All of the following are not eligible to receive a business property tax credit or to be part of a property unit that receives the business property tax credit:

- a. Property that is rented or leased to low-income individuals and families as authorized by Section 42 of the Internal Revenue Code, as amended, and that is subject to assessment procedures relating to Section 42 property under Iowa Code section 441.21, subsection 2, for the applicable assessment year.
- b. Mobile home park as defined in Iowa Code section 435.1.
- c. Manufactured home community and land-leased community as defined in Iowa Code sections 335.30A and 414.28A and 2013 Iowa Acts, chapter 123, section 28.
- d. Assisted living facility as defined in Iowa Code section 231C.2. Assisted living facility also includes:
 - (1) A health care facility as defined in Iowa Code section 135C.1;
 - (2) A child foster care facility under Iowa Code chapter 237; or
 - (3) Property used for a hospice program as defined in Iowa Code section 135J.1.
- e. Property primarily used or intended for human habitation with three or more separate dwelling units.

80.30(9) Application of credit.

- a. A person may claim and receive one business property tax credit for each eligible parcel unless the parcel is part of a property unit for which a credit is claimed.
- b. A person may claim and receive one business property tax credit for each property unit.
- c. A credit approved for a property unit shall be allocated to the several parcels within the property unit in the proportion that each parcel's total amount of property taxes due and payable bears to the total amount of property taxes due and payable on the property unit.
- d. The classification of property used to determine eligibility for the business property tax credit shall be the classification of the property for the assessment year used to calculate the taxes due and payable in the fiscal year for which the credit is claimed.
- e. Once filed and allowed, the credit shall continue to be allowed on the parcel or property unit for successive years without further filing of an application unless the parcel or property unit ceases to qualify for the credit under Iowa Code chapter 421C.
- f. When all or a portion of a parcel or property unit is sold or transferred or ownership otherwise changes, the new owner must reapply for the credit. The owner of the portion of a parcel or property unit that did not change shall also reapply for the credit.
- g. The following noninclusive examples illustrate the application of the business property tax credit under various circumstances.

EXAMPLE 1. On February 13, 2015, Mr. Jones files with his county assessor an application for the business property tax credit for taxes due and payable in the fiscal year beginning July 1, 2015. The property that Mr. Jones claims is eligible for the credit is a single parcel that is classified as commercial property. The property is not rented or leased to low-income individuals and families as authorized by Section 42 of the Internal Revenue Code. The property is not a mobile home park, manufactured home community, land-leased community, or assisted living facility nor is it primarily used or intended for human habitation with three or more separate dwelling units. Therefore, Mr. Jones' application should be approved as a credit against the taxes due and payable in the fiscal year beginning July 1, 2015.

EXAMPLE 2. Same facts as in EXAMPLE 1, but Mr. Jones files his application on March 17, 2015. Mr. Jones' application should be approved, but the credit will be against taxes due and payable in the fiscal year beginning July 1, 2016.

EXAMPLE 3. Davidoff LLC owns two parcels of land, both of which are classified as industrial property. Each parcel is being operated for a common use and purpose. The parcels are separated by a road. If Davidoff owns the property parcels to the middle of the road in fee simple title, the parcels are considered contiguous and would qualify as a unit, and Davidoff would be eligible for a single business property tax credit. If a third party, including the state, a municipality, or other government entity, owned the road in fee simple title, the parcels would not be considered contiguous, and Davidoff would be eligible for two separate business property tax credits.

EXAMPLE 4. In Madison County, Iowa, there is a wind farm that consists of four wind turbines that are taxed separately as permanent improvements to the land. All the wind turbines are owned by Windy LLC. The turbines sit upon four parcels of land that share a common boundary. Each parcel of land is

owned by a different owner. The four wind turbines are contiguous because the wind turbines are taxed as permanent improvements to the land, they are situated upon four parcels of land that share a common boundary, and the land is assessed and taxed separately from the wind turbines. The four wind turbines qualify as a property unit and would be eligible for one business property tax credit.

80.30(10) Calculation of credit.

a. Auditor certification. On or before June 30 of each year, the county auditor shall certify to the department the following:

- (1) The claims allowed by the board of supervisors in that county;
- (2) The actual value, prior to the imposition of any applicable assessment limitations, of the parcels and property units for which credits were allowed in that county; and
- (3) The information applicable to the location of the parcels and property units.

b. Department process and methodology.

(1) Department of management information. The department shall obtain from the department of management tax district and applicable consolidated rates.

(2) Initial amount of actual value. For each parcel or property unit certified by the county auditor, the department shall calculate, for each fiscal year, an initial amount of actual value to use for determining the amount of credit for each such parcel or property unit that provides the maximum possible credit according to the credit formula and limitations prescribed by Iowa Code section 426C.3(5). The department shall also calculate the initial amount of actual value so as to provide that the total dollar amount of credits against the taxes due and payable in the fiscal year equals 98 percent of the moneys in the business property tax credit fund following the deposit of the appropriation for the fiscal year, including any interest or earnings that have been credited to the fund.

(3) Credit amount. The amount of the credit shall be calculated as follows:

Step 1. Determine the lesser of the actual value calculated in paragraph 80.30(10) "a" and the initial value calculated in subparagraph 80.30(10) "b"(2).

Step 2. Multiply the amount determined in Step 1 by the difference between the assessment limitation percentage applicable to the parcel or property unit under Iowa Code section 441.21(5) and the assessment limitation applicable to residential property under Iowa Code section 441.21(4). For purposes of this calculation, such difference shall be stated as a percentage.

Step 3. Divide the product of Steps 1 and 2 by \$1000.

Step 4. Multiply the quotient obtained in Step 3 by the consolidated levy rate or average consolidated levy rate per \$1000 of taxable value applicable to the parcel or property unit for the fiscal year for which the credit is claimed as certified by the county auditor under Iowa Code section 426C.3(5).

(4) Allocation to parcels. The business property tax credit approved for a property unit shall be allocated to the several parcels within the property unit in the proportion that each parcel's total amount of property taxes due and payable bears to the total amount of property taxes due and payable on the property unit.

(5) Limitation on information. Notwithstanding the foregoing, the department's calculations shall be based upon the certified information it has received by June 30 of each fiscal year. Any information, whether certified or uncertified, received after June 30 of each fiscal year will not be included in the department's credit calculations for the applicable fiscal year.

This rule is intended to implement Iowa Code chapter 426C.

[ARC 1382C, IAB 3/19/14, effective 4/23/14]

701—80.31 to 80.48 Reserved.

701—80.49(441) Commercial and industrial property tax replacement—county replacement claims. For each fiscal year beginning on or after July 1, 2014, the department of revenue shall pay to the county treasurer an amount equal to the amount of the commercial and industrial property tax replacement claims in the county. For fiscal years beginning on or after July 1, 2017, if an amount appropriated for a fiscal year is insufficient to pay all replacement claims, the director of revenue shall

prorate the payment of replacement claims to the county treasurers and shall notify the county auditors of the pro rata percentage on or before September 30.

80.49(1) For each taxing district, the commercial and industrial property tax replacement claim amount is determined by multiplying the amounts calculated in 80.49(1) “a” and “b” and dividing the resultant amount by \$1,000.

a. The difference between the assessed valuation of all commercial property and industrial property for the assessment year used to calculate taxes which are due and payable in the applicable fiscal year and the actual value of all commercial property and industrial property that is subject to assessment and taxation for the same assessment year; and

b. The tax levy rate per \$1,000 of assessed value of each taxing district for that fiscal year.

80.49(2) Reporting requirements.

a. On or before July 1 of each fiscal year beginning on or after July 1, 2014, the assessor shall report to the county auditor the total actual value of all commercial and industrial property in the county that is subject to assessment and taxation for the assessment year used to calculate the taxes due and payable in that fiscal year.

b. On or before September 1 of each fiscal year beginning on or after July 1, 2014, the county auditor shall, based upon the information in the report required to be provided in paragraph “a” of this subrule, prepare and submit a statement to the department of revenue which lists, for each taxing district in the county, the information required in 80.49(1).

c. The department shall pay the replacement amount to the county treasurer in two installments in September and March of each year.

d. The county treasurer shall apportion the replacement claim payments among the eligible taxing districts in the county.

[ARC 1332C, IAB 2/19/14, effective 3/26/14]

701—80.50(427,441) Responsibility of local assessors.

80.50(1) The assessor shall determine the taxable status of all property. If an application for exemption is required to be filed, the assessor shall consider the information contained in the application in determining the taxable status of the property. The assessor may also request from any property owner or claimant any additional information necessary to the determination of the taxable status of the property. For property subject to Iowa Code subsection 427.1(14), the assessor shall not base the determination of the taxable status of property solely on the statement of objects or purposes of the organization, institution, or society seeking an exemption. The use of the property rather than the objects or purposes of the organization, institution, or society shall be the controlling factor in determining the taxable status of property. (*Evangelical Lutheran G.S. Society v. Board of Review of Des Moines*, 200 N.W.2d 509; *Northwest Community Hospital v. Board of Review of Des Moines*, 229 N.W.2d 738.)

80.50(2) In determining the taxable status of property, the assessor shall construe the appropriate exemption statute and these rules in a strict manner. If there exists any doubt as to the taxable status of property, the property shall be subject to taxation. The burden shall be upon the claimant to show that the exemption should be granted. (*Evangelical Lutheran G.S. Society v. Board of Review of Des Moines*, 200 N.W.2d 509; *Southside Church of Christ of Des Moines v. Des Moines Board of Review*, 243 N.W.2d 650; *Aerie 1287, Fraternal Order of Eagles v. Holland*, 226 N.W.2d 22.)

80.50(3) If the assessor determines that all or part of a property is subject to taxation, the assessor shall notify the taxpayer by the issuance of an assessment roll as provided in Iowa Code sections 441.26 and 441.27. If the assessor determines that property has been erroneously exempted from taxation, the assessor shall revoke the exemption for the current assessment year but not for prior assessment years.

80.50(4) The assessor’s determination of the taxable status of property may be appealed to the local board of review pursuant to Iowa Code section 441.37.

This rule is intended to implement Iowa Code chapter 427 and sections 441.17(11), 441.26, and 441.27.

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.51(441) Responsibility of local boards of review.

80.51(1) If the board of review determines that property has been erroneously exempted from taxation, the board of review shall revoke the exemption for the current assessment year, but not for prior assessment years, and shall give notice to the taxpayer as provided in Iowa Code section 441.36.

80.51(2) If the board of review acts in response to a protest arising from an assessor's determination of the taxable status of property, the board of review shall notify the taxpayer of its disposition of the protest in accordance with the provisions of Iowa Code section 441.37.

This rule is intended to implement Iowa Code sections 441.35, 441.36, and 441.37.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.52(427) Responsibility of director of revenue. The director may revoke or modify an exemption on property if the exemption is found to have been erroneously granted by the local taxing officials. Any taxpayer or taxing district may request that the director revoke or modify an exemption, or the director may on the director's own determination revoke or modify an exemption. The director may revoke or modify an exemption for the tax year commencing in the tax year in which the request is made to the director or for the tax year commencing in the tax year in which the director's own motion is filed. The director shall hold a hearing on the appropriateness of the exemption prior to issuing an order for revocation or modification. The director's order to revoke or modify an exemption may be appealed in accordance with Iowa Code chapter 17A or in the district court of the county in which the property is located.

This rule is intended to implement Iowa Code section 427.1(16).
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.53(427) Application for exemption.

80.53(1) Each society or organization seeking an exemption under Iowa Code subsection 427.1(5), 427.1(8), 427.1(21), or 427.1(33) shall file with the appropriate assessor a statement containing the following information:

- a. The legal description of the property for which an exemption is requested.
- b. The use of all portions of the property, including the percentage of space not used for the appropriate objects of the society or organization and the percentage of time such space is so utilized.
- c. A financial statement showing the income derived and the expenses incurred in the operation of the property.
- d. The name of the organization seeking the exemption.
- e. If the exemption is sought under Iowa Code subsection 427.1(8), the appropriate objects of the society or organization.
- f. The book and page number on which is recorded the contract of purchase or the deed to the property and any lease by which the property is held.
- g. An oath that no persistent violations of the laws of the state of Iowa will be permitted or have been permitted on such property.
- h. The signature of the president or other responsible official of the society or organization showing that information contained in the claim has been verified under oath as correct.

80.53(2) The statement of objects and uses required by Iowa Code subsection 427.1(14) shall be filed only on forms prescribed by the director of revenue and made available by assessors.

80.53(3) Applications for exemptions required under Iowa Code subsection 427.1(14) must be filed with the assessor not later than February 1 of the year for which the exemption is requested.

80.53(4) If a properly completed application is not filed by February 1 of the assessment year for which the exemption would apply, no exemption shall be allowed against the property for that year (1964 O.A.G. 437).

This rule is intended to implement Iowa Code section 427.1, subsections 5, 8, 14, 19 to 24, 27, and 29 to 33.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.54(427) Partial exemptions. In the event a portion of property is determined to be subject to taxation and a portion of the property exempt from taxation, the taxable value of the property shall be an amount which bears the same relationship to the total value of the entire property as the area of the portion subject to taxation bears to the area of the entire property. If a portion of a structure is subject to taxation, a proportionate amount of the value assigned to the land upon which the structure is located shall also be subject to taxation.

This rule is intended to implement Iowa Code subsection 427.1(14).
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.55(427,441) Taxable status of property.

80.55(1) The status of property on July 1 of the fiscal year which commences during the assessment year determines eligibility of the property for exemption in situations where no claim is required to be filed to procure a tax exemption. If the property is in a taxable status on July 1, no exemption is allowable for that fiscal year. If the property is in an exempt status on July 1, no taxes are to be levied against the property during that fiscal year. Exceptions to this rule are as follows:

a. Land acquired by the state of Iowa or a political subdivision thereof after July 1 in connection with the establishment, improvement, or maintenance of a public road shall be taxable for that portion of the fiscal year in which the property was privately owned.

b. All current and delinquent tax liabilities are to be canceled and no future taxes levied against property acquired by the United States or its instrumentalities, regardless of the date of acquisition, unless the United States Congress has authorized the taxation of specific federally owned property (1980 O.A.G. 80-1-19). The following exceptions apply:

(1) Property owned by the Federal Housing Authority (FHA) and property owned by the Federal Land Bank Association are subject to taxation, and any tax liabilities existing at the time of the acquisition are not to be canceled (1982 O.A.G. 82-1-16; 12 USCS §2055).

(2) Existing tax liabilities against property acquired by the Small Business Administration are not to be canceled if the acquisition takes place after the date of levy. However, no taxes are to be levied if the acquisition takes place prior to the levy date or for subsequent fiscal years in which the Small Business Administration owns the property on July 1 (15 USCS §646).

c. Land owned by the state and leased by the department of corrections or the department of human services pursuant to Iowa Code section 904.302, 904.705, or 904.706 to an entity that is not exempt from property tax is subject to taxation for the term of the lease. This provision applies to leases entered into on or after July 1, 2003. The lessor shall file a copy of the lease with the county assessor of the county where the land is located.

80.55(2) The status of property during the fiscal year for which an exemption was claimed determines eligibility of the property for exemption in situations where a claim is required to be filed to procure a tax exemption. If the property is used for an appropriate purpose for which an exemption is allowable for all of the fiscal year for which the exemption is claimed, no taxes are to be levied against the property during that fiscal year. If the property for which an exemption has been claimed and received is used for an appropriate purpose for which an exemption is allowable for only a portion of the fiscal year for which the exemption is claimed, the taxes shall be prorated in accordance with the period of time the property was in a taxable status during the fiscal year.

This rule is intended to implement Iowa Code sections 427.1(1), 427.1(2), 427.2, 427.18, and 427.19.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—80.56(427) Abatement of taxes. The board of supervisors may abate the taxes levied against property acquired by gift or purchase if the property was acquired after the deadline for filing a claim for property tax exemption if the property would have been exempt under Iowa Code section 427.1, subsection 7, 8, or 9, if a timely claim had been filed.

This rule is intended to implement Iowa Code section 427.3.

TITLE X
CIGARETTES AND TOBACCOCHAPTER 81
ADMINISTRATION

[Prior to 12/17/86, Revenue Department[730]]

701—81.1(453A) Definitions. As used in this title the following definitions apply:

“*Bank*” means a bank designated and authorized by the director of revenue to sell cigarette stamps and set cigarette meters.

“*Carton*” means a box or container of any kind in which ten or more packages or packs of cigarettes or tobacco products are offered for sale, sold, or otherwise distributed to consumers.

“*Cigarette licensee*” means any person who has or is required to obtain a permit of any kind under Iowa Code chapter 453A, division I.

“*Counterfeit cigarettes*” means cigarettes, packages of cigarettes, cartons of cigarettes or other containers of cigarettes with a label, trademark, service mark, trade name, device, design, or word adopted or used by a cigarette manufacturer to identify its product that is false or used without authority of the cigarette manufacturer.

“*Department*” means the Iowa department of revenue.

“*Director*” means the director of the department, or the director’s authorized representative.

“*License*” and “*permit*” are used interchangeably.

“*Licensee*” means any person holding or required to obtain a permit or license of any kind under Iowa Code chapter 453A.

“*Meter settings*” means Iowa cigarette meters which imprint indicia on cigarette packages.

“*Package*” or “*pack*” means a container of any kind in which cigarettes or tobacco products are offered for sale, sold, or otherwise distributed to consumers.

“*Revenue*” means any evidence of tax on cigarettes required by the department to be affixed to individual packages of cigarettes.

“*Stamps*” means Iowa Fusion stamps, 30,000 to a roll and Iowa hand stamps of any quantity authorized by the director to be applied to packages of cigarettes and little cigars.

“*Supplier*” means any person or firm authorized to manufacture or supply cigarette stamps for the department.

“*Tax*” means the tax imposed under Iowa Code chapter 453A on cigarettes or other tobacco products.

“*Taxpayer*” means any person required to collect or remit tax directly to the department or required to be licensed or to file any report or return or keep records under Iowa Code chapter 453A.

“*Tobacco*” means the same as “tobacco products” as defined in Iowa Code section 453A.42.

“*Tobacco licensee*” means any person who has or is required to obtain a permit of any kind under Iowa Code chapter 453A, division II.

In addition to these definitions, the definitions contained in Iowa Code sections 421B.2, 453A.1, and 453A.42 apply to these rules.

This rule is intended to implement Iowa Code chapter 453A as amended by 2004 Iowa Acts, Senate File 2296.

701—81.2(453A) Credentials and receipts. Employees of the department have official credentials and the taxpayer should require proof of the identity of any person claiming to represent the department. No charges shall be made nor gratuities of any kind accepted by an employee of the department for assistance given in or out of the office of the department.

All employees authorized to collect money are supplied with official receipt forms. When cash is paid to an employee, the taxpayer should require the employee to issue an official receipt. Such receipt shall show the taxpayer’s name, address and permit number; the purpose for the payment; and the amount of the payment. The taxpayer should retain all receipts, and only official receipts for a cash payment will be recognized by the department.

This rule is intended to implement Iowa Code sections 453A.25 and 453A.49.

701—81.3(453A) Examination of records. Within three years after a return or report is filed or within three years after the report or return became due, whichever is later, the department shall examine it, determine the amount of cigarette or tobacco tax due, and give notice of assessment to the taxpayer. If no return or report has been filed, the department may determine the amount of tax due and give notice thereof. The period of examination and determination of the correct amount of tax is unlimited in the case of a false or fraudulent report or return made with the intent to evade tax, or in the case of a failure to file a report or return, or if a person purchases or is in possession of unstamped cigarettes. The three-year period of limitation may be extended by a taxpayer by signing a waiver agreement form provided by the department. The agreement must stipulate the period of extension and the tax period to which the extension applies and must provide that a claim for refund may be filed at any time during the period of extension.

Whenever books and records are examined by an employee designated by the director, whether to verify a return, report, or claim for refund or in making an audit, an assessment will be issued for any amount of tax due or a refund made for any amount of tax overpaid.

This rule is intended to implement Iowa Code sections 453A.15, 453A.28, and 453A.46 as amended by 2004 Iowa Acts, Senate File 2296.

701—81.4(453A) Records. Every taxpayer subject to the provisions of Iowa Code chapter 453A shall keep, preserve, and make available to the department records for a period of three years. The following is a list of records subject to the provisions of this rule. For taxpayers using an electronic data interchange process or technology, also see 701—subrule 11.4(4).

81.4(1) Cigarette manufacturer. Licensed cigarette manufacturers are required to keep the following records.

- a. Records, including invoices, showing the sale of cigarettes in Iowa or the sale of cigarettes for shipment into Iowa.
- b. Records evidencing the transportation of cigarettes into Iowa.
- c. Records, including invoices, showing all sales of cigarettes to licensees.
- d. A record of all stamps purchased.
- e. Copies of all reports filed with the department.

Unlicensed cigarette manufacturers shipping cigarettes into Iowa are asked to keep records, including invoices, showing the sale of cigarettes in Iowa or the sale of cigarettes for shipment into Iowa.

Nothing in this rule shall be construed to affect the provisions of P.L. 95-575 (Contraband Cigarette Act, 18 USC Ch. 114) or P.L. 81-363 (Jenkins Act, 15 USC, Sec. 375).

81.4(2) Cigarette distributing agent.

- a. Records of the receipt of all cigarettes showing the amount of cigarettes received and from whom received.
- b. Records of all distribution of cigarettes showing the amount of cigarettes shipped, to whom and at whose direction the cigarettes were distributed.
- c. Records showing all exports of cigarettes.
- d. Copies of all reports filed with the department.
- e. Detailed inventory records.
- f. Freight receiving and shipping records.

81.4(3) Cigarette distributors.

- a. Records, including invoices, showing the purchase of all cigarettes sold, used or stored in Iowa.
- b. Records, including invoices, showing the sale of cigarettes in Iowa.
- c. Detailed inventory records.
- d. Freight receiving and shipping records.
- e. A record of all stamps purchased.
- f. Copies of all reports filed with the department.

81.4(4) Wholesaler.

- a. Records, including invoices, evidencing the purchase of all cigarettes.
- b. Records, including invoices, evidencing the sale of all cigarettes.

c. Detailed inventory records.

81.4(5) Cigarette vendor.

a. Records, including invoices, evidencing the purchase of all cigarettes.

b. Records evidencing the sale of cigarettes.

c. Inventory records.

d. Records of all cigarette vending machines owned, furnished, installed, serviced, operated or maintained by the vendor and the location of each.

81.4(6) Cigarette retailer.

a. Records, including invoices, evidencing the purchase of all cigarettes.

b. Inventory records.

81.4(7) Tobacco distributor. The same records as a cigarette distributor but with respect to tobacco, excluding records of stamps purchased. (See 81.4(3))

81.4(8) Tobacco subjobber. The same records as a cigarette wholesaler but with respect to tobacco.

81.4(9) Tobacco retailer. The same records as a cigarette retailer but with respect to tobacco.

81.4(10) Common carrier engaged in transporting cigarettes or tobacco products into Iowa.

a. Copies of bills of lading or manifests as to each transportation of cigarettes or tobacco.

b. Log book or trip sheets.

81.4(11) Microfilm and related records system. Microfilm, microfiche, COM (computer on machine) and other related reduction in storage systems will be referred to as "microfilm" in this rule.

Microfilm reproductions of general books of account, such as a cash book, journals, voucher registers, ledgers, etc., are not acceptable other than those that have been approved by the Internal Revenue Service under Revenue Procedure 76-43, Section 302. However, microfilm reproductions of supporting records of detail, such as sales invoices, purchase invoices, credit memoranda, etc., may be allowed providing all the following conditions are met and accepted by the taxpayer.

a. Appropriate facilities are provided to ensure the preservation and readability of the films.

b. Microfilm rolls are indexed, cross-referenced, labeled to show beginning and ending numbers or beginning and ending alphabetical listing of documents included, and are systematically filed.

c. The taxpayer agrees to provide transcripts of any information contained on microfilm which may be required for purposes of verification of tax liability.

d. Proper facilities are provided for the ready inspection and location of the particular records, including modern projectors for viewing and for the copying of records.

e. Any audit of "detail" on microfilm may be subject to sample audit procedures, to be determined at the discretion of the director or the director's designated representative.

f. A posting reference must be on each invoice.

g. Credit memoranda must carry a reference to the document evidencing the original transaction.

h. Documents necessary to support claimed exemptions from tax liability, such as bills of lading and purchase orders, must be maintained in an order by which they readily can be related to the transaction for which exemption is sought.

81.4(12) Automatic data processing records. Automatic data processing is defined in this rule as including electronic data processing (EDP) and will be referred to as ADP.

a. An ADP tax accounting system must have built into its program a method of producing visible and legible records which will provide the necessary information for verification of the taxpayer's tax liability.

b. ADP records must provide an opportunity to trace any transaction back to the original source or forwarded to a final total. If detail printouts are not made of transactions at the time they are processed, then the system must have the ability to reconstruct these transactions.

c. A general ledger with source references will be produced as hard copy to coincide with financial reports of tax reporting periods. In cases where subsidiary ledgers are used to support the general ledger accounts, the subsidiary ledgers should also be produced periodically.

d. Supporting documents and audit trail. The audit trail should be designed so that the details underlying the summary accounting data may be identified and made available to the director or the director's designated representative upon request. The system should be so designed that the supporting

documents, such as sales invoices, purchase invoices, credit memoranda, etc., are readily available. (An audit trail is defined as the condition of having sufficient documentary evidence to trace an item from source (invoice, check, etc.) to a financial statement or tax return; or the reverse; that is, to have an auditable system.)

e. Program documentation. A description of the ADP portion of the accounting program should be available. The statements and illustrations as to the scope of operations should be sufficiently detailed to indicate:

- (1) The application being performed;
- (2) The procedure employed in each application (which, for example, might be supported by flow charts, block diagrams or other satisfactory description of the input or output procedures); and
- (3) The controls used to ensure accurate and reliable processing. Program and systems changes, together with their effective dates should be noted in order to preserve an accurate chronological record.

f. Storage of ADP output will be in appropriate facilities to ensure preservation and readability of output.

81.4(13) General requirements. If a tax liability has been assessed and an appeal is pending to the department, state board of tax review or district or supreme court, books, papers, records, memoranda or documents specified in this rule which relate to the period covered by the assessment shall be preserved until the final disposition of the appeal.

The records will be considered inadequate when the requirements of this rule are not met. The director may, by express order in certain cases, authorize permit holders to keep their records in a manner and upon forms other than those so prescribed (agreements must be in writing).

81.4(14) Other persons. The director may require any person other than those previously listed in this rule to maintain books and records as deemed necessary by the director.

This rule is intended to implement Iowa Code sections 453A.15 and 453A.45 as amended by 2004 Iowa Acts, Senate File 2296, and Iowa Code sections 453A.18, 453A.19, 453A.24, and 453A.49.

701—81.5(453A) Form of invoice. Whenever an invoice is required to be prepared or kept by Iowa Code chapter 453A or these rules, it shall minimally contain the following information:

1. The seller's name, address.
2. The purchaser's name, address and permit number (if any).
3. The date of sale.
4. All prices and discounts stated separately.
5. An indication as to whether cigarettes or tobacco products are being sold with or without tax stamps attached or tax included.
6. The origination and destination points.

This rule is intended to implement Iowa Code sections 453A.15, 453A.25, 453A.45 and 453A.49.

701—81.6(453A) Audit of records—cost, supplemental assessments and refund adjustments. The department shall have the right and duty to examine or cause to be examined the books, records, memoranda or documents of a taxpayer for the purpose of verifying the correctness of a return or report filed or determining the tax liability of any taxpayer under Iowa Code chapter 453A.

When it is determined, upon audit, that any person dealing in cigarettes owes additional tax, the costs of the audit are assessed against such person as additional penalty.

The department may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the department and the taxpayer are precluded from making a supplemental assessment or refund adjustment concerning the same issue

involved in such appeal for the same tax period unless there is a showing of mathematical or clerical error or a showing of fraud or misrepresentation.

This rule is intended to implement Iowa Code section 453A.30.
[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—81.7(453A) Bonds. When bonds are required by Iowa Code chapter 453A or these rules, said bonds shall be in the form of cash, a certificate of deposit or a bond issued by a surety company licensed to do business in the state of Iowa, payable to the state of Iowa and in a form approved by the director. Bonds required by tobacco distributors must be issued by a surety company licensed to do business in Iowa. However, upon approval by the director, a cash bond or a certificate of deposit will be accepted by the department as a substitute for the surety bond. (See Iowa Code section 453A.44(4).)

This rule is intended to implement Iowa Code sections 453A.14 and 453A.44.

701—81.8(98) Penalties. Renumbered as 701—10.76(98), IAB 1/23/91.

701—81.9(98) Interest. Renumbered as 701—10.77(98), IAB 1/23/91.

701—81.10(98) Waiver of penalty or interest. Renumbered as 701—10.78(98), IAB 1/23/91.

701—81.11(453A) Appeal—practice and procedure before the department.

81.11(1) Procedure. The practice and procedure before the department is governed by Iowa Code chapter 17A and 701—Chapter 7 of the department's rules.

81.11(2) Appeals—time limitations. For notices of assessment or refund denial issued on or after January 1, 1995, the department will consider a protest to be timely filed if filed no later than 60 days following the date of the assessment notice or refund denial, or if a taxpayer failed to timely appeal a notice of assessment, the taxpayer may make payment pursuant to rule 701—7.8(17A) and file a refund claim within the period provided by law for filing such claims.

This rule is intended to implement Iowa Code chapter 17A as amended by 1998 Iowa Acts, chapter 1202, and sections 453A.25, 453A.28, 453A.29, 453A.46, 453A.48, and 453A.49.
[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—81.12(453A) Permit—license revocation.

81.12(1) Cigarette permits. Cigarette permits issued by the department must be revoked if the permittee willfully violates the provisions of Iowa Code section 453A.2 (sale or gift to minors). The department may revoke permits issued by the department for violation of any other provision of division I of Iowa Code chapter 453A or the rules promulgated thereunder. (Also see Iowa Code chapter 421B and rule 701—84.7(421B).) The revocation shall be subject to the provisions of rule 701—7.23(17A). The notice of revocation shall be given to the permittee at least ten days prior to the hearing provided therein. The department will revoke a permit of a permit holder, who is an individual, if the department has received a certificate of noncompliance from the child support unit in regard to the permit holder, unless the unit furnishes the department with a withdrawal of the certificate of noncompliance.

If a retailer or employee of a retailer has violated Iowa Code section 453A.2 or 453A.36(6), the city council, county board of supervisors, or the Iowa department of public health shall assess a penalty as provided in Iowa Code section 453A.22(2) as amended by 2003 Iowa Acts, chapter 26. The penalty procedures are governed by Iowa Code section 453A.22(1) and the individual council's or board's procedures. Iowa Code chapter 17A does not apply to boards of supervisors or city councils. (See rule 701—84.7(421B).) The board of supervisors or the city council that issued a retail permit is required by Iowa Code chapter 252J to revoke the permit of any retailer who is an individual if the board or council has received a certificate of noncompliance from the child support recovery unit in regard to the retailer, unless the unit furnishes the board of supervisors or the city council with a withdrawal of the certificate of noncompliance.

If a permit is revoked under this subrule, except for the receipt of a certificate of noncompliance from the child support recovery unit, the permit holder cannot obtain a new cigarette permit of any kind nor

may any other person obtain a permit for the location covered by the revoked permit for a period of one year unless good cause to the contrary is shown to the issuing authority. If a retail permit is suspended or revoked, the suspension or revocation applies only to the place of business where the violation occurred and not to any other place of business covered by the permit.

The department or local authority must report the suspension or revocation of a retail permit to the department of public health within 30 days of the suspension or revocation.

81.12(2) Tobacco licenses. The director may revoke, cancel or suspend the license of any tobacco distributor or tobacco subjobber for violation of any provision in division II of Iowa Code chapter 453A, the rules promulgated thereunder, or any other statute applicable to the sale of tobacco products. The licensee shall be given ten days' notice of a revocation hearing under Iowa Code section 453A.48(2) and rule 701—7.23(17A). No license may be issued to any person whose license has been revoked under Iowa Code section 453A.44(11) for a period of one year. The department will revoke a license of a licensee, who is an individual, if the department has received a certificate of noncompliance from the child support recovery unit in regard to the licensee, unless the unit furnishes the department with a withdrawal of the certificate of noncompliance.

This rule is intended to implement Iowa Code section 453A.22 as amended by 2003 Iowa Acts, chapter 26, and sections 453A.13, 453A.44(11) and 453A.48(2).
[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—81.13(453A) Permit applications and denials.

81.13(1) Applications for permits. The application forms for all permits issued under Iowa Code chapter 453A are available from the department upon request. The applications shall include, but not be limited to:

- a. The nature of the applicant's business;
- b. The type of permit requested;
- c. The address of the principal office of the applicant;
- d. The place of business for which the permit is to apply;
- e. The names and addresses of principal officers or members, not to exceed three, if the business is not a sole proprietorship;
- f. A list of persons who will be the applicant's suppliers or customers or both (whichever is applicable);
- g. If the applicant intends to operate as a cigarette distributor, a certificate from a manufacturer of cigarettes indicating an intention to sell unstamped cigarettes to the applicant;
- h. Whether or not the applicant possesses any other permit issued under Iowa Code chapter 453A; and
- i. The signature of the person making the application. For electronically transmitted applications, the application form shall state that, in lieu of the person's handwritten signature, the person's E-mail address or the person's fax signature will constitute a valid signature.

81.13(2) Denial of application for permit. The department may deny a permit to any applicant who is, at the time of application, substantially delinquent in paying any tax due which is administered by the department or the interest or penalty on the tax. If the applicant is a partnership, a permit may be denied if a partner is substantially delinquent in paying any tax, penalty, or interest regardless of whether the tax is in any way a liability of or associated with the partnership. If an applicant for a permit is a corporation, the department may deny the applicant a permit if any officer, with a substantial legal or equitable interest in the ownership of the corporation, owes any delinquent tax, penalty, or interest of the applicant corporation. In this latter instance, the corporation must, initially, owe the delinquent tax, penalty, or interest, and the officer must be personally and secondarily liable for the tax. This is in contrast to the situation regarding a partnership. See rule 701—13.16(422) for characterizations of the terms "tax administered by the department" and "substantially delinquent" in paying a tax. This subrule is applicable to tax, interest, and penalty due and payable on and after January 1, 1987.

The director will deny a permit to any applicant, who is an individual, if the department has received a certificate of noncompliance from the child support recovery unit in regard to the individual, unless the unit furnishes the department with a withdrawal of the certificate of noncompliance.

81.13(3) *Revocation of a permit.* The department may revoke the permit of any permit holder who becomes substantially delinquent in paying any tax which is administered by the department or the interest or penalty on the tax. If the permit holder is a corporation, the department may revoke the permit if any officer, with a substantial legal or equitable interest in the ownership of the corporation, owes any delinquent tax, penalty, or interest of the applicant corporation. In this latter instance, the corporation must, initially, owe the delinquent tax, penalty, or interest, and the officer must be personally and secondarily liable for the tax. If the permit holder is a partnership, a permit cannot be revoked for a partner's substantial delinquency in paying any tax, penalty, or interest which is not a liability of the partnership. See rule 701—13.16(422) for characterizations of the terms "tax administered by the department" and "substantially delinquent" in paying a tax. This subrule is applicable to tax, interest, and penalty due and payable on and after January 1, 1987.

The department will revoke the permit of any permit holder, who is an individual, if the department has received a certificate of noncompliance from the child support recovery unit in regard to the individual, unless the unit furnishes the department with a withdrawal of the certificate of noncompliance.

81.13(4) *Applications for retail cigarette permits.* Applications for retail cigarette permits are supplied by the department to city councils and county boards of supervisors. The application must be obtained from and filed with the individual council or board. The board of supervisors or the city council is required by 1995 Iowa Acts, chapter 115, to deny a retail permit to any applicant, who is an individual, if the board or council has received a certificate of noncompliance from the child support recovery unit in regard to the individual, unless the unit furnishes the board of supervisors or city council with a withdrawal of the certificate of noncompliance.

This rule is intended to implement Iowa Code sections 453A.13, 453A.16, 453A.17, 453A.22, 453A.23, and 453A.44, and 1995 Iowa Acts, chapter 115.

701—81.14(453A) Confidential information. The release of information contained in any reports or returns filed under Iowa Code chapter 453A or obtained by the department in the administration of Iowa Code chapter 453A is governed by the general provisions of Iowa Code chapter 22 since there are no specific provisions relating to confidential information contained in chapter 453A. Any requests for information must be made pursuant to rule 701—6.2(17A). See rule 701—6.3(17A).

Any request for information pertaining to a taxpayer's business affairs, operations, source of income, profits, losses, or expenditures must be made in writing to the director. The taxpayer to whom the information relates will be notified of the request for information and will be allowed 30 days to substantiate any claim of confidentiality under Iowa Code chapter 22 or any other statute such as Iowa Code section 422.72. If substantiated, the request will be denied; otherwise, the information will be released to the requesting party. This rule will not prevent the exchange of information between state and federal agencies.

This rule is intended to implement Iowa Code sections 453A.25 and 453A.49.

701—81.15(98) Request for waiver of penalty. Renumbered as 701—10.79(98), IAB 1/23/91.

701—81.16(453A) Inventory tax. All persons required to obtain a permit under Iowa Code section 453A.13 as distributors shall take an inventory of all cigarettes and little cigars in their possession prior to delivery for resale upon which the tax has been affixed and all unused cigarette tax stamps and unused metered imprints in their possession at the close of business on the day preceding the effective date of an increase in the tax rate.

Persons required to take an inventory shall remit the tax due on all cigarette stamps or metered imprints and all cigarettes and little cigars with revenue affixed in their possession prior to delivery for resale within 30 days of the inventory date. The tax is equal to the difference between the amount paid

for cigarette stamps or metered imprints purchased prior to the tax increase and the amount that is to be paid for cigarette stamps or metered imprints purchased after the tax increase.

In computing the inventory tax, any discount allowed or allowable under Iowa Code section 453A.8 shall not be considered.

The inventory tax is applicable only when there is an increase in the tax rate. See rule 701—82.11(453A) for an explanation of whether a refund is allowable when there is a decrease in the tax rate.

This rule is intended to implement Iowa Code sections 453A.6, 453A.40, and 453A.43.

CHAPTER 82
CIGARETTE TAX

[Prior to 12/17/86, Revenue Department[730]]

701—82.1(453A) Permits required. Every person selling or distributing cigarettes or using or consuming untaxed cigarettes within the state of Iowa must first obtain the appropriate permit.

82.1(1) Distributor's permit. Every person acting as a distributor as defined in Iowa Code section 453A.1 must obtain a permit from the department. A distributor is any person who obtains unstamped cigarettes within or without this state by manufacture, production, import or by any means for the purpose of making the first intrastate sale or distribution or the first use or consumption in Iowa. Every distributor holding a distributor's permit will cause to be affixed, within or without Iowa, all cigarette tax stamps or meter impressions as set forth in rule 82.8(453A) and Iowa Code section 453A.10. The distributor permit expires annually on June 30, and costs \$100. A distributor must obtain a duplicate permit for each place of business owned or operated by the distributor from which distributor activities are carried on. Duplicate distributor permits may be obtained from the department at an annual cost of \$5 for each duplicate permit. A distributor may act as a wholesaler without obtaining a wholesaler's permit, but a wholesaler's permit may be obtained upon meeting all of the requirements for the issuance of a wholesaler's permit. If a distributor performs any other function which requires a permit, a separate permit must be obtained. If a person is not performing the functions of a distributor, a permit will not be issued.

82.1(2) Wholesaler's permit. Every person acting as a wholesaler as defined in Iowa Code section 453A.1 must obtain a wholesaler's permit. A wholesaler is any person, other than a distributor or a distributing agent, who sells or distributes cigarettes within Iowa for resale. A "sale or distribution" of cigarettes connotes a transfer of cigarettes from one person or entity to another person or entity. *Union Oil Co. of California v. State*, 2 Wash. 2d 436, 98 P. 2d 660 (1940); *State v. Nash Johnson and Sons' Farms Inc.*, 263 N.C. 66, 138 S.E. 2d 773 (1964). Therefore, an intraentity transfer is not a transaction which qualifies as a function of a wholesaler. The wholesaler permit expires annually on June 30, and costs \$100 annually. A wholesaler must obtain a duplicate permit for each place of business owned or operated by the wholesaler from which wholesale activities are carried on. Duplicate wholesaler permits may be obtained from the department at an annual cost of \$5 for each duplicate permit. If a person is not performing the functions of a wholesaler, a permit will not be issued.

The following example will illustrate the application of this subrule:

The XYZ Grocery Chain has a warehouse in Des Moines where stamped cigarettes are stored. The stamped cigarettes are purchased from a permitted distributor. XYZ transfers the cigarettes to its retail outlets across the state for the purpose of making retail sales, and makes no other sales. The storage of stamped cigarettes and the retail sale of cigarettes are not functions of a wholesaler, and XYZ would not be eligible for a wholesaler's permit.

82.1(3) Cigarette vendor's permit. Every person acting as a cigarette vendor as defined in Iowa Code section 453A.1 must obtain a permit from the department. A cigarette vendor is any person who takes responsibility for furnishing, installing, servicing, operating or maintaining one or more vending machines for the purpose of selling cigarettes at retail, and does so by reason of ownership, agreement or contract.

A retailer who holds a retail permit is not required to get a cigarette vendor's permit if the retail permittee is, in fact, the owner of the cigarette vending machine(s) which is operated in the location described in the retail permit. The cigarette vendor's permit expires annually on June 30, and costs \$100 annually. A cigarette vendor must have a duplicate permit for each place of business from which cigarette vending machines are furnished, installed or serviced. A duplicate permit can be obtained from the department for an annual cost of \$5. The duplicate permit applies to additional places of business from which the cigarette vendor conducts operations and not to those places of business where the cigarette vending machines are installed for retail sales.

EXAMPLE: A cigarette vendor owns three warehouses from which the vendor supplies cigarettes to 100 vending machines located at various retail establishments. The total permit cost for the vendor would be \$110 (\$100 for a regular permit plus \$10 for two duplicate permits at \$5 each).

82.1(4) *Railway retail permit.* A retail permit may be issued to a railway dining car company, railway sleeping car company, railroad or a railway company. A retailer's permit for railway cars is issued by the department for an annual cost of \$25 and expires on June 30 of each year. A duplicate permit is required for each car in which cigarettes are stored for sale or sold and each duplicate permit is issued by the department at an annual cost of \$2.

82.1(5) *Manufacturer's permit.* Any manufacturer, as defined in Iowa Code section 453A.1, may obtain a manufacturer's permit from the department. A manufacturer is any person who ships cigarettes into this state from outside the state. The permit is issued without cost and is valid until revoked or canceled. The permit allows the manufacturer to purchase tax stamps from the department and to affix such stamps to cigarettes outside of this state prior to their shipment into the state. A manufacturer is required to affix stamps to cigarettes prior to their shipment into this state unless the cigarettes are shipped to an Iowa permitted distributor or an Iowa permitted distributor's agent.

82.1(6) *Distributing agent's permit.* Every person acting as a distributing agent as defined in Iowa Code section 453A.1 must obtain a permit from the department. A distributing agent is any person in this state who acts as an agent of any manufacturer outside of the state by storing cigarettes received in interstate commerce from such manufacturer subject to distribution or delivery to distributors upon orders received from the manufacturer in interstate commerce and transmitted to such distributing agent for fulfillment from such storage place. The distributing agent's permit is issued by the department at an annual cost of \$100 and expires on June 30 of each year. A separate permit at the \$100 cost must be obtained for each place of business owned or operated within the state by the distributing agent. The permit authorizes the distributing agent to store unstamped cigarettes which are received in interstate commerce for distribution or delivery to distributors upon orders received from outside this state or to be sold outside this state. Stocks of cigarettes held for interstate and intrastate commerce must be kept separate.

82.1(7) *Retailer's permit.*

a. In general. Every person acting as a retailer, as defined in Iowa Code section 453A.1, must obtain a permit. A retailer is any person who:

- (1) Directly sells, distributes or offers for sale cigarettes for consumption, or
- (2) Possesses cigarettes for direct sale for consumption.

Retail permits are issued by the following authorities at the following prices:

1. Within unincorporated areas of a county, by the county board of supervisors at an annual cost of \$50.
2. Within the city limits of a city of less than 15,000 population, by the city council, at an annual cost of \$75.
3. Within the city limits of a city equal to or greater than 15,000 population, by the city council, at an annual cost of \$100.

The retail permit expires on June 30 of each year. A renewal sticker furnished by the department containing the appropriate year and number may be issued in lieu of a new permit where the place of business of the retail permit holder has remained the same. The retail permit is valid only for the location described in the permit, and a retailer must obtain a separate permit for each place of business owned or operated by the retailer. (See subrule 82.2(3))

The power to grant the retail permit is discretionary with the city council or board of supervisors, and uniform, nondiscriminatory limits may be placed on its issuance. *Bernstein v. City of Marshalltown*, 215 Iowa 1168, 248 N.W. 26 (1933); *Ford Hopkins Co. v. City of Iowa City*, 216 Iowa 1286, 248 N.W. 668 (1933); 1938 O.A.G. 708. The city or county must submit a copy of any retail permit issued and the application for the permit to the department of public health within 30 days of issuance.

b. Mobile retailer. If a cigarette retailer sells cigarettes from a mobile concession vehicle, the vehicle itself shall be considered a place of business. A city has the discretionary power to grant a retail cigarette permit to a place of business located within the corporate limits of that city. A county

has the discretionary power to grant a retail cigarette permit to a place of business located within the unincorporated areas of the county. If a retailer is selling cigarettes from a mobile concession vehicle within the area of several permit-issuing authorities, the retailer must obtain a permit from each authority. The retailer is operating a single place of business within the jurisdiction of the several authorities and is, therefore, subject to regulation by each.

The location described on the permit shall include identification of the vehicle and the address of the permanent place of business from which the vehicle is dispatched. If the vehicle is traded in for a new vehicle, the exchange provisions of subrule 82.2(3) shall apply.

This rule is intended to implement Iowa Code section 453A.13 as amended by 2000 Iowa Acts, Senate File 2366, and sections 453A.16, 453A.17, and 453A.23.

701—82.2(453A) Partial year permits—payment—refund—exchange. For purposes of this rule, “year” means the cigarette tax year running from July 1 of year A to June 30 of year B and “quarter” means a yearly quarter with the first quarter commencing on July 1.

82.2(1) Partial payment. If any permit is granted other than in the first quarter, the following partial payments are required:

1. During the second quarter - 75 percent of the permit fee.
2. During the third quarter - 50 percent of the permit fee.
3. During the fourth quarter - 25 percent of the permit fee.

82.2(2) Partial refund. If any unrevoked permit for which the entire annual fee has been paid is voluntarily surrendered, the following permit fees will be refunded:

1. During the first quarter - 75 percent of the permit fee.
2. During the second quarter - 50 percent of the permit fee.
3. During the third quarter - 25 percent of the permit fee.

If any unrevoked permit for which 75 percent of the annual fee has been paid is voluntarily surrendered, the following permit fees will be refunded by the entity which issued the permit:

1. During the second quarter - 50 percent of the permit fee.
2. During the third quarter - 25 percent of the permit fee.

If any unrevoked permit for which 50 percent of the annual fee has been paid is voluntarily surrendered, the following permit fees will be refunded:

During the third quarter - 25 percent of the annual fee.

82.2(3) Exchange of permits. If a permittee changes the location of an operation requiring a permit but remains within the jurisdiction of the same entity which granted the original permit, the permittee may exchange the invalid permit (valid only for the location described in the permit) for a valid permit free of charge, without the partial payment-partial refund process. (1934 O.A.G. 106)

The following nonexclusive examples will illustrate the application of this rule:

EXAMPLE 1: City Bar and Grill sells cigarettes at retail and has obtained a retail cigarette permit from the city of Des Moines. The establishment is moved across the street but remains within the city limits of Des Moines. The retail permit is valid only for the location described in the permit, and therefore, the original permit is no longer valid. However, since the establishment has remained within the jurisdiction of the entity which granted the original permit, Des Moines, the original, presently invalid permit may be exchanged for a valid permit with a new location description at no cost.

EXAMPLE 2: Same as Example 1, except the new location of City Bar and Grill is outside the corporate limits of Des Moines and within the unincorporated area of Polk County. City Bar and Grill would have to surrender the old permit to the city of Des Moines and obtain a new permit from Polk County with the schedules set forth in this rule applying.

This rule is intended to implement Iowa Code section 453A.13, subsections 3 and 4.

701—82.3(453A) Bond requirements. The amount of the bond required for each permit shall be as follows:

1. Distributor permit - \$2,500
2. Wholesaler permit - \$2,500

3. Vendor permit - \$1,000
4. Railway car retail permit - \$500
5. Manufacturer permit - \$5,000
6. Distributing agent permit - \$2,500
7. Retail permit - \$0-
8. Nonpermittee storing interstate cigarettes - \$5,000

If a person is required to obtain more than one type of permit, the bond requirements shall be cumulative and additional bonds or a single bond equal to the total aggregate requirements must be obtained. (See rule 701—81.7(453A) for the required form of the bond.)

This rule is intended to implement Iowa Code sections 453A.14, 453A.17 and 453A.23.

701—82.4(453A) Cigarette tax—attachment—exemption—exclusivity of tax.

82.4(1) Tax. See Iowa Code section 453A.6 for the rate of tax imposed on cigarettes.

82.4(2) Attachment. The tax is imposed when the cigarettes are received by any person in Iowa for the purpose of making a “first sale” of the cigarettes (as defined in Iowa Code section 453A.1). If the tax is not paid by the person making the first sale, it must be paid by any person into whose possession such cigarettes come until the tax has been paid, the tax to be paid only once. The fact that the tax is eventually paid will not relieve the person’s standing prior in the chain of distribution of the sanctions for distributing untaxed cigarettes if the tax should have been paid sooner by said person.

The tax must be added to the selling price of every package of cigarettes so that the ultimate consumer bears the burden of the tax.

82.4(3) Exemption. If all of the following conditions are met, the Iowa cigarette tax need not be paid:

- a. The cigarettes are imported on or about the person claiming the exemption,
- b. The total quantity of cigarettes so imported is equal to or less than 40,
- c. The seal of the individual cigarette package has been broken, and
- d. The cigarettes are actually used by the person so importing and are not sold or offered for sale.

82.4(4) Exclusivity of tax. No other occupation or excise tax may be imposed by any political subdivision of the state. However, this provision does not apply to occupation or excise taxes imposed by the state.

82.4(5) Sales exempt from tax. Sales of cigarettes which the state is prohibited from taxing under the Constitution or the laws of the United States or under the Constitution of this state are exempt from the tax. If the sale is exempt from the tax, stamps must not be attached. No refund will be issued for stamps which are attached to cigarette packages which are later sold exempt.

a. *Sales to the federal government.* Military post exchanges or instrumentalities of the federal government are not required to comply with the provisions of Iowa Code chapter 453A nor pay the tax imposed thereunder. However, individuals who have purchased or obtained cigarettes from a federal instrumentality and come within the jurisdiction of the state, are subject to the provisions of Iowa Code sections 453A.6(2), 453A.36(1) and 453A.37. *U.S. v. Tax Commission of Mississippi*, 421 U.S. 599, 44 L.Ed. 2d 404, 95 S.Ct. 1872 (1975).

b. *Sales by or to Indians.* Sales by Indians to other Indians of their own tribe on federally recognized Indian reservations or settlements of which they are tribal members are exempt from the tax. The Indian sellers are subject to the record-keeping requirements of Iowa Code chapter 453A. The cigarettes must be purchased by the Indian seller with the tax included in the purchase price. The tax exemption is allowed to the Indian purchaser by the purchaser’s filing a claim for refund of the tax paid or to the tribe of which the Indian purchaser is a member by the tribe’s filing a claim for refund of the tax paid by the tribe on cigarettes sold to the Indian purchaser.

This rule is intended to implement Iowa Code section 453A.6 as amended by 1999 Iowa Acts, chapter 151.

701—82.5(453A) Cigarette tax stamps.

82.5(1) In general. To evidence the payment of the cigarette tax, cigarette stamps must be securely affixed to the individual cigarette containers. The stamps shall be provided by the director, and either

sold directly to a distributor or a manufacturer holding a valid distributor's or manufacturer's permit or through authorized banks, as defined in Iowa Code section 524.103 to these same permittees. The possession of unstamped cigarettes by persons not authorized to possess unstamped cigarettes shall be prima facie evidence of the nonpayment of the tax. The penalty for possession of unstamped cigarettes is set forth in Iowa Code section 453A.31(1) as amended by 1999 Iowa Acts, chapter 151, section 81. Any person in possession of unstamped cigarettes must pay the tax directly to the department. If sales of cigarettes exceed the purchase of cigarette stamps by persons authorized and responsible to affix stamps, there is established a rebuttable presumption that the excess cigarettes were sold without the tax stamps affixed thereto.

82.5(2) *Purchase of stamps from the department.* Stamps may be purchased from the department and from authorized banks in unbroken rolls of 30,000 stamps, or other quantities authorized by the director. The stamps may be purchased only by persons holding an unrevoked distributor's permit or an unrevoked manufacturer's permit.

When cigarette stamps are purchased from the department, orders shall be sent directly to the department on a form prescribed by and available upon request from the department. The order must be accompanied by a remittance payable to "Treasurer of State of Iowa" in the amount of the face value of the stamps less any discount as provided in rule 701—82.7(453A). The stamps shall be sent to the purchaser through the United States Postal Service by registered mail or similar delivery service at the department's expense. The purchaser may request alternate methods of transmission, but such methods shall be at the expense of the purchaser. Regardless of the method used to send the stamps, title transfers to the purchaser at the time the department delivers the stamps to the carrier.

82.5(3) *Purchase of stamps from authorized bank.* The purchase of stamps from an authorized bank must be made by the distributor or manufacturer or the distributor's or manufacturer's representative. The permittee shall furnish the bank with a requisition form prescribed by the department along with payment for the full price of the stamps less any discount as provided in rule 701—82.7(453A). The director may require such payments to be by cashier's check or certified check as to any individual distributor or manufacturer. The authorized bank shall be notified in writing by the department of any such requirement. Distributors or manufacturers who elect to purchase stamps from authorized banks shall advise the department in writing of the authorized bank so elected. The distributor or manufacturer may not purchase from any other bank other than the one so selected, but may still purchase stamps directly from the department. See rule 701—82.6(453A) for restrictions on authorized banks as to the sale of stamps. Also see rule 82.11(453A) relating to refunds.

This rule is intended to implement Iowa Code sections 453A.6, 453A.8, and 453A.28 as amended by 1999 Iowa Acts, chapter 151, and Iowa Code sections 453A.7, 453A.10, 453A.12, and 453A.35.

701—82.6(453A) Banks authorized to sell stamps—requirements—restrictions.

82.6(1) *Authorization.* The director has the discretion to allow the sale or distribution of stamps through authorized banks as defined in Iowa Code section 524.103. The authorization of a bank to sell stamps is not a mandatory direction, but may be utilized by the director to enhance the efficiency of the tax stamp distribution system. Some of the factors the director will consider in determining whether or not to authorize a bank to sell stamps are:

- a. Geographical location in relation to distributors or manufacturers requesting alternative purchase locations,
- b. The anticipated volume of stamps to be purchased by the requesting distributors or manufacturers,
- c. Access to transportation systems, and
- d. Prior experience with the bank.

82.6(2) *Sale of stamps.* An authorized bank may sell cigarette stamps only to distributors or manufacturers holding valid permits who have "elected" (as per subrule 82.5(3)) to purchase stamps from that bank. The department shall furnish each bank with a list of all such distributors or manufacturers who have so elected, and the bank shall not sell stamps to persons not on the list. The

bank must receive payment in full, less the discount, before selling stamps. See rule 82.7(453A). A bank is not authorized to accept credit memorandums from distributors or manufacturers.

82.6(3) *Stamp inventory.* Each bank shall keep an adequate inventory of stamps on hand to supply distributors or manufacturers assigned to said bank for at least six weeks. Stamps will be shipped freight prepaid to the bank from the department or from the supplier of the stamps. The supplier of the stamps shall advise the department at once by mail of a shipment to a bank and the bank shall advise the department at once by mail of the receipt of the stamps. Each bank shall store stamps in a secure vault.

82.6(4) *Reports and remittances.* Each bank authorized to sell stamps shall forward to the department the invoices, requisitions, and remittances for stamps sold on a daily basis. Each bank shall forward to the department, on the first working day of each month, an inventory report which shall minimally include as to the prior month: the quantity of stamps on hand at the beginning of the month, the quantity of stamps received during the month, the quantity of stamps sold as to each distributor or manufacturer, the quantity of stamps on hand at the end of the month and the signature of the person responsible for the stamps.

82.6(5) *Audit.* For the purpose of auditing for the end of the fiscal year, no bank shall sell cigarette stamps on the days from June 25 to June 30. With or without notice, the department or a representative designated by the department may take an inventory of stamps and audit stamp sales.

Each bank must retain all records of inventory, stamp receipts, and stamp sales for a period of three years.

82.6(6) *Termination of authorization.* The director may terminate the authorization of a bank to sell stamps if the bank has failed to comply with the provisions of this rule or Iowa Code chapter 453A, or if the director deems it desirable for the efficient distribution of stamps. Notice of termination shall be sent to the bank by certified mail. The bank may appeal the termination determination by filing a protest pursuant to 701—Chapter 7 within 30 days of notice of termination. A bank may voluntarily terminate the sale of stamps by giving the department 90 days' written notice. Upon termination, the bank must immediately return all stamps and present a final accounting, along with any remittances, to the department.

This rule is intended to implement Iowa Code sections 453A.8, 453A.12, and 453A.25.

701—82.7(453A) *Purchase of cigarette tax stamps—discount.* Upon the purchase of cigarette tax stamps, the distributor or manufacturer shall be entitled to a discount of 2 percent from the face value of the stamps.

This rule is intended to implement Iowa Code section 453A.8.

701—82.8(453A) *Affixing stamps.* Every package of cigarettes received in this state by a permitted distributor or for distribution within or without the state of Iowa must be stamped within 48 hours of its receipt, unless the distributor is also permitted as and is acting as a distributing agent. The cigarettes held by a person acting as a distributor and those held by the same person who is also acting as a distributing agent must be kept separate, and if not, the entire inventory will be subject to the 48-hour limitation. The 48-hour period shall be exclusive of Sundays and legal holidays. (See 1958 O.A.G. 25.)

This rule is intended to implement Iowa Code sections 453A.10 and 453A.17.

701—82.9(453A) *Reports.* Every person permitted as a cigarette distributor or manufacturer, or any other person as deemed necessary by the director, must file a monthly report on or before the tenth day of the month following the month for which the report is made. The report must be complete and certified by the person responsible for filling out the report. The failure to file a report or the filing of a false or incomplete report shall subject the person to a penalty as set forth in Iowa Code section 453A.31. (See rule 701—10.76(453A).) The report must be so certified or the report shall be considered incomplete. Whenever “cigarette” is used in this rule, it shall also include taxable “little cigars.”

82.9(1) *In-state distributors not exporting cigarettes.* Every distributor with a place of business in Iowa where cigarettes are stamped and who is not engaged in exporting cigarettes from this state shall

file Forms 70-017 (Monthly Cigarette Tax Report) and 70-020 (Self Audit Report). The two forms are considered a multipart report and both forms must be completed before the report will be considered "filed."

- a. The Monthly Cigarette Tax Report shall include, but not be limited to:
 1. The distributor's name, permit number and address;
 2. The amount of Iowa revenue purchased during the month;
 3. The quantity of cigarettes on hand at the end of the month;
 4. The amount of revenue on hand at the end of the month;
 5. Purchases of cigarettes during the month and as to each purchase, the seller's name, the date of purchase, the invoice number, and the quantity purchased;
 6. An inventory report as to out-of-state revenue;
 7. The quantity of cigarettes returned to the factory along with supporting documents; and
 8. The certification of the person responsible for making the report.
- b. The Self Audit Report shall include, but not be limited to:
 1. The distributor's name, permit number and address;
 2. An inventory accounting for cigarettes; and
 3. An inventory accounting for revenue.

The quantity of cigarettes distributed or stamped should be equal to the tax equivalent of the revenue used. Any discrepancy must be adequately explained.

82.9(2) *In-state distributors exporting cigarettes.* Every distributor with a place of business in Iowa where cigarettes are stamped who also engages in exporting cigarettes from this state shall file Form 70-017 (Monthly Cigarette Tax Report). This form must be completed before the report will be considered "filed."

82.9(3) *Out-of-state distributors.* Every distributor stamping cigarettes only without the state shall file Form 70-018 (Monthly Cigarette Tax Report). The Monthly Cigarette Tax Report (Form 70-018) shall include, but not be limited to:

1. The distributor's name, address and permit number;
2. An itemized statement of Iowa revenue purchased;
3. An inventory accounting of Iowa revenue;
4. A detailed schedule of cigarette distribution in Iowa and as to each distribution, the date, the name of purchaser or receiver, the purchaser's address and the quantity of cigarettes distributed; and
5. The certification of the person responsible for making the report.

82.9(4) *Manufacturers and other persons.* The monthly reports for manufacturers and other persons shall contain such information as the director deems necessary.

This rule is intended to implement Iowa Code section 453A.15 as amended by 1999 Iowa Acts, chapter 151.

701—82.10(453A) Manufacturer's samples.

82.10(1) Iowa Code section 453A.39 provides a method for manufacturers to distribute free sample packages of cigarettes or little cigars. This method is to be followed to the exclusion of all others. (See 1982 O.A.G. #710.)

The cigarettes or little cigars must:

- a. Rescinded IAB 1/22/92, effective 2/26/92.
- b. Be sent to a permitted distributor.
- c. Rescinded IAB 1/22/92, effective 2/26/92.
- d. Have tax paid thereon by a distributor.
- e. Be clearly marked "sample."
- f. Contain acknowledgment of tax being paid on each carton containing free samples.

The manufacturer must notify the department by affidavit of shipment and the distributor must notify the department by affidavit of receipt and separately remit the tax. The tax must be computed on a per cigarette basis rather than a per package basis.

82.10(2) Remittance of tax and acknowledgment of payment. Iowa Code section 453A.39 provides that the tax will be paid by a permitted distributor. The payment of tax should accompany the distributor's affidavit (Form 70-033).

The department will stamp the distributor's affidavit containing the remittance and return a copy of the affidavit to the distributor as the acknowledgment that taxes have been paid on the samples. After receiving the acknowledgment, and before the sample cigarettes are distributed, each distributor is requested to stamp the cartons of free samples with a stamp containing the following information:

IOWA STATE TAX PAID

Distributor's name

Permit number

The department will make every effort to return a copy of the distributor's remittance report on the same day it is received. In the event the distributor needs acknowledgment sooner, the distributor may request that the department acknowledge by telephone and follow up with the affidavit acknowledgment at a later date.

In the event sample cigarettes must be returned to the manufacturer for some reason, a refund of the taxes previously paid will be made to the distributor who actually remitted the tax to the department. The refund will be made in the same manner as for regular cigarettes by the distributor filing the appropriate forms with the department.

82.10(3) Promotions using cigarettes, noncigarettes or coupons. Promotional situations are specifically covered by Iowa Code section 421B.4. A promotional situation as described in section 421B.4 is valid provided it is a promotion scheme complying with the procedural requirements that it be a sale. A sale is defined to "mean and include any transfer for a consideration, exchange, barter, gift, offer for sale and distribution in any manner or by any means whatsoever."

Once a sale has occurred, the gift may be any kind whatsoever.

a. Promotion using cigarettes. If a manufacturer wants to run a promotion where two packs of cigarettes are sold for the price of one, the manufacturer could give the complimentary cigarettes to a distributor to be stamped who would then give them to a retailer who gives the cigarettes away with the purchase of another pack. Provided the distributor is reimbursed for the cost of the tax stamps, there is no violation of Iowa Code chapter 421B, by anyone. The following example illustrates what a manufacturer can do.

EXAMPLE. A manufacturer ships packs of 20, free of charge, to a permitted distributor with instructions to stamp them and send them to retail outlets or deliver them to one of the manufacturer's employees. The manufacturer reimburses the distributor for the cost of stamping the cigarettes. The manufacturer sends or furnishes the retailers instructions and display materials for the retail distribution of the cigarettes. This method of distribution would be proper.

The cost provisions of 421B.4 would not prevent the distribution of cigarettes in this example, since 421B.4 is silent with respect to below cost combination sales by manufacturers. The cost of cigarettes which are sold is controlled by section 421B.2. The cigarettes sold under the "buy one" portion of the promotion will have a cost of the lower of the true invoice or the lowest replacement cost. The cigarettes sold under the "get one free" portion of the promotion and which were obtained free of charge will have no invoice cost to the retailer.

b. Promotions using noncigarette items. A manufacturer wants to give away promotional items with the purchase of cigarettes at the regular price. Since Iowa Code section 421B.4 is silent with respect to below cost combination sales by manufacturers, the practice of the manufacturer providing a gift item such as cigarette lighters through wholesale channels to retailers which will be delivered to the customer at the time of the sale of the cigarettes does not violate chapter 421B. (See 1958 O.A.G. #22.)

c. Coupons. A manufacturer distributes coupons to the general public to allow the purchase of cigarettes at a reduced price. Provided it is the manufacturer who absorbs the entire cost of the reduction in price, there would be no violation of Iowa Code chapter 421B. Coupons which are sent to the final consumer to be redeemed by a retailer who is reimbursed by a manufacturer do not violate chapter 421B. (See 1968 O.A.G. #68.) This would be true even though the coupon represented the full price of the cigarettes.

d. Replacement packages. A manufacturer wants to respond to a customer complaint by replacing a package of 20 cigarettes purchased by the customer with another package of 20 cigarettes. The replacement package must be clearly marked with the following information:

COMPLIMENTARY. NOT FOR SALE. ALL APPLICABLE STATE TAXES PAID.

The manufacturer may pay the tax directly to the department by submitting an affidavit to the department containing the number of replacement packages sent into the state during the previous month, along with the remittance. The number of replacement packages and remittance may be submitted as part of the manufacturer's affidavit required under Iowa Code section 453A.39 (manufacturer's samples).

This rule is intended to implement Iowa Code sections 453A.1, 453A.13, 453A.16, 453A.22, 453A.31, 453A.39 and chapter 421B.

701—82.11(453A) Refund of tax—unused and destroyed stamps.

82.11(1) *Refunds of unused stamps and destroyed stamps.* Refunds shall be issued for unused stamps which are returned to the department for any reason by a person entitled to receive a refund. This includes unused stamps unaffixed at the close of the business day next preceding the effective date of a decrease in the tax rate which are in excess of the unstamped cigarette inventory on hand as of that date. Banks which are authorized to sell stamps or meter settings are not authorized to issue a refund; the stamps must be returned to and a refund will be issued only by the department. This subrule would also cover stamps which are recalled by the director for purposes of effectuating a change of design of the stamps. A refund will also be issued for stamps which have been lost through destruction, since destroyed stamps have not been used. A refund will not be issued for stamps which are lost (misplaced) or stolen, it being the distributor's or manufacturer's responsibility to maintain proper control over cigarette tax stamps. The claim for refund must be supported by proof of the fact of the loss and proof of the quantity of the loss. The claim must be filed within 30 days of the loss.

82.11(2) *Return of used stamps.* Refunds shall be issued for stamps which have been affixed to cigarettes which have become unfit for use or consumption or unsaleable. This refund is available to any permitted distributor or manufacturer upon proof that the cigarettes were returned to the person who manufactured the cigarettes. The proof required shall be an affidavit from the distributor setting forth to whom the cigarettes were returned and verifying that cigarette stamps had been affixed thereto. There must also be included therewith an affidavit from the manufacturer to whom the cigarettes were returned verifying the information.

82.11(3) *Cigarettes which have been destroyed.* The tax shall be returned on cigarettes which have been destroyed after the tax stamps have been affixed, to the person stamping the cigarettes. The person claiming the loss must be able to prove the fact of the loss and quantity of the loss. The claim, accompanied by proof of the loss and proof of the quantity of the loss, must be filed with the department no later than 30 days following the date the loss occurred. The amount of the refund shall be the face value of the stamps less the applicable discount allowed purchasers of tax stamps. This provision does not apply to cigarettes which are lost (misplaced) or stolen.

82.11(4) *Credit in lieu of a refund.* There are no statutory provisions to allow a credit in lieu of a refund of taxes paid for returned or destroyed cigarette stamps.

This rule is intended to implement Iowa Code section 453A.8.

CHAPTER 83
TOBACCO TAX

[Ch 83, Selling Cigarette Revenue in Banks, rescinded, see IAC 4/2/80]
[Prior to 12/17/86, Revenue Department[730]]

701—83.1(453A) Licenses. Before any person engages in the business of a distributor or subjobber of tobacco products, that person must obtain a tobacco distributor's or tobacco subjobber's license. If the person holds a valid cigarette permit of any kind, the license will be issued without cost if all other requirements for the license are met, but the license must still be obtained. A tobacco retailer is required to obtain a retail cigarette/tobacco permit.

83.1(1) Distributor license. Every person operating as a tobacco distributor, as defined in Iowa Code section 453A.42, must obtain a tobacco distributor's license. A tobacco distributor is any person:

- a. Engaging in selling tobacco products in this state who brings tobacco products or causes tobacco products to be brought into this state for the purpose of selling them in this state; or
- b. Making, manufacturing, or fabricating tobacco products in this state for sale in this state; or
- c. Selling tobacco products without this state who ships or transports tobacco products directly to retailers in this state to be sold by those retailers. In any distribution scheme whereby tobacco products are imported into this state for sale, there must be at least one distributor. The following examples shall illustrate the application of this rule:

EXAMPLE 1: Manufacturer, Inc. is in the business of processing tobacco products in the state of North Carolina. Retailer, Inc. is in the business of selling tobacco products at retail in the state of Iowa. If Manufacturer, Inc. ships tobacco products directly to Retailer, Inc., f.o.b. manufacturer's plant, both are performing the functions of a distributor; Manufacturer, Inc. is selling tobacco products without this state and shipping them directly to a retailer in this state, and Retailer, Inc. is causing tobacco products to be brought into this state from without the state for the purpose of sale. If either the out-of-state manufacturer or the in-state retailer has a distributor's license, the other need not, but may, have a distributor's license.

EXAMPLE 2: Manufacturer, Inc. is in the business of processing tobacco products in the state of North Carolina. Retailer, Inc. is in the business of selling tobacco products at retail in the state of Iowa. If Manufacturer, Inc. ships tobacco products directly to Retailer, Inc., f.o.b. Retailer's place of business, Manufacturer, Inc. is acting as a distributor and Retailer, Inc. is not. Manufacturer, Inc. is selling tobacco products without this state and shipping them directly to a retailer in this state. Retailer, Inc. is not causing tobacco products to be brought into this state from without the state.

The license is issued by the department at an annual cost of \$100 unless the distributor possesses any valid cigarette permit in which case the license shall be issued without cost. A separate application and fee payment, if applicable, must be submitted for each place of business from which distributor activities are carried on. The license expires on June 30 of each year, and there are no provisions for partial year license fee refunds if the license is voluntarily surrendered. If a license is issued between January 1 and June 30 of any year, the license fee is one-half of the normal fee.

83.1(2) Subjobber's license. Every person, other than persons licensed as tobacco distributors, operating as a tobacco subjobber, as defined in Iowa Code section 453A.42, must obtain a tobacco subjobber's license. A tobacco subjobber is any person, other than a manufacturer or distributor, who purchases tobacco products from a distributor and sells them to persons other than the ultimate consumer. The license is issued by the department at an annual cost of \$10, unless the subjobber possesses any valid cigarette permit, in which case, the license shall be issued without cost. A single subjobber's license shall be sufficient for the subjobber's entire activities within the state, that is, it is not issued for each place of business. The license expires annually on June 30 of each year, and there are no provisions for partial year license fee refunds if the license is voluntarily surrendered. If a license is issued between January 1 and June 30 of any year, the license fee is one-half of the normal fee.

This rule is intended to implement Iowa Code section 453A.44.

701—83.2(453A) Distributor bond. A bond in the amount of \$1,000 is required to be posted before a distributor's license can be issued, regardless of whether or not the distributor is licensed and bonded as a cigarette permittee. If the distributor has a cigarette permit of any kind and is required to post a

bond thereunder, the amount of the cigarette bond(s) and the tobacco bond may be aggregated to reach a single bond requirement, and the distributor may provide a single bond in the aggregate amount provided the bond may be used to discharge either a cigarette tax liability or a tobacco tax liability. See rule 701—81.7(453A) relating to bonds.

This rule is intended to implement Iowa Code section 453A.44.

701—83.3(453A) Tax on tobacco products. The tax on tobacco products is to be paid but once, either upon distribution by a distributor or upon use or storage by a consumer. The tax is in addition to any occupation or privilege tax or license fees imposed by any city or county.

83.3(1) Distributor's tax. When a distributor:

- a. Brings tobacco products or causes tobacco products to be brought into this state for sale;
- b. Makes, manufactures, or fabricates tobacco products in this state for sale in this state; or
- c. Ships or transports tobacco products directly to retailers in this state for sale by the retailer, the tax attaches at the rate specified in Iowa Code section 453A.43(1) of the wholesale price of the tobacco products. The wholesale price of the tobacco products is the manufacturer's gross list price.

83.3(2) Consumer's tax. If the tax has not been paid under Iowa Code section 453A.43(1) and subrule 83.3(1), the consumer is responsible for the tax specified in Iowa Code section 453A.43(2) on the cost to the consumer of the tobacco products used or stored by the consumer. The tax does not apply to the use or storage of tobacco products in quantities of:

1. Less than 25 cigars,
2. Less than ten ounces of snuff or snuff powder, or
3. Less than one pound of other tobacco products in the possession of any one consumer.

These exceptions do not apply to tobacco products subject to the tax imposed upon distributors under the provisions of Iowa Code section 453A.43(1) and subrule 83.3(1).

This rule is intended to implement Iowa Code section 453A.43.

701—83.4(453A) Tax on little cigars. "Little cigars" as defined in Iowa Code section 453A.42(5) means any roll for smoking made wholly or in part of tobacco not meeting the definition of cigarette as contained in Iowa Code section 453A.1(3) which either weighs three pounds or less per thousand or weighs more than three pounds per thousand (excluding packaging weight) and has a retail price of two and one-half cents or less per little cigar. All of the provisions applicable to cigarettes concerning the rate, imposition, method of payment and affixing of stamps apply equally to little cigars. The tax on little cigars is to be paid on the purchase of stamps by cigarette distributors or cigarette manufacturers who hold valid permits. The reporting requirements contained in section 453A.15 and rule 701—82.9(453A) shall pertain equally to the distribution of little cigars, and whenever information as to cigarettes is required to be reported, the same is required as to little cigars.

This rule is intended to implement Iowa Code sections 453A.42(5) and 453A.43.

701—83.5(453A) Distributor discount. Licensed tobacco distributors filing returns under Iowa Code section 453A.46 and rule 701—83.6(453A) are entitled to deduct, from the remittance for tax due, a discount equal to 3½ percent.

This rule is intended to implement Iowa Code section 453A.46(1).

701—83.6(453A) Distributor returns. Every distributor licensed under Iowa Code section 453A.44 must file monthly returns. These returns must be filed no later than the twentieth day of the month following the month covered by the return, and must include a remittance for the amount due less the applicable discount.

83.6(1) In-state distributors. Licensed tobacco distributors, with a place of business in Iowa, must file Forms 70-022 and 70-023 as the monthly distributor return. The return shall include, but not be limited to:

- a. The distributor's name, address and license number;

b. An accounting of the acquisition of tobacco products subject to tax including as to each acquisition:

- (1) The date received,
- (2) The date and number of the invoice,
- (3) The person from whom purchased, and
- (4) The manufacturer's gross list price;

c. A claim for credit for tobacco products destroyed, returned to manufacturers and exported; and

d. The certification of the person responsible for making the return.

When claiming credits for tobacco products destroyed, returned to manufacturers and exported, Form 70-024 schedule I, Form 70-024 schedule II, and Form 70-025 schedule III, respectively, must be completed.

83.6(2) Out-of-state distributors. Licensed tobacco distributors, with no place of business in Iowa, must file Form 70-026 as the monthly distributor return. The return shall include, but not be limited to:

a. The distributor's name, address and license number;

b. An accounting of the sale in Iowa of tobacco products subject to tax including as to each sale:

- (1) The date of sale,
- (2) The invoice number,
- (3) To whom sold,
- (4) The purchaser's address, and
- (5) The manufacturer's gross list price; and

c. The certification of the person responsible for making the return.

This rule is intended to implement Iowa Code sections 453A.46 and 453A.47.

701—83.7(453A) Consumer's return. Every person, other than a licensed tobacco distributor, who is responsible for reporting and paying the tax on tobacco products under Iowa Code section 453A.43(2) and subrule 83.3(2), shall file Form 70-022 (Monthly Distributor Tax Return) for any month that the person is responsible for paying the tax. The return shall be due by the twentieth day of the month following the month during which taxable tobacco products were acquired. The return shall be completed in all respects except the consumer will not have a permit number. The return must be accompanied by a full remittance in the amount of the tax due because the discount provided in Iowa Code section 453A.46(1) applies only to licensed distributors. The penalties provided in Iowa Code section 453A.46(3) apply to any taxpayer required to file any return and, therefore, apply equally to licensed tobacco distributors and any other person accruing a tax liability. See rules 701—81.8(453A) (penalty), 81.9(453A) (interest), and 81.10(453A) (waiver of penalty).

This rule is intended to implement Iowa Code section 453A.46.

701—83.8(453A) Transporter's report. The transportation of tobacco products into this state must be reported to the director. The report shall include, but not be limited to:

1. A description of the products imported,
2. The name and address of the seller or consignor,
3. The date of importation,
4. The name and address of the purchaser or consignee,
5. The point of origin, and
6. The point of destination.

83.8(1) Out-of-state distributors. Persons who are licensed as a tobacco distributor and have a place of business without the state, from which tobacco products are shipped, need not file a separate transportation report. This information is available from the distributor report.

83.8(2) Common carriers. Common carriers transporting tobacco products into this state need only report shipments to places other than public warehouses licensed under the provisions of Iowa Code chapter 554. Common carriers must file the transporter's report by the tenth day of the month following the month of importation.

83.8(3) Others. All other transportation of tobacco products into this state by persons other than described in subrules 83.8(1) and 83.8(2) must be reported to the department except:

a. The importation of tobacco products by the consumer in sufficiently small quantities to be exempt from the tax (see subrule 83.3(2)), and

b. The importation by the consumer of the tobacco products if the consumer is responsible to report and pay the tax under Iowa Code subsections 453A.43(2) and 453A.46(6) and subrule 83.3(2) and rule 83.7(453A).

The transportation report must be filed within 30 days of the date of importation.

This rule is intended to implement Iowa Code subsection 453A.45(4).

701—83.9(453A) Free samples. Where samples of tobacco products are distributed in this state, the person responsible for the distribution must pay the tax. The person responsible for the distribution shall file a return and pay the tax on the basis of the usual wholesale price for such products.

This rule is intended to implement Iowa Code sections 453A.43, 453.46, and 453A.49.

701—83.10(453A) Credits and refunds of taxes. Credits for tobacco products destroyed, returned to manufacturers or exported are provided in subrule 83.6(1). If the credits exceed the average monthly tax liability of the distributor, based upon the prior 12 tax periods, a refund may be issued.

Credits and refunds to a consumer who paid the tax pursuant to Iowa Code section 453A.43(2) shall be made for the same reasons and upon the same basis as credits and refunds to distributors.

This rule is intended to implement Iowa Code section 453A.47.

701—83.11(453A) Sales exempt from tax. Sales of tobacco products which the state is prohibited from taxing under the Constitution or the laws of the United States or under the Constitution of this state are exempt from the tax.

83.11(1) Sales to the federal government. Military post exchanges or instrumentalities of the federal government are not required to comply with the provisions of Iowa Code chapter 453A or pay the tax imposed thereunder. However, individuals who have purchased or obtained tobacco products from a federal instrumentality and come within the jurisdiction of the state are subject to the provisions of Iowa Code sections 453A.43(2) and 453A.50. *U.S. v. Tax Commission of Mississippi*, 421 U.S. 599, 95 S. Ct. 1872, 44 L.Ed.2d 404 (1975).

83.11(2) Sales by or to Indians. Sales by Indians to other Indians of their own tribe on federally recognized Indian reservations or settlements of which they are tribal members are exempt from the tax. The Indian sellers are subject to the record-keeping requirements of Iowa Code chapter 453A. The tobacco products must be purchased by the Indian seller with the tax included in the purchase price. The tax exemption is allowed to the Indian purchaser by the purchaser's filing a claim for refund of the tax paid or to the tribe of which the Indian purchaser is a member by the tribe's filing a claim for refund of the tax paid by the tribe on tobacco products sold to the Indian purchaser.

This rule is intended to implement Iowa Code section 453A.43(4).

701—83.12(81GA, HF339) Retail permits required. For administrative purposes, the retail permits will be called "cigarette/tobacco retail permits." A person shall not engage in the business of a retailer of tobacco products without first having received a permit as a cigarette/tobacco retailer. A cigarette/tobacco retail permit shall be obtained for each place of business owned or operated by a retailer. The holder of a cigarette/tobacco retail permit is not required to obtain a tobacco retail permit. The retailer may sell cigarettes only, tobacco products only, or both cigarettes and tobacco products. However, if the cigarette/tobacco permit is suspended, revoked, or expired, the cigarette retailer shall not sell any cigarettes or tobacco products during the time the permit is suspended, revoked, or expired.

This rule is intended to implement 2005 Iowa Acts, House File 339.

701—83.13(81GA, HF339) Permit issuance fee. Retail permits are issued by the following authorities at the following prices:

83.13(1) Outside any city, by the county board of supervisors, at an annual cost of \$50.

83.13(2) In cities of less than 15,000 population, by the city council, at an annual cost of \$75.

83.13(3) In cities of 15,000 or more population, by the city council, at an annual cost of \$100.

83.13(4) If any permit is granted during the month of October, November, or December, the fee shall be three-fourths of the above maximum schedule; if granted during the month of January, February, or March, one-half of the maximum schedule; and if granted during the month of April, May, or June, one-fourth of the maximum schedule.

83.13(5) The retail permit expires on June 30 of each year. The city or county must submit a copy of any retail permit issued and the application for the permit to the department of public health within 30 days of issuance.

This rule is intended to implement 2005 Iowa Acts, House File 339.

701—83.14(81GA, HF339) Refunds of permit fee.

83.14(1) An unrevoked permit for which the retailer paid the full annual fee may be surrendered during the first nine months of the year to the office issuing it, and the city or county granting the permit shall make refunds to the retailer as follows:

- a. Three-fourths of the annual fee if the surrender is made during July, August, or September.
- b. One-half of the annual fee if the surrender is made during October, November, or December.
- c. One-fourth of the annual fee if the surrender is made during January, February, or March.

83.14(2) An unrevoked permit for which the retailer has paid three-fourths of a full annual fee may be surrendered during the first six months of the period covered by the payment, and the city or county shall make refunds to the retailer as follows:

- a. A sum equal to one-half of the annual fee if the surrender is made during October, November, or December.
- b. A sum equal to one-fourth of the annual fee if the surrender is made during January, February, or March.

83.14(3) An unrevoked permit for which the retailer has paid one-half of a full annual fee may be surrendered during the first three months of the period covered by the payment, and the city or county shall refund to the retailer a sum equal to one-fourth of the annual fee.

This rule is intended to implement 2005 Iowa Acts, House File 339.

701—83.15(81GA, HF339) Application for permit. Retailer permits shall be issued only upon application, accompanied by the applicable fee, and made upon forms furnished by the department. The forms shall specify:

83.15(1) The manner under which the retailer transacts or intends to transact business as a retailer.

83.15(2) The principal office, residence, and place of business for which the permit is to apply.

83.15(3) If the applicant is not an individual, the principal officers or members of the applicant, not to exceed three, and their addresses.

83.15(4) Such other information as the director shall require.

This rule is intended to implement 2005 Iowa Acts, House File 339.

701—83.16(81GA, HF339) Records and reports.

83.16(1) The director shall prescribe the forms necessary for the efficient administration of 2005 Iowa Acts, House File 339, section 4, and may require uniform books and records to be used and kept by each retailer or other person as deemed necessary for a period of five years.

83.16(2) Every retailer shall, when requested by the department, make additional reports as the department deems necessary and proper and shall, at the request of the department, furnish full and complete information pertaining to any transaction of the retailer involving the purchase or sale or use of tobacco products.

This rule is intended to implement 2005 Iowa Acts, House File 339.

701—83.17(81GA, HF339) Penalties. The permit suspension and revocation provisions and the civil penalties established in Iowa Code section 453A.22 shall apply to tobacco retailers.

This rule is intended to implement 2005 Iowa Acts, House File 339.

CHAPTER 84
UNFAIR CIGARETTE SALES
[Prior to 12/17/86, Revenue Department[730]]

701—84.1(421B) Definitions. For purposes of this chapter “wholesaler” and “retailer” mean a cigarette wholesaler and cigarette retailer as defined in Iowa Code section 421B.2. See opinion of the Attorney General, Griger to Bair, Director, Iowa Department of Revenue, 80-1-15. “Sale” or “sales” shall include an offer for sale.

This rule is intended to implement Iowa Code section 421B.2.

701—84.2(421B) Minimum price. The formula for determining the “cost” to a wholesaler or retailer as defined in Iowa Code section 421B.2 is not conclusive. The retailer, wholesaler or the department may prove that the “cost” is either higher or lower.

Any wholesaler or retailer who desires to prove that the wholesaler’s or retailer’s cost is less than the statutory presumptive cost computed according to the Iowa unfair cigarette sales Act, Iowa Code chapter 421B, shall submit a petition for approval of a lower cost along with actual cost data to the department of revenue. The statutory presumptive cost must be used in determining minimum price until approval has been granted by the department. If the requester continues to sell cigarettes at less than the presumptive cost, the department may revoke the requester’s permit or seek an injunction pursuant to Iowa Code section 421B.10 to prevent such action.

Any requester making sales of cigarettes in or into Iowa for more than 12 months shall submit cost data for the 12-month period ending no more than 30 days prior to the submission of the petition. Any requester making sales of cigarettes in or into Iowa for less than 12 months shall submit cost data for the period beginning with the start of business and ending no more than 30 days prior to the submission of the petition. The department shall notify the wholesaler or retailer of the acceptance or rejection of the petition. If the requester disagrees with the department’s determination, the requester may file a protest within 60 days of the department’s decision in accordance with rule 701—7.8(17A).

Costs of doing business shall include, but are not limited to, freight charges, labor, and equipment costs to affix stamps, ink, glue, permit fees, management fees, labor costs (including salaries of officers), rents, depreciation, selling costs, maintenance expenses, interest expenses, delivery costs, taxes, insurance, advertising expenses, and any other operational and administrative costs. The requester shall set forth the basis for allocated costs. When the computed cost amounts to any fractional part of a cent, the cost must not be less than the next higher cent. However, sales made between wholesalers as provided for in Iowa Code section 421B.5, sales described in Iowa Code section 421B.6, and sales outside of the ordinary channels of trade as provided in Iowa Code section 421B.9 shall not be required to adhere to the minimum pricing requirements set forth in Iowa Code section 421B.3 and this rule. See rule 84.5(421B).

84.2(1) Wholesaler’s cost of cigarettes. The statutory method for determining the wholesaler’s cost of cigarettes is as follows:

- a. “Basic cost of cigarettes” equals the lowest of true invoice cost, or lowest replacement cost, less trade or cash discounts plus one half of the state cigarette tax.
- b. “Cost to wholesaler” equals the basic cost of cigarettes plus 3 percent of the basic cost plus the one half of the state cigarette tax not already included.

84.2(2) Retailer’s cost of cigarettes. The statutory method for determining the retailer’s cost of cigarettes is as follows:

- a. “Basic cost of cigarettes” equals the lower of either true invoice cost exclusive of state cigarette tax or lowest replacement cost exclusive of state cigarette tax, minus trade or cash discounts plus one half of the state cigarette tax.
- b. “Cost to retailers” equals the basic cost plus 3 percent of the basic cost, to the extent the retailer is allowed discounts ordinarily allowed wholesalers, plus 6 percent of the basic cost, plus the one half of the state cigarette tax not already included.

For purposes of determining the basic cost of cigarettes for wholesalers or retailers, trade or cash discounts may be deducted, if available, even though not taken. The discount taken or available must be clearly specified on the invoice or it will not be allowed as a reduction in the basic cost of cigarettes. Any financial incentive given to a wholesaler or retailer by a manufacturer at a later date will not reduce the basic cost of cigarettes.

The following example will demonstrate the application of this rule.

Manufacturer's list price per 1000 cigarettes	\$115.70
Invoice price to wholesaler	\$115.70
Less 2% discount	2.31
Plus ½ of the tax	<u>9.00</u>
Basic cost of cigarettes	\$122.39
Plus 3% of basic cost	<u>3.67</u>
Retailer's basic cost	\$126.06
Plus ½ of the tax	<u>9.00</u>
Minimum cost to wholesaler per 1000 cigarettes	\$135.06
Per carton	\$27.01
Less ½ state tax	<u>1.80</u>
Retailer's basic cost	\$25.21
Plus 6% of basic cost	1.51
Plus ½ of state tax	<u>1.80</u>
Minimum cost to retailer	\$28.52
Per pack	2.86/pack

This rule is intended to implement Iowa Code sections 421B.2, 421B.3, 421B.5, 421B.6 and 421B.9. [ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—84.3(421B) Combination sales. Whenever cigarettes and another item are offered for sale at a total combined price, the sales price shall not be lower than the “cost to the wholesaler or retailer” of all articles sold. The “cost to the wholesaler or retailer” of all of the articles sold on a combined basis shall be determined under Iowa Code section 421B.2, subsections (1), (3), and (4).

If a promotional gift is given to the wholesaler or retailer by a cigarette manufacturer at no cost, which gift is to be given to consumers at no cost upon the sale of cigarettes, the minimum sales price will not be affected. The invoice cost of the promotional gift is zero, and therefore, the “cost to the wholesaler” or “cost to the retailer” of the promotional gift is zero. If, however, the wholesaler or retailer were to purchase items to be given away with the purchase of cigarettes by consumers, the minimum sales price would increase. The “cost to the wholesaler” or the “cost to the retailer” of the promotional item would be based upon the lower of invoice cost or replacement cost. (See 1958 O.A.G. 22.)

This rule is intended to implement Iowa Code section 421B.4.

701—84.4(421B) Retail redemption of coupons. The redemption of coupons by retailers, which coupons were supplied to consumers by manufacturers and will be redeemed from the retailers by the manufacturers, does not affect the minimum sales price of cigarettes. The retailer is still receiving the statutory minimum price even though that price is paid by two different persons, the consumer and the manufacturer. (See 1986 O.A.G. 68.) Manufacturer incentives to the consumer in lieu of a coupon which reduce the cost of the cigarettes to the consumer do not affect the minimum sales price of cigarettes when the manufacturer absorbs the loss for the incentive.

This rule is intended to implement Iowa Code section 421B.3.

701—84.5(421B) Exempt sales.

84.5(1) Sales between wholesalers. The sale price of cigarettes from one wholesaler to another wholesaler is not required to have included therein the “cost to the wholesaler” as defined in Iowa Code section 421B.2(4). All of the provisions of Iowa Code section 421B.3 shall apply to the subsequent sale by the purchasing wholesaler to any other person except another wholesaler.

84.5(2) Exempt sales. The provisions of Iowa Code chapter 421B do not apply to the following sales transactions:

- a. An isolated sale, or
- b. A bona fide clearance sale for the purpose of discontinuing trade in cigarettes as long as the sale states the reason for the sale and the quantity of cigarettes to be sold, or
- c. The sale of damaged or imperfect cigarettes as long as the sale states the reason for the sale and the quantity of cigarettes to be sold.

84.5(3) Sales to meet lawful competition. A wholesaler or retailer may sell cigarettes below cost in good faith in order to meet the price of a competitor who is selling the same article at the cost to the competitor as defined in chapter 421B. Sales made under the exemptions contained in Iowa Code section 421B.6 and subrules 84.5(1) and 84.5(2) and sales of a bankrupt or forced sale shall not be considered in determining the cost to a competitor.

This rule is intended to implement Iowa Code sections 421B.5 to 421B.7.

701—84.6(421B) Notification of manufacturer’s price increase. For purposes of determining the minimum cost of cigarettes to wholesalers or retailers, all manufacturers dealing with Iowa permittees shall notify the department in writing or by telegram within five working days of the effective date of any change in the manufacturer’s list price for cigarettes.

This rule is intended to implement Iowa Code sections 421B.8 and 421B.11.

701—84.7(421B) Permit revocation. The department may revoke any permit issued under division I of Iowa Code chapter 453A for any violation of Iowa Code chapter 421B. The authority to revoke a retail cigarette permit for a violation of Iowa Code chapter 421B rests in the department even though the permit was issued by a city or county. The revocation shall be effectuated under the provisions of rule 701—81.12(453A).

Once the permit is revoked, the permittee cannot obtain another cigarette permit, nor may a permit be issued for the location covered by the revoked permit regardless of the identity of the applicant, for a period of at least six months.

This rule is intended to implement Iowa Code section 421B.11.

CHAPTER 85
TOBACCO MASTER SETTLEMENT AGREEMENT

DIVISION I
TOBACCO MASTER SETTLEMENT AGREEMENT

701—85.1(453C) National uniform tobacco settlement. In 1998 the state of Iowa entered into an agreement with cigarette manufacturers called the Master Settlement Agreement (MSA). Subsequent to entering into that agreement, in 1999 the Iowa general assembly enacted Iowa Code chapter 453C. The statute requires the department of revenue to promulgate regulations to ascertain the amount of excise tax paid on cigarettes sold by nonparticipating tobacco product manufacturers in Iowa each year.

701—85.2(453C) Definitions. For the purposes of this chapter, the definitions set forth in Iowa Code section 453C.1 shall apply.

701—85.3(453C) Report required. Reports must be filed by tobacco products distributors, cigarette distributors, and persons who sell tobacco products at retail that were purchased from a person who is not required to file a distributor report. The report must be filed annually on or before the last day of the month following the close of the calendar year in which the sales were made and must be in a form and manner requested by the department. The reports are to be mailed to Iowa Department of Revenue, Compliance Division, Cigarette Tax Unit, P.O. Box 10456, Des Moines, Iowa 50306-0456.

701—85.4(453C) Report information. The report must include the following information with respect to units sold that were not purchased from a participating tobacco product manufacturer or units sold that were purchased from a participating tobacco product manufacturer but are not units sold as covered by the MSA:

1. The number of units sold.
2. The brand of the units sold.
3. The name and address of the person from whom each unit was purchased.
4. The name and address of the manufacturer of the unit, if known.
5. The name and address of the importer of the unit, if known, and whether that importer is the exclusive importer of the unit, if known.

A retailer may need to file a report when purchasing roll-your-own tobacco or cigarettes over the Internet, through a catalog from a vendor located outside of Iowa, from an Indian tribe or from an enrolled member of an Indian tribe located on a reservation in or outside Iowa, by mail order, or from a vendor located in another state.

A retailer must also, upon request by the department, report information with respect to units sold that were purchased from any participating tobacco product manufacturer.

701—85.5(453C) Record-keeping requirement. Every person who sells at retail tobacco products purchased from a person who is not required to file a report required by this chapter and every tobacco products distributor and cigarette distributor subject to this reporting rule must maintain complete and accurate records and underlying documentation for five years to support the data required to be supplied to the department under rule 701—85.4(453C). Upon request, all requested records and documents must be provided to the department.

701—85.6(453C) Confidentiality. The department of revenue may disclose any and all information filed pursuant to rule 701—85.4(453C) to the attorney general for use in enforcing compliance with Iowa Code chapter 453C.

These rules are intended to implement Iowa Code chapter 453C.

701—85.7 to 85.20 Reserved.

DIVISION II
TOBACCO PRODUCT MANUFACTURERS' OBLIGATIONS AND PROCEDURES

701—85.21(80GA,SF375) Definitions. For purposes of this division, the definitions set forth in 2003 Iowa Acts, Senate File 375, section 2, shall apply.

701—85.22(80GA,SF375) Directory of tobacco product manufacturers.

85.22(1) *Directory of cigarettes approved for stamping and sale in Iowa.* A tobacco product manufacturer and a brand family shall not be included in the directory authorized by 2003 Iowa Acts, Senate File 375, section 3, after April 30 each year until and unless the tobacco product manufacturer has provided current and accurate certification conforming to the requirements of 2003 Iowa Acts, Senate File 375, section 3. Nonparticipating manufacturers and their brand families shall not be included in the directory after April 30 each year until and unless the attorney general has determined that the nonparticipating tobacco product manufacturer is in full compliance with 2003 Iowa Acts, Senate File 375, section 3, and that neither subsection (2)“b”(1) nor (2)“b”(2) of section 3 applies to the nonparticipating tobacco product manufacturer or a brand family it seeks to have included in the directory. A tobacco product manufacturer or brand family shall be deleted from the directory if a determination is made by the attorney general that the tobacco product manufacturer no longer meets the requirements of 2003 Iowa Acts, Senate File 375, section 3, or that either subsection (2)“b”(1) or (2)“b”(2) of section 3 applies.

85.22(2) *Notice of inclusion in directory.* The attorney general shall notify a tobacco product manufacturer by mail that it has met the requirements of 2003 Iowa Acts, Senate File 375, section 3, and will be included in the directory. This notice shall include each brand family that the attorney general determines will be included in the directory.

85.22(3) *Notice of noninclusion in or deletion from the directory.* Tobacco product manufacturers that have applied for inclusion in the directory shall be notified in writing of a decision made by the attorney general not to include in or to delete from the directory the tobacco product manufacturer or a brand family. Such notice shall be served on the tobacco product manufacturer's agent for service of process by certified mail.

85.22(4) *Procedure for contesting notice of noninclusion or deletion.* A tobacco product manufacturer that disagrees with a decision made by the attorney general in relation to the directory may contest the validity of the decision within 60 days of the date of the decision by filing a written protest of that decision with the Iowa Department of Revenue, Clerk of the Hearings Section, Hoover State Office Building, Fourth Floor, Des Moines, Iowa 50319, pursuant to rule 701—7.8(17A). The protest shall conform generally to the requirements of 701—subrules 7.8(1) through 7.8(10) to the extent applicable. The protest will, thereafter, be processed and a contested case hearing will be held in general conformity with the rules set forth in 701—Chapter 7, rules 701—7.10(17A), 701—7.12(17A) and 701—7.14(17A) to 701—7.16(17A), 701—subrule 7.17(8), and rules 701—7.19(17A) to 701—7.22(17A) to the extent applicable. The burden of proof shall be on the tobacco product manufacturer to establish that it or a particular brand family is entitled to be listed in the directory.

The form, status, finality and appealability of orders shall be controlled by the general provisions of 701—subrule 7.17(8), except that no appeal to or on motion of the state board of tax review or any other agency is authorized. All parties to the contested case may appeal any orders entered in relation to the contested case.

Stays of the decision of the attorney general during the pendency of the contested case proceedings and judicial review of the final contested case order of the department may be sought under 701—subrule 7.17(9). However, the addition or retention of a tobacco product manufacturer or brand family in the directory shall not be ordered during the pendency of the contested case proceedings and judicial review of the final contested case order unless a sufficient bond has been provided to the attorney general to ensure that all escrow amounts owed at the time of bonding and all escrow amounts reasonably expected to become due during the pendency of the contested case and all related appeals will be satisfied if the

tobacco product manufacturer does not ultimately prevail in its challenge. Such bonds shall be subject to update on a quarterly basis on motion of the attorney general.

If a claim is made that a particular entity is the tobacco product manufacturer and the entity obtains an order allowing it and any of the brands it claims to be responsible for to be listed in the directory pending final resolution of its status and it is ultimately determined that the entity is not the tobacco product manufacturer, the required bond shall be forfeited to the state.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

These rules are intended to implement 2003 Iowa Acts, Senate File 375.

[Filed 7/3/01, Notice 5/16/01—published 7/25/01, effective 8/29/01]

TITLE XI
INHERITANCE, ESTATE, GENERATION SKIPPING, AND FIDUCIARY INCOME TAXCHAPTER 86
INHERITANCE TAX

[Prior to 12/17/86, Revenue Department[730]]

701—86.1(450) Administration.**86.1(1) Definitions.** The following definitions cover Chapter 86.

“*Administrator*” means the administrator of the compliance division of the department of revenue.

“*Child*” means a biological or adopted issue entitled to inherit pursuant to Iowa Code chapter 633.

“*Compliance division*” is the administrative unit of the department created by the director to administer the inheritance and fiduciary income tax laws of the state.

“*Department*” means the department of revenue.

“*Devise*,” when used as a verb, means to dispose of property, both real and personal, by a will.

“*Director*” means the director of revenue.

“*Estate*” means the real and personal property, tangible and intangible, of the decedent or a trust, that over time may change in form due to sale, reinvestment, or otherwise, and augmented by accretions or additions thereto and substitutions therefor, or diminished by any decreases and distributions therefrom. For the definitions of “gross estate” and “net estate” under this chapter, see those terms as referenced in this subrule.

“*Executor*” means any person appointed by the court to administer the estate of a testate decedent.

“*Fiduciary*” includes personal representative, executor, administrator, and trustee. This term includes both temporary and permanent fiduciaries appointed by the court to settle the decedent’s probate estate and also the trustee of an inter vivos trust where the trust assets are part of the gross estate for inheritance tax purposes.

“*Gross estate*” as used for inheritance tax purposes as defined in Iowa Code section 450.2 includes all those items, or interests in property, passing by any method of transfer specified in Iowa Code section 450.3 without reduction for liabilities specified in Iowa Code section 450.12. The gross estate for tax purposes may not be the same as the estate for probate purposes. For example, property owned as joint tenants with right of survivorship, property transferred with a retained life use, gifts in excess of the annual gift tax exclusion set forth in Internal Revenue Code Section 2503(b) and within three years of death, transfers to take effect in possession or enjoyment at death, trust property, “pay on death” accounts, annuities, and certain retirement plans, are not part of the decedent’s probate estate, but are includable in the decedent’s gross estate for inheritance tax purposes. *In re Louden’s Estate*, 249 Iowa 1393, 92 N.W.2d 409 (1958); *In re Sayres’ Estate*, 245 Iowa 132, 60 N.W.2d 120 (1953); *In re Toy’s Estate*, 220 Iowa 825, 263 N.W. 501 (1935); *In re Mann’s Estate*, 219 Iowa 597, 258 N.W. 904 (1935); *Matter of Bliven’s Estate*, 236 N.W.2d 366 (Iowa 1975); *In re English’s Estate*, 206 N.W.2d 305 (Iowa 1973).

Effective for estates of a decedent dying on or after July 1, 2003, property and any interest in or income from any of the estates and property, which pass from the decedent owner in any manner, are subject to tax if the passing interest is in one of the following: (1) real estate and tangible personal property located in Iowa regardless of whether the decedent was a resident of Iowa at death; and (2) intangible personal property owned by a decedent domiciled in Iowa.

“*Gross share*” means the total amount of property of an heir, beneficiary, surviving joint tenant, or transferee, without reduction of those items properly deductible in computing the net shares. The total of all gross shares is equal to the gross estate.

“*Heir*” includes any person, except the surviving spouse, who is entitled to property of the decedent under the statutes of intestate succession.

“*Internal Revenue Code*” means the Internal Revenue Code of 1954 as defined in Iowa Code section 422.3(5) and is to include the revisions to the Internal Revenue Code made in 1986 and all subsequent revisions.

“*Intestate estate*” means an estate in which the decedent did not have a will. Administration of such estates is governed by Iowa Code sections 633.227 through 633.230. Rules of inheritance for such estates are found in Iowa Code sections 633.211 through 633.226.

“*Issue*,” for the purpose of intestate succession, means all lawful lineal descendants of a person, whether biological or adopted. For details regarding intestate succession, see Iowa Code sections 633.210 through 633.226. For details regarding partial intestate succession, see Iowa Code section 633.272.

“*Net estate*” means the gross estate less those items specified in Iowa Code section 450.12 as deductions in determining the net shares of property of each heir, beneficiary, surviving joint tenant, or transferee. *In re Estate of Waddington*, 201 N.W.2d 77 (Iowa 1972). The total of all net shares of an estate must equal the total of the net estate.

“*Net share*” means the gross share less the liabilities, if any, which are properly deductible from the gross share of an heir, beneficiary, surviving joint tenant, or transferee. The law of abatement of shares may be applicable for purposes of determining the net share subject to tax. See Iowa Code section 633.436; *In re Estate of Noe*, 195 N.W.2d 361 (Iowa 1972); *Colthurst v. Colthurst*, 265 N.W.2d 590 (Iowa 1978); *In re Estate of Duhme*, 267 N.W.2d 688 (Iowa 1978). However, see Iowa Code section 633.278 for property subject to a mortgage.

“*Personal representative*” shall have the same meaning as the term is defined in Iowa Code section 633.3(29) and shall also include trustees. For information regarding claims of a personal representative, see Iowa Code section 633.431.

“*Probate*” means the administration of an estate in which the decedent either had or did not have a will. Jurisdiction over the administration of such estates, among other matters, is by the district court sitting in probate. For further details on the subject matter and personal jurisdiction of the district court sitting in probate, see Iowa Code sections 633.10 through 633.21. For matters regarding the procedure in probate, see Iowa Code sections 633.33 through 633.53.

“*Responsible party*” is the person liable for the payment of tax under this chapter. See 701—86.2(450).

“*Simultaneous deaths*” occur when the death of two or more persons occurs at the same time or there is not sufficient evidence that the persons have died otherwise than simultaneously. For distribution of property in this situation, see Iowa Code sections 633.523 through 633.528.

“*Stepchild*” means the child of a person who was married to the decedent at the time of the decedent’s death, or the child of a person to whom the decedent was married, which person died during the marriage of the decedent.

“*Surviving spouse*” means the legally recognized surviving wife or husband of the decedent.

“*Tax*” means the inheritance tax imposed by Iowa Code chapter 450.

“*Taxpayer*” means a person liable for the payment of the inheritance tax under Iowa Code section 450.5 and includes the executor or personal representative of an estate, the trustee or other fiduciary of property subject to inheritance tax, and includes each heir, beneficiary, surviving joint tenant, transferee, or other person becoming beneficially entitled to any property or interest therein by any method of transfer specified in Iowa Code section 450.3, as subject to inheritance tax with respect to any inheritance tax due on the respective shares of the property.

“*Trustee*” means the person or persons appointed as trustee by the instrument creating the trust or the person or persons appointed by the court to administer the trust.

“*Trusts*” means real or personal property that is legally held by a person or entity for the benefit of another. This includes, but may not be limited to, express trusts, trusts imposed by court order, trusts administered by the court, and testamentary trusts. Such trusts are subject to Iowa Code chapter 450, even in situations when the estate consists solely of trust property.

“*Unknown heirs*” means heirs to an estate in which the identities of the heirs or the place of residency of the heirs cannot be ascertained with reasonable certainty.

“*Will*” includes codicil; it also includes a testamentary instrument that merely appoints an executor, and a testamentary instrument that merely revokes or revives another will. For information regarding mutual and contractual wills, see Iowa Code section 633.270.

86.1(2) *Delegation of authority.* The director delegates to the administrator, subject always to the supervision and review by the director, the authority to administer the Iowa inheritance tax. This delegated authority specifically includes, but is not limited to, the determination of the correct inheritance tax liability; making assessments against the taxpayer for additional inheritance tax due; authorizing refunds of excessive inheritance tax paid; issuing receipts for inheritance tax paid; executing releases of the inheritance tax lien; granting extension of time to file the inheritance tax return and pay the tax due; granting deferments to pay the inheritance tax on a property interest to take effect in possession or enjoyment at a future date; requesting or waiving the appraisal of property subject to the inheritance tax and the imposition of penalties for failure to timely file or pay the inheritance tax. The administrator may delegate the examination and audit of inheritance tax returns to the supervisors, examiners, agents, and any other employees or representatives of the department.

86.1(3) *Information deemed confidential.* Federal tax returns, federal return information, inheritance tax returns, and the books, records, documents, and accounts of any person, firm, or corporation, including stock transfer books, requested to be submitted to the department for the enforcement of the inheritance tax law, shall be deemed and held confidential by the department, subject to public disclosure only as provided by law. See 26 U.S.C. Section 6103 pertaining to confidentiality and disclosure of federal tax returns and federal return information.

86.1(4) *Information not confidential.* Copies of wills, the filing of an inheritance tax lien, release of a real estate lien, probate inventories, trust instruments, deeds and other documents which have been filed for public record are not deemed confidential by the department.

86.1(5) *Forms.* The final inheritance tax return, inheritance tax receipts, and forms for the audit, assessment, and refund of the inheritance tax shall be in such form as may be prescribed or approved by the director—see 701—8.3(17A).

86.1(6) *Safe deposit boxes and joint accounts.* Effective July 1, 1998, there is no longer a requirement for safe deposit boxes to be inventoried and reported to the department prior to the delivery of the assets to the personal representative, transferee, joint owner, or beneficiary. Additionally, effective July 1, 2005, there is no longer a requirement that all persons, banks, credit unions, and savings and loan associations notify the department of the balance in a joint account on the date of a deceased joint owner's death and the name and address of the surviving joint owner prior to permitting the withdrawal of funds from the joint account by a surviving joint owner.

This rule is intended to implement Iowa Code chapter 22 and Iowa Code sections 450.1 and 450.2 as amended by 2003 Iowa Acts, chapter 95, sections 1 and 2, and sections 421.2, 450.67, 450.68, 450.94, 450.97 and 450B.7.

[ARC 1137C, IAB 10/30/13, effective 12/4/13; ARC 1545C, IAB 7/23/14, effective 8/27/14]

701—86.2(450) Inheritance tax returns and payment of tax.

86.2(1) *Filing of an inheritance tax return.* Estates meeting certain requirements must file an inheritance tax return, and it is the duty of certain persons associated with the estate to file the inheritance tax return as follows:

a. Mandatory filing. The inheritance tax return provided for in subrule 86.2(2) must be filed if the gross share of any heir, beneficiary, transferee, or surviving joint tenant exceeds the exemptions allowable in Iowa Code sections 450.4 and 450.9. In addition, if Iowa real estate is includable in the gross estate, the return must be filed, even if no tax is due, prior to the issuance of a no tax due certificate.

Effective July 1, 2001, an estate is required to file an Iowa inheritance tax return if the entire estate of the decedent exceeds the sum of \$25,000 after deducting the liabilities of the estate.

b. Who must file. If the decedent's estate is probated as provided in Iowa Code chapter 633 or administered as provided in Iowa Code section 450.22, the personal representative of the estate is charged with the duty of filing the return with the department. If the personal representative of the estate fails to file the return or if the estate is not probated, it shall be the duty of those heirs, beneficiaries, transferees, surviving joint tenants, and trustees who receive shares in excess of the allowable exemptions or shares which are taxable in whole or in part, without the deduction of liabilities, and those individuals in receipt of the decedent's property are either jointly or severally to file the return with the department.

c. Who is not required to file a return for estate of decedents dying on or after July 1, 2004. Effective for estates with decedents dying on or after July 1, 2004, if an estate has no Iowa inheritance tax due and there is no obligation for the estate to file a federal estate tax return, even though real estate is involved, an Iowa inheritance tax return need not be filed if one of the following situations is applicable:

(1) All estate assets are held solely in joint tenancy with right of survivorship between husband and wife alone; or

(2) All estate assets are held solely in joint tenancy with right of survivorship, and not as tenants in common, solely between the decedent and individuals listed in Iowa Code section 450.9 as individuals that are entirely exempt from Iowa inheritance tax; or

(3) All assets are passing by beneficiary designation pursuant to a trust and are intended to pass the decedent's property at death or through a nonprobate transfer solely to individuals listed in Iowa Code section 450.9 who are statutorily exempt from Iowa inheritance tax on shares received from a decedent based on their relationship to the decedent. The entire amount of property, interest in property, and income passing solely to the surviving spouse and to parents, grandparents, great-grandparents, and other lineal ascendants, to children including legally adopted children and biological children entitled to inherit under the laws of this state, stepchildren, and grandchildren, great-grandchildren, and other lineal descendants is exempt from tax; or

(4) All estate assets are passed by will or intestate succession as set forth in Iowa Code chapter 633, division IV, and beginning with section 633.210, solely to individuals who are statutorily exempt from Iowa inheritance tax as set forth above in subparagraph (3); or

(5) For estates of decedents dying on or after July 1, 2007, if the total aggregate value of all the tangible personal property in the estate is \$5,000 or less and in-kind distributions are made. Any in-kind distribution of personal property is exempt from inheritance tax when the total aggregate value of the tangible personal property in the estate is \$5,000 or less. If the total aggregate amount of tangible personal property is greater than \$5,000, then the exemption for in-kind distributions of tangible personal property does not apply. See Iowa Code section 450.4(7); see also Iowa Code section 633.276 for a description of tangible personal property that qualifies.

EXAMPLE 1: The total aggregate value of the tangible personal property in the estate is \$3,000. The executor makes an in-kind distribution of a diamond ring worth \$1,000 to a neighbor. The diamond ring is not subject to inheritance tax.

EXAMPLE 2: The total aggregate value of the tangible personal property in the estate is \$15,000. The executor makes an in-kind distribution of a diamond ring worth \$1,000 to a neighbor. The diamond ring is subject to inheritance tax because the total aggregate value of tangible personal property is greater than \$5,000.

Paragraph 86.2(1) "c" does not apply to interests in an asset or assets that pass to both an individual listed in Iowa Code section 450.9 and that individual's spouse.

d. General rules. An Iowa inheritance tax return must be filed if estate assets pass to both an individual listed in Iowa Code section 450.9 and that individual's spouse.

(1) If an inheritance tax return is not required because the estate meets the criteria in paragraph 86.2(1) "c," the final report (beginning with Iowa Code section 633.469) need not contain an inheritance tax receipt (clearance) issued by the department, but must properly certify that one of the criteria set forth in paragraph 86.2(1) "c" has been met as set forth in Iowa Code section 450.58(2).

(2) If any interest in real estate passes on account of the decedent's death and no Iowa inheritance tax return is required to be filed and the real estate does not pass through probate administration, then one of the persons succeeding to the interest in the real property must file an affidavit in the county in which the real property is located setting forth the legal description of the real property and the fact that an Iowa inheritance tax return is not required to be filed with the department. A copy of this affidavit must be retained by the beneficiary that holds the real estate.

(3) If a return is filed with the department and the return is not required to be filed, the department will retain the return as required by statutes governing retention of returns. However, the department

will not process the filed return if the statute does not require that the return be filed. The department will not issue a clearance in an estate in which a return is not required to be filed.

86.2(2) Form and content—inheritance tax return.

a. Estates of decedents dying prior to July 1, 1983. Rescinded IAB 10/13/93, effective 11/17/93.

b. Estates of decedents dying on or after July 1, 1983. For estates of decedents dying on or after July 1, 1983, the preliminary inheritance tax return is abolished and a single inheritance tax return shall be filed. The return shall provide for schedules listing the assets includable in the gross estate, a listing of the liabilities deductible in computing the net estate, and a computation of the tax due, if any, on each share of the net estate. The return shall conform as nearly as possible to the federal estate tax return, Form 706. For information regarding Iowa returns, see subrule 86.1(5). If the estate has filed a federal estate tax return, a copy must be submitted with the Iowa return. If the federal estate return includes the schedules of assets and liabilities, the taxpayer may omit the Iowa schedules of assets from the return. However, any Iowa schedules indicating liabilities must be filed with the Iowa return due to proration of liabilities. When Iowa schedules are filed with the return, only those schedules which apply to the particular assets and liabilities of the estate are required. A return merely listing the assets and their values when the gross estate is in excess of \$25,000 (\$10,000 for estates of decedents dying before July 1, 2001) is not sufficient in nontaxable estates. In this case, the return must be amended to list the schedule of liabilities and the computation of the shares of the net estate before an inheritance tax clearance will be issued.

c. Special rule when the surviving spouse succeeds to property in the estate. Effective for estates of decedents dying on or after January 1, 1988, the following rules apply when the surviving spouse succeeds to property in the estate:

(1) If all of the property includable in the gross estate for inheritance tax purposes is held in joint tenancy with right of survivorship by husband and wife alone, an inheritance tax return is not required to be filed and a certificate from the department stating no inheritance tax is due is not required to release the inheritance tax lien under Iowa Code section 450.7(2).

(2) If any of the property includable in the gross estate passes to the surviving spouse by means other than by joint tenancy with right of survivorship or if any property passes by joint tenancy with right of survivorship when the surviving spouse is not the only surviving joint tenant, an inheritance tax return is required to be filed.

d. Estates of decedents dying on or after July 1, 1999. In addition to the special rule for surviving spouses set forth in paragraph “c” of this subrule, effective for estates of decedents dying on or after July 1, 1999, an estate that consists solely of property includable in the gross estate that is held in joint tenancy with right of survivorship and that is exclusively owned by the decedent and a lineal ascendant of the decedent, lineal descendant of the decedent, a child legally adopted in compliance with the laws of this state by the decedent or a stepchild of the decedent, or any other person declared exempt from Iowa inheritance tax pursuant to Iowa Code section 450.9, or a combination solely consisting of such persons, is not required to file an Iowa inheritance tax return, unless such an estate has an obligation to file a federal estate tax return. Property of the estate passing by means other than by joint tenancy with right of survivorship or if any property passes by joint tenancy with right of survivorship when the title of property is held by persons other than a lineal ascendant, lineal descendant, a child legally adopted in compliance with the laws of this state, or a stepchild of the decedent or by any other person declared exempt from Iowa inheritance tax pursuant to Iowa Code section 450.9, an inheritance tax return is required to be filed.

The exemption granted to stepchildren is limited to that class of step relationships exclusively. The exemption is not extended to include any lineal ascendants or descendants of the step relationship, such as stepgrandchild, stepparent or stepgrandparent. For a definition of “stepchild” for estates of decedents dying on or after July 1, 2003, please see the definition found in 701—86.1(450).

The rate of Iowa inheritance tax imposed on a share is based upon the relationship of the beneficiary to the decedent or the type of entity that is the beneficiary. For estates of decedents dying before July 1, 2001, a net estate that is less than \$10,000 does not have an Iowa inheritance tax obligation. For estates of decedents dying on or after July 1, 2001, the net estate that is less than \$25,000 does not have an Iowa

inheritance tax obligation. The following is the most current Iowa inheritance tax rate schedule for net estates over \$25,000:

SCHEDULE B			
Brother, sister (including half-brother, half-sister), son-in-law, and daughter-in-law. There is no exemption.			
If the share is: Not over \$12,500, the tax is 5% of the share.			
If over	But not over	Tax is	Of excess over
\$ 12,500	\$ 25,000	\$ 625 + 6%	\$ 12,500
25,000	75,000	1,375 + 7%	25,000
75,000	100,000	4,875 + 8%	75,000
100,000	150,000	6,875 + 9%	100,000
150,000	and up	11,375 + 10%	150,000
SCHEDULE C			
Uncle, aunt, niece, nephew, foster child, cousin, brother-in-law, sister-in-law, stepgrandchild, and all other individual persons. There is no exemption.			
If the share is: Not over \$50,000, tax is 10% of the share.			
If over	But not over	Tax is	Of excess over
\$ 50,000	\$100,000	\$ 5,000 + 12%	\$ 50,000
100,000	and up	11,000 + 15%	100,000
SCHEDULE D			
A firm, corporation or society organized for profit, including an organization failing to qualify as a charitable, educational or religious organization:			
Effective July 1, 2001, any fraternal and social organization which does not qualify for exemption under IRC Section 170(c) or 2055:			
15% of the amount.			
SCHEDULE E			
Any society, institution or association incorporated or organized under the laws of any other state, territory, province or country than this state, for charitable, educational or religious purposes, or to a cemetery association, including a humane society not organized under the laws of this state, or to a resident trustee for use without this state, the rate of tax imposed in excess of \$500:			
10% of the amount.			
SCHEDULE F			
An unknown heir, as distinguished from an heir who is not presently ascertainable, due to contingent events:			
5% of the amount.			

SCHEDULE G

A charitable, religious, educational, or veterans organization as defined in IRC Section 170(c) or 2055.

All other shares to income tax exempt organizations that are not defined in IRC Section 170(c) must provide their IRS letter of determination. Organizations may also be required to provide evidence that the bequest has restricted the funds to a conforming activity.

Public libraries, public art galleries, hospitals, humane societies, municipal corporations, bequests for care of cemetery or burial lots of the decedent or the decedent's family, and bequests for religious services the total of which does not exceed \$500.

Entirely exempt: No tax.

86.2(3) *Liability for the tax.* The personal representative of an estate is personally liable for the total tax due from any person receiving property subject to the tax, to the extent the person's share of the property is subject to the jurisdiction of the probate court and the personal representative. The trustee of trust property subject to tax is personally liable for the total tax due from a beneficiary to the extent of the person's share of the trust property. Each heir, beneficiary, transferee, joint tenant, and any other person being beneficially entitled to any property subject to tax is personally liable for the tax due on all property received subject to the tax. The person is not liable for the tax due on another person's share of property subject to tax, unless the person is also a personal representative, trustee, or other fiduciary liable for the tax by reason of having jurisdiction over the property, the succession to which is taxable. *Eddy v. Short*, 190 Iowa 1376, 179 N.W. 818 (1920); *Waterman v. Burbank*, 196 Iowa 793, 195 N.W. 191 (1923).

86.2(4) *Supplemental return—deferred interest.* When the tax has been deferred on a property interest to take effect in possession or enjoyment after the termination of a prior property interest, it shall be the duty of the owner of the future interest to file a supplemental inheritance tax return with the department, reporting the future interest for taxation. At the top of the front page of the return, the word "SUPPLEMENTAL" shall be printed.

86.2(5) *Amended return.* If additional assets or errors in valuation of assets or deductible liabilities are discovered after the filing of the inheritance tax return increasing the amount of tax due, an amended inheritance tax return must be filed with the department, reporting the additional assets. The appropriate penalty and interest will be charged on the additional tax due pursuant to Iowa Code section 421.27 and department rules in 701—Chapter 10. To file an amended inheritance tax return, Form IA 706 shall be completed and at the top of the front page of the return the word "AMENDED" shall be printed. If additional liabilities are discovered or incurred after the filing of the inheritance tax return which result in an overpayment of tax, an amended inheritance tax return must be filed in the manner indicated above. For amended returns resulting from federal audit adjustments—see subrule 86.3(6) and rules 86.9(450), and 86.12(450). For permitted and amended returns not permitted for change of values—see subrule 86.9(4).

86.2(6) *Due date for filing—return on present property interests.* Unless an extension of time has been granted, the final inheritance tax return, or the inheritance tax return in case of decedents dying on or after July 1, 1983, must be filed and any tax due paid, for all property in present possession or enjoyment:

a. On or before the last day of the ninth month after death for estates of decedents dying on or after July 1, 1984, subject to the due date falling on a Saturday, Sunday, or legal holiday, which would then

make the return due on the following business day. The following table for return due dates illustrates this subrule:

Deaths Occurring During:	Return Due Date:
July 1996	April 30, 1997
August 1996	June 2, 1997 (May 31 is a Saturday and June 1 is a Sunday)
September 1996	June 30, 1997
October 1996	July 31, 1997
November 1996	September 2, 1997 (August 31 is a Sunday, September 1 is Labor Day)
December 1996	September 30, 1997
January 1997	October 31, 1997
February 1997	December 1, 1997 (November 30 is a Sunday)
March 1997	December 31, 1997
April 1997	February 2, 1998 (January 31 is a Saturday and February 1 is a Sunday)
May 1997	March 2, 1998 (February 28 is a Saturday and March 1 is a Sunday)
June 1997	March 31, 1998

b. Within nine months after death for estates of decedents dying during the period beginning July 1, 1981, and ending June 30, 1984.

86.2(7) *Election to file—before termination of prior estate.* The tax due on a future property interest may be paid, at the taxpayer's election, on the present value of the future interest as follows:

a. *On or before the last day of the ninth month after the decedent's death (or within one year after the death of the decedent for estates of decedents dying prior to July 1, 1981).* Compute the tax by applying the life estate, annuity, or present value tables to the value of the property at the date of the decedent's death. If age or time is a determining factor in computing the present value of the future interest, it is the age or time at the date of the decedent's death that must be used.

b. *After the last day of the ninth month following the decedent's death (one year after death for estates of decedents dying prior to July 1, 1981) but prior to the termination of the prior estate.* Compute the tax by applying the life estate, annuity, or present value tables to the value of the property at the date the tax is paid. If age or time is a determining factor in computing the present value of the future interest, it is the age or time at the date the tax is paid that must be used. *In re Estate of Wickham*, 241 Iowa 198, 40 N.W.2d 469 (1950); *In re Estate of Millard*, 251 Iowa 1282, 105 N.W.2d 95 (1960). *In re Estate of Dwight E. Clapp*, Clay County District Court, Probate No. 7251 (1980).

86.2(8) *Mandatory due date—return on a future property interest.*

a. *For estates of decedents dying prior to July 1, 1984.* Rescinded IAB 10/13/93, effective 11/17/93.

b. *Mandatory due date—return on a future property interest for estates of decedents dying on or after July 1, 1981.* Unless the tax due on a future property interest has been paid under the provisions of subrule 86.2(7), paragraphs "a" and "b," the tax due must be paid on or before the last day of the ninth month following the termination of the prior estate. The statute does not provide for an extension of the mandatory due date for payment of the tax.

86.2(9) *Extension of time—return and payment.* For estates of decedents dying on or after July 1, 1984, the department may grant an extension of time to file an inheritance tax return on an annual basis. To be eligible for an extension, an application for an extension of time must be filed with the department

on a form prescribed or approved by the director. The application for extension must be filed with the department prior to the time the tax is due and an estimated payment of 90 percent of the tax due must accompany the application—see Iowa Code section 421.27 and rule 701—10.85(422). An extension of time to pay the tax due may be granted in the case of hardship. However, for extensions to be granted, the request must include evidence of the hardship—see 701—Chapter 10. An extension of time to file cannot be extended for a period of time longer than ten years after the last day of the month in which the death of the decedent occurs.

86.2(10) Discount. There is no discount allowed for early payment of the tax due.

86.2(11) Penalties. See rule 701—10.6(421) for the calculation of penalty for deaths occurring on or after January 1, 1991.

86.2(12) Interest on tax due. All tax which has not been paid on or before the last day of the ninth month following the death of the individual whose death is the event imposing the inheritance tax draws interest at the rate prescribed by Iowa Code section 421.7, to be computed on a monthly basis with each fraction of a month counted as a full month. See rule 701—10.2(421) for the interest rate to use for a specific calendar year. Interest applies equally to tax that is delinquent and tax that is due under an extension of time to pay.

This rule is intended to implement Iowa Code sections 421.14, 450.4, 450.5, 450.6, 450.9, 450.22, 450.44, 450.46, 450.47, 450.51, 450.52, 450.53, 450.63, and 450.94 and 2004 Iowa Acts, chapter 1073, and 2005 Iowa Acts, chapter 14.

[ARC 7761B, IAB 5/6/09, effective 6/10/09; ARC 1137C, IAB 10/30/13, effective 12/4/13]

701—86.3(450) Audits, assessments and refunds.

86.3(1) Audits. Upon filing of the inheritance tax return, the department must audit and examine it and determine the correct tax due. A copy of the federal estate tax return must be filed with the inheritance tax return in those estates where federal law requires the filing of a federal estate tax return. The department may request the submission of wills, trust instruments, contracts of sale, deeds, appraisals, and such other information as may reasonably be necessary to establish the correct tax due. See Iowa Code sections 450.66 and 450.67 and *Tiffany v. County Board of Review*, 188 N.W.2d 343, 349 (Iowa 1971). For taxpayers using an electronic data interchange process or technology also see 701—subrule 11.4(4). The person or persons liable for the payment of the tax imposed by Iowa Code chapter 450 shall keep the records relating to the gross and net estate required for federal estate tax purposes under 26 U.S.C. Section 6001 of the Internal Revenue Code and federal regulation Section 20.6001-1.

86.3(2) Assessments for additional tax. The taxpayer must file an inheritance tax return on forms prescribed by the director on or before the last day of the ninth month after the death of the decedent. When an inheritance tax return is filed, the department shall examine it and determine the correct amount of tax. If the amount paid is less than the correct amount due, the department must notify the taxpayer of the total amount due together with any penalty and interest which shall be a sum certain if paid on or before the last day of the month in which the notice is postmarked or on or before the last day of the following month if the notice is postmarked after the twentieth day of a month and before the last day of the following month. For estates with decedents dying on or after July 1, 1999, the date of the notice and not the postmark date is controlling. If the inheritance tax return is not filed within the time prescribed by law, taking into consideration any extensions of time, or the return as filed is not correct, the department may make an assessment for the tax and any penalty and interest due based on the inventories, wills, trust instruments, and other information necessary to ascertain the correct tax. For interest and penalty rate information, see 701—Chapter 10.

86.3(3) Refunds. If the examination and audit of the inheritance tax return discloses an overpayment of tax, the department will refund the excess to the taxpayer. See 701—Chapter 10 for the statutory interest rate commencing on or after January 1, 1982. For estates of decedents dying prior to January 1, 1988, interest shall be computed for a period beginning 60 days from the date of the payment to be refunded. For estates of decedents dying on or after January 1, 1988, interest must be computed for a period beginning the first day of the second calendar month following the date of payment, or the date

upon which the return which sets out the refunded payment was actually filed, or the date that return was due to be filed, whichever date is the latest. For the purposes of computing the period, each fraction of a month counts as an entire month. If the taxpayer, after the tax has been paid, discovers additional liabilities which, when offset by any additional assets results in an overpayment of the tax, the excess payment will be refunded to the taxpayer upon filing with the department an amended inheritance tax return claiming a refund. No refund for excessive tax paid shall be made by the department unless an amended return is filed with the department within three years (five years for estates of decedents dying prior to July 1, 1984) after the tax payment upon which the claim is made became due, or one year after the tax was paid, whichever time is the later—see Iowa Code section 450.94(3).

86.3(4) *Supplemental assessments and refund adjustments.* The department may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the department and the taxpayer are precluded from making a supplemental assessment or refund adjustment concerning the same issue involved in such appeal for the same tax period unless there is a showing of mathematical or clerical error or a showing of fraud or misrepresentation.

86.3(5) *Assessments—period of limitations.* Effective for estates of decedents dying on or after July 1, 1984, assessments for additional tax due must be made within the following periods of time:

a. Within three years after the return is filed for property reported to the department on the return. The three-year period of limitation does not begin until the return is filed. The time of the decedent's death is not relevant. For purposes of determining the period of limitations, the assessment period shall terminate on the same day of the month three years later which corresponds to the day and month the return was filed. If there is no numerically corresponding day three years after the return is filed, or if the expiration date falls on a Saturday, Sunday, or legal holiday, the assessment period expires the preceding day in case there is no corresponding day, or the next day following which is not a Saturday, Sunday, or legal holiday.

b. The period of time for making an assessment for additional tax is unlimited if a return is not filed with the department.

c. If a return is filed with the department, but property which is subject to taxation is omitted from the return, the three-year period for making an assessment for additional tax on the omitted property does not begin until the omitted property is reported to the department on an amended return. The omission of property from the return only extends the period of limitations for making an assessment for additional tax against the beneficiary, surviving joint tenant, or transferee whose share is increased by the omitted property. Other shares of the estate are not affected by the extended assessment period due to the omitted property. The inheritance tax is a separate succession tax on each share of the estate, not on the estate as a whole. *In re Estate of Stone*, 132 Iowa 136, 109 N.W. 455 (1906).

86.3(6) *Period of limitations—federal audits.*

a. Statute of limitations and federal audits in general. In the case of a federal audit, the department, notwithstanding the normal three-year audit period specified in Iowa Code paragraphs 450.94(5) “a” and “b,” shall have an additional six-month period for examination of the inheritance tax return to determine the correct tax due and for making an assessment for additional tax that may be due.

The additional six-month period begins on the date the taxpayer performs two affirmative acts: (1) notifies the department, and the department receives such a notification, in writing, that all controversies with the Internal Revenue Service concerning the federal estate, federal gift, and federal generation skipping transfer taxes (for deaths occurring after December 31, 2004) have been concluded and (2) submits to the department a copy of the federal audit, closing statement, court decision, or any other relevant federal document concerning the concluded controversy. The additional six-month examination period does not begin until both of the acts are performed. See Iowa Code sections 622.105 and 622.106 for the mailing date as constituting the filing date and Iowa Code section 4.1(34) and

Emmetsburg Ready Mix Co. v. Norris, 362 N.W.2d 498 (Iowa 1985) when the due date falls on a legal holiday.

b. Statute of limitations regarding federal audits involving real estate.

(1) In general. Effective for estates with decedents dying on or after July 1, 1999, in addition to the period of limitation for examination and determination, the department shall make an examination to adjust the value of real property for Iowa inheritance tax purposes to the value accepted by the Internal Revenue Service for federal estate tax purposes. The department shall have an additional six months to make an examination and adjustment for the value of the real property.

(2) Beginning of the additional six-month period. The additional six-month period for assessment and adjustment begins on the date the taxpayer performs two affirmative acts: (a) notifies the department, in writing, that all controversies with the Internal Revenue Service concerning the federal estate, federal gift, and federal generation skipping transfer taxes (for deaths occurring after December 31, 2004) have been concluded and (b) submits to the department a copy of the federal audit, closing statement, court decision, or any other relevant federal document. Such documents must indicate the final federal determination and final audit adjustments of all real property.

(3) Adjustment required. The department must make an adjustment to the value of real property for inheritance tax purposes to the value accepted for federal estate tax purposes regardless of whether any of the following have occurred: an inheritance tax clearance has been issued; an appraisal has been obtained on the real property indicating a contrary value; there has been an acceptance of another value for real property by the department; an agreement has been entered into by the department and the personal representative for the estate and persons having an interest in the real property regarding the value of the real property.

(4) Refunds. Despite the time period for refunds set forth in Iowa Code section 450.94(3), the personal representative for the estate has six months from the day of final disposition of any real property valuation matter between the personal representative for the estate and the Internal Revenue Service to claim a refund from the department of an overpayment of tax due to the change in the valuation of real property by the Internal Revenue Service.

c. Effect of additional time periods. The additional six-month audit period set forth in “a” and “b” under this subrule does not limit or shorten the normal three-year examination period. As a result, a six-month additional examination period has no application if the additional six-month examination period would expire during the normal three-year audit period. If additional tax is found to be due, see paragraph 86.12(5)“b” for the inheritance tax lien filing requirements for securing the additional tax after an inheritance tax clearance has been issued. The six-month additional examination period means the department shall have at least six months to examine the return after the notification. The department will have more time if the normal three-year examination period expires after the six-month additional period for examination. After the expiration of the normal three-year examination period, and absent an agreement to the contrary, the six-month extension of the statute of limitations for assessing Iowa inheritance tax based on federal audit adjustments for real property is limited to federal audit adjustments that directly affect Iowa inheritance tax and involve Iowa inheritance tax laws that incorporate Internal Revenue Code provisions. See Iowa Code section 450.94(5), 701—86.9(450) and 701—86.12(450), and *Kelly-Springfield Tire Co. v. Iowa Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

This rule is intended to implement Iowa Code sections 422.25, 422.30, 450.37, 450.53, 450.65, 450.71, and 450.94.

[ARC 0251C, IAB 8/8/12, effective 9/12/12; ARC 1545C, IAB 7/23/14, effective 8/27/14]

701—86.4(450) Appeals. A determination made by the department of either the correct amount of the tax due, or the amount of refund for excessive tax paid, shall be final unless the taxpayer, or any other party aggrieved by the determination, appeals to the director for a revision of the department’s determination. For notices of assessment issued on or after January 1, 1995, the department will consider a protest to be timely filed if filed no later than 60 days following the date of assessment notice or, if a taxpayer failed to timely appeal a notice of assessment, the taxpayer may make a payment pursuant to rule 701—7.8(17A) and file a refund claim within the period provided by law for filing such

claims. In the event of an appeal, the provisions of 701—Chapter 7 of the department’s rules of practice and procedure before the department of revenue and Iowa Code chapter 17A shall apply.

This rule is intended to implement Iowa Code chapter 17A and section 450.94.

701—86.5(450) Gross estate.

86.5(1) *Iowa real and tangible personal property.*

a. Real estate and tangible personal property with a situs in the state of Iowa and in which the decedent had an interest at the time of death is includable in the gross estate regardless of whether the decedent was a resident of Iowa. It is immaterial whether the property, or interest, is owned singly, jointly, or in common.

b. Certain other real and tangible personal property with a situs in the state of Iowa in which the decedent did not have an interest at death may also be part of the gross estate for tax purposes. Examples of such property transfers include, but are not limited to, transfers of real estate in which the grantor retained a life estate, life interest, interest or the power of revocation, property or interest in property in trust, and gifts made within three years of death in excess of the federal gift tax exclusion. These constitute transfers of property in which the decedent may not have an interest at death, but are includable in the gross estate for inheritance tax purposes. *In re Dieleman’s Estate v. Dept. of Revenue*, 222 N.W.2d 459 (Iowa 1974); *In re English’s Estate*, 206 N.W.2d 305 (Iowa 1973); and *Lincoln’s Estate v. Briggs*, 199 N.W.2d 337 (Iowa 1972).

c. A nonresident decedent’s interest in a corporation, limited liability company, or partnership that owns real or tangible personal property with an Iowa situs that is titled in the name of that business entity is not subject to inheritance tax. An interest in a business entity is intangible personal property which follows the residence of the decedent for the purposes of inheritance tax.

d. Tangible personal property as defined in Iowa Code section 633.276 with an Iowa situs which is distributed in kind from the estate is not subject to inheritance tax if the aggregate value of all tangible personal property in the estate does not exceed \$5,000. See 86.2(1) “c”(5).

86.5(2) *Foreign real estate and tangible personal property.* Real estate and tangible personal property with a situs outside the state of Iowa are not subject to the Iowa inheritance tax and, therefore, are not includable in the decedent’s gross estate for tax purposes. *Frick v. Pennsylvania*, 268 U.S. 473, 45 S. Ct. 603, 69 L.Ed. 1058 (1925); *In re Marx Estate*, 226 Iowa 1260, 286 N.W.2d 422 (1939).

86.5(3) *Intangible personal property—decedent domiciled in Iowa.* Intangible personal property, or interest therein, owned by a decedent domiciled in Iowa is includable in the gross estate for inheritance tax purposes regardless of the physical location of the evidence of the property or whether the account or obligation is with a non-Iowa financial institution. *Curry v. McCanless*, 307 U.S. 357, 59 S. Ct. 900, 83 L.Ed 1339 (1939); *Lincoln’s Estate v. Briggs*, 199 N.W.2d 337 (Iowa 1972).

86.5(4) *Intangible personal property—decedent domiciled outside Iowa.* Rescinded IAB 10/30/13, effective 12/4/13.

86.5(5) *Classification of property.* The property law of the state of situs determines whether property is classified as real, personal, tangible or intangible and also whether decedent had an interest in the property. *Dieleman’s Estate v. Dept. of Revenue*, 222 N.W.2d 459 (Iowa 1974); *Williamson v. Youngs*, 200 Iowa 672, 203 N.W. 28 (1925).

86.5(6) *Insurance—in general.* Whether the proceeds or value of insurance is includable in the gross estate for inheritance tax purposes depends on the particular facts in each situation. Designated beneficiary and type of insurance (life, accident, health, credit life, etc.) are some of the factors that are considered in determining whether the value or proceeds are subject to tax. *In re Estate of Brown*, 205 N.W.2d 925 (Iowa 1973).

a. *Insurance proceeds subject to tax.* The proceeds of insurance on the decedent’s life owned by the decedent and payable to the decedent’s estate or personal representative is includable in the gross estate. Insurance owned by the decedent on the life of another is includable in the gross estate to the extent of the cash surrender value of the policy. The proceeds of all insurance to which the decedent had an interest, at or prior to death, but are payable for reasons other than death, are includable in the gross estate. *Bair v. Randall*, 258 N.W.2d 333 (Iowa 1977).

b. Insurance proceeds not taxable. Insurance on the decedent's life payable to a named beneficiary, including a testamentary trust, other than the insured, the estate, or the insured's personal representative, is not subject to Iowa inheritance tax. *In re Estate of Brown*, 205 N.W.2d 925 (Iowa 1973).

c. Insurance proceeds includable—depending on circumstances. Credit life insurance and burial insurance are offsets against the obligation. If the obligation is deducted in full or in part in computing the taxable shares of heirs or beneficiaries, the proceeds of the credit life and burial insurance are includable in the gross estate to the extent of the obligation. Insurance on the decedent's life and owned by the decedent, pledged as security for a debt is an offset against the debt if the insurance is the primary source relied upon by the creditor for the repayment of the obligation and is includable in the gross estate on the same conditions as credit life insurance. See *Estate of Carl M. Laartz* Probate No. 9641, District Court of Cass County, March 17, 1973; *Estate of Roy P. Petersen*, Probate No. 14025, District Court of Cerro Gordo County, May 16, 1974.

Insurance on the decedent's life, payable to a corporation or association in which the decedent had an ownership interest, while not subject to tax as insurance, may increase the value of the decedent's interest. *In re Reed's Estate*, 243 N.Y. 199, 153 N.E.47, 47 A.L.R. 522 (1926).

86.5(7) Gifts in contemplation of death—for estates of decedents dying prior to July 1, 1984, only. A transfer of property, or interests in property by a decedent, except in the case of a bona fide sale for fair consideration within three years of the grantor's death, made in contemplation of death, is includable in the decedent's gross estate. Any such transfer made within the three-year period prior to the grantor's death is presumed to be in contemplation of death, unless it is shown to the contrary. Whether a transfer is made in contemplation of death depends on the intention of the grantor in making the transfer and will depend on the facts and circumstances of each individual transfer.

a. Factors to be considered include, but are not limited to:

- (1) The age and health of the grantor at the time of the transfer,
- (2) Whether the grantor was motivated by living or death motives,
- (3) Whether or not the gift was a material part of the decedent's property,
- (4) Whether the gift was an isolated event or one of a series of gifts during the decedent's lifetime.

b. Factors which tend to establish that the motive for the gift was prompted by the thought of death include, but are not limited to:

- (1) Made with the purpose of avoiding death taxes,
- (2) Made as a substitute for a testamentary disposition of the property,
- (3) Of such an amount that the remaining property of the grantor would not normally be sufficient to provide for the remaining years of the grantor and those of the grantor's household,
- (4) Made with the knowledge that the grantor is suffering from a serious illness that is normally associated with a shortened life expectancy.

c. Factors which tend to establish that the gift was inspired by living motives include, but are not limited to:

- (1) Made on an occasion and in an appropriate amount that is usually associated with such gift giving occasions as Christmas, birthdays, marriage, or graduation,
- (2) Made because of the financial need of the donee and in an amount that is appropriate to the need,
- (3) Made as a remembrance or reward for past services or favors in an amount appropriate to the occasion,
- (4) Made to be relieved of the burden of management of the property given, retaining sufficient property and income for adequate support and maintenance.

For a gift to be determined to have been made in contemplation of death it is not necessary that the grantor be conscious of imminent or immediate death. However, the term means more than the general expectation of death which all entertain. It is a gift when the grantor is influenced to do so by such expectation of death, arising from bodily or mental condition, as prompts persons to dispose of their property to those whom they deem the proper object of their bounty. It is sufficient if the thought of

death is the impelling cause for the gift. *U.S. v. Wells*, 283 U. S. 102, 51 S. Ct. 446, 75 L.Ed. 867 (1931); *In re Mann's Estate*, 219 Iowa 597, 258 N.W. 904 (1935).

d. Gifts made within three years prior to death—for estates of decedents dying on or after July 1, 1984. All gifts made by the donor within three years prior to death, which are in excess of the annual calendar year federal gift tax exclusion provided for in 26 U.S.C. Section 2503, subsections b and e, are included in the gross estate for inheritance tax purposes. The motive, intention or state of mind of the donor is not relevant. Date of valuation for a gift in which there was a full transfer of ownership is valued at the date in which the gift is completed. However, for a gift of an interest in property that is less than a full transfer of ownership, which includes, but is not limited to, a life estate or conditional gift, the date of valuation is the date of the death of the decedent, unless alternative valuation is chosen. Effective for estates of decedents dying on or after July 1, 2003, valuation of property transferred by the grantor or donor is based on the net market value at the date of transfer. The fact alone that the transfer is a gift, in whole or in part, and exceeds the annual calendar year exclusion for federal gift tax purposes, is sufficient to subject the excess of the transfer over the exclusion to tax. The exclusion is applied to the total amount of the gifts made to a donee in a calendar year, allocating the exclusion to the gifts in the order made during the calendar year. This rule has important application to the earliest year of the three-year period before death because the three-year period for inheritance tax purposes is measured from the date the decedent-donor died. This will only rarely coincide with a calendar year. As a result, none of the gifts made in the earliest calendar year of the three-year period prior to death, regardless of the amount, which are made before the beginning of the three-year period, measured by the decedent's death date, are subject to tax. However, gifts made before the three-year period begins in this earliest year will reduce or may completely absorb the exclusion amount that is available for the remaining part of this first-year period. The significance of the difference between the three-year period prior to death and the calendar year exclusion amount is illustrated by the following:

EXAMPLE. The decedent-donor, A, died July 1, 2012. The three-year period during which gifts may be subject to inheritance tax begins July 1, 2009. During the calendar year 2009, A made a cash gift to nephew B of \$14,000 on May 1, 2009, and a second gift to B of \$4,000 on August 1, 2009. In this example, none of the \$14,000 gift made on May 1, 2009, is includable for inheritance tax purposes because it was made before the three-year period began, based on A's date of death. All of the \$4,000 gift made on August 1, 2009, is includable for inheritance tax purposes because it is in excess of the calendar year 2009 federal gift tax exclusion of \$13,000.

(1) Split gift. At the election of the donor's spouse, a gift made by a donor to a person, other than the spouse, shall be considered, for inheritance tax purposes, as made one half by the donor and one half by the donor's spouse. This split gift election for inheritance tax purposes is subject to the same terms and conditions that govern split gifts for federal gift tax purposes under 26 U.S.C. Section 2513.

The consent of the donor's spouse signified under 26 U.S.C. Section 2513(b) shall also be presumed to be consent for Iowa inheritance tax purposes, unless the contrary is shown. If the split gift election is made, the election shall apply to all gifts made during the calendar year. Therefore, if the election is made, each spouse may use the annual federal gift tax exclusion which shall be applied to one-half of the total value of all gifts made by both spouses during the calendar year to each donee.

(2) Types of transfers which may result in a gift. Whether a transfer of property constitutes a gift depends on the facts and circumstances surrounding each individual transfer. Transfers which may result in a gift, in whole or in part, include, but are not limited to: sales of property where the purchase price, or terms of sale, are less than fair market value; a loan of money, interest free, even though the loan is payable on demand; the release of a retained life use of property; and the payment of a debt or other obligation of another person.

(3) Types of transfers that are not a gift. However, certain transfers which in property law would be considered a present transfer of an interest in property may not be considered gifts within the Iowa three-year rule under Iowa Code section 450.3(2). Rather the transfers may be transfers intended to take effect in possession or enjoyment at death. Examples of this kind of transfer would include, but are not limited to, transfers in trust or otherwise, with a retained life use or interest; commercial annuities where payments are made to a beneficiary upon the death of the primary annuitant; transfers that place

property in joint tenancy; irrevocable transfers of real or personal property where the deed or bill of sale is placed in escrow to be delivered only upon the grantor's death. Transfers of this kind are subject to inheritance tax under Iowa Code section 450.3(3) as a transfer to take effect in possession or enjoyment at death, even though under property law an interest in the property may have been transferred prior to death. Different kinds of transfers that may constitute a taxable gift, in whole or in part, include but are not limited to the following:

EXAMPLE A. Grantor-decedent, A, on July 1, 1992, transferred to nephew B, without consideration, a 160-acre Iowa farm, reserving the life use. On the date of transfer, the farm had a fair market value of \$2,000 per acre, or \$320,000. On August 1, 1994, A released the retained life estate without any consideration being given and then died on December 1, 1994. The release on August 1, 1994, constitutes a gift, for inheritance tax purposes, of the value of the entire farm (less the annual gift tax exclusion), within the three-year period prior to death. What is taxable is what would have been taxable had the release not been given. *United States v. Allen*, 293 F.2d 916 (10th Cir. 1961); Rev. Ruling 56-324, 1956 2 C.B. 999. In this example, the gift is not to be valued at the time of the release of the life use, but rather at its fair market value at the time of death. See subrule 86.9(1). The real estate cannot be valued at its alternate valuation date because it is not included in the federal gross estate for federal estate tax purposes, but rather it constitutes an adjusted taxable gift not eligible for the alternate valuation date. See rule 701—86.10(450) and Federal Estate Tax Regulation Section 20.2032-1(a) and (d).

EXAMPLE B. A, on August 1, 2009, loaned brother B \$450,000 which was evidenced by a non-interest-bearing promissory note, payable on demand. A died on October 1, 2011, with no part of the loan having been repaid. The principal amount of the note is includable in A's gross estate. The free use of money is a valuable property right to the debtor. *Dickman v. Commissioner*, 465 U.S. 330 (1984). Thus, in effect, A has made a gift of the value of the interest to B each year the debt remains unpaid. Assuming for purposes of illustration that the applicable federal short-term rate for the entire year is 9 percent for each year and no other gifts were made to B, A has made a gift to B of \$40,500 through August 2010 (one year after the note was executed) and an additional gift of \$40,500 through August 1, 2011, and two months' interest of \$6,750 from August 1, 2011, to the date of death on October 1, 2011. Therefore, in calendar year 2009 A has made a gift of 5/12 of \$40,500, or \$16,875. After deducting the annual calendar year exclusion of \$13,000, \$3,875 is subject to inheritance tax. Since the loan was outstanding for all of calendar year 2010, \$40,500, less the \$13,000 exclusion, or \$27,500, is subject to inheritance tax. For calendar year 2011 the loan was outstanding for nine months. Three-fourths of \$40,500, less \$13,000, or \$17,375, is subject to inheritance tax.

In this example it is not necessary that the loan be made within the three-year period prior to death. It is the free use of the loan during the three-year period prior to death that constitutes the gift.

EXAMPLE C. On March 1, 2010, A sold a 160-acre Iowa farm to niece B for \$1,500 per acre, or \$240,000. On the date of sale, the fair market value of the farm was \$2,500 per acre, or \$400,000. A died on August 1, 2012. This sale is, in part, a gift. It is not a bona fide sale for an adequate and full consideration in money or money's worth, and as a result, the difference between the sale price and the fair market value of the farm on the date of sale constitutes a gift. The sale price in this example represents only 60 percent of the farm's fair market value; therefore, 40 percent of the farm is a gift. However, the gift percentage to apply to the farm's value at death is 37 percent, not 40 percent, because the \$13,000 annual gift tax exclusion must be deducted from the value of the gift. See the computation of this percentage in Example D immediately following.

EXAMPLE D. On March 1, 2010, A sold a 160-acre Iowa farm to niece B for \$2,500 per acre, or \$400,000, which was also the fair market value of the farm on the date of sale. The sale was an installment sale contract, payable in 20 equal annual installments of principal and interest. The unpaid principal balance is to draw interest at one-half of the prevailing Federal Land Bank loan rate, which for purposes of illustration we will assume to be the rate of 12 percent, or 6 percent per year. The annual payments of principal and interest are \$34,873.82 per year. A died on August 1, 2012. In this example, the sale price in and of itself does not constitute a gift because the sale price was also the fair market value of the farm. However, the difference between the prevailing Federal Land Bank loan rate of 12 percent and the contract rate of 6 percent constitutes a gift from A to B.

The amount of the gift that is includable in the gross estate is computed by determining the present value of the future annual payments of \$34,873.82 discounted to reflect a 12 percent return on the investment. The discounted value is then divided by the fair market value of the farm on the date of the sale to determine the percentage of the sale price that is a bona fide sale for full consideration and the percentage of the sale price that represents a gift before the annual exclusion. The gift percentage is then applied to the fair market value of the farm (or special use value, if applicable) at death, to determine the amount that is includable in the gross estate.

The computation in this example is as follows:

The present value of the future annual payments of \$34,873.82 for 20 years to reflect a 12 percent return on an investment is \$260,488.05. That is, an investor who desires to earn the market rate of return of 12 percent on an investment would only pay \$260,488.05 for this 6 percent \$400,000 contract of sale.

Bona Fide Sale Percentage

Present value: $\frac{260,488.05}{400,000.00} = 65\%$

Sale price: 400,000.00

This is the percentage of the sale price of \$400,000 that represents a bona fide sale for full consideration.

Gift Percentage

The sale price of \$400,000 - \$260,488.05 or \$139,511.95 is the gift portion of the sale price due to the 6 percent interest rate on the contract, before the \$13,000 annual exclusion is deducted.

The gift percentage is computed as follows:

$$\$139,511.95 - \$13,000 = \frac{\$126,511.95}{400,000.00} = 32\%$$

In this example the gift percentage used to determine the amount of the farm value at death that is taxable is only 32 percent of the value because deducting the \$13,000 exclusion reduced the gift percentage from 35 percent to 32 percent. The gift took place in the year of sale, not in the year of death. As a result, 32 percent of fair market value (or special use value, if applicable) of the farm at the time of the donor's death is includable in the gross estate for inheritance tax purposes.

86.5(8) Joint tenancy property—in general. Whether the form of ownership of property is considered to be joint tenancy is determined by the property law of the state of the situs of the property. Generally, the words and phrases “to A and B as joint tenants with full rights of survivorship and not as tenants in common” create a joint tenancy form of ownership unless a contrary interest can be shown by material evidence. “To A or B, payable to the order of self” creates an alternative right of ownership and for tax purposes is treated as joint tenancy property. *In re Estate of Martin*, 261 Iowa 630, 155 N.W.2d 401 (1968); *Petersen v. Carstensen*, 249 N.W.2d 622 (Iowa 1977); *In re Estate of Loudon*, 249 Iowa 1393, 92 N.W.2d 409 (1958). Joint tenancy property may be held by more than two persons. *In re Estate of Horner*, 234 Iowa 624, 12 N.W.2d 166 (1944). However, the use of the words “as joint tenants” alone without the use of the phrase “with right of survivorship” may only create a tenancy in common. *Albright v. Winey*, 226 Iowa 222, 284 N.W. 86 (1939).

a. Joint tenancy property—husband and wife alone. Generally there are no shares in joint tenancy property because each joint tenant owns the whole property. As a result, joint tenancy property is not taxed like tenancy in common property where each owner has a specific share. If the joint tenancy property is held by husband and wife alone, only one-half of the property is includable in the gross estate for inheritance tax purposes in the estate of the first joint tenant to die. However, if the survivor can establish by competent evidence that separate money or property was used and contributed to a larger percentage than one-half to the acquisition of a specific item or items of jointly held property, then the

larger percentage of such item or items shall be excluded from taxation. *Ida M. Jepsen v. Bair*, No. 85, State Board of Tax Review, June 18, 1975.

b. Joint tenancy property—not held by husband and wife alone. Property held in this form of joint tenancy is includable in the gross estate of the deceased joint tenant, except to the extent the surviving joint tenant or tenants can establish contribution to the acquisition of the joint property, in which case the proportion attributed to the contribution is excluded from the gross estate. In the case of multiple joint tenancy property, excess contribution established by one surviving joint tenant cannot be attributed to another surviving joint tenant. For tax purposes, the requirement of contribution in effect establishes percentage ownership—or shares—in jointly held property that does not exist in property law. Contribution to the acquisition of jointly held property can be established by the survivor by proof, which includes, but is not limited to, evidence that the property was acquired by gift, inheritance, or purchase from the survivor's separate funds or property. Contribution means cash or cash in kind that is applied to the cost of obtaining the property at issue. Unlike joint tenancy property held solely between husband and wife, if any of the surviving joint tenants is not the spouse of the decedent, the presumed one-half exclusion is not automatically available without proof of contribution.

c. Joint tenancy—convenience or constructive trust. If the record ownership of bank accounts, certificates of deposit, and other kinds of property are held in the form of joint tenancy, but in fact are held by the decedent and another person or persons who have a confidential or fiduciary relationship with the decedent, the property is not held in joint tenancy but is held in constructive or resulting trust by the survivor for the decedent. A confidential or fiduciary relationship is any relationship existing between the parties to a transaction wherein one of the parties is duty bound to act with the utmost good faith for the benefit of the other party. In its broadest connotation, the phrase embraces those multiform positions in life wherein one comes to rely on and trust another in one's important affairs. *First National Bank v. Curran*, 206 N.W.2d 317 (Iowa 1973). The fact that the decedent furnished the funds to acquire the property or demonstrated a kind, considerate, and affectionate regard for the survivor does not in itself establish a confidential relationship between the decedent and the survivor. If the evidence to establish a contrary relationship with respect to property in the form of joint tenancy is not substantial, a joint tenancy exists as a matter of law. *Petersen v. Carstensen*, 249 N.W.2d 622 (Iowa 1977).

If a confidential relationship constituting a constructive or resulting trust is established on behalf of the decedent, the property or property interest that is the subject of the trust is part of the decedent's gross estate as singly owned property.

86.5(9) Transfers reserving a life income or interest. If the grantor transfers property, except in the case of a bona fide sale for fair consideration, reserving the income, use, possession, or a portion thereof for life, the property is includable in the gross estate for inheritance tax purposes. *In re Sayres' Estate*, 245 Iowa 132, 60 N.W.2d 120 (1953); *In re Estate of English*, 206 N.W.2d 305 (Iowa 1973). If there is a full reservation of income, the entire value of the property in which the reservation exists is includable for tax purposes. If only a portion of the income is reserved, the amount subject to tax is the full value of the property at death multiplied by a fraction of which the total income reserved is the numerator and the total average earning capacity of like property is the denominator. See *In re Estate of English*, 206 N.W.2d at 310.

The reservation of the life income, or portion thereof, need not necessarily be stated or contained in the instrument of transfer to be includable for taxation. The transfer of property may contain no reservation of income or other incidents of ownership in the grantor, but if there is a contemporaneous agreement between the grantor and grantee to pay the income, or portion thereof, to the grantor for life, the two instruments or agreements when considered together may be construed to be reservation of the income from the transferred property. See *In re Sayres' Estate*, 245 Iowa 132 at 141, 142, 60 N.W.2d 120 (1953) for a full discussion of the subject.

The instrument need not be in any special form. For example, it may take the form of a contract of sale to terminate at death where the payments consist of the income from the property only. In addition, the transfer to be includable for taxation is not limited to income-producing property. For example, the transfer of the grantor's dwelling, reserving the life occupancy, falls within the meaning of a reserved

life income or interest. Generally, revocable trusts can be classified as reserving a life income or interest. This type of transfer does not fall within the annual gift exclusion.

86.5(10) Powers of appointment—in general. Iowa Code section 450.3(4) is concerned with two aspects of powers of appointment that are subject to inheritance tax. First, the taxation of the decedent's property subject to the power of appointment in the estate of the donor (decedent), and second, the exercise, or nonexercise, of the power of appointment over the property in the estate of the donee (the decedent possessing the power).

a. General power of appointment. Whether the instrument of transfer utilized by the donor creates a general or special power of appointment is a matter of property law. For example, a devise to A for life with "power to dispose of and pass clear title ... if A so elects," creates a life estate with a general power of appointment. *In re Estate of Cooksey*, 203 Iowa 754, 208 N.W. 337 (1927). Also to A for life, "Especially giving unto A the right to use and dispose of the same as A may see fit," creates a general power of appointment, *Volz v. Kaemmerle*, 211 Iowa 995, 234 N.W. 805 (1931). However, the power to sell and convert the assets subject to the power does not in itself create a general power of appointment. *In re Estate of Harris*, 237 Iowa 613, 23 N.W.2d 445 (1946). A power is general if being testamentary, it can be exercised wholly in favor of the estate of the donee. *In re Estate of Spencer*, 232 N.W.2d 491 at 495, 496 (Iowa 1975). The definition of a general power of appointment contained in 26 U.S.C. Section 2056(b)(5) of the Internal Revenue Code would meet the test of a general power under Iowa law.

b. Special power of appointment. If there is a limitation on the donee's right to use the corpus only for care, maintenance and support, the power is special, not general. *Brown v. Brown*, 213 Iowa 998, 240 N.W. 910 (1932). Also, to A for life with power to handle the property for A's interest, limits the power of invasion of the principal for care and support only, and is therefore a special, not a general, power of appointment. *Lourien v. Fitzgerald*, 242 Iowa 1258, 49 N.W.2d 845 (1951). Also, to A for life, with unrestricted power of sale with no power over the sale proceeds creates only a special power of appointment in the donee. *McCarthy v. McCarthy*, 178 N.W.2d 308 (Iowa 1970).

If the donee's power to appoint is limited to a class or group of persons, a special, not a general, power is created. *In re Estate of Spencer*, 232 N.W.2d 491, at 496 (Iowa 1975).

c. Powers of appointment—taxation in donor's estate. If the instrument in the donor's estate creates a general power of appointment, the property subject to the power is taxed as if the property had been transferred to the donee in fee simple. Those who would succeed to the property in the event the power is not exercised are treated in the donor's estate as if they receive no interest in the property, even though in property law those who succeed to the property either by the exercise, or nonexercise, take from the donor of the power. *In re Estate of Higgins*, 194 Iowa 369 at 373, 189 N.W. 752 (1922); *Bussing v. Hough*, 237 Iowa 194 at 200, 21 N.W.2d 587 (1946).

If the instrument in the donor's estate creates a special power of appointment, the property subject to the power is taxed as if the donee of the power had received a life estate or term for years, as the case may be. Those persons who would take the property in the event the special power is not exercised are taxed in the donor's estate as if they had received the remainder interest in the property subject to the special power, although an election to defer payment of the tax may result in either no tax or a different tax obligation. This could happen, for example, if the special power is the power to invade the corpus for the health, education, and maintenance of the donee.

d. Powers of appointment in the estate of a donee dying on or after January 1, 1988. Property which is subject to a general power of appointment is includable for inheritance tax purposes in the gross estate of a donee dying on or after January 1, 1988, if the donee has possession of the general power of appointment at the time of the donee's death, or if the donee has released or exercised the general power of appointment within three years of death. Whether or not the donee of a general power exercises the general power at death is not relevant to the includability of the property subject to the general power in the estate of the donee. The mere possession of the power at death is sufficient for the property subject to the power to be included in the estate of the donee for inheritance tax purposes.

Property subject to a special power of appointment is not includable in the gross estate of the donee of the power regardless of whether the donee possesses the special power or exercised the power at death, unless a QTIP election was made under Iowa Code subsection 450.3(7) in which case the rule governing

QTIP elections shall control. See paragraphs 86.5(10) “a” and “b” for the distinction between a general and special power and subrule 86.5(11) for the rule governing QTIP elections.

For inheritance tax purposes, if there is an exercise or release of the general power within three years of the donee’s death, the property subject to the exercise or release is includable in the donee’s estate just as if the donee had retained possession of the power at death and is taxable to those to whom the property is appointed in case the power is exercised, or to those who take in default of the exercise in case the power is released.

The general power of appointment is considered to have been exercised for the purposes of this rule when the nature of the disposition is such that if it were a transfer or disposition of the donee’s property, the transfer would be subject to inheritance tax under Iowa Code section 450.3. The power is considered exercised in the following three nonexclusive classes of cases: (1) where there has been some reference in the will or other instrument to the power; (2) the will or other instrument contains a reference to the property which is the subject on which the power is to be executed; (3) where the provision in the will or other instrument executed by the donee of the power would otherwise be ineffectual or a mere nullity; in other words, the provision would have no operation except as an execution of the power. *In re Trust of Stork*, 233 Iowa 413, 421, 9 N.W.2d 273 (1943). For the purposes of section 450.3(4), a release of a general power is considered to be a transfer of the property subject to the power to those who would take in default if the power was not exercised.

86.5(11) *Qualified terminable interest property (QTIP).*

a. In general. Effective for estates of decedents dying on or after July 1, 1985, property passing from the decedent grantor-donor, which qualifies as qualified terminable interest property (QTIP) within the meaning of 26 U.S.C. Section 2056(b)(7)(B) is eligible to be treated for Iowa inheritance tax purposes, if an election is made, as passing in fee to the donee-grantee surviving spouse, in the estate of the grantor-donor decedent, subject to the provisions of law and this subrule. If the election is made, the qualified property, unless it is disposed of prior to death, shall be included in the gross estate of the surviving spouse and treated as passing in fee to those succeeding to the remainder interest in the qualified property.

b. Property transfers eligible. Five factors are relevant in determining whether property passing from a decedent grantor-donor is eligible for the Iowa qualified terminable interest election. They are: (1) the death of the decedent-transferor, but not necessarily the transfer, must have occurred on or after July 1, 1985; (2) the property must meet the qualifications required in 26 U.S.C. Section 2056(b)(7)(B), or in the case of a gift within three years prior to the decedent-transferor’s death, the qualifications in 26 U.S.C. Section 2523(f); (3) a valid federal election must have been made on a required federal return with respect to the qualified property for federal estate tax purposes or, for federal gift tax purposes, if the transfer occurred within three years prior to the transferor’s death; and (4) the property must be included in the decedent-transferor’s gross estate for Iowa inheritance tax purposes, either because the transfer occurred at death or within three years prior to the transferor’s death; and (5) Iowa must have constitutional nexus with the surviving spouse or QTIP property.

If property is not eligible for an Iowa qualified terminable interest election, or if eligible, but an Iowa election is not made, it is not included in the estate of the surviving spouse grantee-donee for inheritance tax purposes by reason of Iowa Code section 450.3. The fact that the qualified property is included in the estate of the surviving spouse for federal estate tax purposes does not necessarily mean the property is automatically included in the surviving spouse’s Iowa gross estate.

The treatment of the qualified property in both the grantor-donor’s and the surviving spouse’s estates for Iowa inheritance tax purposes is determined by the Iowa election, or lack of an election, being made in the grantor-donor’s estate.

This subrule is illustrated by the following examples:

EXAMPLE 1. Decedent A died testate, a resident of Iowa, July 2, 1995, leaving a surviving spouse, B, and two children, C and D. On February 1, 1992, A transferred by deed a 160-acre Iowa farm to spouse B for life, with the remainder at B’s death to two children, C and D. An election was made under 26 U.S.C. Section 2523(f) to treat the gift of the 160-acre farm as passing entirely to B in fee.

Upon A's death the 160-acre farm is not part of A's gross estate either for federal estate or for Iowa inheritance tax purposes because the transfer was made more than three years prior to death. However, upon the death of B, the surviving spouse, the 160 acres is included in B's gross estate (unless disposed of prior to death) for federal estate tax purposes, but is not included in B's Iowa gross estate. The transfer by A took place more than three years prior to death, and therefore is not included in A's Iowa estate and is not eligible for an Iowa qualified terminable interest election.

EXAMPLE 2. On October 1, 1992, grantor A executed a revocable inter vivos trust which consisted of cash and a 160-acre Iowa farm. Under the terms of the trust agreement A was to receive the trust income for life and upon A's death the trustee was to pay the trust income to A's spouse, B, for life, with the power to invade the principal for B's care and support. Upon B's death the trust was to terminate and the balance of the corpus was to be paid to A's children, C and D. A died July 2, 1995, and the personal representative elected to treat the trust assets as passing entirely in fee to the surviving spouse, B, for federal estate tax purposes. An Iowa qualified terminable interest election was not made. In this fact situation, the election qualified the trust assets for the marital deduction for federal estate tax purposes. For Iowa inheritance tax purposes, since an Iowa election was not made, the trust assets are taxed on the basis of a life estate passing to B, the surviving spouse, and the remainder passing to the children, C and D. Upon B's death, the trust corpus will be included in B's estate for federal estate tax purposes, but not in B's estate for Iowa inheritance tax purposes, because an Iowa qualified terminable interest election was not made in A's estate.

c. The qualified terminable interest election—in general. The election to treat qualified terminable interest property as passing entirely in fee to the surviving spouse in the estate of the decedent grantor-donor is an affirmative act. In the event an election is not made, the qualified property will be treated as a life estate passing to the surviving spouse with a remainder over as provided in Iowa Code section 450.3(4).

An Iowa election cannot be made unless an election has been made on the same qualified property for federal estate tax purposes on a required federal return, or in case of a gift made within three years of the decedent grantor-donor's death, for federal gift tax purposes. However, even though a federal election has been made, the personal representative of the decedent grantor-donor's estate has the option to either make or not to make the election with respect to the qualified property for Iowa inheritance tax purposes. It is sufficient for Iowa inheritance tax purposes that a valid federal election has been made. What constitutes a valid election for federal estate or gift tax purpose is determined under applicable federal law and practice and not by the department.

However, it is permissible for Iowa inheritance tax purposes to make an election for a smaller but not larger percentage of the qualified property than was made for federal estate or gift tax purposes. These general principles can be illustrated by the following examples:

EXAMPLE 1. Decedent-grantor A created a revocable inter vivos trust on October 15, 1992, which was funded by \$200,000 in cash and a 160-acre Iowa farm worth \$200,000. The trust provided that the trustee pay the income to A for life and upon A's death, the trustee was to pay the income to A's surviving spouse B for life, with power to invade the principal for B's care and support. Upon B's death the trust was to terminate and the balance of the principal was to be distributed to A's two children, C and D.

A died on July 2, 1995, and the principal of the trust is included in A's gross estate both for federal estate and Iowa inheritance tax purposes because the trust was revocable and A retained the income for life. A's personal representative elected to treat 50 percent of the trust assets as qualified terminable interest property for federal estate tax purposes. A's personal representative elected not to treat the qualified property as passing to B for Iowa inheritance tax purposes. This is permissible because the personal representative has the option to either elect or not to elect to treat 50 percent of the qualified property as passing in fee to the surviving spouse for Iowa inheritance tax purposes.

EXAMPLE 2. Same factual situation as Example 1. A's personal representative elects to treat only 25 percent of the qualified property as passing in fee to the surviving spouse for Iowa inheritance tax purposes. This is permissible because the personal representative is not required to make an election on all of the qualified terminable interest property on which the federal election has been made. It is sufficient that a federal election has been made for at least as large a percentage of the qualified property

on which the Iowa election is made. However, an Iowa election cannot be made for a larger percentage of the qualified property than the percentage made on the federal election.

EXAMPLE 3. Same factual situation as Example 1. In this example, A's personal representative, for Iowa inheritance tax purposes, purports to elect to treat the \$200,000 cash in the trust as passing in fee to the surviving spouse, but not the 160-acre Iowa farm, which is also valued at \$200,000. Although the federal estate tax election is for 50 percent of the qualified property, the Iowa election is invalid even though it is made in respect to an asset which is equal in value to 50 percent of the trust principal. If the election is made for less than all of the qualified terminable interest property, the election must be for a fraction of all the qualified property. The personal representative is not permitted to select for the election some qualified assets and reject others. See Federal Estate Tax Regulation 20.2056-1(b).

d. The election—manner and form. The qualified terminable interest election shall be in writing and made by the personal representative of the decedent grantor-donor's estate on the Iowa inheritance tax return. The election once made shall be irrevocable. If the election is not made on the first inheritance tax return, the election may be made on an amended return, provided the amended return is filed on or before the due date of the return (taking into consideration any extensions of time granted to file the return and pay the tax due). The personal representative may make an election on a delinquent return, provided it is the first return filed for the estate. The filing for the purpose of protective election is not allowed. Failure to make the election on the first return filed after the due date has passed precludes making an election on a subsequent return. See 26 U.S.C. Section 2056(b)(7)(B)(V) and Internal Revenue Service Letter Ruling 8418005.

The election consists of two affirmative acts performed by the personal representative on the inheritance tax return: (1) by answering in the affirmative the question—Is the estate making a qualified terminable interest election with respect to the qualified property? and (2) by computing the share of the surviving spouse to include the qualified terminable interest property on which the election was made. In the event of an inconsistency in complying with the two requirements, the treatment given to the share of the surviving spouse shall be controlling.

e. Disposition of qualified property prior to death. A disposition of all or part of the qualified property, which was the subject of the qualified terminable interest election, prior to the death of the surviving spouse, voids the election as to that portion of the property disposed of that is not retained by the surviving spouse. In this event, the portion of the qualified property not retained by the surviving spouse shall be taxed to those succeeding to the remainder interests in the disposed property as if the tax on the remainder interest had been deferred under Iowa Code sections 450.44 to 450.49. Except in the case of special use valuation property, the tax shall be based on the fair market value of the amount of the qualified property not retained by the surviving spouse at the time the property was disposed of. *In re Estate of Wickham*, 241 Iowa 198, 40 N.W.2d 469 (1950), see subrule 86.11(5) for taxation of remainder interests when the tax is deferred. The alternate valuation date cannot be used in computing the tax. See subrule 86.10(2). If QTIP property has been valued at its special use value under Iowa Code chapter 450B, and is disposed of prior to the death of the surviving spouse, the portion of the QTIP property not retained by the surviving spouse shall be valued for taxation as follows:

1. At its special use value at the time of its disposition, if the QTIP property remains in qualified use under 26 U.S.C. Section 2032A.

2. At its fair market value at the time of its disposition, if there is a cessation of the qualified use under 26 U.S.C. Section 2032A. In case there is a cessation of the qualified use, the recapture tax provisions of Iowa Code section 450B.3 shall not apply. The tax on the remainder interest is treated as a payment of tax deferred and subject to the rules on deferred tax and not a recapture, with interest, of the tax originally imposed in the decedent grantor-donor's estate.

f. Inclusion in the estate of the surviving spouse. Upon the death of the surviving spouse the qualified terminable interest property, which was the subject of an election, that was not disposed of prior to death, shall be included in the gross estate of the surviving spouse and be treated as if it passed in fee from the surviving spouse to those succeeding to the remainder interests. The included QTIP property will receive a stepped up basis for gain or loss as property acquired from a decedent. See 26 U.S.C. Section 1014(b)(10). The relationship of the surviving spouse to the owners of the remainder interest

shall determine whether the individual exemptions provided for in Iowa Code section 450.9 apply and which tax rate in Iowa Code section 450.10 shall be applicable.

Qualified property included in the estate of the surviving spouse shall be valued as if it passed from the surviving spouse in fee and shall be valued either (1) at the time of the surviving spouse's death under the provisions of Iowa Code section 450.37 and rule 86.9(450), or at its special use value under Iowa Code chapter 450B and rule 86.8(450B), if the real estate is otherwise qualified; or (2) at the alternate valuation date under the provisions of Iowa Code section 450.37(1) "b" and rule 86.10(450), if the property is otherwise eligible.

This subrule can be illustrated by the following examples:

EXAMPLE 1. Decedent A died testate on July 2, 1997, survived by a spouse, B, aged 65, and two step-grandchildren, C and D. Under A's will all property was left in trust to pay all of the income to B for life. Upon B's death, the trust was to terminate and the principal was to be divided equally between C and D, who are the grandchildren of surviving spouse B. The personal representative elected to treat the trust assets as passing entirely in fee to surviving spouse B. The net corpus of the trust consists of a 160-acre farm valued at \$250,000 and personal property valued at \$200,000.

Tax on the basis of all property passing in fee to B

<u>Share</u>	<u>Tax</u>
\$450,000	\$0

EXAMPLE 2. Same facts as Example 1, with the exception that the personal representative did not make an Iowa qualified terminable interest election. In this fact situation, the trust assets are taxed on the basis of a life estate passing to the surviving spouse B with a remainder over to C and D.

<u>Share</u>	<u>Tax</u>
Spouse B: Life estate factor .42226	
$\$450,000 \times .42226 = \$190,017$	-0-
C's share ½ remainder factor .57774	
$\$450,000 \times .57774 \div 2 = \$129,991.50$	\$15,498.73
D's share—same as C's share <u>\$129,991.50</u>	<u>\$15,498.73</u>
Total \$450,000.00	\$30,997.46

In Example 1, the qualified terminable interest election results in no inheritance tax. However, as shown in Example 2, it would have cost the step-grandchildren, C and D, \$30,997.46 if the election had not been made.

EXAMPLE 3. B, the surviving spouse of A in Example 1, died testate, a resident of Iowa, on October 15, 1997. Under the terms of B's will, B's grandchildren, C and D, inherit B's entire estate in equal shares. B's net estate consists of \$200,000 in personal property and a 160-acre Iowa farm with a value of \$250,000 both of which were the subject of a qualified terminable interest election in A's estate and in which C and D own the remainder interest. B's net estate also consisted of \$100,000 in intangible personal property which B owned in fee simple.

B's net estate for Iowa inheritance tax purposes consists of the following:

\$200,000, personal property from A's estate.

\$250,000, 160-acre farm from A's estate.

\$100,000, owned by B in fee simple.

\$550,000 Total

The shares of C and D and their tax owed in B's estate are computed as follows:

<u>Share</u>	<u>Tax</u>	
Beneficiary C: ½ of the net estate, or		
	\$275,000	\$0
Beneficiary D: (same as C)	<u>\$275,000</u>	<u>\$0</u>
Totals	\$550,000	\$0

g. The QTIP tax credit and the credit for tax on prior transfers. The credit for the additional tax paid by the surviving spouse in the estate of the decedent grantor-donor on property, which was the subject of a qualified terminable interest election, is governed exclusively by the provisions of Iowa Code section 450.3 and these rules. The credit for tax paid on prior transfers allowable under Iowa Code section 450.10(6) shall not apply. However, property received by the surviving spouse from the estate of the decedent grantor-donor, which was not the subject of a qualified terminable interest election, is eligible for the credit for the tax paid on a prior transfer, if the conditions of Iowa Code section 450.10(6) are otherwise met.

86.5(12) Annuities. Annuities in general, including the earnings, are considered to be taxable under Iowa Code section 450.3(3) as a transfer made or intended to take effect in possession or enjoyment after the death of the grantor or donor. *In re Estate of English*, 206 N.W.2d 305 (Iowa 1973); *In re Endemann's Estate*, 307 N.Y. 100, 120 N.E.2d 514 (1954); *Cochrane v. Commission of Corps & Taxation*, 350 Mass. 237, 214 N.E.2d 283 (1966). For exceptions for employee-sponsored retirement plans, including annuities, see 86.5(13).

86.5(13) Employer-provided or employer-sponsored retirement plans and individual retirement accounts. Iowa Code section 450.4(5) provides an exemption on that portion of the decedent's interest in an employer-provided or employer-sponsored retirement plan or on that portion of the decedent's individual retirement account that will be subject to federal income tax when paid to the beneficiary. This exemption applies regardless of the identity of the beneficiary and regardless of the number of payments to be made after the decedent's death.

For the purposes of this exemption:

a. An "individual retirement account" includes an individual retirement annuity or any other arrangement as defined in Section 408 of the Internal Revenue Code.

b. An "employer-provided or employer-sponsored retirement plan" includes a qualified retirement plan as defined in Section 401 of the Internal Revenue Code, a governmental or nonprofit employer's deferred compensation plan as defined in Section 457 of the Internal Revenue Code, and an annuity as defined in Section 403 of the Internal Revenue Code.

EXAMPLE 1. The decedent was a participant in a qualified retirement plan through the decedent's employer. The beneficiary of the retirement plan is the decedent's niece. The balance in the retirement plan will be fully subject to federal income tax and included as net income pursuant to Iowa Code section 422.7 when paid to the beneficiary. As a result, Iowa inheritance tax would not be imposed on the value of the retirement plan.

EXAMPLE 2. The decedent was a participant in a qualified retirement plan through the decedent's employer. The beneficiary of the pension is the decedent's niece. A portion of the payments received by the niece will be fully subject to federal income tax and included as net income pursuant to Iowa Code section 422.7. As a result, Iowa inheritance tax would not be imposed on the value of the portion of payments included as net income. However, the remaining portion of the payments not reported as net income pursuant to Iowa Code section 422.7 would be subject to Iowa inheritance tax. See Iowa Code section 450.4.

An exemption from Iowa inheritance tax for a qualified plan does not depend on the relationship of the beneficiary to the decedent. Payments under a qualified plan made to the estate of the decedent are exempt from Iowa inheritance tax. See *In re Estate of Heuermann*, Docket No. 88-70-0388 (September 21, 1989). In addition, for the purpose of determining the taxable or exempt status of payments under a qualified plan, it is not relevant that the decedent rolled over or changed the terms of payment prior to

death. Taxation or exemption of payments made under a qualified plan is determined at the date of the decedent's death.

86.5(14) *Distribution of trust property.* Property of a trust can be divided into two or more trusts, or one or more separate trusts can be consolidated with one or more other trusts into a single trust by dividing the property in cash or in kind, including in undivided interests, by pro-rata or non-pro-rata division or in any combination thereof. Division of property between trusts in this manner does not result in a "sale" of the divided property and a corresponding taxable gain.

86.5(15) *Qualified tuition plans exempt.* Effective for estates of decedents dying on or after July 1, 2008, in the event that the decedent was the sole plan participant in a qualified school tuition plan, as defined in Section 529 of the Internal Revenue Code; or in the event that a named co-plan participant does not have a lineal relationship to the named beneficiary of the qualified tuition plan, the value of the decedent's interest in the qualified tuition plan is not subject to Iowa inheritance tax and therefore is not includable in the decedent's gross estate for tax purposes. This provision applies only to qualified tuition plans in existence on or after July 1, 1998.

This rule is intended to implement Iowa Code sections 422.7(4), 450.2, 450.3, 450.4(5), 450.8, 450.12, 450.37, 450.91, 633.699, and 633.703A and Iowa Code Supplement section 450.4 as amended by 2008 Iowa Acts, House File 2673, section 2.
[ARC 1137C, IAB 10/30/13, effective 12/4/13]

701—86.6(450) The net estate.

86.6(1) *Liabilities deductible.*

a. Debts owing by decedent. A debt, to be allowed as a deduction in determining the net estate under Iowa Code section 450.12, must be the liability of the decedent and also be owing and not discharged at the time of the decedent's death. The amount allowable as a deduction is the principal amount due, plus interest accruing to the day of the decedent's death. If the decedent is not the only person liable for the debt, only a portion of the debt shall be deducted for inheritance tax purposes. The portion deducted is based on the number of solvent obligors. If a joint and several debt has more than one obligor and one obligor pays the remaining balance owed on the debt, the obligor who pays the remaining debt has a right of contribution for payment of the debt against the other solvent obligors. If the decedent is the obligor and the estate pays the remaining balance of the debt, the estate must list the right of contribution as an asset on the Iowa inheritance tax return. *In re Estate of Tollefsrud*, 275 N.W.2d 412 (Iowa 1979); *In re Estate of Thomas*, 454 N.W.2d 66 (Iowa App. 1990); *Estate of Pauline Bladt*, Department of Revenue and Finance, Hearing Office Decision, Docket No. 95-70-1-0174 (December 16, 1996). The term "debt owing by the decedent" is not defined in Iowa Code section 450.12. However, Iowa Code section 633.3(10) defines "debts" as including liabilities of the decedent which survive, whether arising in contract, tort, or otherwise.

The term "debt of the decedent" does not include taxes, which are an impost levied by authority of government upon its citizens or subjects for the support of the state. *Eide v. Hottman*, 257 Iowa 263, 265, 132 N.W.2d 755 (1965). Please note, that this is a nonexclusive example of "debt of the decedent." Promissory notes executed by the decedent without consideration are not debts of the decedent and are not allowable as a deduction in determining the net estate subject to tax. *In re McAllister's Estate*, 214 N.W.2d 142 (Iowa 1974). Payments to persons in compromise of their claim to a portion of the estate made by those persons who take from the decedent are not debts nor treated as expenses of settlement. *In re Estate of Bliven*, 236 N.W.2d 366, 371 (Iowa 1975); *In re Estate of Wells*, 142 Iowa 255, 259, 260, 120 N.W. 713 (1909).

Iowa Code section 450.12 and Internal Revenue Code Section 2053 provide that debts owing by the decedent to be allowable in computing the net estate must be the type of obligation of the decedent for which a claim could be filed and be enforced in the probate proceedings of the estate. *In re Estate of McMahon*, 237 Iowa 236, 21 N.W.2d 581 (1946); *In re Estate of Laartz*, Cass County District Court, Probate No. 9641 (1973); *In re Estate of Tracy*, Department of Revenue and Finance, Hearing Officer Decision Docket No. 77-167-3-A (1977). Filing a claim in probate proceedings is not a prerequisite for the allowance of the liability as a deduction in computing the net estate. An allowable liability is

deductible whether or not the liability is legally enforceable against the decedent's estate. Claims in probate founded on a promise or agreement are deductible only to the extent they were contracted bona fide and for an adequate and full consideration. *In re McAllister's Estate*, 214 N.W.2d 142 (Iowa 1974).

The debt must have been paid prior to the filing of the inheritance tax return, or if the debt is not paid at the time the final inheritance tax return is filed (which is frequently the case in installment obligations) the burden is on the taxpayer to establish, if requested by the department, that the debt will be paid at a future date. The validity of a claim in probate based on a liability of the decedent is subject to review by the department. *In re Estate of Stephenson*, 234 Iowa 1315, 1319, 14 N.W.2d 684 (1944).

If any doubt or ambiguity exists whether an item is deductible or not, it is to be strictly construed against the taxpayer. Therefore, the burden is on the taxpayer to establish that an item is deductible. *In re Estate of Waddington*, 201 N.W.2d 77 (Iowa 1972).

The department may require the taxpayer to furnish reasonable proof to establish the deductible items such as, but not limited to, canceled checks in payment of an obligation, copies of court orders allowing claims against the estate, attorney and fiduciary fees, allowances for the surviving spouse, and copies of notes and mortgages.

b. Mortgages—decedent's debt. A mortgage or other encumbrance securing a debt of the decedent on Iowa property in which the decedent had an interest is allowable as a deduction in determining the net estate in the same manner as an unsecured debt of the decedent, even though it may be deducted from different shares of the estate than unsecured debts. (See Iowa Code section 633.278.) However, if the debt of the decedent is secured by property located outside Iowa, which is not subject to Iowa inheritance tax, the debt is allowable as a deduction in determining the net estate, only in the amount the debt exceeds the value of the property securing the debt.

c. Mortgages—not decedent's debt. If the gross estate includes property subject to a mortgage or other encumbrance which secures a debt which is not enforceable against the decedent, the amount of the debt, including interest accrued to the day of death, is deductible, not as a debt of the decedent, but from the fair market value of the encumbered property. The deduction is limited to the amount the decedent would have had to pay to remove the encumbrance less the value, if any, of the decedent's right of recovery against the debtor. See *Home Owners Loan Corp. v. Rupe*, 225 Iowa 1044, 1047, 283 N.W. 108 (1938), for circumstances under which the right of subrogation may exist.

d. Mortgages—nonprobate property. A debt secured by property not subject to the jurisdiction of the probate court, such as, but not limited to, jointly owned property and property transferred within three years of death is deducted in the same manner as a debt secured by probate property. The fact the property is includable in the gross estate is the controlling factor in determining the deductibility of the debt (providing the debt is otherwise deductible).

e. Inheritance and accrued taxes.

(1) Inheritance tax. The inheritance tax imposed in the decedent's estate is not a tax on the decedent's property nor is it a state tax due from the estate. It is a succession tax on a person's right to take from the decedent. The tax is the obligation of the person who succeeds to property included in the gross estate. *Wieting v. Morrow*, 151 Iowa 590, 132 N.W. 193 (1911); *Waterman v. Burbank*, 196 Iowa 793, 195 N.W. 191 (1923). Therefore, inheritance tax is not a deduction in determining the net estate of the decedent in which the tax was imposed. However, if a taxpayer dies owing an inheritance tax imposed in another estate, the tax imposed in the prior estate, together with penalty and interest owing, if any, is a deduction as a state tax due in the deceased taxpayer's estate.

(2) Accrued taxes. In Iowa, property taxes accrue on the date that they are levied even though they are not due and payable until the following July 1. *In re Estate of Luke*, 184 N.W.2d 42 (Iowa 1971); *Merv E. Hilpipre Auction Co. v. Solon State Board*, 343 N.W.2d 452 (Iowa 1984).

Death terminates the decedent's taxable year for income tax purposes. Federal regulation Section 1.443-1(a)(2), 701—paragraph 89.4(9) "b." As a result, the Iowa tax on the decedent's income for the taxable year ending with the decedent's death is accrued on date of death.

In addition, any federal income tax for the decedent's final taxable year is owing at death, even though it is not payable until a later date. Therefore, both the decedent's state and federal income taxes,

both for prior years and the year of death, are deductible in computing the taxable estate if unpaid at death.

f. Federal taxes. Deductible under this category are the federal estate taxes and federal taxes owing by the decedent including any penalty and interest accrued to the date of death. Prior to 1983, the federal estate tax was prorated based on the portion of federal estate tax attributable to Iowa property and that attributable to property located outside the state of Iowa. However, currently the deductibility of federal estate tax is treated like other liabilities of the estate. For estates with property located in Iowa and outside the state of Iowa, see the proration computation provided in 86.6(2). The deduction is limited to the net federal tax owing after all allowable credits have been subtracted. Any penalty and interest imposed or accruing on federal taxes after the decedent's death is not deductible.

g. Funeral expenses. The deduction is limited to the expense of the decedent's funeral, which includes, but is not limited to, flowers, cost of meals, cards and postage. Expenses that are not deductible include, but are not limited to, family travel expenses. If the decedent at the time of death was liable for the funeral expense of another, such expense is categorized as a debt of the decedent and is deductible subject to the same conditions as other debts of the decedent. *In re Estate of Porter*, 212 Iowa 29, 236 N.W. 108 (1931). A devise in the decedent's will, or a direction in a trust instrument, to pay the funeral expense of a beneficiary upon death is an additional inheritance in favor of the beneficiary and not a funeral expense deductible in the estate of the testator or grantor. Funeral expense is the liability of the estate of the person who has died. *In re Estate of Kneebbs*, 246 Iowa 1053, 70 N.W.2d 539 (1955).

What constitutes a reasonable expense for the decedent's funeral depends upon the facts and circumstances in each particular estate. Factors to be considered include, but are not limited to: the decedent's station in life and the size of the estate, *Foley v. Brocksmit*, 119 Iowa 457, 93 N.W. 344 (1903); and the decedent's known wishes (tomb rather than a grave), *Morrow v. Durant*, 140 Iowa 437, 118 N.W. 781 (1908). Funeral expense includes the cost of a tombstone or monument. *In re Estate of Harris*, 237 Iowa 613, 23 N.W.2d 445 (1946). A reasonable fee or honorarium paid to the officiating clergy is a deductible funeral expense. *In re Estate of Kneebbs*, 246 Iowa 1053, 1058, 70 N.W.2d 539 (1955). It is not a prerequisite for deductibility that a claim for funeral expenses be filed and allowed in the probate proceedings. It is sufficient that the expense be paid whether or not the claim is legally enforceable against the decedent's estate. The deduction allowable is limited to the net expense of the decedent's funeral, after deducting any expense prepaid by the decedent, burial insurance or death benefit, such as the death benefit allowed by the veterans administration or the social security administration.

h. Allowance for surviving spouse and dependents. An allowance for the support of the surviving spouse and dependents to be deductible in determining the net estate for taxation must meet two conditions: First it must be allowed and ordered by the court and second it must be paid from the assets of the estate that are subject to the jurisdiction of the probate court. The allowance is not an additional exemption for the spouse or children. It is part of the costs of administration of the decedent's estate. Iowa Code section 633.374; *In re Estate of DeVries*, 203 N.W.2d 308, 311 (Iowa 1972). Upon request of the department, the taxpayer shall submit a copy of the order of the court providing for the allowance and copies of canceled checks or other documents establishing payment of the allowance.

For the purpose of determining the shares of heirs or beneficiaries for inheritance tax, the allowance is a charge against the corpus of the shares of the estate even though it is paid from the income of the shares. The allowance is included with the other debts and charges for the purpose of abatement of shares to pay the debts and charges of the estate.

i. Court costs. The deduction under this category is limited to Iowa court costs only. *In re Estate of Evans*, 246 Iowa 893, 68 N.W.2d 289 (1955). The term "court costs" is not synonymous with "costs of administration" as defined in Iowa Code section 633.3(8) or "administration expenses" under Section 2053(a) of the Internal Revenue Code. See federal regulation Section 20.2053-3(d). "Court costs" is a narrower term. Court costs are part of costs of administration in Iowa and are an expense of administration under the Internal Revenue Code, but not all costs or expenses of administration are court costs. For example, interest payable on an extension of time to pay the federal estate tax is a cost

of administration in the estate in which the federal estate tax is imposed, but it is not part of court costs, and therefore not deductible for inheritance tax purposes.

In general, court costs include only those statutory fees and expenses relating directly to the probate proceeding, carried on the clerk's docket, and paid routinely in the process of closing every estate. *In re Estate of Waddington*, 201 N.W.2d 77, 79 (Iowa 1972). The term "court costs" since August 15, 1975, also includes the expenses of selling property. See Iowa Code sections 450.12 and 633.3(8) and Internal Revenue Code Section 2053 for further details.

j. Additional liabilities that are deductible. Subject to subrules 86.6(4) and 86.6(5), the only liabilities deductible from the gross value of the estate include debts owing by the decedent at the time of death, local and state taxes accrued before the decedent's death, federal estate tax and federal taxes owing by the decedent, a sum for reasonable funeral expenses, the allowance for surviving spouse and minor children granted by the probate court or its judge, court costs, and any other administration expenses allowable pursuant to Section 2053 of the Internal Revenue Code.

(1) Criteria for deductible administration expenses under Section 2053 of the Internal Revenue Code. Administration expenses must meet certain requirements to be allowable deductions under Section 2053 of the Internal Revenue Code. To be allowable deductions, expenses must meet the following conditions:

1. The expenses must be payable out of property subject to claims;
2. The expenses are allowable (not based on the deductible amount) by the law governing the administration of the decedent's estate;

3. The expenses are actually and necessarily incurred in the administration of the estate. Administration expenses are limited to those expenses incurred in the settlement of the estate and the transfer of the estate property to beneficiaries and trustees, including an executor that is a trustee. Expenses that are not essential to the settlement of the estate, but are incurred for the individual benefit of the heirs, legatees, or devisees, may not be taken as deductions; and

4. The allowable amount of expenses for deduction is limited to the value of property included in the decedent's gross estate and subject to claims, plus amounts paid out of the property not subject to claims against the decedent's estate, on or before the last day of the ninth month after death or within any granted extension(s) of time for filing the return. "Property subject to claims" is defined as the property includable in the gross estate which bears the burden or would bear the burden under law for payment of the deduction in the final adjustment and settlement of the decedent's estate, less an initial deduction allowable under Section 2054 of the Internal Revenue Code, for any losses for casualty or theft attributable to such property and incurred during the settlement of the estate.

(2) Allowable administration expenses. Subject to the limitations in paragraph "a" of this subrule, allowable administration expenses under Section 2053 of the Internal Revenue Code include costs and fees incurred in the collection of assets, payment of debts, distribution of property to entitled persons, executor's commission, attorney's fees, and miscellaneous administration expenses. Miscellaneous administration expenses include costs or fees for surrogates, accountants, appraisers, clerk hire, storing or maintaining property of the estate, and selling the property of the estate. Expenses for preserving and caring for the property do not include expenditures for additions or improvements or expenses for a longer period than the executor is reasonably required to retain the property. Expenses for selling property of the estate are limited to those for sales that are necessary in order to pay the decedent's debts, expenses of administration, and taxes, preserve the estate, or effect distribution. Expenses for selling the property include brokerage fees or auctioneer fees and may include the expenses for a sale of an item in a bona fide sale that is below the fair market value of the item. The allowable selling expense for an item sold below its fair market value to a dealer in such items is the lesser of the amount by which the fair market value of the item on the valuation date exceeded the proceeds from the sale or the amount by which the fair market value of the item on the date of the sale exceeded the proceeds of the sale.

86.6(2) Prorated liabilities.

- a.* The amount of the liability that is deductible depends upon the situs of the property in the gross estate.

If part of the property included in the gross estate has a situs in a jurisdiction other than Iowa, only a pro rata amount of the liabilities specified in Iowa Code section 450.12, with the exception of liabilities secured by a lien on property, is deductible in computing the net estate for Iowa inheritance tax purposes. The amount deductible is computed by multiplying the total amount of the unsecured liabilities by a fraction of which the Iowa situs property in the gross estate is the numerator and the total gross estate is the denominator. For the purpose of apportionment of the liabilities, the term “gross estate” means the gross estate for federal estate tax purposes. Provided, if the federal gross estate formula produces a grossly distorted result then, subject to the approval of the department, an alternate apportionment formula may be used either by the department or the taxpayer which fairly represents the particular facts of the estate.

Liabilities secured by a lien on property are allocated to the state of situs. If the secured liability exceeds the value of the security, any excess is prorated in the same manner as an unsecured liability.

b. Liabilities that must be prorated. If the gross estate includes property with a situs outside Iowa, the liabilities that must be prorated are: (1) court costs, both foreign and domestic; (2) unsecured debts of the decedent regardless of where the debt was contracted; (3) federal and state income tax, including the tax on the decedent’s final return, federal estate, gift and excise tax, and state and local sales, use and excise tax; (4) expenses of the decedent’s funeral and burial, regardless of the place of interment; (5) allowances for the surviving spouse and children allowed by the probate court in Iowa or another jurisdiction; (6) the expense of the appraisal of property for the purpose of assessing a state death or succession tax; (7) the fees and necessary expenses of the personal representative and the personal representative’s attorney allowed by order of court, both foreign and domestic; (8) the costs of the sale of real and personal property, both foreign and domestic, if not otherwise included in court costs; and (9) the amount paid by the personal representative for a bond, both foreign and domestic.

c. Liabilities that are not prorated. Liabilities secured by a lien on property included in the gross estate are to be allocated in full to the state of situs. These are liabilities secured by: (1) mortgages, mechanic’s liens and judgments; (2) real estate taxes and special assessments on real property; (3) liens for an obligation to the United States of America, a state or any of its political subdivisions; and (4) any other lien on property imposed by law for the security of an obligation.

d. Prorated cash bequests. Rescinded IAB 10/30/13, effective 12/4/13.

86.6(3) *Liabilities deductible from property not subject to the payment of debts and charges.*

a. Estates with all of the property located in Iowa. Subject to the special provisions in 86.6(3)“c,” the liabilities deductible under Iowa Code section 450.12 may be deductible in whole or in part from property includable in the gross estate for inheritance tax purposes which under Iowa debtor-creditor law is not liable for the payment of the debts and charges of the estate under the following terms and conditions:

(1) The application of liabilities.

1. The liabilities must be paid. If a liability is not paid in full, the amount deductible is limited to the amount paid. If the amount claimed is not certified as paid by the time the inheritance tax return is filed, the statute requires that the director must be satisfied that the liabilities, or portions thereof deductible, will be paid.

2. The liability can be deducted only from property that is included in the gross estate for Iowa inheritance tax purposes. This rule would exclude, among others, that portion of joint tenancy property which is excluded from the gross estate, wrongful death proceeds, gifts to each donee made within three years of death up to an amount equal to the annual federal gift tax exclusion, and property with a situs outside Iowa.

3. The property included in the gross estate that is under Iowa debtor-creditor law subject to the payment of the deductible liabilities must first be applied to the liabilities, and only after this property has been exhausted can the excess liabilities be applied to the remaining property included in the gross estate.

4. Any excess liabilities remaining unpaid after exhausting the property subject to the payment of the liabilities must be allocated to the remaining property included in the gross estate for inheritance tax

purposes on the basis of the ratio the value of each person's share of the remaining property in the gross estate bears to the total value of the remaining property included in the gross estate.

(2) General rules.

1. The source of the funds used for payment of the excess liabilities is not relevant to the allowance of the deduction. It is sufficient for the allowance of the deduction that the liability be paid.

2. The applicability of the statute is limited to the deduction for inheritance tax purposes of those liabilities listed in Iowa Code subsection 450.12(1). It neither enlarges nor diminishes the rights of creditors under existing Iowa law.

3. The statute is not limited to estates which are probated and subject to the jurisdiction of the probate court. The statute also applies to estates which file an inheritance tax return for a tax clearance (CIT proceedings) or those otherwise not probated such as, but not limited to, inter vivos trusts whose assets are subject to inheritance tax, estates consisting of joint tenancy with right of survivorship property, estates whose assets consist of transferred property with a reserved life use or interest, estates whose assets consist of gifts made within three years of the decedent's death and estates consisting entirely of qualified terminal interest property (QTIP) in the estate of the surviving spouse.

The statute will apply to any estate when any share of the estate will remain taxable after being reduced by the liabilities in Iowa Code subsection 450.12(1) which are lawfully charged to the share and the deduction of any statutory exemption. Excess liabilities must be prorated over all of the property not subject to debts and charges regardless of whether or not the property is part of a taxable share.

b. Estates with part of the property located outside Iowa. Iowa Code section 450.12(2) and subrule 86.6(2) require that the liabilities deductible be prorated in those estates where a portion of the property included in the gross estate has a situs outside Iowa. Subject to the special provision in 86.6(3) "c," in these estates the portion of the liabilities deductible which is allocated to the Iowa property under the proration formula must first be applied to the Iowa situs property which is subject to the payment of the liabilities. Any portion of the liabilities allocated to Iowa remaining unpaid may then be applied to the other Iowa property included in the gross estate subject to the same limitations provided for in 86.6(3) "a"(1)"1" to "4."

c. Special rule for liabilities secured by property included in the gross estate. If a liability which is deductible under Iowa Code section 450.12(1) "a" is secured by property included in the gross estate, then the liability is deductible from the specific property that secures the liability, regardless of whether or not the property is subject to the payment of the ordinary debts and charges of the estate. If the liability exceeds the value of the property that secures it and is the obligation of the decedent, then any excess liability is deductible under the same rules that govern unsecured obligations.

86.6(4) Resident and nonresident deductions distinction abolished. Effective for estates of decedents dying on or after July 1, 1983, the domicile of the decedent is not relevant in determining whether a liability is deductible in computing the net estate. In the case of *In re Estate of Evans*, 246 Iowa 893, 68 N.W.2d 289 (1955) applies only to estates of decedents dying prior to July 1, 1983. However, the amount of the liability that is deductible depends upon the situs of the property in the gross estate.

If part of the property included in the gross estate has a situs in a jurisdiction other than Iowa, only a pro rata amount of the liabilities specified in Iowa Code section 450.12, with the exception of liabilities secured by a lien on property, is deductible in computing the net estate for Iowa inheritance tax purposes. The amount deductible is computed by multiplying the total amount of the unsecured liabilities by a fraction of which the Iowa situs property in the gross estate is the numerator and the total gross estate is the denominator.

Liabilities secured by a lien on property are allocated to the state of situs. If the secured liability exceeds the value of the security, any excess is prorated in the same manner as an unsecured liability.

This rule is intended to implement Iowa Code sections 450.7(1), 450.12, 450.22, 450.24, 450.38, 450.89, 633.278, and 633.374.

[ARC 1137C, IAB 10/30/13, effective 12/4/13; ARC 1545C, IAB 7/23/14, effective 8/27/14]

701—86.7(450) Life estate, remainder and annuity tables—in general. For estates of decedents dying on or after July 4, 1965, and prior to January 1, 1986, the value of a life estate in property, an

annuity for life and the value of a remainder interest in the property, shall be computed by the use of the commissioners' standard ordinary mortality table at the rate of 4 percent per annum.

86.7(1) Tables for life estates and remainders. This subrule only applies to estates of decedents dying on or after July 4, 1965, and prior to January 1, 1986. The two factors on the same line on the next page added together equal 100 percent. Multiply the corpus of the estate by the first factor to obtain the value of the life estate. Use the second factor to obtain the value of the remainder interest in the corpus if the tax is to be paid within 12 months after the death of the decedent who created the life estate remainder. If the tax on the remainder is to be paid prior to the death of the life tenant, but after one year from the decedent's death, use the remainder factor opposite the age of the life tenant at the time the tax is to be paid.

86.7(3) *Annuity tables when the term is certain.* This table is to be used to compute the present values of two types of annuities: (1) the use of property for a specific number of years and (2) an annuity of a specific amount of money for a number of years certain. To compute the present value of the first annuity, multiply the value of property by 4 percent. Then multiply the result by the annuity factor opposite the number of years of the annuity. Multiply the value of the property by the remainder factor for the present value of the remainder. For the second annuity annualize the payments and multiply the result by the annuity factor opposite the number of years of the annuity. Subtract the present value of the annuity from the value of the property from which the annuity is funded for the remainder value.

<u>Number of Years</u>	<u>Present Value of an Annuity of One Dollar, Payable at the End of Each Year, for a Certain No. of Years</u>	<u>Present Value of One Dollar, Payable at the End of a Certain Number of Years</u>

86.7(4) *Tables for life estates and remainders for estates of decedents dying on or after January 1, 1986, and prior to January 1, 2004.* For estates of decedents dying on or after January 1, 1986, and prior to January 1, 2004, the following tables are to be used in computing the value of a life estate, an annuity for life and the value of a remainder in property. The table is based on the commissioners' standard ordinary mortality tables of life expectancy, with no distinction being made between the life expectancy of males and females of the same age. As a result, the sex of the recipient is not relevant in

computing the value of the property interest received. *Arizona Governing Committee for Tax Deferred Annuity and Deferred Compensation Plans v. Norris*, 463 U.S. 1073, 103 S.Ct. 3492, 77 L.Ed.2d 1236 (1983). Valuation is based on the age at the nearest birthday. The following table is to be applied in the same manner as specified in subrule 86.7(1).

 4% INTEREST

The two factors across the page equal 100 percent. Multiply the corpus of the estate by the first factor to obtain value of the life estate.

Use the second factor to obtain the remainder interest if the tax is to be paid at the time of probate or to determine if there would be any tax due.

This rule is intended to implement Iowa Code sections 450.51 and 450.52.
[ARC 1137C, IAB 10/30/13, effective 12/4/13]

701—86.8(450B) Special use valuation.

86.8(1) In general. Effective for estates of decedents dying on or after July 1, 1982, real estate which has been valued at its special use value under 26 U.S.C. Section 2032A for computing the federal estate tax is eligible to be valued for inheritance tax purposes at its special use value, subject to the limitations imposed by statute and these rules. Special use valuation under the provisions of Iowa Code chapter 450B is in lieu of valuing the real estate at its fair market value in the ordinary course of trade under

Iowa Code section 450.37. The valuation of real estate at its special use value must be made on the entire parcel of the real estate in fee simple. The value of undivided interests, life or term estates and remainders in real estate specially valued is determined by (1) applying the life estate, remainder or term tables to the special use value—see rule 86.7(450), or (2) by dividing the special use value by the decedent's fractional interest in case of an undivided interest. The eligibility of real estate for special use value is not limited to probate real estate. Real estate transfers with a retained life use or interest, real estate held in joint tenancy, real estate transferred to take effect in possession or enjoyment at death, real estate held by a partnership or corporation and real estate held in trust are noninclusive examples of real estate not subject to probate that may be eligible for special use valuation.

86.8(2) Definitions and technical terms. References in this subrule to sections of the Internal Revenue Code mean sections of the Internal Revenue Code of 1954 as defined (and periodically updated) in Iowa Code section 422.3(5). Technical terms such as, but not limited to, “qualified real property”; “qualified use”; “cessation of qualified use”; “disposition”; “qualified heir”; “member of the family”; “farm”; “farming purpose”; “material participation”; and “active management” are examples of technical terms which have the same meaning for Iowa special use valuation under Iowa Code chapter 450B as the terms are defined and interpreted in 26 U.S.C. Section 2032A. It is the purpose of Iowa special use valuation to conform as nearly as possible to the special use valuation provisions of 26 U.S.C. Section 2032A, as can be done within the framework of an inheritance tax instead of an estate tax.

86.8(3) Eligibility requirements. The eligibility requirements for valuing real estate at its special use value for computing inheritance tax are the same as the eligibility requirements of 26 U.S.C. Section 2032A for the purpose of computing the federal estate tax imposed by 26 U.S.C. Section 2001. Real estate cannot be specially valued for inheritance tax purposes unless it is also eligible and is valued at its special use value for federal estate tax purposes. However, even though real estate is specially valued for federal estate tax purposes, the estate has the right to elect or not to elect to value real estate at its special use value for computing the inheritance tax. Real estate otherwise qualified will be eligible for special use valuation for Iowa inheritance tax purposes if a valid special use valuation election has been made on the federal estate tax return. What constitutes a valid election for federal estate tax purposes is determined under applicable federal law and practice and is not determined by the department.

86.8(4) Real estate—not eligible.

a. Real estate otherwise qualified is not eligible to be specially valued for inheritance tax purposes if it is not includable in the federal gross estate. For example, a gift of real estate may not be part of the federal gross estate. However, the real estate may be a taxable gift, but the real estate would not qualify for special valuation.

b. Real estate, otherwise qualified, will not be eligible for the special use valuation provisions of Iowa Code chapter 450B, if the owner of a remainder, or other future property interest in the real estate, defers the payment of the inheritance tax until the termination of the prior estate. Special use valuation is made at the date of the decedent's death, while Iowa Code section 450.44 requires the future interest to be revalued at the time of the termination of the prior estate when the tax is deferred. See *In re Estate of Wickham*, 241 Iowa 198, 40 N.W.2d 469 (1950); department subrules 86.2(8) and 86.2(9). In addition, when the tax has been deferred the life estate-remainder factor to be used in computing the tax on the future interest is the factor existing at the time of payment or the termination of the prior estate, while the additional inheritance tax under special use value is based on the life estate-remainder factor at the time of death. See *In re Estate of Millard*, 251 Iowa 1982, 105 N.W.2d 95 (1960). A second valuation after death is not within the scope of either 26 U.S.C. Section 2032A or Iowa Code chapter 450B. Since all persons with an interest in the real estate must sign the agreement specified in 86.8(5)“e,” the deferral of the inheritance tax on a future property interest disqualifies all of the property interests in the real estate because the future property interest is not eligible to be specially valued in case of a deferral of the tax.

86.8(5) Election and agreement.

a. In general. The election to specially value real estate under the provisions of Iowa Code chapter 450B must be made by the fiduciary for the estate or trust on the inheritance tax return or on a statement attached to the return. The election may be made on a delinquent return. However, once made, the

election is irrevocable. The election is an affirmative act. Therefore, failure to make an election on the inheritance tax return shall be construed as an election not to specially value real estate under Iowa Code chapter 450B.

b. Form—election. The election to value real estate at its special use value shall comply with the requirements of 26 U.S.C. Section 2032A(d) and federal regulation Section 20.2032A-8. An executed copy of the election filed as part of the federal estate tax return and accepted by the Internal Revenue Service will fulfill the requirements of this subrule.

c. Content of the election. The election must be accompanied by the agreement specified in 86.8(5)“e” and shall contain the information required by federal regulation Section 20.2032A-8. Submission of an executed copy of the information required by federal regulation Section 20.2032A-8(3) in support of the election to specially value property for federal estate tax purposes will fulfill the requirements of this subrule.

d. Protective elections. A protective election may be made to specially value qualified real property for inheritance tax purposes. The availability of special use valuation is contingent upon values, as finally determined for federal estate tax purposes, meeting the requirements of 26 U.S.C. Section 2032A. The protective election must be made on the inheritance tax return and shall contain substantially the same information required by federal regulation Section 20.2032A-8(b). Submission of an executed copy of the protective election filed and accepted for federal estate tax purposes will fulfill the requirements of this subrule.

If it is found that the real estate qualifies for special use valuation as finally determined for federal estate tax purposes, an additional notice of election must be filed within 60 days after the date of the determination. The notice must set forth the information required in 86.8(5)“c” and is to be attached, together with the agreement provided for in 86.8(5)“e,” to an amended final inheritance tax return. Failure to file the additional notice within the time prescribed by this subrule shall disqualify the real estate for special use valuation.

e. Agreement. An agreement must be executed by all parties who have any interest in the property to be valued at its special use value as of the date of the decedent’s death. In the agreement, the qualified heirs must consent to personal liability for the additional inheritance tax imposed by Iowa Code section 450B.3 in the event of early disposition or cessation of the qualified use. All other parties with an interest in the property specially valued must consent to liability for the additional inheritance tax to the extent of the additional tax imposed on their share of the property no longer eligible to be specially valued. The liability of the qualified heir or the successor qualified heir for the additional inheritance tax is not dependent on the heir’s share of the property specially valued, but rather it is for the amount of the additional inheritance tax imposed on all of the shares of the parties with an interest in the property no longer eligible for special use value.

f. Failure to file the election and agreement. Failure to file with the inheritance tax return either the election provided for in 86.8(5)“b” or the agreement specified in 86.8(5)“e” shall disqualify the property for the special use value provisions of Iowa Code chapter 450B. In the event of disqualification, the property shall be valued for inheritance tax purposes at its market value in the ordinary course of trade under the provisions of Iowa Code section 450.37.

86.8(6) Value to use.

a. Special use value. The special use value established and accepted by the Internal Revenue Service for the qualified real property shall also be the value of the qualified real property for the purpose of computing the inheritance tax on the shares in the specially valued property.

b. Fair market value when a recapture tax is imposed. The additional inheritance tax imposed by Iowa Code section 450B.3, due to the early disposition or cessation of the qualified use, is based on the fair market value of the qualified real property at the time of the decedent’s death as reported and established in the election to value the real estate at its special use value, subject to the limitations in 86.8(6)“c.” Iowa Code chapter 450B makes reference only to the use of federal values. Therefore, a fair market value appraisal made by the Iowa inheritance tax appraisers cannot be used in computing the amount of the additional inheritance tax imposed unless it is accepted by the Internal Revenue Service.

Iowa Code section 450.37 only applies to property which is not specially valued under Iowa Code chapter 450B.

c. Fair market value limitations. The following fair market value limitations shall govern the computation of the additional inheritance tax imposed, if any. If at the time of its disposition or cessation of the qualified use, the fair market value of the property which is the subject of the additional tax is:

1. Greater than its fair market value at the time of the decedent's death, the additional tax is computed on the fair market value at death.

2. Less than its fair market value at the time of death but greater than the special use value, the additional tax is computed on the lesser fair market value.

3. Equal to or less than the special use value of the property, no additional inheritance tax is imposed. In this event, no refund is allowed. Iowa Code chapter 450B makes reference only to the imposition of additional inheritance tax, not to an additional benefit if the agreement is not fulfilled.

As a result, failure to fulfill the agreement provided for in 86.8(5) "e" may, in certain circumstances, result in a lower tax liability than would have been the case had the special use valuation election not been made.

The rule for computing the additional federal estate tax under 26 U.S.C. Section 2032A(c) is different. See lines 8 to 11, Additional Federal Estate Tax Form 706-A and IRS letter ruling 8215036 (1982).

86.8(7) Imposition of additional inheritance tax.

a. In general. If within ten years after the decedent's death there is a disposition of the property or a cessation of the qualified use within the meaning of 26 U.S.C. Section 2032A(c), an additional inheritance tax is imposed on the shares in the qualified real property specially valued, subject to the limitation in 86.8(6) "c." Failure to begin the special use within two years after the decedent's death disqualifies the property for the special use valuation provisions of Iowa Code chapter 450B. However, the ten-year period for imposing an additional inheritance tax is not extended by the period of time between the decedent's death and the beginning date of the special use. The rule for federal estate tax purposes is different. The ten-year period for federal estate tax purposes is extended by the period of time between the decedent's death and the time the special use begins. See 26 U.S.C. Section 2032A(c)(7)(A)(ii). In this respect, the Iowa law does not conform to the federal statute. See Iowa Code section 450B.3.

b. Additional tax on life or term estates and remainders. The additional tax on life or term estates and remainders in real estate which no longer qualifies for special use valuation is computed as if the special use valuation had not been elected. Therefore, if age or time is a determining factor in computing the additional tax, it is the age or time at the date of the decedent's death which governs the computation, not the age or time at the date of the disposition or cessation of the qualified use. Therefore, subrule 86.2(7) implementing Iowa Code section 450.44 does not apply. Iowa Code section 450B.3 makes no provision for deferral of the additional tax on a future property interest in real estate which is no longer eligible to be specially valued.

c. Interplay of the additional inheritance tax with the Iowa estate tax for deaths occurring prior to January 1, 2005. In the event of an early disposition or cessation of the qualified use of the specially valued real estate, the federal estate tax is recomputed with a corresponding recomputation of the credit allowable under 26 U.S.C. Section 2011 for state death taxes paid. If the maximum allowable credit for state death taxes paid as recomputed is greater than the total inheritance tax obligation on all of the shares of the estate, including the shares which have not been revalued, the amount of the maximum credit for state death taxes paid is the additional tax.

d. Computation of the tax—full disposition or full cessation. If there is an early disposition or a cessation of the qualified use of all of the real estate specially valued, the inheritance tax on the shares of all persons who succeed to the real estate from the decedent are recomputed based on the fair market value of the specially valued real estate. See 86.8(6) "c" on which market value to use. The total revalued share of each person who had an interest in the disqualified real property is the value of that person's share of the property not specially valued plus the revalued share of the special use property. The tax is then recomputed based on the applicable exemption, if any, allowable under Iowa Code section 450.9 and the rates of tax specified in Iowa Code section 450.10 in effect at the time of the decedent's death. A

credit is allowed against the amount of the recomputed tax, without interest, for the tax paid which was based on the special use value.

EXAMPLES: Disposition of all of the qualified real property.

It is assumed in these examples that the real estate has qualified for special use valuation and that prior to the date of disposition, the real estate remained qualified.

EXAMPLE. Farmer A, a widower, died July 1, 1992, a resident of Iowa, and by will left all of his property to his three nephews in equal shares. Nephew B operates the farm. Nephew C lives in Des Moines, Iowa, and Nephew D lives in Phoenix, Arizona. At the time of death, Farmer A's estate consisted of:

<u>Asset</u>	<u>Fair Market Value</u>	<u>Special Use Value</u>
160-acre Iowa farm	\$ 480,000 (\$3,000 per acre)	\$ 160,000 (\$1,000 per acre)
Grain and livestock	90,000	90,000
Stocks, bonds and bank accounts	<u>80,000</u>	<u>80,000</u>
Gross Estate	\$ 650,000	\$ 330,000
Less: Deductions without federal estate tax	<u>25,000</u>	<u>25,000</u>
Net estate before federal estate tax	\$ 625,000	\$ 305,000

COMPUTATION OF THE INHERITANCE TAX
UNDER SPECIAL USE VALUATION

Net estate before federal estate tax	\$305,000
Less: Federal estate tax	<u>4,120</u>
Net Estate	\$300,880

TAX ON SHARES

<u>Beneficiary</u>	<u>Share</u>	<u>Tax</u>
To each nephew	\$101,666.67	\$11,250.00
Total Tax Paid	\$11,250 × 3	= \$33,750.00

On October 15, 1995, Nephew B, the qualified heir, retires from farming and all three nephews sell the farm to a nonrelated party for \$3,200 per acre, or \$512,000. Under 86.8(6)“c,” the \$3,000 per acre valuation at death governs the computation of the additional inheritance tax.

COMPUTATION OF THE ADDITIONAL INHERITANCE TAX DUE TO THE EARLY
DISPOSITION OF THE QUALIFIED USE PROPERTY

Net estate before federal estate tax	\$625,000
Less: Revised federal estate tax (\$9,250 was deducted for credit for state death taxes paid)	<u>0</u>
Net Estate	\$625,000

<u>Tax on Shares</u>	<u>Share</u>	<u>Tax</u>
To each nephew \$208,333.33	\$27,250.00	
Less tax previously paid	<u>11,250.00</u>	
	16,000.00	
Additional tax due		
Interest at 10% from 4-03-93 to due date 4-15-96		<u>\$4,734.40</u>
Total Due Each Nephew		\$20,734.40
Total additional tax and interest for all three shares $\$20,734.40 \times 3 = \$62,203.20$.		

NOTE: In this example, the total additional tax for the three nephews before a credit for tax previously paid is $\$27,250.00 \times 3$ or $\$81,750.00$. The credit for state death taxes paid on the revalued federal estate is $\$9,250.00$. Therefore, the larger amount is the additional tax, before the credit for tax previously paid is deducted. The additional inheritance or Iowa estate tax bears interest at 10 percent beginning the last day of the ninth month after the decedent's death until the due date, which is six months after the disposition of the specially valued real estate. Interest accrues on delinquent tax at the same rate. Since interest only accrues on unpaid tax, the amount of the interest in this example would have been less if the tax had been paid prior to its due date, April 15, 1996.

e. Computation of the tax—partial disposition or cessation of the qualified use.

(1) First partial disposition or cessation of the qualified use. Compute the maximum amount of the additional tax that would be due from each person who has an interest in the portion of the real estate no longer eligible to be specially valued, as if there were an early disposition or cessation of the qualified use of all that person's specially valued real estate. The additional tax on a partial disposition or cessation of the qualified use is computed by multiplying the maximum amount of the additional tax by a fraction of which the fair market value of the portion no longer eligible is the numerator and the fair market value of all of that person's specially valued real estate is the denominator. The resulting amount is the tax due on the first partial disposition or cessation of the qualified use.

EXAMPLE 1. First partial additional tax. Assume the fair market value of three parcels of real estate owned by a single qualified heir (brother of the decedent) is $\$100,000$ and the special use value of the three parcels is $\$75,000$. The qualified heir is in the 10 percent tax bracket. FMV in this example means fair market value.

Parcel 1, fair market value	\$25,000
Parcel 2, fair market value	50,000
Parcel 3, fair market value	25,000

Computation of Maximum Amount of Additional Tax

Tax based on fair market value ($\$100,000 \times 10\%$)	\$10,000
Tax based on special use value ($\$75,000 \times 10\%$)	<u>7,500</u>
Maximum amount of additional tax	\$ 2,500

Computation on the First Partial Additional Tax

Parcel 1, sale to an unrelated party

FMV of Parcel 1	<u>\$ 25,000</u>	×	\$2,500	=	\$625
FMV of all special use property	\$100,000		(Maximum add'l tax)		(First add'l tax)

(2) Second or any succeeding disposition or cessation of the qualified use. Compute the maximum amount of the additional tax as outlined in the first partial disposition or cessation of the qualified use. Increase the numerator of the fraction used to determine the first additional tax by the fair market value

of the second partial disposition or cessation of the qualified use. The denominator remains the same. The computed tax is then credited with the tax paid on the first partial disposition or cessation of the qualified use. Succeeding partial dispositions or cessations of the qualified use are handled in the same manner by increasing the numerator of the fraction and a corresponding increase in the credit for the prior additional tax paid.

Computation of the second and succeeding partial dispositions or cessations of the qualified use can be illustrated by the following examples:

EXAMPLE 2. Second partial additional tax. Same facts as in Example 1. In this example, Parcel 2 is sold to an unrelated party.

Computation of the Second Partial Additional Tax

FMV of Parcels 1 & 2	<u>\$ 75,000</u>	×	\$2,500 (Maximum add'l tax)	=	\$1,875
FMV of all special use property	\$100,000				
Less tax paid on Parcel 1					<u>625</u>
Second Add'l Tax					\$1,250

EXAMPLE 3. Third partial additional tax. Same facts as in Example 1. In this example, Parcel 3 is sold to an unrelated party.

Computation of the Third Partial Additional Tax

FMV of Parcels 1, 2, & 3	<u>\$100,000</u>	×	\$2,500 (Maximum add'l tax)	=	\$2,500
FMV of all specially valued real estate	\$100,000				
Less tax paid on Parcels 1 & 2					<u>1,875</u>
Third Additional Tax					\$ 625

f. No additional tax on shares not revalued. The shares of persons who received no interest in the real estate which is no longer eligible to be specially valued are not subject to an additional tax. Therefore, on the amended final inheritance tax return only the shares of the persons receiving interest in the real estate need to be revalued when computing the additional tax under this subrule.

EXAMPLE. Decedent A, a widower and resident of Iowa, died testate July 1, 1992, survived by nephew B and niece C. His estate consisted of two Iowa farms and certain personal property. Under A's will, the niece and nephew share equally in the personal property. Nephew B received one farm and niece C the other one. Nephew B, a qualified heir, elected to specially value his farm and niece C did not. The inheritance tax was paid on this basis. Five years after A's death, nephew B quits farming and sells his inherited farm to an unrelated party, thus incurring an additional inheritance tax. Only nephew B owes an additional tax. Niece C's share in the estate is not revalued.

86.8(8) Return for additional inheritance tax. The return reporting the additional inheritance or Iowa estate tax imposed due to the early disposition or cessation of the qualified use shall conform as nearly as possible to the federal additional estate tax return, Form 706A, as can be done within the framework of an inheritance tax on shares instead of an estate tax. The return must be executed by the qualified heir and filed with the Iowa Department of Revenue, Hoover State Office Building, Des Moines, Iowa 50319.

86.8(9) Due date for paying the additional inheritance tax. The additional inheritance tax imposed by Iowa Code section 450B.3 and the return for the additional tax is due six months after the early disposition or cessation of the qualified use of the real estate specially valued.

86.8(10) No extension of time to file or pay. Iowa Code chapter 450B makes no provision for an extension of time to file the return for the additional tax and pay the additional inheritance tax due.

Therefore, if the return for the additional tax is not filed or the additional inheritance tax is not paid within six months after the early disposition or cessation of the qualified use, the return or the tax is delinquent and subject to penalty under subrule 86.8(13).

86.8(11) *Interest on additional tax.* The additional inheritance tax imposed under Iowa Code section 450B.3 accrues interest at the rate of 10 percent per annum until paid commencing the last day of the ninth month after the decedent's death. The variable prime interest rate made applicable to inheritance tax by 1981 Iowa Acts, chapter 131, sections 15 and 16, on real estate not specially valued, does not apply to interest due on the additional tax imposed by Iowa Code section 450B.3. In addition, the federal rule that interest only accrues on the additional federal estate tax when an election is made under 26 U.S.C. Section 1016(c) to increase the basis for gain or loss on the real estate no longer eligible to be specially valued, has no application to Iowa special use valuation. In this respect the Iowa law does not conform to the federal statute.

86.8(12) *Receipt for additional tax.* The receipt for the additional tax imposed by Iowa Code section 450B.3 is separate and distinct from the receipt for inheritance tax required by Iowa Code section 450.64. The receipt must identify the property which was the subject of the early disposition or cessation of the qualified use, the owners of the property, the qualified heir, the amount paid and whether the additional tax paid is for a partial or full disposition or cessation of the qualified use.

86.8(13) *Penalty for failure to file or failure to pay.* Department rules 701—Chapter 10, pertaining to the penalty for failure to timely file the return or to pay the inheritance tax imposed by Iowa Code chapter 450, also apply where there is a failure to timely file the return reporting the additional inheritance tax or to pay the additional tax due imposed by Iowa Code section 450B.3.

86.8(14) *Duties and liabilities.*

a. Duty to report an early disposition or cessation of the qualified use. The agent designated in the agreement required by 86.8(5)“e” has the duty to notify the department of any early disposition or cessation of the qualified use of the property on or before the due date of the additional inheritance tax. An executed copy of the notice required by federal regulation Section 20.2032A(c)(4) will satisfy this subrule.

b. Liability for payment of the tax. The qualified heir or the heir's successor is personally liable for all the additional inheritance tax imposed under Iowa Code section 450B.3. It is the qualified heir's duty to collect the additional Iowa inheritance tax from each person whose share was revalued. In respect to the additional tax, the duty of the qualified heir is the same as the duty of the fiduciary of an estate or trust under Iowa Code section 450.5, for the regular inheritance tax. See subrule 86.2(1) regarding the responsibility of the fiduciary of an estate or trust. While the qualified heir is primarily liable for the payment of all of the additional tax, each person who has an interest in the real estate no longer eligible to be specially valued is also liable under the agreement provided for in 86.8(5)“e” for additional tax on that person's revalued share. Therefore, if the qualified heir fails to pay the additional tax imposed on any revalued share, the department may proceed to collect the delinquent tax from the person who received the share. The liability for the additional tax due from each person who had an interest in the revalued real estate is the same as the liability for the inheritance tax on property not specially valued. See *Eddy v. Short*, 190 Iowa 1376, 1380, 1832, 179 N.W. 818 (1920); *In re Estate of Stone*, 132 Iowa 136, 109 N.W. 455 (1906).

c. Books and records. It is the duty of the qualified heir to keep books and records necessary to substantiate the continued eligibility of the real estate for special use valuation. Upon request, the agent designated in the agreement shall furnish the department sufficient information relating to the use, ownership and status of the real estate to enable the department to determine whether there has been an early disposition or cessation of the qualified use.

86.8(15) *Special lien for additional inheritance tax.*

a. In general. The special lien created by Iowa Code section 450B.6 is separate and distinct from the lien provided for in Iowa Code section 450.7, for the inheritance tax imposed at the time of the decedent's death. The special lien is to secure any additional inheritance tax that may be due within the ten-year period after the decedent's death, should there be an early disposition or cessation of the qualified use. The inheritance tax lien provided for in Iowa Code section 450.7 is only to secure the

tax imposed at the time of the decedent's death on the transfer of property including property that is specially valued. If an additional tax is imposed for the early disposition or cessation of the qualified use, it is secured by the lien created by Iowa Code section 450B.6.

b. Form of the notice of the special lien. The notice of the special lien for additional inheritance tax created by Iowa Code section 450B.6 must conform as nearly as possible to the special use valuation lien provided for in 26 U.S.C. Section 6324B.

c. Notice of lien. Unlike the lien provided for in Iowa Code section 450.7, notice of the special lien for additional inheritance tax must be recorded before it has priority over subsequent mortgagees, purchasers or judgment creditors. The special lien is perfected by recording the notice of the special lien in the recorder's office in the county where the estate is being probated (even though the real estate may be located in a different county). Failure to perfect the special lien by recording as provided for in Iowa Code section 450B.6 divests the qualified real property from the lien in the event of a sale to a bona fide purchaser for value.

d. Duration of the special lien. The special lien continues:

(1) Until the additional inheritance tax is paid, or ten years after the date the additional tax is due, whichever first occurs, if there is an early disposition or cessation of the qualified use, or

(2) For ten years after the decedent's death on all other property which has been specially valued.

e. Release of the lien. The special lien for additional inheritance tax:

(1) May be released at any time in whole or in part upon adequate security being given to secure the additional tax that may be due, if any.

(2) Is released by payment of the additional inheritance tax imposed by Iowa Code section 450B.3, on the property which was the subject of an early disposition or cessation of the qualified use.

(3) Is released when it becomes unenforceable by reason of lapse of time.

f. Application to release the lien. Ten years after the decedent's death, unless there is an additional tax remaining unpaid, the qualified heir may submit to the department an application in writing for release of the lien on the real estate specially valued. The application must contain information necessary to enable the department to determine whether or not the special use valuation lien should be released. Supporting documentation may include a copy of the federal release. If, after audit of the application, it is determined the real estate remained eligible for special valuation, the department will release the lien.

86.8(16) Valuation of the decedent's interest in corporations, partnerships and trusts—special rules. If the decedent's interest in a corporation, partnership or a trust has been valued at its special use valuation under 26 U.S.C. Section 2032A for federal estate tax purposes, it is also eligible to be valued at its special use value for inheritance tax purposes, subject to the limitation imposed by statute and these rules. See Internal Revenue Service letter ruling 8108179 (1980) for guidelines in valuing the decedent's interest. Other factors indicative of value, such as the value of other assets, net dividend-paying capacity, book value, profit and loss statements and net worth must also be taken into account in arriving at the value of the decedent's interest for inheritance tax purposes. See Revenue ruling 59-60, 1959-1 C.B. 243 for the factors to be considered in valuing closely held corporate stock. In the event the decedent's interest in a corporation, partnership or trust is no longer eligible to be specially valued, the additional inheritance tax will be imposed on the fair market value of the decedent's interest in the same manner and subject to the same limitations as other property specially valued.

86.8(17) Audits, assessments and refunds. Subrules 86.3(1) to 86.3(3) providing for the audit, assessment and refund of the inheritance tax imposed by Iowa Code sections 450.2 and 450.3, shall also be the rules for the audit, assessment and refund of the additional inheritance tax imposed by Iowa Code section 450B.3.

86.8(18) Appeals. Rule 701—86.4(450) providing for an appeal to the director and a subsequent appeal to district court under the Iowa administrative procedure Act for disputes involving the inheritance tax imposed by Iowa Code chapter 450 shall also be the rule for appeal for disputes concerning special use valuation and the additional inheritance tax imposed by Iowa Code chapter 450B.

This rule is intended to implement Iowa Code sections 450B.1 to 450B.7.

[ARC 1545C, IAB 7/23/14, effective 8/27/14]

701—86.9(450) Market value in the ordinary course of trade. Fair market value of real or personal property is established by agreement or the appraisal and appeal procedures set forth in Iowa Code section 450.37 and subrules 86.9(1) and 86.9(2). If the value is established by agreement, the agreement may be to accept the values of such property as submitted on the Iowa inheritance tax return, to accept a negotiated value or to accept the values as finally determined for federal estate tax purposes. Values submitted on an inheritance tax return constitute an offer regarding the value of the property by the estate. An inheritance tax clearance that is issued based upon property values submitted on an inheritance tax return constitutes an acceptance of those values on that return. An agreement to accept negotiated values or accept values as finally determined for federal estate tax purposes must be an agreement between the department of revenue, the personal representative, and the persons who have an interest in the property. If an agreement cannot be reached regarding the valuation of real property, then the department may request, within 30 days after the return is filed, an appraisal pursuant to Iowa Code sections 450.37 and 450.27 and subrule 86.9(2). Effective for estates with decedents dying on or after July 1, 2004, if an agreement cannot be reached regarding the valuation of real property, then the department may request, within 60 days after the return is filed with the department, an appraisal pursuant to Iowa Code sections 450.37 and 450.27 and subrule 86.9(2). If an appraisal is not requested within the required period, then the value listed on the return is the agreed value of the real property. If an agreement cannot be reached regarding the valuation of personal property, the personal representative or any person interested in the personal property may appeal for a revision of the department's value as set forth in Iowa Code section 450.37 and subrule 86.9(2). Any inheritance tax clearance granted by the department may be subject to revision based on federal audit adjustments. Absent an agreement to the contrary, the six-month extension of the statute of limitations for assessing Iowa inheritance tax based on federal audit adjustments is limited to federal audit adjustments that directly affect Iowa inheritance tax and involve Iowa inheritance tax law that incorporates Internal Revenue Code provisions—see Iowa Code section 450.94(5) and *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

86.9(1) In general. With the exception of real estate which has been specially valued under Iowa Code chapter 450B, property included in the gross estate for inheritance tax purposes must be valued under the provisions of Iowa Code section 450.37 at its market value in the ordinary course of trade. See rule 701—86.10(450) for the rule governing the market value in the ordinary course of trade if the alternate valuation date is elected. “Market value in the ordinary course of trade” and “fair market value” are synonymous terms. *In re Estate of McGhee*, 105 Iowa 9, 74 N.W. 695 (1898). Fair market value is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts. The fair market value of a particular item of property includable in the decedent's gross estate is not to be determined by a forced sale price. Nor is the fair market value of an item of property to be determined by the sale price of the item in a market other than that in which such item is most commonly sold to the public, taking into account the location of the item whenever appropriate. See federal regulation Section 20.2031(1)(b) and Iowa Code section 441.21(1)“b” for similar definitions of fair market value.

a. Values not to be used. Other kinds of value assigned to property such as, but not limited to, assessed value of real estate for property tax purposes, cost price, true value, or book value are only relevant in computing the value of the property for inheritance tax purposes, to the extent they may be properly used in the determination of fair market value or special use value. *In re Estate of McGhee*, 105 Iowa 9, 74 N.W.695 (1898). Fair market value cannot be determined alone by agreement between the persons succeeding to the decedent's property. Also, fair market value cannot be determined alone by setting out in the decedent's will the price for which property can be sold. *In re Estate of Fred W. Rekers*, Probate No. 28654, Black Hawk County District Court, July 26, 1972.

b. Date of valuation. Unless the alternate valuation date is elected under Iowa Code section 450.37, or the tax has been deferred according to Iowa Code sections 450.44 to 450.49, all property includable in the gross estate must be valued at the time of the decedent's death for the purpose of computing the tax imposed by Iowa Code section 450.2. Subject to the two exceptions listed, any

appreciation or depreciation of the value of an asset after the decedent's death is not to be taken into consideration. *Insel v. Wright County*, 208 Iowa 295, 225 N.W.378 (1929).

86.9(2) Market value—how determined.

a. In general. The fair market value of an item of property, both real and personal, that is included in the gross estate for inheritance tax purposes is expressed in the property's monetary equivalent. The process used to determine fair market value presupposes the voluntary exchange of the item in a market for its equivalent in money. *Hetland v. Bilstad*, 140 Iowa 411, 415, 118 N.W. 422 (1908). The fact the item of property is not actually sold or exchanged or even offered for sale is not relevant. It is sufficient for establishing the item's value to arrive at the specific dollar amount that a seller would voluntarily accept in exchange for the property and the amount that a buyer would be willing to pay. *Juhl v. Greene County Board of Review*, 188 N.W.2d 351 (Iowa 1971). It is assumed when determining this specific dollar amount, which is the item's fair market value, that the seller is desirous of obtaining the highest possible price for the property and that the buyer does not wish to pay more than is absolutely necessary to acquire the property.

The item of property must be valued in a market where it is customarily traded to the public. See federal regulation 20.2031-1(b). Therefore, if an item of property is valued in a market which is not open to the general public, the party asserting the value in the restricted market has the burden to prove by a preponderance of the evidence that the value in the restricted market is the item's fair market value.

The distinction between a public and a restricted market can be illustrated by the following:

EXAMPLE 1. Under the provisions of the decedent's will, the personal representative of the estate is given the power to sell the decedent's property at either a public or private sale. Pursuant to this power, the personal representative sold the decedent's household goods at public auction held on a specific day and time which was widely advertised both in the newspaper in the locality where the decedent lived and also by sale bills posted in numerous public places in the decedent's community. The household goods sold at auction for \$2,500. The fair market value of the household goods on the day of sale is \$2,500. The public auction is a market where such items are commonly sold and the public had knowledge of the impending sale. The public was also invited to bid and the items to be sold were available for inspection.

EXAMPLE 2. Pursuant to an agreement between the beneficiaries of the estate, the personal representative sold the decedent's household goods and personal effects at an auction where only members of the decedent's family were permitted to bid. The items sold for \$2,500, which may or may not be the fair market value of the property. Family pride, sentiment, and other personal considerations may have entered into the selling price. In this type of sale the burden is on the personal representative to prove that the selling price is the fair market value of the items sold.

b. Values established by recognized public markets.

(1) Stocks, bonds, and notes. Items of personal property such as, but not limited to, corporate stock, bonds, mutual funds, notes, and commodities which are traded on one or more of the nation's stock or commodity exchanges shall be valued under the provisions of Federal Estate Tax Regulation 20.2031-2, which regulation is incorporated in and made a part of this subrule by reference.

Individuals who have a registration of a security indicating sole ownership by one individual or multiple ownership by two or more individuals with a right of survivorship and not as tenants in common, may obtain a registration in beneficiary form as provided in the uniform transfer on death security registration Act as provided in Iowa Code section 633.800. A "registering entity" under this Act must provide notice to the department of revenue of all reregistrations made pursuant to this Act. Such notice must include the name, address, and social security number of the decedent and all transferees. Until the division of the security, after the death of all the owners, multiple beneficiaries surviving the death of all the owners hold their interest as tenants in common. If no beneficiary survives the death of all the owners, the security belongs to the estate of the deceased sole owner of the estate of the last to die of the multiple owners.

(2) Local elevator and sale barn prices. The fair market value of grain and livestock may be determined either by the quoted price from the grain elevator or sale barn in the community where the grain or livestock is located or by the price quoted from the nearest commodity exchange, less the customary delivery discount.

(3) Public auctions by the court. The fair market value of an item may be established in a public market other than a market which has a permanent location and which holds sales at periodic stated intervals. It is common for estates or the probate court to hold a public auction to sell estate property and if the sale meets certain criteria the selling price received in this type of public auction will establish the fair market value of the property. Factors in an estate or court sale which tend to establish the selling price as one at fair market value include but are not limited to the time and place of the sale were well advertised; the public was invited and encouraged to bid; members of the decedent's family or business associates were not given special consideration as to price or terms of sale; and the terms of sale were comparable to those offered at sales in a regularly established public market.

(4) Sales in a regularly established market. Sales made in a regularly established market pursuant to Iowa Code section 633.387 would qualify as a sale at fair market value for inheritance tax purposes.

c. Private sales that may establish fair market value. Private sales of estate assets may establish the fair market value of the item depending on the facts and circumstances surrounding each sale. Factors which tend to establish a private sale as one at fair market value include but are not limited to:

(1) Sales made by a recognized broker who receives a commission from the seller based on the selling price and who has exercised diligence in obtaining a buyer.

(2) Sales made by the personal representative to nonfamily members after a good-faith effort was made to solicit bids from persons who are known to be interested in buying that particular kind of property.

(3) Sales made by the attorney or the personal representative after the item of property was advertised for sale in a newspaper of general circulation or in trade publications and a good-faith effort was made to obtain the best possible price.

(4) Sales made by the personal representative when the sale price is the price quoted on one of the nation's stock or commodity exchanges.

(5) Private sales made by the personal representative to members of the decedent's family or business associates are suspect due to personal, family, or business reasons, but nevertheless may constitute a sale at fair market value, depending on the facts and circumstances surrounding each sale. The personal representative has the burden to establish that this kind of private sale is a sale at fair market value. Factors which have a bearing on whether this type of private sale is one at fair market value include, but are not limited to, the following: Did the decedent's will give a sale or price preference to a member of the decedent's family or business associate? Were the terms of sale more advantageous than terms that would be given to the general public? Was a good-faith effort made to solicit bids from other persons known to be interested in buying that particular kind of property? Was the sale made as part of a family settlement of a will contest or dispute on a claim against the estate?

d. Fair market value—no regularly established market.

(1) In general. Certain items of personal property such as, but not limited to, closely held corporate stock, real estate contracts of sale, private promissory notes, accounts receivable, partnership interests, and choses in action are not customarily bought and sold in a public market. Occasional sales of these items of personal property at infrequent intervals do not establish a market for this kind of personal property, but the lack of a regular market does not indicate that the item is of no value. When there is not a regularly established market to use as a reference point for value, it is necessary to create a hypothetical market to determine fair market value. The factors used to create a hypothetical market vary with the kind of property being valued and depend on the facts and circumstances in each individual case.

(2) Fair market value of closely held corporate stock. A closely held corporation is a corporation whose shares are owned by a relatively limited number of stockholders. Often the entire stock issue is held by members of one family or by a small group of key corporate officers. Because of the limited number of stockholders and due to a family or business relationship, little, if any, trading in the shares takes place. There is, therefore, no established market for the stock. Sales that do occur are usually at irregular intervals and seldom reflect all of the elements of a representative transaction as is contemplated by the term fair market value. The term "fair market value" has the same meaning for federal estate tax purposes as it does for Iowa inheritance tax purposes. As a result, the federal revenue rulings establishing the criteria for valuing closely held corporate stock are equally applicable

to inheritance tax values. Therefore, corporate stock which meets the standards for being closely held must be valued for inheritance tax purposes under the provisions of Federal Revenue Ruling 59-60, 1959-1 C.B. 237 as modified by Revenue Ruling 65-193, 1965-2 C.B. 370 and amplified by Revenue Ruling 77-287, 1977-2 C.B. 319, Revenue Ruling 80-213, 1980-2 C.B. 101, and Revenue Ruling 83-120, 1983-2 C.B. 170, which Federal Revenue Rulings are incorporated in and made a part of this subrule by reference.

(3) Fair market value of real estate contracts, notes, and mortgages. The fair market value of promissory notes, secured or unsecured, contracts for the sale of real estate, and other obligations to pay money which are included in the gross estate is presumed to be the amount of the unpaid principal plus the amount of interest, if any, accrued to the day of the decedent's death. If the asset is not reported on the return at face value plus accrued interest, the burden is on the party claiming a greater or lesser value to establish that face value plus accrued interest is not the asset's fair market value.

Factors which have a bearing on whether the fair market value of an asset is greater or less than face value include, but are not limited to, the rate of interest charged on the obligation; the length of time remaining on the obligation; the credit standing and payment history of the debtor; the value and nature of the property, if any, securing the obligation; the relationship of the debtor to the decedent; and whether the obligation is to be offset against the debtor's share of the estate. See Iowa Code section 633.471 and *Welp v. Department of Revenue*, 333 N.W.2d 481 (Iowa 1983). This subrule can be illustrated by the following:

EXAMPLE 1. The decedent at the time of death owned a seller's interest in an installment sale contract for the sale of a 160-acre farm. The contract contained a forfeiture provision in the event the buyer failed to make the payments and further provided that the purchase price was to be paid in 20 equal annual principal payments plus interest at 7 percent per year on the unpaid principal balance. At the time of the decedent's death, the contract of sale had ten years yet to run and the current federal land bank interest rate for farm land loans was 12 percent. Assuming in this example that other valuation factors are not relevant, the fair market value of the contract is the face amount of the contract, plus interest, discounted to reflect a 12 percent interest return on the outstanding principal balance. A prudent investor would not invest at a lower rate of interest when a comparable investment with equal security would earn 12 percent interest.

EXAMPLE 2. A tenant of the decedent owed the decedent \$5,000, which was evidenced by a promissory note, payable on demand, drawing 6 percent interest, and which was executed in 1992, a year prior to the decedent's death. Assuming no other valuation factors are relevant, the fair market value of the \$5,000 promissory note is its face value, plus accrued interest. The less than market interest rate on the note does not affect its fair market value because the note is due on demand and, as a consequence, there is no loss of a higher rate of interest which would be the case if the note specified a future payment date.

EXAMPLE 3. Decedent A died intestate July 1, 1993, survived by two nephews, B and C. The estate consisted, after debts and charges, of \$300,000 in cash and U.S. Government bonds and a noninterest bearing promissory note for \$10,000 executed by nephew B in 1975 for money borrowed for his college education. No payments were ever made on the note. The note is outlawed by the statute of limitations and would be worthless if anyone other than nephew B or C had executed the note. However, since nephew B inherits one-half of A's estate, and is required under the law of setoff and retainer to pay the note before he can participate in the estate, the fair market value of the note in this particular fact situation is \$10,000 because it is collectible in full. Each nephew's share of the estate is \$155,000. Nephew C receives \$155,000 in cash and nephew B receives \$145,000 in cash plus his canceled note for \$10,000. In this example, the statutory right of setoff and retainer supersedes other factors which are relevant in determining the fair market value of the asset. See Iowa Code section 633.471; *In re Estate of Farris*, 234 Iowa 960, 14 N.W.2d 889 (1944); *Indiana Department of Revenue v. Estate of Cohen*, 436 N.E.2d 832 (Ind. App. 1982); *Gearhart's Ex'r and Ex'x v. Howard*, 302 Ky. 709, 196 S.W.2d 113 (1946).

(4) Fair market value of a sole proprietorship or partnership interest. The fair market value of the decedent's interest in a business, whether a partnership or a proprietorship, is the net amount a willing buyer would pay for the interest to a willing seller, neither being under any compulsion to buy or to sell

and both having reasonable knowledge of the relevant facts. Relevant factors in determining net value include but are not limited to the following: a fair appraisal as of the applicable valuation date of all of the assets of the business, tangible and intangible, including goodwill; the demonstrated earning capacity of the business; and the other factors in rule 701—89.8(422), to the extent they are applicable, that must be considered in valuing closely held corporate stock.

(5) Fair market value of choses in action. The fair market value of the decedent's interest in a right to sue for a debt or a sum of money often cannot be determined with certainty at the time of the decedent's death. The value of this right is dependent on many factors which include, but are not limited to, the following: the strength and credibility of the decedent's evidence; the statutory and case law supporting the decedent's claim or position; the ability of the opposing party to pay a judgment; the extent, if applicable, of the decedent's contributory negligence; and the other normal hazards of litigation. However, this lack of certainty does not mean the right to sue has no value at the time of the decedent's death. Evidence of what was actually received for this right by the decedent's estate or its beneficiary is evidence of the fair market value of the right at death.

This subrule can be illustrated by the following example:

The decedent died in a fire of uncertain origin that destroyed his dwelling. Due to the circumstances surrounding the fire, the estate's right of recovery from the fire insurance carrier was speculative and, therefore, the value of this right at death was unknown. After the estate was closed, the beneficiary of the estate settled the fire insurance claim for \$15,000. The amount received in settlement of the claim can be considered as evidence of the fair market value of the right of action at death. *Bair v. Randall*, 258 N.W.2d 333 (Iowa 1977). In addition, interest on the unpaid tax begins and continues to accrue from the date of the decedent's death.

(6) Wrongful death proceeds are not included in the gross estate. *Estate of Dieleman v. Department of Rev.*, 222 N.W.2d 459 (Iowa 1974).

e. By agreement between the department, the estate and its beneficiaries. Iowa Code section 450.37 provides that the market value in the ordinary course of trade is to be determined by agreement between the estate and its beneficiaries and the department. The term "agreement" when used with reference to the value of an asset, whether it is real or personal property, has the same meaning as the term is used in the law of contracts. The agreement between the department, the estate and its beneficiaries may be contained in a single written instrument, or it may be made by an offer submitted by the estate and its beneficiaries and its acceptance by the department. The agreement establishing values for computing the tax may specify that the values as finally determined for federal estate tax purposes on all or a portion of the assets will be the values used in computing the tax.

(1) Offer by the estate and the beneficiaries. It is the duty of the taxpayer to list on the inheritance tax return the values of the assets in the gross estate which the estate and those beneficially entitled to the decedent's property are willing to offer as the values for computing the taxable shares in the estate. The value of the assets listed on the return will constitute an offer for the department to accept or reject. Counteroffers may be made in the event an offer is rejected. This rule applies equally to real and personal property.

(2) Acceptance of values by the department. The values offered on the inheritance tax return by the estate and its beneficiaries are accepted by the department when:

1. The department has accepted the offered values in writing, or
2. A clearance certifying full payment of the tax due or a clearance certifying no tax due is issued by the department, or
3. The department does not request an appraisal within 60 days after the return has been filed in the case of the value of real estate. Notice of appraisal must be served by certified mail, and the notice is deemed completed when the notice is deposited in the mail and postmarked for delivery. However, see 86.9(2)"e"(3) for the rule governing values listed as "unknown" or "undetermined." See Iowa Code sections 622.105 and 622.106 for the law determining the filing date of a tax return that is mailed.

(3) Values listed on the return as "undetermined" or "unknown." If at the time the inheritance tax return is filed the information necessary to determine the value of an asset cannot be presently ascertained, the taxpayer may list the value of that asset as "unknown" or "undetermined." The return must contain

a statement signed by the taxpayer on behalf of the estate and the beneficiaries with an interest in the property granting the department an extension of time for requesting an appraisal until 60 days after an amended return is filed listing a value for the real estate. Failure to grant an extension of time will subject the real estate to an immediate request for an appraisal. The amended return shall be accompanied with sufficient facts and other information necessary to substantiate the value offered. An agreement concerning the value of an asset presupposes that the department, the beneficiaries and the estate have knowledge of the relevant facts necessary to determine value. There can be no meaningful agreement or appraisal until the relevant facts relating to value are known. See *Bair v. Randall*, 258 N.W.2d 333 (Iowa 1977), regarding the criteria that may be used to determine the value of an asset which was unknown at the time of the decedent's death.

f. Values established—no agreement.

(1) Real estate. If the department, the estate and the persons succeeding to the decedent's property have not reached an agreement as to the value of real estate under 86.9(2)“e,” the market value for inheritance tax purposes will be established by the appraisal proceedings specified in Iowa Code sections 450.27 to 450.36. For the purposes of appraisal, “real estate or real property” means the land and appurtenances, including structures affixed thereto. Use of the inheritance tax appraisers to determine value for other purposes such as, but not limited to, determining the share of the surviving spouse in the estate or for determining the fair market value of real estate for the purposes of sale, is not controlling in determining values for inheritance tax purposes. *In re Estate of Giffen*, 166 N.W.2d 800 (Iowa 1969); *In re Estate of Lorimor*, 216 N.W.2d 349 (Iowa 1974). Appraisals of real estate must be made in fee simple including land, all appurtenances and structures affixed to the real estate. Discounts in the value of real estate are not to be considered in the valuation of real property for the purposes of an appraisal. Such discounts in valuation are to be resolved by mutual agreement through informal procedures between the personal representative of the estate and the department. If an agreement between the personal representative of the estate and the department cannot be obtained, then the valuation placed on the property by the department may be appealed by the personal representative of the estate pursuant to the procedures set forth in rule 701—86.4(450). If either the department or the estate does not agree with the results of an appraisal that is conducted pursuant to Iowa Code sections 450.27 through 450.36, either the department or the estate may file an objection to the appraisal pursuant to Iowa Code section 450.31. See 701—subrule 86.9(2) for additional factors to assist in the determination of fair market value of real property.

(2) Personal property. Effective for estates of decedents dying on or after July 1, 1983. If an agreement is not reached on the value of personal property under 86.9(2)“e,” the estate or any person beneficially receiving the personal property may appeal to the director under Iowa Code section 450.94, subsection 3, for a resolution of the valuation dispute, with the right of judicial review of the director's decision under Iowa Code chapter 17A.

g. Amending returns to change values.

(1) Amendment permitted or required. Unless value has been established by the appraisal or administrative proceedings, the inheritance tax return may be amended by the estate to change the value of an asset listed on the return as long as the amendment is filed before an agreement is made between the estate and the department as to the asset's value. The return must be amended to list the value of an asset omitted from the original return or to assign a value for an item listed on the original return as “unknown” or “undetermined.”

If the facts and circumstances surrounding the value agreement would justify a reformation or rescission of the agreement under the law of contracts, the return may be amended by the estate, and must be amended at the department's request, to change the value of the item to its correct fair market value or its special use value as the case may be.

(2) Amendment not permitted. A return cannot be amended:

1. To change the agreed value of an asset, if the facts and circumstances surrounding the agreement would not justify a reformation or rescission of the agreement,

2. To change a real estate value that has been established by the appraisal proceedings under Iowa Code sections 450.31 to 450.33, *Insel v. Wright County*, 208 Iowa 295, 225 N.W. 378 (1929), or

3. To change the value of an item of personal property that has been established by the department's administrative procedure under 701—Chapter 7, or, if an appeal is taken from the director's decision, by judicial review under Iowa Code chapter 17A. Provided, in no event may the return be amended to lower the value of an asset that would result in a refund of tax more than three years after the tax became due or one year after the tax was paid, whichever time is the later. Iowa Code section 450.94, *Welp v. Department of Revenue*, 333 N.W.2d 481 (Iowa 1983).

This rule is intended to implement Iowa Code sections 450.27 to 450.37, 450.44 to 450.49, and 633.800 to 633.811.

[ARC 1137C, IAB 10/30/13, effective 12/4/13]

701—86.10(450) Alternate valuation date.

86.10(1) When available. The alternate valuation date allowed by 26 U.S.C. Section 2032 is available for estates of decedents dying on or after July 1, 1983, on the same terms and conditions which govern the alternate valuation date for federal estate tax purposes. Effective for estates of decedents dying after July 18, 1984, the alternate valuation date cannot be elected unless the value of the gross estate for federal estate tax purposes is reduced and the amount of federal estate tax owing, after all credits have been deducted, has also been reduced. See 26 U.S.C. Section 2032(c) enacted by Public Law 98-369 Section 1023(a). In general, the alternate valuation date is six months after the date of the decedent's death. If property is sold within the six-month period, the date of sale is the alternate date for valuing the property sold. See federal regulation Section 20.2032-1, as amended December 28, 1972, for the rules governing the valuation of property in the gross estate at its alternate valuation date for federal estate tax purposes. If the election is made, all of the property included in the gross estate and not just a portion of the property, must be valued at the alternate valuation date. The estate may elect both the alternate valuation date and the special use value under Iowa Code chapter 450B, if the estate is otherwise qualified. See Federal Revenue Ruling 83-31(1983). It is a precondition for valuing the property at its alternate value for Iowa inheritance tax purposes that the property has been valued at the alternate value for federal estate tax purposes. However, even if the property in the gross estate is valued at the alternate valuation date for federal estate tax purposes, the estate has the option either to elect or not to elect the alternate valuation date for Iowa inheritance tax purposes. If the alternate valuation date is elected, the value established for federal estate tax purposes shall also be the alternate value for inheritance tax purposes. The election is an affirmative act and for estates of decedents dying prior to July 19, 1984, it must be made on a timely filed inheritance tax return, taking into consideration any extensions of time granted to file the return. Effective for estates of decedents dying after July 18, 1984, the election may be made on the first return filed for the estate, regardless of whether the return is delinquent, providing the return is filed no more than one year after the due date, taking into consideration any extensions of time granted to file the return and pay the tax due. See 26 U.S.C. 2032(d) as amended by Public Law 98-369 Section 1024(a). Failure to indicate on the inheritance tax return whether the alternate valuation date is elected shall be construed as a decision not to elect the alternate valuation date.

86.10(2) When not available.

a. The alternate valuation date provided for in 26 U.S.C. Section 2032 cannot be elected by the estate if the tax on a future property interest has been deferred under Iowa Code sections 450.44 to 450.49. The tax on a future property interest must be computed on the fair market value of the future property interest at the time the tax is paid. *In re Estate of Wickham*, 241 Iowa 198, 40 N.W. 2d 469 (1950).

b. Real estate which is subject to an additional inheritance tax imposed by Iowa Code section 450B.3 due to the early disposition or cessation of the qualified use cannot be valued at the alternate valuation date for purposes of the recapture tax, unless the alternate valuation date was originally elected on the return for the decedent's estate.

c. The alternate valuation date cannot be elected if the size of the gross estate for federal estate tax purposes, based on the fair market value of the assets at the time of death, is less than the minimum filing

requirements under current federal authority. The fact that the gross estate for inheritance tax purposes is less than the minimum federal estate tax filing requirement is not relevant.

This rule is intended to implement Iowa Code sections 422.3 and 450.37.

701—86.11(450) Valuation—special problem areas.

86.11(1) Valuation of life estate and remainder interests—in general. Life or term estates and remainders in property cannot be valued separately for inheritance tax purposes without reference to the value of the property in which the life or term estate and remainder exists. The first valuation step is to determine the value of the property as a whole. This rule applies equally to fair market value in the ordinary course of trade, whether it be valued at death or on the alternate valuation date six months after death, or at its special use value under Iowa Code chapter 450B. The second step is to apply the life estate-remainder or term tables in rule 701—86.7(450) to the whole value of the property in which the life estate-remainder or term exists. Iowa Code section 450.51 requires that value of annuities, life or term, deferred or future estates in property be computed on the basis that the use of the property is worth a return of 4 percent per year. The life estate-remainder tables in rule 701—86.7(450) make no distinction between the life expectancy of males and females. See *City of Los Angeles v. Manhart*, 435 U.S. 702, 98 S.Ct. 1370, 55 L.Ed. 657 (1978) and *Arizona Governing Committee for Tax Deferred Annuity and Deferred Compensation Plans v. Norris*, 51 U.S. Law Week 5243, 77 L.Ed.2d 1238 (1983) for the requirement that retirement annuities must not discriminate on the basis of sex. However, the actual life expectancy of the particular person receiving the life estate is not relevant in determining the value of the life estate for inheritance tax purposes. *In re Estate of Evans*, 255 N.W.2d 99 (Iowa 1977), appeal dismissed, 434 U.S. 805, 98 S.Ct. 34, 54 L.Ed.2d 62.

86.11(2) Single life estate and remainder. The value of a single life estate and remainder in property is computed by first determining the value of the property as a whole. The life estate is then computed by multiplying the value of the property as a whole by the life estate factor in rule 701—86.7(450) for the age of the life tenant. The value of property remaining after the value of the life estate is subtracted is the value of the remainder interest in the property.

The computation of the value of a single life estate and remainder in property is illustrated by the following:

EXAMPLE: Decedent A, by will, devised to surviving spouse B, aged 68, a life estate in a 160-acre farm, with the remainder at B's death to niece C. Special use value and the alternate value were not elected. The 160-acre farm at the time of the decedent's death had a fair market value of \$2,000 per acre, or \$320,000.

COMPUTATION OF B's LIFE ESTATE: The life estate factor for a life tenant aged 68 under 701—86.7(450) is .43306; that is, the use of the \$320,000 for life at the statutory rate of return of 4 percent is worth 43.306 percent of the value of the farm. Niece C's remainder factor is .56694. The life estate-remainder factors when combined equal 100 percent of the value of the property. It is the age of the life tenant which governs the value of the remainder. The age of the person receiving the remainder is not relevant.

<u>Value of B's Life Estate</u>	$\$320,000 \times .43306 =$	\$138,579.20
<u>Value of C's Remainder</u>	$\$320,000 \times .56694 =$	<u>\$181,420.80</u>
Total Value		\$320,000.00

86.11(3) Joint and succeeding life estates. If property includable in the gross estate is subject to succeeding or joint life estates, the following general rules shall govern their valuation:

a. There can be no greater value assigned to all of the life estate interests than the value of the life estate of the youngest life tenant. The value of the life estate of the youngest life tenant fixes the value of the remainder interest in the property.

b. If two or more persons share in a life estate, the life tenants are presumed to share equally in the life estate during the life of the older life tenant, unless the will or trust instrument specifically directs that the income or use may be allocated otherwise.

c. The age of a life tenant alone determines the value of that life tenant's interest in the property. The life tenant's state of health is not relevant to valuation. *In re Estate of Evans*, 225 N.W.2d 99 (Iowa 1977), appeal dismissed, 434 U.S. 805, 98 S.Ct. 34, 54 L.Ed.62. As a result, if a succeeding life tenant is older than the preceding life tenant, the value of the succeeding life estate is zero. These general rules can be illustrated by the following examples:

EXAMPLE 1. Decedent A, by will, devised a 160-acre farm to surviving spouse B, aged 68, for life, and upon B's death, to daughter C, aged 45, for life, and the remainder upon C's death to nephews D and E in equal shares. The 160-acre farm had a fair market value at A's death of \$320,000. Neither the alternate valuation date nor special use value was elected.

COMPUTATION OF THE SUCCEEDING LIFE ESTATES AND REMAINDER

1. <u>Value of B's Life Estate:</u>		
Life estate factor for age 68 is .43306		
$\$320,000 \times .43306 =$		\$138,579.20
2. <u>Value of C's Succeeding Life Estate</u>		
Life estate factor for age 45 is .71463		
$\$320,000 \times .71463 =$	\$228,681.60	
Less: B's life estate	<u>\$138,579.20</u>	
Value of C's life estate		\$ 90,102.40
3. <u>Value of D's ½ remainder</u>		
Remainder factor for a life tenant aged 45 is .28537		
as ½ of $\$320,000 \times .28537 =$		\$ 91,318.40
4. <u>Value of E's ½ remainder</u>		
½ of $\$320,000 \times .28537$		<u>\$ 91,318.40</u>
Total Value — life estates and remainders		\$320,000.00

NOTE: In this example, the value of C's succeeding life estate is reduced by the value of B's preceding life estate because C does not have the use of the farm during B's lifetime. The value of the remainder to D and E is fixed by the age of C, the succeeding life tenant.

EXAMPLE 2: Joint and survivorship life estates and remainder. In this example, the estate elected both the alternate valuation date and special use value. This is permitted by Federal Revenue Ruling 83-31 (1983) if the gross estate and the real estate are otherwise qualified.

Decedent A, a widow, by will devised her 240-acre Iowa farm to her nephew, B, aged 52, and the nephew's wife, C, aged 48, for their joint lives and for the life of the survivor, with the remainder to D and E in equal shares. The farm had a fair market value at death of \$2,200 per acre, or \$528,000; the alternate value of the farm six months after death was \$2,100 per acre, or \$504,000. Its special use value is \$1,000 per acre or \$240,000. The life estates and the remainder are computed on the basis of the special use value of \$240,000.

COMPUTATION OF JOINT LIFE ESTATE — REMAINDER VALUES

1. <u>B's share of joint life estate.</u>		
$\$240,000 \times .64086$ (life estate factor, age 52) =	\$153,806.40	
½ as B's share =		\$ 76,903.20
2. <u>C's share of joint life estate.</u>		
$\$240,000 \times .68468$ (life estate factor, age 48) =	\$164,323.20	

Less: ½ value of life estate for B's life	\$ 76,903.20	\$ 87,420.00
3. Value of the remainder.		
The value of the remainder is computed by using the remainder factor at the age of the youngest life tenant. In this example, it is .31532, based on C's age of 48.		
<u>D's share of the remainder.</u>		
½ \$240,000 × .31532 =		\$ 37,838.40
<u>E's share of the remainder.</u>		
Same as D's		\$ 37,838.40
Total value of joint life estates and the remainder		<u>\$240,000.00</u>

NOTE: In this example, B and C share equally in the life use of the farm during the life of B, who is the eldest. As a result, each life tenant's share during B's life is worth \$76,903.20. Since C is younger than B, the difference between the value of the life estates for B and C is set off to C alone. The age of the youngest life tenant (C in this example) fixes the value of the remainder interest in the farm.

86.11(4) Fixed sum annuity for life or for a term of years. The value of an annuity for a fixed sum of money, either for the life of the annuitant or for a specific period of time, shall be computed by determining the present value of the future annuity payments using the 4 percent annuity tables in rule 701—86.7(450). A fixed sum annuity, either for life or for a term of years, is to be distinguished from a life estate and remainder in property. A life estate in property is the use of property, and the present value of the life use cannot exceed the value of the property in which the life estate-remainder exists, regardless of the rate of return used to determine the life estate factor. A fixed sum annuity on the other hand is different. The amount of the annuity does not necessarily bear any relationship to the earning capacity or value of the property which funds the annuity. The fixed sum annuity may be for an amount larger than the 4 percent used to compute a life estate. As a result, the present value of the fixed sum annuity, computed at the statutory rate of 4 percent per year, may exceed the value of the property which funds the fixed annuity. In this case, the present value of the future annuity payments cannot exceed the value of the property which funds the annuity. The remainder in this situation has no value for inheritance tax purposes.

This subrule is illustrated by the following examples:

EXAMPLE 1. Decedent A devises a 240-acre farm to daughter B, with the provision that B pay the sum \$5,000 per year to C for life. The farm is subject to a lien as security for the payment of the annuity. C, the annuitant, is 54 years old. The fair market value of the farm at A's death is \$2,000 per acre, or \$480,000. Neither special use value nor the alternate valuation date was elected.

COMPUTATION OF THE VALUE OF THE \$5,000 ANNUITY AND THE REMAINDER REVERSION TO B. Under rule 701—86.7(450), the 4 percent annuity factor for life at age 54 is 15.436 for each dollar of the annuity received. Therefore, C's life annuity is computed as follows:

<u>C's Annuity</u>		
\$5,000 × 15.436 =		\$ 77,180
<u>B's Reversionary — Remainder Interest</u>		
Value of farm	\$480,000	
Less: C's annuity	<u>\$ 77,180</u>	<u>\$402,820</u>
Total annuity and reversion — Remainder		\$480,000

NOTE: In this example, the \$5,000 annuity is worth less than a life estate in the farm. A life estate would be worth \$273,499.20 because the use of \$480,000 at 4 percent per year would return \$19,200 per year, which is much greater than the \$5,000 annuity.

EXAMPLE 2: Decedent A, by will, directed that the sum of \$100,000 be set aside from the residuary estate to be held in trust to pay \$500 per month to B for life, and upon B's death, the remaining principal and income, if any, are to be paid to C and D in equal shares. B, the annuitant, was 35 years old at the time of A's death.

Under rule 701—86.7(450), the annuity factor for a person 35 years of age is 19.946 for each dollar of the annuity. The annuity factor is multiplied by the annual amount of the annuity, which in this case is \$6,000 per year.

COMPUTATION OF THE PRESENT VALUE OF B's \$6,000 ANNUITY

$\$500.00 \times 12 = \$6,000 \times 19.946 = \$119,676$, which exceeds the value of the property funding the annuity. As a result, the value for inheritance tax purposes is \$100,000, the maximum amount allowed by subrule 86.11(4). The remainder to C and D has no value for inheritance tax purposes.

86.11(5) Valuation of remainder interests. Iowa Code section 450.51 and rule 701—86.7(450) require the value of a remainder interest in property to be computed by subtracting the present value of the preceding life or term estate from the total value of the property in which the remainder exists. Since age or time is the controlling factor in valuing life or term estates in property, the time when the preceding life or term estate is valued is crucial for determining the value of the remainder interests in the property. Iowa Code sections 450.6, 450.44 and 450.52 provide three alternative dates for valuing a remainder, or other property interest in future possession or enjoyment, for inheritance tax purposes. Each of the three dates requires valuing the preceding life or term estate on the date selected, thus in effect, valuing the remainder interest at the same time. The value of the remainder interest is based on the value of the property on the date elected for payment. *In re Estate of Wickham*, 241 Iowa 198, 40 N.W.2d 469 (1950). The remainder or term factor in rule 701—86.7(450) which is based on the age of the life tenant, or the number of years remaining in the term on the date of payment, is then applied to the value of the property to determine the value of the remainder interest. *In re Estate of Millard*, 251 Iowa 1282, 105 N.W.2d 95 (1960). Therefore, the remainder, or other future property interest, shall be valued by the following general rules.

a. If the tax on a remainder or other future property interest is paid within 9 months after the decedent's death (12 months for estates of decedents dying prior to July 1, 1981), the tax is to be based on the value of the property at the time of the decedent's death (whether it is fair market value or special use value) or the alternate value, 6 months after death, if elected. The age of the life tenant at the time of the decedent's death (the youngest life tenant in case of succeeding or joint life estates), or the term of years specified in the will or trust instrument, must be used to determine the value of the life estate or term estate in computing the tax on the remainder or other future property interests.

b. If the tax is paid after nine months from the date of the decedent's death (one year for estates of decedents dying prior to July 1, 1981), but before the termination of the previous life or term estate, the tax on the remainder or other future property interest shall be computed on the fair market value of the property at the time of payment using the life estate or term factor based on the life tenant's age or term of years remaining at the time the tax is paid. Neither the alternate value nor special use value can be used to value the property after nine months from the date of the decedent's death.

c. If the tax on the remainder or other future property interest is not paid under paragraphs "a" and "b," the tax must be paid within nine months (one year for future property interests created prior to July 1, 1981) after the termination of the prior estate. In this case, the tax is based on the fair market value of the property and the life estate remainder or term factor corresponding with the time the prior estate is terminated. If the prior estate is terminated due to the death of the life tenant, or due to the expiration of the term of years, the remainder factor is 100 percent of the value of the property. If the prior estate terminates during the life of the life tenant or during the term of years, the tax is computed in the same manner as provided in paragraph "b." If the tax is not paid within nine months (one year for future property interests created prior to July 1, 1981) after the termination of the prior estate, the tax owing is delinquent and is subject to penalty and interest as provided by law. For information regarding interest rate, see 701—Chapter 10. However, in this case the value of the remainder interest is not modified to reflect any change in the fair market value of the property or the life or term estate factor that may occur due to the lapse of time between the due date of the tax and the date the tax is paid.

d. Iowa Code section 450.52 provides that the tax may be paid at any time on the present worth of the future property interest. The term “present worth” means the value of the future property interest at the time the tax is paid. Therefore, if the tax on the remainder or other future property interest is not paid within nine months after the decedent’s death (one year for future property interests created prior to July 1, 1981), the estate or the beneficiary receiving the future interest cannot pay the tax on a delinquent basis using a value and a life estate or term factor which does not reflect the present worth of the future interest at the time of payment. In this situation, the tax must be computed under paragraph “*b*” or “*c*” of this subrule, whichever applies. In this respect, failure to pay the tax within nine months after the decedent’s death (one year for future property interests created prior to July 1, 1981) operates as a deferral of the tax on the future property interest. *In re Estate of Dwight E. Clapp*, Probate No. 7251, Clay County Iowa District Court, July 2, 1980.

e. If an alternative valuation date is chosen, a liability must be currently owed by the estate to be deductible.

f. Tax rates in effect at the date of the decedent’s death are the rates applicable for computation of the tax owed. *In re Estate of Wickham*, 241 Iowa 198, 40 N.W.2d 469 (1950).

These rules can be illustrated by the following examples:

For an example of computing remainder interests, see Examples 1 and 2 in subrule 86.11(3).

EXAMPLE 1: Decedent A died July 1, 2009, and, by will, devised all of her personal property to her surviving spouse, B, and her 240-acre Iowa farm to B for his life with the remainder at B’s death to two nephews, C and D, in equal shares. The surviving spouse, B, was 74 years of age when A died. The fair market value of the 240-acre farm was \$2,000 per acre, or \$480,000 on the date of A’s death. Neither the alternate valuation date nor special use value was elected by the estate. On March 15, 2010, the tax on B’s life estate was paid. The tax on the remainder to C and D was therefore deferred, to be paid no later than nine months after the death of B, the life tenant. However, on October 15, 2011, due to adverse economic circumstances, B, C, and D voluntarily sold the 240-acre farm at public auction to an unrelated person for \$2,100 per acre, or \$504,000. B’s life estate was not preserved in the sale proceeds. The tax on the remainder in this fact situation must be computed under subrule 86.11(5), paragraph “*b*,” when the life estate is terminated before the life tenant’s death. The sale price of the farm and the life estate remainder factor reflecting B’s age on October 15, 2011, (B’s age is now 76) control the value of the remainder.

COMPUTATION OF THE REMAINDER INTEREST OF C AND D

The remainder factor in rule 701—86.7(450) for a life tenant aged 76 is .68249.

<u>C’s ½ remainder interest</u>	½ (\$504,000 × .68249) =	\$171,987.48
<u>D’s ½ remainder interest</u>	same as C’s	<u>171,987.48</u>
Total value of remainder		\$343,974.96

NOTE: In this example, the value of C’s and D’s remainder interest in the sale proceeds is greater than the value of the remainder at the time of A’s death due to the increase in the remainder factor because of B’s increased age and the increase in the fair market value of the farm. However, if B’s life estate had been preserved in the sale proceeds, the tax could continue to be deferred on C’s and D’s remainder interest. C and D cannot be required to pay the tax on their remainder until they come into possession or enjoyment of the property.

EXAMPLE 2: Decedent A at the time of her death on July 1, 2005, owned a vested remainder in a 240-acre Iowa farm, which was subject to the life use of her mother, B, who was 87 years old when A died. A’s ownership of the remainder interest was not discovered until after life tenant B’s death on October 15, 2007. The fair market value of the farm was \$2,000 per acre or \$480,000 on July 1, 2005, and \$2,200 per acre or \$528,000 on October 15, 2007. Neither the alternate valuation date nor special use valuation can be used in this fact situation. See rule 701—86.10(450) and subrule 86.8(4), paragraph “*c*.” A’s estate was reopened to include the omitted remainder in the 240-acre farm. An amended inheritance tax return was filed December 10, 2007, basing the tax on the fair market value and

the remainder factor corresponding with the life tenant's age (87) on July 1, 2005. In this fact situation, the tax on A's remainder is not computed correctly, even if A's estate has offered to pay a penalty and interest on the tax due. The tax must be computed on the basis of a fair market value of \$2,200 per acre and a remainder factor of 100 percent of the value of the farm. No penalty or interest would be assessed if the correct tax is paid prior to July 15, 2008, which is nine months after the life tenant's death. The life tenant's age at death is not relevant.

86.11(6) Valuation of contingent property interests. Contingent remainders, succeeding life estates and other contingent property interests must be valued as if no contingency exists. Factors to be considered to determine if a contingency interest exists include, but are not limited to, the interest is generally a future interest, it is not a vested interest, and vesting of the interest depends upon the occurrence of a specific event or condition being met. As a result, subrule 86.11(5) applies equally to the valuation of vested and contingent property interests. The tax on a contingent property interest may be deferred until such time as it can be determined who will come into possession or enjoyment of the property. By deferring the tax under Iowa Code sections 450.44 to 450.49, a person does not have to speculate as to who will be the probable owner of the contingent interest. As a result, no one is required to pay tax on a property interest to which a vested right has not been received. Therefore, if a person exercises the right to pay the tax during the period of the contingency, that person cannot obtain a tax advantage by asserting that the value should be reduced due to a contingency, when the person would not be entitled to a reduction in value if the tax had been deferred until the ownership is determined.

This rule is illustrated by the following example.

COMPREHENSIVE EXAMPLE: Decedent A, by will, devised a 240-acre Iowa farm to B for life and upon B's death, then to C for life and the remainder after C's death to D and E in equal shares. In this example, C's succeeding life estate is contingent upon surviving B, the first life tenant. If C elects to pay the tax on the succeeding life estate within nine months after A's death, the tax is computed according to Example 1 in subrule 86.11(3) with no discount for the contingency that C may not survive B. However, C may defer the tax to be paid no later than nine months after B's death. In this case, if C does not survive B, the succeeding life estate lapses, and D and E, who own the remainder, will come into possession or enjoyment of the 240-acre farm. No tax will be owing on the succeeding life estate because C receives nothing. D and E will owe tax on the remainder within nine months after the death of B, if the tax was not previously paid.

For another example of computing a contingent remainder interest see *In re Estate of Schnepf*, 258 Iowa 33, 138 N.W.2d 886 (1965).

86.11(7) Valuation of growing crops owned by the decedent. Valuation of growing crops owned by the decedent is determined by using a proration formula. Based on the formula, the cash value of the actual crop realized in the fall of the year is prorated by attributing a portion of the value to the period before death and a portion after death. The portion attributed to the period before death is the value for Iowa inheritance tax purposes. The numerator of the ratio expresses the number of days the decedent lived during the growing season. In Iowa, the growing season for corn and beans is generally considered to be from May 15 through October 15, or 153 days. This 153-day period is the denominator of the ratio. This ratio should then be multiplied by the number of bushels realized in the fall, and then multiplied by the local elevator price at the time of maturity. However, if the estate sells the crop within a reasonable time after harvest, and the sale is an "arm's-length transaction," then the sale price of the crop can be used as a fair market value basis.

EXAMPLE: The decedent grew crops consisting of corn and beans. The decedent died August 15. The decedent lived 92 days of the growing season. In the fall of the year, 2,000 bushels of corn were harvested by the estate and sold to the local elevator for \$3.10 per bushel. The value of the crop for the purpose of Iowa inheritance tax purposes is calculated as follows:

$$\frac{92}{153} \times 2,000 \text{ bushels} \times \$3.10 \text{ per bushel} = \$3,728.10$$

86.11(8) Valuation of cash rent farm leases. If the decedent at the time of death owns farm property that was subject to lease, or if the decedent rents such property, the value of the cash rent farm for inheritance tax purposes must be determined. The formula to be used is the total cash rent for the entire rental period prorated over the entire year. The proration percentage is the number of days the decedent lived during the rental period, divided by 365 days. This percentage shall then be applied to the total cash rent for the entire year. Deductions from the resulting sum are allowed for rent payments made prior to the death of the decedent. If the deduction results in a negative amount, no refund or credit is allowed.

This valuation formula is to be utilized whether the decedent is the lessor or lessee of such property.

EXAMPLES: The decedent has a cash rent farm lease agreement (beginning March 1 through the end of February of the next year) with farmer X for automatic yearly rentals. The rent is due in two installments: \$10,000 on March 1 and \$10,000 on September 1.

1. Decedent dies February 1, 2011. $\$20,000 \times 338/365 = \$18,520.55$. Farmer X had paid his two installments in 2010. His next installment is due March 1, 2011, for the new farm rental year. Farmer X has overpaid by \$1,479.45 ($\$18,520.55 - \$20,000 = -\$1,479.45$). No refund or credit is allowed.

2. Decedent dies April 20, 2011. $\$20,000 \times 51/365 = \$2,794.52$. Farmer X has paid his March 1 installment of \$10,000. Farmer X has overpaid by \$7,205.48 ($\$2,794.52 - \$10,000 = -\$7,205.48$). No refund or credit is allowed.

3. Decedent dies October 10, 2011. $\$20,000 \times 224/365 = \$12,273.97$. Farmer X paid his March installment but has not paid his September installment. Farmer X has underpaid at the date of death. $\$12,273.97 - \$10,000 = \$2,273.97$. This amount must be reported as an asset. It is an accounts receivable due at date of decedent's death.

This rule is intended to implement Iowa Code sections 450.44 to 450.49, 450.51 and 450.52.

[ARC 1137C, IAB 10/30/13, effective 12/4/13]

701—86.12(450) The inheritance tax clearance.

86.12(1) In general. The inheritance tax clearance is a written certificate of the department documenting the satisfaction of the inheritance tax obligation of the persons succeeding to the property included in the gross estate and the personal representative of the estate, and also the obligation of the qualified heir, in case special use valuation is elected under Iowa Code chapter 450B. The clearance is either in the form of a full payment tax receipt or a statement that no tax is due on the shares of the estate. Even though the department of revenue has issued an inheritance tax clearance, the tax may be subject to change as a result of any federal estate tax changes affecting the Iowa inheritance tax. Absent an agreement to the contrary, the six-month extension of the statute of limitations for assessing Iowa inheritance tax based on federal audit adjustments is limited to federal audit adjustments that directly affect Iowa inheritance tax and involve Iowa inheritance tax law that incorporates Internal Revenue Code provisions—see Iowa Code section 450.94(5) and *Kelly-Springfield Tire Co. v. Iowa State Board of Tax Review*, 414 N.W.2d 113 (Iowa 1987).

86.12(2) Limitations on the clearance. Limitations on the inheritance clearance include, but are not limited to:

a. If special use valuation has been elected under Iowa Code chapter 450B, a clearance certifying all inheritance tax has been paid in full, or that no inheritance tax is due, does not extend to any additional inheritance tax that may be imposed under Iowa Code section 450B.3 by reason of the early disposition or early cessation of the qualified use of the real estate specially valued. Provided, this limitation shall be null and void if:

(1) The real estate specially valued remains in qualified use for the ten-year period after the decedent's death, or

(2) There is an early disposition or early cessation of the qualified use and any additional inheritance tax imposed by Iowa Code section 450B.3 is paid in full.

b. The clearance does not extend to property that is not reported on the return.

c. The clearance does not extend to a fraudulently filed return or a return which misrepresents a material fact.

d. The clearance does not release an underlying tax obligation that remains unpaid, even though a clearance may release the liens imposed by Iowa Code sections 450.7 and 450B.6.

86.12(3) *The tax paid in full clearance.* Effective for estates of decedents dying on or after July 1, 1983, the distinction between full payment and partial payment clearances is abolished. For estates of decedents dying on or after July 1, 1983, in which a tax is due, only full payment clearances will be issued. The full payment clearance will be issued only after all the tax, penalty and interest have been paid in full. Provided, if the tax has been paid in full on some, but not all of the shares in the estate, the department will, upon request, issue a full payment clearance limited to those shares on which the tax has been paid in full. The inheritance tax is a separate tax on each share of the estate and not one tax on the estate itself. *In re Estate of Stone*, 132 Iowa 136, 109 N.W. 455 (1906). However, see subrule 86.12(2), paragraph “a,” for the limitation on clearances if the estate elected the special use valuation under Iowa Code chapter 450B.

86.12(4) *The no tax due clearance.* If no tax is found to be due on any of the shares of the estate, the department will issue a clearance certifying that no tax is due, subject to the limitations in subrule 86.12(2).

86.12(5) *Clearance releases the lien.*

a. *In general.* Two inheritance tax liens have been created by statute to secure the payment of an inheritance tax. The lien created by Iowa Code section 450.7 secures the payment of the tax imposed by Iowa Code section 450.3, regardless of whether the tax is based on market value in the ordinary course of trade, the alternate value or special use value. Iowa Code section 450B.6 creates a second lien to secure the additional inheritance tax that may be due by reason of the early disposition or early cessation of the qualified use of special use valuation property.

b. *The section 450.7 lien.* Effective May 20, 1999, a ten-year statutory lien for inheritance tax on all estates is imposed regardless of whether the decedent died prior to or subsequent to July 1, 1995. A lien is imposed for the inheritance tax on all the property of the estate or owned by the decedent for a period of ten years from the date of death of the decedent, unless a remainder or deferred interest is at issue, then the statutory period for the lien may be extended beyond the ten-year limitation to accommodate the term of the interest. For exceptions and additional information, see Iowa Code section 450.7. A tax clearance releases the lien imposed by Iowa Code section 450.7 on all of the property in the gross estate that is reported on the return.

Effective for estates of decedents dying on or after July 1, 1984, if a tax, or additional tax, is found to be due after the issuance of an inheritance tax clearance, the lien under Iowa Code section 450.7 does not have priority against subsequent mortgages, purchases or judgment creditors, unless the department gives notice of the lien by recording the notice in the office of the recorder of the county where the estate is probated, or in the county where the property is located, if the estate has not been administered. As a result, if the department has issued an inheritance tax clearance, an examiner of real estate or personal property titles can rely on this clearance as a release of the inheritance tax lien even though additional tax may be due. This subrule only pertains to the security for the tax under the lien provisions of Iowa Code section 450.7. Other provisions for security for payment of the tax such as judgment liens, mortgages, bonds and distress warrants, are not affected by this subrule. See Iowa Code section 450B.6 and subrule 86.8(15) for the lien for additional tax on property which has been valued at its special use value.

This subrule can be illustrated by the following example:

EXAMPLE: Decedent A died August 15, 1994, a resident of Iowa. By will A devised a 160-acre farm to nephew B and all personal property to niece C. The net estate consisted of the farm with a fair market value of \$2,000 per acre, or \$320,000 and personal property worth \$320,000. On May 24, 1995, the inheritance tax return was filed and tax of \$88,000 (\$44,000 for each beneficiary) was paid. The department issued its unqualified inheritance tax clearance on June 13, 1995. On July 5, 1995, C pledges some corporate stock inherited from A as security for a bank loan. On August 1, 1995, additional personal property was discovered worth \$10,000 ($\$10,000 \times 15\% = \$1,500$) and an amended inheritance tax return was filed without remittance. On August 15, 1995, the department filed an inheritance tax lien for the \$1,500 additional tax plus interest (no penalty was imposed because 90 percent of the tax was timely paid).

In this example, the bank's lien on the pledged corporate stock is superior to the inheritance tax lien under Iowa Code section 450.7, because at the time the stock was pledged (July 5, 1995), the department had not filed its lien for the additional tax owing. Since only C owed additional tax, B's share of the estate was not subject to the lien filed August 15, 1995.

c. The section 450B.6 lien. This lien has no application to estates of decedents dying prior to July 1, 1982. In estates of decedents dying on or after July 1, 1982, the lien only applies to the property which has been specially valued under Iowa Code chapter 450B. A clearance certifying full payment of the additional inheritance tax imposed by Iowa Code section 450B.3 releases the lien on the property which was subject to the additional tax. Since the lien imposed by Iowa Code section 450B.6 expires automatically ten years after the decedent's death on property remaining in qualified use during the ten-year period, a tax clearance is not required.

86.12(6) Distribution of the clearance. Effective for estates of decedents dying on or after July 1, 1983, only an original inheritance tax clearance will be issued by the department. The personal representative is required to designate on the return who is to receive the clearance. If the return fails to designate a recipient, the clearance will be sent to the clerk of the district court.

Rules 86.9(450) to 86.12(450) are intended to implement Iowa Code chapter 17A and sections 450.1 as amended by 1999 Iowa Acts, chapter 152, section 32, 450.7 as amended by 1999 Iowa Acts, chapter 151, section 45, 450.27 as amended by 1999 Iowa Acts, chapter 152, section 33, and Iowa Code sections 450.5, 450.58, 450.64, 450B.2, 450B.3, 450B.6, 633.477, and 633.479.

701—86.13(450) No lien on the surviving spouse's share of the estate. Effective for estates of decedents dying on or after January 1, 1988, no inheritance tax lien is imposed on the share of the decedent's estate passing to the surviving spouse. In addition, effective for estates of decedents dying on or after July 1, 1997, no inheritance tax lien is imposed on the share of the decedent's estate passing to the decedent's parents, grandparents, great-grandparents, and other lineal ascendants, children (including legally adopted children and biological children entitled to inherit under the laws of this state), grandchildren, great-grandchildren, and other lineal descendants and stepchildren.

This rule is intended to implement Iowa Code sections 450.7(1) and 450.12 as amended by 1997 Iowa Acts, Senate File 35.

701—86.14(450) Computation of shares. The following areas of the law should be applied when computing the shares of an estate for the purpose of Iowa inheritance tax:

86.14(1) Right to take against the will. In the event that a decedent dies with a will, a surviving spouse may elect to take against the will and receive a statutory share in real and personal property of the decedent as designated by statute. If a surviving spouse elects to take against the will, this election nullifies gifts to the surviving spouse set forth in the decedent's will. For details regarding this election and statutory share, see Iowa Code sections 633.236 to 633.259 and *In the Matter of Campbell*, 319 N.W.2d 275, 277 (Iowa 1982).

86.14(2) Family settlements. Beneficiaries of an estate may contract to divide real or personal property of the estate, or both, in a manner contrary to the will of the decedent. The court of competent jurisdiction may approve the settlement contract of the beneficiaries. However, the department is not a party to the contract and is not bound to compute the shares of the estate based on the settlement contract. Instead, the department must compute the shares of the estate based upon the terms of the decedent's will, unless a court of competent jurisdiction determines that the will should be set aside. See *In re Estate of Bliven*, 236 N.W.2d 366 (Iowa 1975).

86.14(3) Order of abatement. Shares to be received by the beneficiaries of an estate are subject to abatement for the payment of debts, charges, federal and state estate taxes in the order as provided in Iowa Code section 633.436.

86.14(4) Contrary order of abatement. An order of abatement contrary to that provided in Iowa Code section 633.436 is provided by statute. For instance, if a provision of a will, trust or other testamentary instrument explicitly directs an order of abatement contrary to Iowa Code section 633.436 or a court of competent jurisdiction determines order of abatement due to a devise that would result in an order

of abatement contrary to Iowa Code section 633.436, then the order of abatement indicated is to be followed. For additional information regarding contrary provisions of abatement, see Iowa Code section 633.437. For details regarding marital share and contrary order of abatement see, *Estate of Lois C. Olin*, Docket No. 92-70-1-0437, Letter of Findings (June 1993).

86.14(5) *“Stepped-up” basis.* If a decedent’s will provides that taxes are to be paid from the residue of the estate and not the respective beneficial shares, a “stepped-up” basis will be utilized when computing the shares which will result in the appropriate beneficiaries’ shares to include the tax obligation that was paid as an additional inheritance. A “stepped-up” basis is based on gifts prior to the residual share; shares paid out of the residue are not stepped-up.

EXAMPLE: Decedent’s will gives \$1,000 to a nephew and directs that the inheritance tax on this bequest be paid from the residue of the estate. The stepped-up share is computed as follows:

Tax: $\$1,000 \times 10\% = \100 . Divide the tax by the difference between the tax rate and 100 percent (90 percent in this example): $\$100 \text{ divided by } 90\% = \111.11 . Add the stepped-up tax of \$111.11 to the original bequest of \$1,000. This results in a stepped-up share of \$1,111.11, which allows the nephew to keep \$1,000 after the tax is paid.

86.14(6) *Antilapse provision and the exception to the antilapse statute.* Iowa Code sections 633.273 and 633.274 set forth guidance on the allocation of property in situations in which a lapse in inheritance may occur. Iowa Code section 633.273 provides that when a devisee predeceases a testator, the issue of the devisee inherits the property, per stirpes, unless from the terms of the will, the intent is clear and explicit to the contrary. However, Iowa Code section 633.274 is an exception to Iowa Code section 633.273. If the spouse of the testator predeceases the testator, the inheritance shall lapse, unless the terms of the will clearly and explicitly provide to the contrary. For details regarding the provisions, please see the cited statutes.

86.14(7) *Disclaimer.* A person who is to succeed to real or personal property may refuse to take the property by executing a binding disclaimer which relates back to the date of transfer. Unless the transferor of the property has otherwise provided, disclaimed property passes as if the disclaimant has predeceased the transferor. To be valid, a disclaimer must be in writing and state the property, interest or right being disclaimed, the extent the property, right, or interest is being disclaimed, and be signed and acknowledged by the disclaimant. The disclaimer must be received by the transferor or the transferor’s fiduciary not later than nine months after the later of the date in which the property, interest or right being disclaimed was transferred or the date the disclaimant reaches 18 years of age. A disclaimer is irrevocable from the date of its receipt by the transferor or the transferor’s fiduciary. For additional details regarding disclaimers, please see Iowa Code Supplement chapter 633E.

Effective for estates with decedents dying on or after July 1, 2004, disclaimers are to be filed in compliance with the Iowa uniform disclaimer Act, Iowa Code Supplement chapter 633E. This Act sets forth new requirements for valid disclaimers. Criteria will be based on the type of property or the interest being disclaimed. General criteria for disclaimers have not changed. To be valid, a disclaimer must be in writing or be stored in electronic record or other medium that is retrievable, declare the disclaimer, describe the interest or power disclaimed, be signed by the person making the disclaimer, and be filed. A partial disclaimer may be expressed as a fraction, percentage, monetary amount, term of years, limitation of a power, or any other interest in property of the estate.

A disclaimer becomes irrevocable when it is delivered, filed, or when it becomes effective, whichever occurs later. Delivery of a disclaimer may generally be made by personal delivery, first-class mail, or any other method likely to result in its receipt. However, specific interests being disclaimed require specific means of delivery. For explicit information regarding delivery of a disclaimer based on interest being disclaimed, see Iowa Code Supplement section 633E.12.

86.14(8) *Right of retainer.* If a distributee of an estate is indebted to the estate, whether the decedent dies testate or intestate, the personal representative has the right to offset the distributee’s share in the estate against the amount owed to the estate by the distributee. For additional information regarding this right of offset and retainer, see Iowa Code section 633.471.

86.14(9) *Deferred life estates and remainder interest.* A deferred estate generally occurs as the result of a decedent granting a life estate in property to one person with remainder of the property to another.

In such cases, the determination of the tax on the remainder interest to be received by the remainderman may be deferred until the determination of the previous life estate pursuant to Iowa Code section 450.46. Tax on a remainder interest that has been deferred is valued pursuant to Iowa Code section 450.37, with no reduction based on the previous life estate. Tax due on a deferred interest must be paid before the last day of the ninth month from the date of the death of life tenant pursuant to Iowa Code section 450.46. Penalty and interest is not imposed if the tax is paid before the last day of the ninth month from the date of the death of life tenant. If the death of the decedent occurred before July 1, 1981, the tax due on a deferred interest must be paid before the last day of the twelfth month from the date of the death of life tenant. Deferment may be elected due to the fact that the remainder interest is contingent and because the value of the remainder interest may be significantly altered from the time of the decedent's death until the death of the life tenant. A request for deferment may be made on a completed department form and the completed form, with any required documentation, may be filed with the department on or before the due date of the inheritance tax return. Failure to file a completed department form requesting a deferral of tax on the remainder interest with the inheritance tax return will allow the department to provide an automatic deferral for qualifying remainder interests.

If deferral is chosen, an inheritance tax clearance cannot be issued for the estate. Expenses cannot be used to offset the value of the deferred remainder interest. Based upon Iowa Code section 450.12, deductible expenses must be expenses paid by the estate. Expenses incurred by a deferred remainder interest would not qualify based on Iowa Code section 450.12 as deductible expenses. Pursuant to Iowa Code section 450.52, the owner of a deferred remainder interest may choose to pay the tax on the present value of the remainder interest and have the lien on such an interest removed prior to the termination of the previous life estate. If early termination of the deferred remainder interest occurs, the value of the remainder interest will be reduced by the value of remaining previous life estate.

If the tax on an estate is deferred, a bond may have to be filed with the proper clerk of the district court. This bond must remain effective until the tax on the deferred estate is paid. Failure to maintain or properly renew the bond will result in the bond's being declared forfeited, and the amount collected. For additional details regarding obtaining a bond, see Iowa Code sections 450.49 and 450.50.

86.14(10) Credit on prior transfers. A credit is allowed for inheritance tax paid by certain beneficiaries that have received shares from a prior estate. The credit can be claimed only by the brother, sister, son-in-law and daughter-in-law of the decedent. The decedent in whose estate the credit is to be used must have died within two years of the death of the decedent in whose estate the tax for which the credit is requested was paid and the property inherited. The credit is subject to two limitations:

a. The maximum credit allowed cannot exceed the amount of the prior inheritance tax that was paid on the property in the prior estate. In other words, the inheritance tax the present decedent paid on the property in the prior estate must be prorated on the basis such property bears to the total property inherited in the prior estate; and

b. The amount of the credit cannot exceed the tax generated in the current estate on the property which was inherited from the prior estate. This means that the tax in the current estate must be apportioned on the basis the prior estate property bears to the total property inherited by the beneficiary in the second estate. The credit cannot exceed this apportioned amount.

EXAMPLE 1: *Limitation—maximum credit allowed cannot exceed the amount of the prior inheritance tax that was paid on the property in the prior estate.*

First decedent, Sister, has two siblings. Her property passes to two brothers (A and B). Her property includes:

Real estate	\$400,000
Cash, etc.	\$250,000
Expenses	\$150,000

Each brother inherits \$250,000. The tax due from each brother is \$21,375.

Brother B dies one year and two months after Sister. He leaves everything to Brother A.

Brother B's property includes:

½ interest in Sister's real estate (current value)	\$225,000
Full interest in his own real estate	\$500,000
½ interest in Sister's cash, etc.	\$ 50,000
Full interest in his own cash, etc.	\$500,000
Expenses	\$200,000

Brother A inherits \$1,075,000 with a current tax due of \$103,875. Reduce the current tax due, \$103,875, by the amount of tax paid in the prior estate, \$21,375. The result is \$82,500.

Percentage of Brother A's tax of \$103,875 generated by Sister's property included in Brother B's estate:

$$\$275,000/\$1,075,000 = 25.58\%$$

$$\$103,875 \times 25.58\% = \$26,571.23$$

Maximum credit cannot be more than the tax paid in the prior estate, \$21,375. The tax due in this estate is \$82,500.

EXAMPLE 2: Limitation—amount of credit cannot exceed the tax generated in the current estate on the property which was inherited from the prior estate.

First decedent, Sister, has two siblings. Her property passes to two brothers (A and B). Her property includes:

Real estate	\$400,000
Cash, etc.	\$250,000
Expenses	\$150,000

Each brother inherits \$250,000. The tax due from each brother is \$21,375.

Brother B dies one year and two months after Sister. He leaves everything to Brother A.

Brother B's property includes:

½ interest in Sister's real estate (current value)	\$225,000
Full interest in his own real estate	\$500,000
½ interest in Sister's cash, etc.	\$ 50,000

Full interest in his own cash, etc.	\$500,000
Expenses	\$200,000

Brother A inherits \$1,075,000 with a current tax due of \$103,875. Reduce the amount of the current tax due, \$103,875, by the tax paid in the prior estate, \$21,375. The result is \$82,500.

\$1,075,000 less prior estate properties worth \$275,000 equals \$800,000. Tax would equal \$76,375.

The greater of the two computations (\$82,500 v. \$76,375) is the tax due in the estate. \$82,500 would be due.

EXAMPLE 3: *Two-year requirement.* Same facts as above, except that Brother B dies two years and two months after the date of death of Sister. Tax is \$103,875 with no reduction since it is over the two-year limitation.

EXAMPLE 4: *Multiple beneficiary issues.* Same facts as above, except that beneficiaries of Brother B have changed. If there are multiple beneficiaries in the second estate, only the beneficiaries that are brother, sister, son-in-law, or daughter-in-law relationships to the prior decedent can utilize the credit. The credit is then determined by the property value passing in this estate that can be identified as being inherited by this decedent from a prior estate.

Brother B dies one year and two months after his Sister. He leaves his real estate to Brother A and the residual assets to his two nieces.

Brother B's share of prior decedent's (Sister's) estate equals \$725,000. Tax equals \$68,875. Reduce the current tax due, \$68,875, by the tax paid in the prior estate, \$21,375. The result is \$47,500.

Niece 1's share equals \$175,000. Tax equals \$22,250.

Niece 2's share equals \$175,000. Tax equals \$22,250.

Total tax for Brother B's estate with no reductions equals \$113,375.

Total tax with Brother B's reduced tax is \$92,000.

Computation without the prior decedent's (Sister's) property that passes to a qualified heir:

Brother B's share would be \$500,000. Tax equals \$46,375.

Niece 1's share remains the same since she is not a qualified heir. Tax equals \$22,250.

Niece 2's share remains the same since she is not a qualified heir. Tax equals \$22,250.

Total tax for this computation is \$90,875.

The greater of the two computations is \$92,000. \$92,000 would be due.

86.14(11) Prorated cash bequests. If the distribution of an estate includes pecuniary legacies with an estate with property located in and outside Iowa, or the estate includes specific bequests from a fund containing property located in and outside Iowa, then the Iowa inheritance tax liability for those legacies or bequests will be based on the pro rata portion of the property of the estate located in Iowa. For further

details see *Estate of Dennis M. Billingsley*, Iowa District Court of Emmet County, Case No. 13394 (July 15, 1982).

This rule is intended to implement Iowa Code chapter 450, Iowa Code Supplement chapter 633E, and 2005 Iowa Acts, chapter 38.

¹ Two ARCs

CHAPTER 87
IOWA ESTATE TAX

[Prior to 12/17/86, Revenue Department[730]]

701—87.1(451) Administration.

87.1(1) *Applicability.* This chapter is applicable only for dates of death occurring prior to January 1, 2005.

87.1(2) *Definitions.* The following definitions cover 701—Chapter 87 and are in addition to the definitions contained in Iowa Code section 451.1.

“*Administrator*” means the administrator of the compliance division of the department of revenue.

“*Compliance division*” is the administrative unit of the department created by the director to administer the inheritance, estate, generation skipping transfer, and fiduciary income tax laws of the state.

“*Department*” means the Iowa department of revenue.

“*Director*” means the director of revenue.

“*Tax*” means the Iowa estate tax imposed by Iowa Code chapter 451.

“*Taxpayer*” means the personal representative of the decedent’s estate as defined in Iowa Code subsection 633.3(29) and any other person or persons liable for the payment of the federal estate tax under 26 U.S.C. Section 2002.

87.1(3) *Delegation of authority.* The director delegates to the administrator of the compliance division, subject always to the supervision and review by the director, the authority to administer the Iowa estate tax. This delegated authority specifically includes, but is not limited to: the determination of the correct Iowa estate tax liability; making assessments against the taxpayer for additional tax due; authorizing refunds of excessive tax paid; executing releases of the tax lien; and the determination of reasonable cause for failure to file and timely pay the tax due and granting extensions of time to file the return and pay the tax due. The administrator of the compliance division may delegate the examination and audit of tax returns to the supervisors, examiners, agents and any other employees or representatives of the department.

This rule is intended to implement Iowa Code sections 421.2, 421.4 and chapter 451.
[ARC 1545C, IAB 7/23/14, effective 8/27/14]

701—87.2(451) Confidential and nonconfidential information.

87.2(1) *Confidential information.* Federal tax returns, federal return information, inheritance tax returns, and the books, records, documents and accounts of any person, firm or corporation, including stock transfer books, requested to be submitted to the department for the enforcement of the Iowa estate tax law, shall be deemed and held confidential by the department, subject to public disclosure only as provided by law. See 26 U.S.C. Section 6103 pertaining to the confidentiality and disclosure of federal tax returns and federal return information. See rule 701—6.3(17A).

87.2(2) *Information not confidential.* Copies of wills, probate inventories, trust instruments, deeds, release of a real estate lien, and other documents which are filed for public record are not deemed confidential by the department.

This rule is intended to implement Iowa Code chapter 22, and Iowa Code chapters 450 and 451 as amended by 1992 Iowa Acts, Second Extraordinary Session, chapter 1001.

701—87.3(451) Tax imposed, tax returns, and tax due.

87.3(1) *Tax imposed and tax due.* Iowa Code sections 451.2 and 451.8 impose a tax equal to the maximum amount of credit allowable under 26 U.S.C. Section 2011 of the Internal Revenue Code for state death taxes paid on property included in the gross estate of the decedent. The credit allowable under the federal statute is not limited to the Iowa inheritance tax imposed under Iowa Code chapter 450 on the property in the decedent’s gross estate, but also includes any other estate, legacy or succession taxes imposed by the state on the property. The Iowa estate tax qualifies as an estate tax specified in the federal credit statute. However, the tax due and payable, as distinguished from the tax imposed, is

the maximum credit allowable under 26 U.S.C. Section 2011, less the Iowa inheritance tax paid on the property included in the gross estate of the decedent.

Therefore, the Iowa estate tax due and payable is the amount which the maximum credit allowable under 26 U.S.C. Section 2011 exceeds the Iowa inheritance tax paid.

87.3(2) *Duty of the taxpayer.* The taxpayer does not have the option of electing on the federal estate return, to claim only the Iowa inheritance tax paid on property included in the gross estate of the decedent, or to claim the maximum credit allowed under 26 U.S.C. Section 2011 of the Internal Revenue Code. The maximum credit allowable under the federal statute must be claimed on the federal estate tax return. If the taxpayer has filed a federal estate tax return claiming an amount of credit less than the maximum credit allowable, the taxpayer has the duty to amend the federal estate tax return and claim the maximum credit allowable.

If there is a change in the amount of inheritance tax paid or in the amount of the maximum federal credit allowable for state death taxes paid (such as the result of a federal audit or an audit of the inheritance tax return) which results in an estate tax, or additional estate tax due, the taxpayer has the duty to promptly report the change to the department on an amended return, and pay the tax, or additional tax due, together with any penalty and interest. See Iowa Code section 451.8.

Effective July 1, 1998, there is no longer a requirement for safe deposit boxes to be inventoried and reported to the department prior to the delivery of the assets to the personal representative, transferee, joint owner or beneficiary.

87.3(3) *Form of return.* The final inheritance tax return form provided for in 701—subrule 86.2(2) shall be the return for reporting the Iowa estate tax due. The amount of the Iowa estate tax due shall be listed separately on the return from the amount of the inheritance tax shown to be due.

87.3(4) *Liability for the tax.* The personal representative of the decedent's estate and any person, including a trustee, in actual or constructive possession of any property included in the gross estate, have the duty to file the return with the department and pay the tax due. The shares of heirs and beneficiaries abate for the payment of the tax as provided in Iowa Code sections 633.436 and 633.437 in the same manner as they abate for the payment of the federal estate tax. See *Bergren v. Mason*, 163 N.W.2d 374 (Iowa 1968) for the proper method to abate shares to pay the federal estate tax.

Effective for estates with decedents dying on or after July 1, 1999, all the provisions of Iowa Code chapter 450 regarding liens, determination, imposition, payment, collection of inheritance tax, computation and imposition of penalty and interest upon delinquent taxes and the confidential aspects of the tax return also apply to the administration of estate tax imposed under this chapter, except to the extent that such rules may conflict with Iowa Code chapter 451 and the rules set forth in this chapter. The exceptions of the lien provisions found in Iowa Code section 450.7 do not apply to this chapter.

87.3(5) *Computation of the tax.*

a. Iowa decedent. If the decedent was a resident of Iowa at the time of death and all of the property included in the gross estate has a situs in Iowa, the total amount allowable as a credit under 26 U.S.C. Section 2001 shall be the tax imposed. If part of the gross estate of an Iowa resident decedent consists of property with a situs at death in a state other than Iowa, the tax imposed shall be prorated in the ratio that the Iowa property included in the gross estate bears to the total gross estate.

EXAMPLE 1.

Decedent dies July 3, 1997, a resident of Iowa. The estate was bequeathed in full to inheritance tax-exempt children, except for a \$10,000 bequest to one niece.

Total gross assets =	\$1,200,000
Less debts and expenses (except federal estate tax)	(300,000)
Federal adjusted gross estate =	\$900,000
Federal tax computation:	
gross federal estate tax =	306,800
less 1997 unified credit	(192,800)
less credit for state death tax paid	(27,600)

Net federal estate tax due =	\$86,400
Iowa tax computation:	
Inheritance tax on niece's bequest	1,000
Iowa estate tax equals the federal credit for state death taxes paid	27,600
Less inheritance tax due	(1,000)
Estate tax due	26,600
Total Iowa tax due (1,000 + 26,600) =	\$27,600

All of the decedent's assets have a situs in Iowa; therefore, the full amount of the credit allowable for state death taxes, less the Iowa inheritance tax, is the Iowa estate tax.

For simplicity in Example 2, the values used are the same for federal and state purposes and the debts and expenses are charged to the Iowa estate, even though under Iowa Code section 450.12, certain Minnesota expenses are not deductible in computing the Iowa inheritance tax. All liabilities, except mortgages, are prorated.

EXAMPLE 2.

Decedent dies July 3, 1997, a resident of Iowa, owning a vacation home in Minnesota. The estate was bequeathed in full to inheritance tax-exempt children, except for a \$10,000 bequest to one niece.

Total gross assets:	
Iowa	\$950,000
Minnesota	250,000
Total	1,200,000
Less debts and expenses (except for federal estate taxes)	(300,000)
Federal adjusted gross estate =	900,000
Federal tax computation:	
gross federal estate tax =	306,800
less 1997 unified credit	(192,800)
less credit for state death tax paid	(27,600)
Net federal estate tax due =	86,400
Iowa tax computation:	
Inheritance tax on niece's bequest	1,000
Iowa estate tax	
Proration:	
Iowa \$950,000	
Total \$1,200,000 = 79.17%	
Iowa portion of federal credit for state death taxes paid:	
\$27,600 × 79.17% =	\$21,850.92
Less inheritance tax due	(\$1,000.00)
Iowa estate tax =	\$20,850.92
Total Iowa tax due (1,000 + 20,850.92) =	\$21,850.92

b. Nonresident decedent. If the gross estate of a nonresident decedent includes property with a situs in the state of Iowa, the tax imposed is the maximum amount of the federal credit for state death taxes allowable prorated on the basis the Iowa situs property in the gross estate bears to the total gross estate. For simplicity in the following two examples, it is assumed the values are the same for federal and state purposes and the debts, expenses and federal estate tax are prorated between Iowa and Arizona even though certain liabilities are not prorated under Iowa Code section 450.12.

EXAMPLE 1.

Decedent died a resident of Arizona on July 3, 1997. The estate was bequeathed in full to tax-exempt children.

Total gross estate:	
Iowa real estate	\$750,000
Other property	450,000
	<hr/>
Total gross estate:	1,200,000
Less debts and expenses (except federal estate tax)	(300,000)
	<hr/>
Net adjusted gross estate =	900,000
Federal tax computation:	
Gross federal estate tax =	306,800
Less 1997 unified credit	(192,800)
Less credit for state death tax paid	(27,600)
	<hr/>
Net federal estate tax due =	86,400
Iowa estate tax computation:	
Inheritance tax =	-0-
Iowa estate tax proration:	
Iowa gross \$750,000	
Total gross \$1,200,000 = 62.50%	
Iowa portion of federal credit for state death tax paid: $27,600 \times 62.50\%$	
Iowa estate tax =	\$17,250

EXAMPLE 2.

Decedent died a resident of Arizona on July 3, 1997, with the same property as set forth in Example 1. The estate consisted of four separate \$100,000 bequests to non-exempt individuals with the rest of the estate going to charity.

Iowa portion of each bequest: $\$100,000 \times 62.50\% =$	\$62,500
Tax on each bequest =	\$6,500
Total Iowa inheritance tax due: $\$6,500 \times 4 =$	\$26,000
Total estate tax due	-0-
Iowa tax due =	\$26,000

The Iowa real property is part of the residual estate from which bequests are paid. See Estate of Dennis M. Billingsley, Emmet County District Court, Case No. 13394 (July 15, 1982).

87.3(6) Value to use. For the purpose of computing the amount of the tax imposed in both resident and nonresident estates, the value of the property in the gross estate as determined for federal estate tax purposes, and not the value for state inheritance tax, or other state succession taxes, shall be the value on which the tax is computed.

87.3(7) Return and payment due date. For estates of decedents dying prior to July 1, 1986, the return shall be filed with the department and the tax due paid within 12 months after the decedent's death, unless an extension of time has been granted by the department, in which case the return shall be filed and the tax paid within the time prescribed by the extension of time. For estates of decedents dying on or after July 1, 1986, the return must be filed and the tax due paid on or before the last day of the ninth month after the death of the decedent, unless an extension of time has been granted, in which case the return must be filed and the tax due paid within the time prescribed by the extension of time. See 701—paragraph 86.2(6) "a" for the due date when the last day of the ninth month following death falls on a Saturday, Sunday, or legal holiday.

87.3(8) Extension of time. The extension of time form for inheritance tax provided for in 701—subrule 86.2(9) shall be the extension of time form for the Iowa estate tax. If an extension of time based on hardship is requested, evidence of such hardship is to be provided with the filing of the extension request. Unless the extension of time specifically states to the contrary, an extension of time to file the final inheritance tax return, and pay the tax due, shall also be an extension of time for the same period, to pay the Iowa estate tax. Provided, however, in no event shall the extension be for a

period of time greater than the period of time allowed for claiming the credit for state death taxes paid under 26 U.S.C. Section 2011 of the Internal Revenue Code. Provided, further, if the federal estate tax liability is paid prior to the expiration of an extension of time to pay the Iowa estate tax, the tax shall be due and payable at the time the federal estate tax is paid regardless of the extension of time period. The application for an extension of time to file the return and pay the tax must be filed with the department prior to the time the return is required to be filed and the tax paid.

87.3(9) Renumbered as 701—10.90(451), IAB 1/23/91.

87.3(10) Renumbered as 701—subrule 10.90(1), IAB 1/23/91.

87.3(11) Renumbered as 701—subrule 10.90(2), IAB 1/23/91.

87.3(12) Renumbered as 701—subrule 10.90(3), IAB 1/23/91.

87.3(13) *Interest—during an extension of time.* During the period of an extension of time, any unpaid tax shall draw interest at the rate set forth in rule 701—10.2(421). Payments made during an extension of time shall first be credited to penalty, interest and the balance, if any, to the tax due. Estate tax is still due for estates that have deferred Iowa inheritance tax. Any outstanding tax obligation remaining after the expiration of an extension of time shall be deemed delinquent and shall be subject to penalty and draw interest at the rate set forth in rule 701—10.2(421). No discount is allowed for early payment of the tax due.

This rule is intended to implement Iowa Code sections 421.27, 450.63, 451.2, 451.5, 451.6, 451.8, 451.12, and 1997 Iowa Acts, chapter 60, sections 1 and 2.

701—87.4(451) Audits, assessments and refunds. 701—subrules 86.3(1) to 86.3(3) providing for the audit, assessment and refund of the Iowa inheritance tax shall also be the rules for the audit, assessment and refund of the Iowa estate tax.

This rule is intended to implement Iowa Code sections 451.3, 451.6, 451.8, 451.10 and 451.12.

701—87.5(451) Appeals. Rule 701—86.4(450), providing for an appeal to the director and a subsequent appeal to district court under the Iowa Administrative Procedure Act in inheritance tax disputes, shall also be the rule for appeals in Iowa estate tax disputes. See 701—Chapter 7.

701—87.6(451) Applicable rules. Unless otherwise provided in this chapter, the rules found in 701—Chapter 86 apply to the administration of estate tax including, but not limited to, rules regarding statutes of limitations provided, however, that the estate tax is applicable only to deaths occurring prior to January 1, 2005.

This rule is intended to implement Iowa Code chapter 17A and section 450.94 and 2014 Iowa Acts, House File 2435, section 25.

CHAPTER 88
GENERATION SKIPPING TRANSFER TAX
[Prior to 12/17/86, Revenue Department[730]]

701—88.1(450A) Administration.

88.1(1) Definitions. The following definitions cover and supplement the definitions contained in Iowa Code section 450A.1.

“*Administrator*” means the administrator of the compliance division of the department of revenue.

“*Compliance division*” is the administrative unit of the department created by the director to administer the inheritance, estate, generation skipping transfer, and fiduciary income tax laws of the state.

“*Department*” means the department of revenue.

“*Director*” means the director of revenue.

“*Direct skip*” means the same as the term is defined in Section 2612(c) of the Internal Revenue Code.

“*Tax*” means the generation skipping transfer tax imposed by Iowa Code chapter 450A.

“*Taxable distribution*” means the same as the term is defined in Section 2612(b) of the Internal Revenue Code.

“*Taxable termination*” means the same as the term is defined in Section 2612(a) of the Internal Revenue Code.

“*Taxpayer*” means the transferee of the property subject to the generation skipping transfer in case of a taxable distribution or the trustee and the transferee in case of a taxable termination.

“*Transferor,*” “*trust,*” “*trustee,*” and “*interest*” mean the same as those respective terms are defined in Section 2652 of the Internal Revenue Code.

88.1(2) Delegation of authority. The director delegates to the administrator of the compliance division, subject always to the supervision and review by the director, the authority to administer the generation skipping transfer tax. This delegated authority specifically includes, but is not limited to: the determination of the correct generation skipping transfer tax liability; making assessments against the taxpayer for additional tax due; authorizing refunds of excessive tax paid; executing releases of the tax lien; and granting extensions of time to file the return and pay the tax due. The administrator of the compliance division may delegate the examination and audit of the tax returns to such supervisors, examiners, agents and any employees or representatives of the department as the administrator may designate.

This rule is intended to implement Iowa Code sections 421.2 and 421.4 and chapter 450A.

701—88.2(450A) Confidential and nonconfidential information.

88.2(1) Confidential information. Federal tax returns, federal return information, Iowa generation skipping transfer tax returns, and the books, records, documents and accounts of any person, firm or corporation, including stock transfer books, requested to be submitted to the department for the enforcement of the generation skipping transfer tax law, shall be deemed and held confidential by the department, subject to public disclosure only as provided by law. See 26 U.S.C. Section 6103 pertaining to the confidentiality and disclosure of federal tax returns and federal return information. See rule 701—6.3(17A).

88.2(2) Information not confidential. Copies of wills, release of real estate liens, probate inventories, trust instruments, deeds and other documents which are filed for public record are not deemed confidential by the department.

This rule is intended to implement Iowa Code chapters 22 and 450A.

701—88.3(450A) Tax imposed, tax due and tax returns.

88.3(1) Tax imposed—general rule. Iowa Code section 450A.2 imposes tax equal to the maximum federal credit allowable (5 percent) under 26 U.S.C. Section 2604 of the Internal Revenue Code for state generation skipping transfer taxes paid on property included in certain generation skipping transfers. The tax imposed by Iowa Code section 450A.2 qualifies as a generation skipping transfer tax specified

in the federal credit statute. The federal credit is not available for every generation skipping transfer taxable under 26 U.S.C. Section 2601 of the Internal Revenue Code. The credit is available only on those generation skipping transfers occurring at the same time as, and as the result of, the death of an individual.

Therefore, a federal generation skipping transfer occurring at the time of a gift of property which is unrelated to the death of an individual is not eligible for the federal credit allowed by Section 2604 of the Internal Revenue Code.

88.3(2) *Tax imposed—limitation.* Iowa Code section 450A.14 imposes a limitation on the amount of tax imposed under Iowa Code section 450A.2. The taxpayer's total federal and state generation skipping tax liability cannot be greater than the tax payable had chapter 450A not been enacted.

88.3(3) *Tax due—no credit for inheritance tax paid.* Any inheritance tax paid on property included in the estate of the individual whose death is the event imposing the federal tax is not a credit against the generation skipping transfer tax imposed by Iowa Code section 450A.2, although the inheritance tax is a credit against the Iowa estate tax imposed by Iowa Code chapter 451 on this property.

Nor is the inheritance tax paid on the property in a prior estate which is now included in a taxable generation skipping transfer a credit against the tax imposed by Iowa Code section 450A.2. Therefore, the tax due is the maximum credit allowable under 26 U.S.C. Section 2604 of the Internal Revenue Code, subject to the limitation in subrule 88.3(2).

88.3(4) *Duty of the taxpayer.* It is the duty of the taxpayer to file the return prescribed by subrule 88.3(5) and pay the tax due within the time prescribed by law (taking into consideration any extension of time to file and pay). A copy of the federal generation skipping transfer tax return must be submitted to the department at the time the Iowa return is filed. The taxpayer shall keep books, records and accounts as are reasonably necessary to substantiate the amount of the federal tax and value of the property included in a generation skipping transfer subject to tax, and upon request the taxpayer shall furnish information to the department as may be reasonably necessary to enable the department to determine the correct tax due. It is the duty of the taxpayer to claim the maximum amount of the federal credit allowable on the federal generation skipping transfer tax return, subject to the limitation in subrule 88.3(2).

If there is a change in the amount of the maximum federal credit allowable, or the amount allowable under subrule 88.3(2), against the federal tax on a generation skipping transfer (such as a result of a federal audit or in the amount and value of the property included in a generation skipping transfer), the taxpayer has the duty to promptly report the change to the department on an amended return, and pay the tax, or additional tax due, together with any penalty and interest. See Iowa Code section 450A.11.

Effective July 1, 1998, there is no longer a requirement for safe deposit boxes to be inventoried and reported to the department prior to the delivery of the assets to the personal representative, transferee, joint owner or beneficiary.

88.3(5) *Form and due date of the return.* The form of the return for reporting the generation skipping tax to the department shall be in such form as may be prescribed by the director. It shall provide for such schedules of property subject to tax, deductible expenses, losses, and tax computation tables to conform as nearly as possible to the form of the federal generation skipping transfer tax return. The return must be filed with the department and the tax due paid on or before the last day of the ninth month following the death of the individual whose death is the event causing the imposition of the federal generation skipping transfer tax. If an extension of time has been granted, the return must be filed and any tax, penalty, and interest due must be paid on or before the expiration of the extension of time.

88.3(6) *Liability for the tax.* The transferee of property in a generation skipping transfer subject to tax is personally liable for the tax to the extent of the value of the property received determined under 26 U.S.C. Section 2624. In addition, the trustee and transferee of property in a taxable termination are personally liable for the tax attributable to such termination to the extent of the value of the property under their control. Value for the purpose of determining the extent of the liability of a transferee or trustee is determined at the time of the distribution or termination. Neither the individual's estate whose death is the event imposing the tax, nor its personal representative, is liable for the tax imposed (unless the personal representative is also the transferee or trustee of the property subject to tax).

88.3(7) *Situs of property.* For the purpose of the tax imposed by Iowa Code chapter 450A, the situs of intangible personal property included in a generation skipping transfer subject to tax is the state in which the transferor was a resident at the time of death or in the case the transferor is a trustee, the residence of the trustee at the time of the imposition of the federal generation skipping transfer tax. The situs of real and tangible personal property included in a transfer subject to tax is the state in which the property is located, regardless of the transferor's or trustee's place of residence.

88.3(8) *No reciprocity.* Iowa Code chapter 450A makes no provision for reciprocity to prevent taxation by more than one state of intangible personal property included in a taxable generation skipping transfer. Therefore, intangible personal property attributable to an Iowa transferor or trustee which may have acquired a business situs and may be subject to tax in another state (due to the location of bank accounts, stock certificates and like instruments) is not exempt from the Iowa tax simply for the reason it is subject to tax in another jurisdiction. See *Curry v. McCanless*, 307 U.S. 357, 83 L.Ed. 1339, 59 S.Ct. 900 (1939); *State Tax Commission of Utah v. Aldrich*, 316 U.S. 174, 86 L.Ed. 1358, 62 S.Ct. 1008 (1942).

88.3(9) *Tangible and intangible property—time of classification.* The classification of property as tangible or intangible is determined by the law of the state of the transferor's or trustee's residence. For the purpose of determining whether an Iowa generation skipping transfer tax is due, the classification of the property as tangible or intangible shall be made at the time of the death of the individual causing the generation skipping transfer. The classification of the property in a taxable transfer at the time of the original grantor's death is not determinative of whether the transferred property will be subject to tax upon the individual's death which caused the imposition of the tax. This rule is illustrated by the following two examples:

EXAMPLE 1. A executed a will in 1996 devising an Iowa farm in trust to pay the income to his son, B, for life, and upon B's death the trust is to terminate and the corpus paid to B's children, C and D, in equal shares. If upon B's death the Iowa farm is still part of the trust assets, the value of the farm is subject to the Iowa generation skipping transfer tax regardless of the state of residence of the transferor. However, if during B's lifetime the farm is sold and the proceeds placed in the trust, the trust assets are subject to the Iowa generation skipping transfer tax only if the property had a situs in Iowa at the time of death, because at B's death the trust assets are classified as intangible personal property.

EXAMPLE 2. A, a resident of Chicago, Illinois, by will devised \$500,000 in trust to pay the income to his son B, a resident of New York, for life and upon B's death the trust is to terminate and the corpus paid to B's children, C and D, in equal shares. If during B's lifetime the trust purchases an Iowa farm and it is part of the trust assets when B dies, the value of the farm is subject to the Iowa generation skipping transfer tax. Also, if at the time of B's death the trust assets are still classified as intangible, the trust assets would be subject to the Iowa tax if the trustee was an Iowa resident at the time of death.

NOTE: In the two examples it is assumed the generation skipping transfers are in excess of the \$1 million exemption.

88.3(10) *Computation of the tax.*

a. In general. The Iowa generation skipping tax is the maximum credit allowed by 26 U.S.C. Section 2604 against the amount of the federal generation skipping transfer tax. The maximum federal credit is 5 percent of the federal tax imposed on the transfer. In this respect, it differs from the federal credit for state death taxes paid under 26 U.S.C. Section 2011 which is a graduated percentage of the value of the property included in the federal adjusted taxable estate. As a result, the valuation of the property included in a generation skipping transfer is only relevant for computing the Iowa generation skipping transfer tax when it is used as the basis for prorating the federal generation skipping transfer tax, when the property subject to the generation skipping transfer tax has a situs in more than one state.

b. Computation of the tax—situs in more than one state. When part of the property included in a generation skipping transfer which is eligible for the credit for state generation skipping transfer tax has situs in Iowa and part in another state or states, the maximum federal credit which is allowed under 26 U.S.C. Section 2604 must be prorated among the states where the property has a situs. In this event, the Iowa generation skipping transfer tax is computed by multiplying the federal tax on the entire transfer by the 5 percent maximum federal credit allowable. This amount is then multiplied by a fraction of which

the value of the Iowa property is the numerator and the value of the total generation skipping transfer is the denominator. The resulting amount is the Iowa generation skipping transfer tax. The fact that other states where part of the property has a situs do not have a generation skipping transfer tax, or the state tax is a lesser percentage than the maximum federal credit allowable (5 percent), is not relevant to the computation of the Iowa tax.

This subrule can be illustrated by the following:

EXAMPLE. A generation skipping transfer occurs in an Illinois trust in 1996 by reason of the death of A. The property in the generation skipping transfer consists of \$650,000 in stocks and bonds and an Iowa farm worth \$240,000, for a total generation skipping transfer of \$890,000. Assuming the lifetime exemption does not apply, the federal generation skipping transfer tax is 55 percent of \$890,000, or \$489,500. The maximum federal credit allowable is 5 percent of \$489,500, or \$24,475. The Iowa portion of the maximum federal credit is:

$$\frac{\text{Iowa prop. } \$240,000}{\text{Total prop. } \$890,000} \times \$24,475 = \$6,600 \text{ which is the Iowa tax.}$$

In this example, the result would not change if Illinois did not have a generation skipping transfer tax or if its tax were a smaller percentage than the maximum 5 percent credit allowed by the federal statute.

88.3(11) Value to use. For the purpose of computing the amount of the tax imposed on generation skipping transfers when the property has a situs in Iowa and another state or states, the value of the transferred property as determined for federal generation skipping transfer tax purposes shall be the value on which the tax is prorated.

88.3(12) Extension of time. In the case of hardship, which is a factual determination made on a case-by-case basis, the director may grant an extension of time to file the return and pay the tax due for a period not to exceed ten years after the death of the individual whose death is the event causing the imposition of the federal generation skipping transfer tax. Provided, however, in no event shall the extension be for a period of time greater than the period of time allowed for claiming the credit allowed for state generation skipping transfer tax paid, allowable under 26 U.S.C. Section 2662. If the federal generation skipping transfer tax liability is paid prior to the expiration of an extension of time to pay the Iowa generation skipping transfer tax, the tax shall be due and payable at the time the federal generation skipping transfer tax is paid regardless of the extension of time period. The application for an extension of time to file the return and pay the tax due shall be in a form as the director may prescribe and must be filed with the department prior to the time the return is required to be filed and the tax due paid.

88.3(13) Discount. No discount is allowed for early payment of the tax due.

88.3(14) Penalties. See rule 701—10.6(421) for the calculation of penalty for deaths occurring on or after January 1, 1991.

88.3(15) Interest on tax due. All tax which has not been paid on or before the last day of the ninth month following the death of the individual whose death is the event imposing the federal generation skipping transfer tax draws interest at the rate prescribed by Iowa Code section 421.7, to be computed on a monthly basis with each fraction of a month counted as a full month. See rule 701—10.2(421) for the interest rate to use for a specific calendar year. Interest applies equally to tax that is delinquent and tax that is due under an extension of time to pay.

This rule is intended to implement Iowa Code sections 450A.2 to 450A.5 and 450A.8 to 450A.14. [ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—88.4(450A) Audits, assessments and refunds. 701—subrules 86.3(1) to 86.3(3) providing for the audit, assessment and refund of the Iowa inheritance tax shall also be the rules for the audit, assessment and refund of the Iowa generation skipping transfer tax.

This rule is intended to implement Iowa Code sections 450A.2, 450A.4, 450A.5, 450A.8 to 450A.12 and 450A.14.

701—88.5(450A) Appeals. Rule 701—86.4(450A) providing for an appeal to the director and a subsequent appeal to district court under the Iowa Administrative Procedure Act in inheritance tax

disputes shall also be the rule for appeals in Iowa generation skipping transfer tax disputes. See 701—Chapter 7.

This rule is intended to implement Iowa Code chapter 17A and sections 450.94 and 450A.12.

701—88.6(450A) Generation skipping transfers prior to Public Law 99-514. Public Law 99-514 repealed the federal generation skipping transfer tax retroactive to June 11, 1976, and provided for a refund of any federal generation skipping transfer tax that had been paid. As a result of this federal statute there is no Iowa generation skipping transfer tax on those transfers which are exempted from the federal tax under Public Law 99-514.

This rule is intended to implement Iowa Code chapter 450A and 1988 Iowa Acts, chapter 1028.

701—88.7(421) Applicability. This chapter is applicable only for dates of death occurring prior to January 1, 2005.

This rule is intended to implement 2014 Iowa Acts, House File 2435, section 25.

CHAPTER 89
FIDUCIARY INCOME TAX
[Formerly fiduciary rules ch 48, See IAB 9/30/81]
[Prior to 12/17/86, Revenue Department[730]]

701—89.1(422) Administration.

89.1(1) Definitions. The following definitions cover 701—Chapter 89 and are in addition to the definitions contained in Iowa Code section 422.4.

“*Administrator*” means the administrator of the compliance division of the department of revenue or the personal representative of an intestate estate.

“*Compliance division*” is the organizational unit of the department created by the director to administer the inheritance and fiduciary income tax laws.

“*Department*” means the department of revenue.

“*Director*” means the director of revenue.

“*Gross income*” includes any and all income prior to any deductions as set forth on the Iowa fiduciary return of income.

“*Personal representative*” means the executor, administrator or trustee of a decedent’s estate.

“*Tax*” means the income tax imposed on estates and trusts under Iowa Code section 422.6.

“*Taxable income*” is the income of the fiduciary and also includes distributions to beneficiaries as set forth on the Iowa fiduciary return of income.

“*Taxpayer*” means the executor, administrator or other personal representative of a decedent’s estate required to file a return for the estate and the decedent under Iowa Code sections 422.14 and 422.23. “Taxpayer” also means the trustee of a trust subject to tax under 26 U.S.C. Section 641 and required to file a return under 26 U.S.C. Section 6012(b), as well as the trustee of the bankruptcy estate of an individual under Chapter 7 or 11 of Title 11 of the United States Code.

89.1(2) Delegation of authority. The director delegates to the administrator of the compliance division, subject always to the supervision and review of the director, the authority to administer the fiduciary income tax. This authority specifically includes, but is not limited to: determining the correct fiduciary income tax liability; making tax liability assessments; issuing refunds; releasing tax liens; filing tax liability claims in probated estates and releasing the claims upon payment of the tax; and issuing the certificate of acquittance authorized by Iowa Code section 422.27. The administrator of the compliance division may delegate the examination and audit of tax returns to the supervisors, agents and employees and representatives of the department.

This rule is intended to implement Iowa Code sections 421.2, 421.4, 422.6, 422.23, 422.25, 422.26, 422.27 and 422.73.

[ARC 1545C, IAB 7/23/14, effective 8/27/14]

701—89.2(422) Confidentiality.

89.2(1) Confidential information. The state and federal returns and accompanying schedules, and the taxpayer’s books, records, documents and accounts of any person, firm or corporation are held confidential, except the information which is deemed a public record by state and federal law. See 26 U.S.C. Section 6103 of the Internal Revenue Code pertaining to the confidentiality and disclosure of federal tax returns and federal tax return information. See rules 701—6.3(17A) and 701—38.6(422) regarding the confidentiality of a decedent’s individual income tax returns.

89.2(2) Information not confidential. Copies of wills, probate inventories, trust instruments, deeds and other documents which are filed for public record are not confidential. The fact alone that a return has or has not been filed with the department is not confidential information. 1976 Op. Att’y. Gen. 679.

89.2(3) Documents to be filed.

a. *Estates of Iowa decedents.* A copy of the inheritance tax return and probate inventory required by Iowa Code section 633.361 and 701—subrule 86.2(2) (relating to inheritance tax) and a copy of the decedent’s will in testate estates shall be filed with the first fiduciary return of income, unless previously filed with the department for inheritance tax purposes.

b. Nonresident decedents—ancillary administration. If ancillary administration has been opened for the estate of a nonresident decedent, a copy of the inheritance tax return and probate inventory and a copy of the decedent's will in testate estates shall be filed with the department, subject to the same conditions and requirements in estates of resident decedents. If ancillary administration has not been opened for a nonresident decedent with Iowa taxable income, a copy of the inventory filed in the primary estate, or the portion of the inventory listing the property generating the Iowa income and the decedent's will in testate estates, must be filed with the department with the first fiduciary return of income.

c. Inter vivos trusts. Inter vivos trusts with a situs in Iowa and inter vivos trusts with a situs outside Iowa with Iowa taxable income shall submit to the department with the first fiduciary return the following: (1) a copy of the trust instrument; (2) a list of the trust assets (those generating Iowa taxable income in case of trusts with a situs outside Iowa); and (3) an estimate of the fair market value of each asset. If the trust instrument is amended or additional assets are added to the trust corpus (additional assets which generate Iowa taxable income in case of trusts with a situs outside Iowa), a copy of the amended items must be submitted to the department with the first fiduciary return of income following the change.

d. Testamentary trusts. If the estate was not reported for inheritance tax purposes, a copy of the decedent's will and a list of assets in the trust corpus in testamentary trusts with a situs both within and without Iowa must be submitted to the department with the first fiduciary return of income.

e. Safe deposit box. Effective July 1, 1998, there is no longer a requirement for safe deposit boxes to be inventoried and reported to the department prior to the delivery of the assets to the personal representative, transferee, joint owner or beneficiary.

89.2(4) Required records. The taxpayer shall keep records and accounts necessary to substantiate reportable income and deductions. Upon request, the taxpayer shall furnish the department documents, such as copies of tax returns, court orders, trust instruments, annual reports, canceled checks and like information, as may be reasonably necessary to enable the department to determine the correct tax liability. *Tiffany v. County Board of Review*, 188 N.W.2d 343, 349 (Iowa 1971). For taxpayers using an electronic data interchange process or technology also see 701—subrule 11.4(4).

This rule is intended to implement Iowa Code sections 422.25, 422.27, 422.28, 422.73 and 1997 Iowa Acts, chapter 60, sections 1 and 2.

701—89.3(422) Situs of trusts.

89.3(1) Testamentary trusts. The situs of a testamentary trust for tax purposes is the state of the decedent's residence at the time of death until the jurisdiction of the court in which the trust proceedings are pending is terminated. In the event of termination and the trust remains open, the situs of the trust is governed by the same rules as pertain to the situs of inter vivos trusts.

89.3(2) Inter vivos trusts. If an inter vivos trust is created by order of court or makes an accounting to the court, its situs is the state where the court having jurisdiction is located until the jurisdiction is terminated. The situs of an inter vivos trust which is subject to the grantor trust rules under 26 U.S.C. Sections 671 to 679 is the state of the grantor's residence, or the state of residence of the person other than the grantor deemed the owner, to the extent the income of the trust is governed by the grantor trust rules.

If an inter vivos trust (other than a trust subject to the grantor trust rules in 26 U.S.C. Sections 671 to 679) is not required to make an accounting to and is not subject to the control of a court, its situs depends on the relevant facts of each case. The relevant facts include, but are not limited to: the residence of the trustees or a majority of them; the location of the principal office where the trust is administered; and the location of the evidence of the intangible assets of the trust (such as stocks, bonds, bank accounts, etc.). The residence of the grantor of a trust, not subject to the grantor trust rules under 26 U.S.C. Sections 671 to 679, is not a controlling factor as to the situs of the trust, unless the person is also a trustee. A statement in the trust instrument that the law of a certain jurisdiction shall govern the administration of the trust is not a controlling factor in determining situs. The residence of the beneficiaries of a trust is also not relevant in determining situs.

89.3(3) Part-year trust. A trust that has its situs part of the year within Iowa and part of the same year outside of Iowa is to report its income on Iowa Form IA-1041. Essentially, to report the income, the trust

will be treated similarly to a nonresident or part-year resident for Iowa income tax purposes. To complete the return, the trust should complete page one of Form IA-1041, the income and deductions portions of the form. The income and deductions reported in these two portions of the form should include all the trust's income reported during the tax year. After the previous computation has been completed, then Schedule C of Form IA-1041 is completed to determine a nonresident/part-year resident credit similar to the calculation set forth in rule 701—42.5(422) for individual income tax.

This rule is intended to implement Iowa Code sections 422.6, 422.8, and 422.14.
[ARC 0398C, IAB 10/17/12, effective 11/21/12]

701—89.4(422) Fiduciary returns and payment of the tax.

89.4(1) *Form of return.* The form of the fiduciary return shall be prescribed by the director. It shall conform as nearly as possible to the federal fiduciary return.

89.4(2) *Required federal returns and schedules.* Nonresident estates with Iowa taxable income and trusts with situs outside Iowa with Iowa taxable income must submit a copy of the federal fiduciary return with the Iowa return. Estates of Iowa decedents and trusts with a situs in Iowa must submit copies of the federal schedules that substantiate gross income, deductions and ordinary and throwback distributions to beneficiaries with the Iowa return.

89.4(3) *Same form for nonresident estates and foreign situs trusts.* Nonresident estates and foreign situs trusts shall use the same form for reporting Iowa taxable income as prescribed for resident estates and trusts with a situs in Iowa.

89.4(4) *Accounting period—tax year.* The initial fiduciary return may reflect either a calendar or fiscal year accounting period, without the department's prior approval. If a fiscal year is elected, it may end on the last day of any month, except December, but in no case shall the fiscal year adopted be for a period longer than the last day of the month preceding the decedent's death or the month the trust was created. The accounting period for the purpose of the tax imposed by Iowa Code section 422.6 must be the same accounting period that is adopted for federal income tax purposes. This limitation is equally applicable to estates of resident and nonresident decedents and trusts with a situs within and without Iowa. If the taxpayer has not adopted a taxable year prior to the time the return is due to be filed and the tax paid, the taxable year is a calendar year until authorization is granted to change to a fiscal year. See 26 U.S.C. Sections 441 to 443, federal regulations Sections 1.441 - 1(g)(3) and 1.442.2.

The permissible taxable years are illustrated by the following examples:

EXAMPLE 1. Decedent died July 4, 1990. The taxable year for the estate commences the day after the decedent's death (July 5, 1990) and will end December 31, 1990, if a calendar year is adopted as the taxable year. If a fiscal year is adopted, it can end on July 31, 1990, or the last day of any future month (except December 31, 1990), but no later than June 30, 1991, subject to the condition that it is selected prior to the time the return and payment are originally due.

EXAMPLE 2. Grantor creates an irrevocable trust on July 27, 1989. On July 1, 1990, the trustee filed the initial fiduciary return of income, adopting at that time a taxable year ending November 30, 1989. Since the return was due March 17, 1990 (March 15 was a Saturday) for federal income tax purposes and March 31, 1990, for Iowa income tax purposes, it is delinquent and a fiscal year accounting period is disallowed and the trust taxable year is the calendar year.

89.4(5) *Short year returns.* If an estate or trust is in existence only a portion of the taxable year, a return must be filed for the partial year in accordance with subrule 89.4(6).

89.4(6) *Minimum filing requirements.*

a. General rule. A fiduciary return of income must be filed if the gross income of the estate or trust for the taxable year is \$600 or more, regardless of any tax liability.

b. Exception to the general rule. A final fiduciary return of income must be filed for the taxable year in which an estate or trust is closed, regardless of the amount of gross income, if an income tax certificate of acquittance is requested. The final fiduciary return of income constitutes an application for an income tax certificate of acquittance pursuant to Iowa Code sections 422.27, 633.477 and 633.479. For a certificate of acquittance to be received, the appropriate box on the final fiduciary return must be checked to request the certificate.

89.4(7) Amended returns. An amended return must be filed if there is a change in income or deductions that results in a tax or additional tax due, or in a change in income, deductions or credits distributable to a beneficiary. An amended return may be filed in lieu of a claim for refund when a change in reportable income or deductions results in a tax overpayment. See 701—subrules 43.3(8) and 43.3(15) for the period of time for making a claim for a refund of excess tax paid.

89.4(8) Return due date. The fiduciary return must be filed with the department and the tax due paid in full on or before the last day of the fourth month following the end of the taxable year. Payment of 90 percent of the tax due with the filing of a return will grant a taxpayer a six-month automatic extension of time to pay the remaining tax due. If the due date falls on a Saturday, Sunday or legal holiday, the due date is the next day which is not a Saturday, Sunday or legal holiday as defined in Iowa Code section 4.1. Returns not timely filed with 90 percent of the tax timely paid are subject to penalty as provided in rule 89.6(422).

89.4(9) Duties of the taxpayer.

a. Income of the estate or trust. A taxpayer must timely file a fiduciary return if the minimum filing requirements specified in subrule 89.4(6) are met and must pay 90 percent of the tax due. Receipt of the return with 90 percent of the tax due paid will result in an automatic six-month extension of time to pay the remaining tax due. The department is not required to file a claim for taxes in the estate proceedings and have the claim allowed before the tax is paid. *In re Estate of Oelwein*, 217 Iowa 1137, 1141, 251 N.W. 694 (1933); *Findley v. Taylor*, 97 Iowa 420, 66 N.W. 744 (1896). The personal representative of an estate must pay the tax on income from property in the personal representative's possession, prior to applying the income to estate obligations. See Iowa Code section 633.352.

b. Decedent's final individual income tax return. The executor, administrator, or other personal representative of the decedent's estate must file an individual income tax return for the decedent for the year of the decedent's death if the gross income attributable to the decedent for the part of the taxable year ending with death equals or exceeds the minimum filing requirements. See 701—subrules 39.1(1) to 39.1(3) and 39.1(5) for the minimum filing requirements for individual income tax. If the surviving spouse of a decedent has not remarried during the balance of the taxable year and has the same taxable year as the decedent, the personal representative of the decedent's estate may file a joint return with the surviving spouse for the taxable year of death. In the event of such an election, the joint return must include the surviving spouse's income for the entire taxable year and the decedent's income for the portion of the taxable year ending with death. Income attributable to property owned by the decedent and the decedent's rights to income received after the day of the decedent's death are income of the decedent's estate or the persons succeeding to the property or rights to income. See Iowa Code sections 633.350 to 633.353 for the circumstances under which the estate is charged with the income from the decedent's property or the decedent's rights to income. Income from property held by the decedent and others in joint tenancy received after the decedent's death is charged to the surviving joint tenants, not to the decedent's estate.

The final return for a decedent may be filed at any time after the decedent's death, but in no event later than the last day of the fourth month following the end of the decedent's normal taxable year. The final income tax return of the decedent, if the minimum filing requirements are met, must be filed prior to the time an income tax certificate of acquittance is requested, even though this may require the early filing of the return. Therefore, filing a joint return with the surviving spouse is precluded if the decedent's final return is required to be filed prior to the end of the normal taxable year.

c. Decedent's prior year returns. The personal representative of the decedent's estate is not limited to filing the decedent's final return and paying the tax due. In addition, the personal representative has the duty to file a return, if none was filed, and to pay any additional income tax owed by the decedent that may become due by reason of an audit of the decedent's income or prior year returns. The personal representative's duty to pay the tax, or additional tax, is limited to the probate property subject to the jurisdiction of the court. The probate property must be applied to the payment of the decedent's tax liability according to the order for paying debts and charges specified in Iowa Code section 633.425.

d. Withholding agent—general rule. The personal representative of a decedent's estate and the trustee of a trust shall withhold Iowa income tax from a distribution of Iowa taxable income to

beneficiaries who are nonresidents of Iowa. This withholding requirement applies to both Iowa and non-Iowa situs estates and trusts. See Iowa Code subsection 422.16(12) and 701—subrule 46.4(2), item “5,” for the duty to withhold. The amount of income tax to be withheld shall be computed either based on 5 percent of the taxable Iowa income distributed or according to tax tables provided by the department. See 701—subrule 46.3(3) for the required withholding form and return to be filed with the department.

e. Exception to the general rule. If a nonresident beneficiary of an estate or trust who is to receive a distribution of Iowa taxable income files with the department a nonresident declaration of estimated tax and pays the estimated tax on the income declared in full, 89.4(9) “d” does not apply to the amount of the income declared. A certificate of release from the duty to withhold will be issued to the withholding agent upon request. See Iowa Code sections 422.16(12) and 422.17 and 701—subrule 46.4(3) relating to the release certificate. In addition, an estimated payment of withholding can occur if a distribution is being made to a taxable beneficiary. An estimated payment of withholding should be based on 5 percent of the taxable Iowa income. It is the department’s policy to allow estimated payments of withholding to be paid directly to the department.

f. Withholding not required. Withholding is not required from the distribution made by estates and trusts of Iowa taxable income to beneficiaries who are residents of Iowa.

g. Beneficiary’s share of income, deductions and credits. After the final distribution of income for the taxable year, but prior to the date for filing a beneficiary’s individual income tax return, the personal representative of an estate and the trustee of a trust shall furnish each beneficiary receiving a distribution from an estate or trust a written statement specifying the amount and types of income subject to Iowa tax and the kinds and amounts of the deductions and credits against the tax. A copy of the federal schedule K-1, Form 1041, adapted to reflect Iowa taxable income, may be substituted in lieu of the statement.

h. Liability of a withholding agent. A withholding agent is personally liable for the amount of the tax required to be withheld under Iowa Code subsection 422.16(12) if the income tax liability of a nonresident beneficiary which is attributable to the distribution is not paid and, in addition, is personally liable for any penalty and interest due if the tax required to be withheld is not paid to the department within the time prescribed by law. See rules 701—44.1(422) to 44.4(422) for the application and computation of penalty and interest on income tax required to be withheld.

This rule is intended to implement Iowa Code sections 422.6, 422.8, 422.16, 422.21, 422.23, 422.25, 422.27, 633.352 and 633.425.

701—89.5(422) Extension of time to file and pay the tax.

89.5(1) Automatic extension of time to file.

a. For tax years beginning on or after January 1, 1986. An automatic two-month extension of time to file the fiduciary income tax return will be granted by the department if the requirements set out in subparagraphs (1) and (2) are met.

(1) Filing the extension application on or before the due date of the return. See subrule 89.4(8) for what constitutes timely filing.

(2) Payment of at least 90 percent of the tax by the due date. At least 90 percent of the tax required to be shown due must have been paid on or before the due date of the return. To determine whether or not 90 percent of the tax was “paid” on or before the due date, the aggregate amounts of tax credits applicable to the return plus the tax payments which were made on or before the due date are divided by the tax required to be shown due on the return. If the aggregate of the tax credits and the tax payments is equal to or greater than 90 percent of the tax required to be shown due, the taxpayer will have met the “90 percent” test and no penalty will be assessed.

If the time for filing is extended, interest as provided by law, from the date the return originally was required to be filed to the date of actual payment of the tax, is to be computed on the unpaid tax. See rule 701—10.2(421) for the statutory rate of interest commencing on or after January 1, 1982.

b. For tax years beginning on or after January 1, 1991. See 701—subrule 39.2(4).

89.5(2) Additional extension of time to file beyond the automatic extension. For tax years beginning on or after January 1, 1986. The department may grant an additional extension of time to file the

fiduciary return, not to exceed four months, provided an application for additional time is filed prior to the expiration of the automatic extension of time.

89.5(3) Extension of time for the decedent's final tax return. 701—subrule 39.2(4) which provides for extensions of time to file individual income tax returns will apply to the decedent's final tax return.

89.5(4) Form of application and place of filing. The application for an extension of time to file the fiduciary income tax return must be made on forms prescribed by the director. The application must be filed with the department prior to the date the return is due, directed to the Compliance Division, Examination Section, P.O. Box 10456, Des Moines, Iowa 50306.

This rule is intended to implement Iowa Code section 422.21.

701—89.6(422) Penalties. See rule 701—10.6(421) for the calculation of penalty for tax periods beginning on or after January 1, 1991.

[ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—89.7(422) Interest or refunds on net operating loss carrybacks.

89.7(1) Interest on unpaid tax. Tax not paid within the time prescribed by law, including the period during an extension of time, draws interest at the rate described in rule 701—10.2(421). Payments made are first credited to penalty and interest due and then to the tax liability. See *Ashland Oil Co. v. Iowa Department of Revenue and Finance*, 452 N.W.2d 162 (Iowa 1990).

89.7(2) Interest on refunds and tax paid prior to due date. For the purpose of determining the time interest begins to accrue, all income tax withheld, estimated tax paid and other tax paid prior to the due date shall be deemed to be paid on the last day the return is required to be filed disregarding any extensions of time to file the return and pay the tax.

89.7(3) Interest on a net operating loss carryback—the second calendar month period—on or after April 30, 1981. For net operating losses occurring in any of the taxable years ending on or after April 30, 1981, interest accrues on excess tax paid in a prior year, if the loss is carried back to such year, only after the close of the taxable year in which the loss occurs or on the first day of the second calendar month following the date the tax to be refunded was paid, whichever time is later.

This rule is intended to implement Iowa Code section 422.25.

[ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—89.8(422) Reportable income and deductions.

89.8(1) Application of the Internal Revenue Code. Iowa Code section 422.4(16) provides that taxable income of estates and trusts for Iowa income tax purposes is the same as taxable income for federal income tax purposes, subject to certain adjustments specified in Iowa Code sections 422.7 and 422.9. Therefore, the Internal Revenue Code is also Iowa law insofar as it relates to what constitutes gross income, allowable deductions and distributions, subject to the adjustments specified above. See *First National Bank of Ottumwa v. Bair*, 252 N.W.2d 723 (Iowa 1977).

For purposes of a distribution deduction under this chapter, an estate or trust shall receive a distribution deduction only for income taxable to Iowa. For example, municipal interest will be included in the distribution deduction because it is taxable to Iowa. U.S. government interest would not be included because it is not taxable to Iowa.

For tax years ending after August 5, 1997, if the trust is a qualified preneed funeral trust as set forth in Section 685 of the Internal Revenue Code and the trustee has elected the special tax treatment under Section 685 of the Internal Revenue Code, neither the trust nor the beneficiary is subject to Iowa income tax on income accruing to the trust.

89.8(2) Authority of federal court cases, regulations and rulings. The director has the responsibility to enforce and interpret the law relating to the taxes the department is obligated to administer, including those portions of the Internal Revenue Code which are Iowa law under Iowa Code section 422.4(16). Federal regulations may be interpreted by Iowa courts for state tax purposes. *In re Estate of Loudon*, 249 Iowa 1393, 1396, 92 N.W.2d 409 (1958). However, the construction of statutes by a court of the jurisdiction where the statute originated properly commands consideration and is highly persuasive. *Eddy v. Short*, 190 Iowa 1376, 1383, 179 N.W. 818 (1920), *In re Estate of Millard*, 251 Iowa 1282,

1292, 105 N.W.2d 95 (1960). Therefore, while federal court cases, regulations and rulings interpreting the Internal Revenue Code will be accorded every consideration, the department has the right to make its own interpretation of the Internal Revenue Code as to what constitutes taxable income for Iowa tax purposes, consistent with Iowa statutes and court decisions. Also see rule 701—41.2(422).

89.8(3) Reportable income in general—Iowa estates and trusts. Estates of Iowa resident decedents and trusts with a situs in Iowa must report all income received from sources within and without Iowa, regardless of whether the income is from real, personal, tangible or intangible property. See 89.8(11) “b” for the credit allowable against the Iowa tax for income tax paid to another state or country on income reported to Iowa for taxation.

89.8(4) Reportable income in general—foreign situs estates and trusts. Estates and trusts with a situs outside Iowa must report all income received from sources within and without Iowa, regardless of whether the income is from real, personal, tangible or intangible property. Foreign situs estates and trusts must also report that portion of the income which is from Iowa sources. Examples of Iowa source income include, but are not limited to: income from real and tangible personal property with a situs in Iowa, such as a farm and from a business located in Iowa; the capital gain portion of an installment sale contract of Iowa situs property; and wages, salaries and other compensation for services performed in Iowa, but received after the death of the decedent. Iowa source income would not include income from intangible personal property, such as annuities, interest on bank deposits, and dividends, unless the income was derived from a business, trade, profession or occupation carried on in Iowa. See paragraph 89.8(11) “d” for the credit allowed a foreign situs estate and trust for income earned outside Iowa.

89.8(5) Income from property subject to the jurisdiction of the probate court.

a. Probate property subject to possession by the personal representative. Income received on probate property after the decedent’s death is chargeable to the estate or to the person succeeding to the decedent’s property depending on whether the personal representative has the right to, or has taken possession of, the probate property producing the income. (Rev. Ruling 57-133, 1-CB 200 (1957).) If the personal representative has taken possession of or has the right to possession of a specific item of probate property, the income from this property is estate income, even though the personal representative is bound by law to distribute the income during the course of administration to a beneficiary. *Colthurst v. Colthurst*, 265 N.W.2d 590 (Iowa 1978); *In re Estate of Herring*, 265 N.W.2d 740 (Iowa 1978). The personal representative is charged with the income from this property for each taxable year until the property is distributed or otherwise disposed of. Iowa Code section 633.351 (probate code) specifies the personal representative shall take possession of the decedent’s personal property, except exempt property, and also the decedent’s real estate, except the homestead, if any one of the following conditions are met: if there is no distributee present and competent to take possession; if the real estate is subject to a lease; or if the distributee is present and competent and gives consent to possession. *Colthurst v. Colthurst*, 265 N.W.2d 590 (Iowa 1978); *In re Estate of Peterson*, 263 N.W.2d 555 (Iowa Ct. of Appeals 1977). In addition, Iowa Code section 633.386 (probate code) gives the personal representative authority to lease real estate (and therefore to take possession) in order to pay the debts and charges of the estate.

b. Income charged to the heir or beneficiary. Under Iowa law title to probate property, both real and personal, passes instantaneously on death to the heir or beneficiary. *In re Estate of Bliven*, 236 N.W.2d 366, 370 (Iowa 1975). If property is not subject to the personal representative’s right of possession under Iowa Code section 633.351 (probate code) and the personal representative has not exercised the right to sell, lease, mortgage or pledge real and personal property to pay debts and charges under Iowa Code section 633.386 (probate code), the income from this probate property is not estate income. It is income to the person succeeding to the property.

89.8(6) Income from nonprobate property. Income from property not subject to the jurisdiction of the probate court is charged to the beneficiary or other person succeeding to the property. Examples of income from nonprobate property include, but are not limited to: property held in joint tenancy, annuity payments, pension and retirement plans not payable to the estate, and income from certain trusts created by the grantor-decedent. See *Wood, Admr., v. Logue*, 167 Iowa 436, 441, 149 N.W. 613 (1914) for joint tenancy property not being subject to the jurisdiction of the probate court; also *Lang v. Commissioner*, 289 U.S. 109, 77 L.Ed. 1066, 53 S.Ct. 535 (1933).

89.8(7) Gross income of an estate.

a. In general. 26 U.S.C. Section 641(b) provides that the taxable income of an estate or trust shall be computed in the same manner as the taxable income of an individual, except as modified in Subchapter J of the Internal Revenue Code. The gross income of an individual and, therefore, the gross income of an estate or trust, is not given a definitive meaning in 26 U.S.C. Section 641. Subrule 89.8(7), paragraphs “d” to “q,” describe the most common kinds of income of an estate or trust. However, those paragraphs are not intended to identify all types of taxable income.

b. Definition of the period of administration. The income charged to the decedent’s estate is reportable by the personal representative for each taxable year during the period of the administration of the decedent’s estate, if the minimum filing requirements are met. The period of administration for Iowa income tax purposes is determined by applying federal tax law to Iowa estates because Iowa taxable income is the same as federal taxable income, subject to the adjustments provided in Iowa Code sections 422.7 and 422.9. *Old Virginia Brick Co., Inc. v. Commissioner*, 367 F.2d 276 (4th CA 1966); *First National Bank of Ottumwa v. Bair*, 252 N.W.2d 723 (Iowa 1977). It is the period actually required by the personal representative to perform the ordinary duties of administration, such as the collection of assets and the payment of debts, taxes, legacies and bequests, whether the period required is longer or shorter than the period specified under the probate code. See federal regulations 1.641(b)-3(a). An estate will be considered terminated for income tax purposes when all of the assets have been distributed, except for a reasonable amount set aside in good faith for the payment of unascertained or contingent liabilities and expenses. The delay in closing the estate cannot be capricious. *Frederich v. Commissioner*, 147 F.2d 796 (5th CA 1944). If the period of administration is terminated for income tax purposes, the heir or beneficiary is charged with the income.

c. The estate’s first return—special considerations. Death terminates the decedent’s taxable year. Income received the day of the decedent’s death is to be reported on the decedent’s final individual return. See 26 U.S.C. 443(a)(2); federal regulation Section 1.443-1(a)(1).

The taxable year of a decedent’s estate begins the day after the decedent’s death. Income received after the decedent’s death is either chargeable to the decedent’s estate or to the person succeeding to the property producing the income. See 89.8(5) “a” and 89.8(5) “b.” Income the decedent had a right to receive prior to death, but did not receive before death, is not the decedent’s income, but is income in respect of a decedent and is chargeable either to the decedent’s estate when received or to the person succeeding to the right to income. See 26 U.S.C. Section 691(a) and applicable federal regulations on what constitutes income in respect of a decedent. Trade or business expenses, interest, taxes and expenses for the production of income owing by the decedent at death, but unpaid, and the allowance for depletion on income not received at death, are not deductible on the decedent’s final return. These are deductible by the estate or the person succeeding to the property when paid. Medical expenses incurred by the decedent, but unpaid at death, are not deductible by the estate. These are deductible on the decedent’s individual return for the year the expenses were incurred, if paid within one year after the decedent’s death and if the medical expense is not claimed as a deduction for federal estate tax purposes under 26 U.S.C. Section 2053. See 26 U.S.C. Section 213(d) and federal regulations thereunder relating to deductible medical expense of a decedent. Funeral expense is not a deductible item for income tax purposes, although it is a deductible expense for federal estate tax and Iowa inheritance tax purposes. See 701—paragraphs 86.6(1) “g” and 86.6(3) “b.” Unused ordinary and capital losses remaining after the decedent’s income tax liability for the year of death has been determined are not carried forward to the decedent’s estate. The unused losses terminate with death, except to the extent they may be used by the decedent’s surviving spouse. See Rev. Ruling 74-175, 1 CB 52 (1974). The estate of a decedent is a different taxpayer than the decedent.

d. Dividends. All income classified as dividends under 26 U.S.C. Section 61 and federal regulation section 1.61-9, received or constructively received, during the taxable year constitutes gross income to the estate or trust. However, some income labeled as dividends is for tax purposes classified as interest. For example, income from cooperative banks, credit unions, domestic building and loan associations, domestic savings and loan associations, federal savings and loan associations and mutual savings banks are considered interest and not dividends.

e. Interest. All interest received or constructively received during the taxable year, with the exception of interest, but not capital gain, from federal securities and from certain bonds issued by the state of Iowa and its political subdivisions listed in rule 701—40.3(422) is income to the estate or trust. Interest from securities issued by a state and its political subdivisions or from foreign securities is included in gross income for Iowa tax purposes, even though the interest may be exempt from federal income tax, except for those bonds listed in rule 701—40.3(422).

f. Partnerships and other estates and trusts. If a partnership in which the decedent had an interest is not terminated at death, the deceased partner's share of the partnership income is considered to be all received at the end of the partnership taxable year. As a result, none of the partnership income is chargeable to the deceased partner, unless the day of the partner's death coincides with the day the partnership year ends. It is chargeable to the deceased partner's estate or the person succeeding to the partner's interest, notwithstanding the fact the deceased partner may have withdrawn most or all of the deceased partner's share of the partnership income prior to death. Federal regulation section 1.706-1(C)(3)(ii); Rev. Ruling 68-215, 18 I.R.B. 14 (1968).

In general, if an estate or trust and its beneficiaries have different taxable years, the beneficiary is required to report the income from the estate or trust as if it were all paid on the last day of the taxable year of the estate or trust. Federal regulation section 1.662(C)-1. *Hay v. U.S.*, 263 F. Supp. 813 (D.C. Tex. 1967). However, if the beneficiary dies during the taxable year of an estate or trust, the taxable income of the beneficiary's estate includes only the portion of the income of the other estate or trust which was required to be distributed to the beneficiary, but was not in fact distributed to the beneficiary before death. The income that was in fact distributed by the other estate or trust prior to the beneficiary's death is properly included in the beneficiary's final income tax return. See federal regulation 1.662(C)-2.

g. Rents and royalties. Income received after death for the use or occupancy of the decedent's real and personal property is the income of the decedent's estate or the income of the person succeeding to the property. See 89.8(5) "a" and 89.8(5) "b." If the rental income was accrued, but unpaid at death, the accrued rent is income in respect of a decedent and is to be included as income, either by the estate or the person succeeding to the right to the income, in the taxable year when payment is received. Rent is not limited to payments in cash. It includes, but is not limited to, crop share rental payments when the decedent was a nonparticipating landlord. *Alvin R. Huldeen Estate v. Department of Revenue*, Sac County District Court, Probate No. 14,661 (1975). Income from the sale of grain and livestock in the estate of a participating landlord which was on hand at death is classified as income from a farm or business and not rental income.

Income from royalties would include, but is not limited to, payment for rights in books, plays, copyrights, trademarks, formulas, patents and from the exploitation of natural resources.

h. Farm and business income—in general. The death of the decedent does not alter the rules under which business and farm income is computed for income tax purposes. However, the decedent's estate as a new taxpayer may adopt a taxable year which is different from the decedent's taxable year. Also, the decedent's estate may adopt a different accounting method. The rules for determining a gain or loss from the sale or exchange of assets in the decedent's estate are the same as those for an individual. However, see 89.8(7) "i" and 89.8(7) "j" for the basis for gain or loss from the sale or exchange of property acquired from a decedent and 89.8(7) "l" for depreciation rules for property acquired from a decedent.

i. Basis for gain or loss—the stepped-up basis. Property acquired from a decedent receives a new basis for determining gain or loss when the property is sold or exchanged. This rule does not apply to property which is classified as income in respect of a decedent and certain other property designated in 26 U.S.C. Section 1014(b) and (c) and the federal regulations thereunder. The basis of property acquired from a decedent is either: (1) its fair market value at the time of death or the alternative value when it has been elected for federal estate tax purposes under 26 U.S.C. Section 2032, or (2) its special use value when the property has been valued for federal estate tax purposes under 26 U.S.C. Section 2032A. The decedent's basis in the property is not relevant.

If an estate files a federal estate tax return, then the basis is governed by the federal estate tax value determination. However, if an estate does not file a federal estate tax return, then Iowa inheritance tax valuation governs the basis for the property that is acquired.

EXAMPLE 1. Decedent A died July 1, 1995, owning a 160-acre Iowa farm which the decedent purchased in 1955 for \$200 per acre, or \$32,000. At the time of A's death, the farm had a fair market value of \$2,000 per acre, or \$320,000. In 1965, A and surviving spouse B purchased a residence for \$35,000 in joint tenancy. Surviving spouse B, a school teacher, contributed one half of the purchase price of the residence; therefore, one-half of the residence is excluded from A's gross estate. At the time of A's death, the residence had a fair market value of \$100,000. Surviving spouse B received the entire estate and did not elect the alternative or special use valuation.

B's basis for gain or loss in the farm and residence is computed as follows:

<u>Asset</u>	<u>Fair Market Value at Death</u>	<u>New Basis for Gain or Loss</u>	
160-acre farm	\$320,000		\$320,000
Residence	100,000	½ new basis	50,000
		½ old basis	<u>17,500</u>
			\$ 67,500

Since the entire farm was acquired from A, its basis is 100 percent of the fair market value at death. Only one-half of the residence was acquired from A; therefore, only one half of the residence receives a new basis on A's death.

j. No new basis—income in respect of a decedent. Property or rights to income, classified as income in respect of a decedent under 26 U.S.C. Section 691, do not receive a new basis upon the decedent's death. It is a special exception to the stepped-up basis rule. See 26 U.S.C. Section 1014(c) and federal regulation section 1.1014-1(c).

Examples of income in respect of a decedent include, but are not limited to, the following:

1. Wages, salary or other compensation for personal services earned which are unpaid at death.
2. Interest accrued on obligations, such as bank accounts, certificates of deposit, bonds and promissory notes.
3. Accrued interest and unpaid capital gain on real and personal property installment contracts.
4. Federal income tax refunds, if claimed as a deduction on an Iowa income tax return.
5. Accounts receivable, if the decedent was on a cash accounting basis.
6. Crop share rent if the decedent was a nonparticipating landlord on a cash basis. This also includes growing crops, which are to be valued at the time of the decedent's death or alternate valuation date.

The basis for gain or loss for property classified as income in respect of a decedent is the decedent's basis in the property at the time of death.

k. Gain or loss—holding period. For the purpose of determining whether the sale or exchange of property is a long- or short-term gain or loss, the holding period of property acquired from a decedent begins the day after the decedent's death, regardless of how long the property was held by the decedent. See 26 U.S.C. Section 1.1223, federal regulation Section 1.1223-1(j). However, if the property acquired from a decedent is sold or otherwise disposed of within one year of the decedent's death, it will be considered to have been held over one year. In general, this is a sufficiently long holding period to qualify the sale or exchange as a long-term gain or loss transaction. However, a one-year holding period does not qualify horses and cattle held for draft, breeding or dairy purposes for long-term gain or loss treatment. A 24-month holding period is required by 26 U.S.C. Section 1231(b)(3) for the transaction to be considered long-term.

Therefore, if this kind of livestock is acquired from a decedent (which is usually the case) and is sold or exchanged within 24 months after the decedent's death, the sale is considered a short-term transaction. See Rev. Ruling 75-361, 2 C.B. 344 (1975). However, even if the sale or exchange results in a short-term gain or loss transaction, the property has a stepped-up basis, because it is acquired from a decedent. See 89.8(7) "i."

l. Depreciation—property acquired from a decedent. Property acquired from a decedent which is subject to the allowance for depreciation, receives the same value for depreciation purposes as its basis

for gain or loss in a sale or exchange, regardless of its basis or remaining useful life in the hands of the decedent. See 26 U.S.C. Sections 167(g) and 1011; federal regulation Section 1.167(g)-1. For the purpose of determining the life of an asset subject to the allowance for depreciation, the property is treated as if it were acquired the day after the decedent's death. See federal regulation Section 1.167(a)-10. The decedent's estate or other person acquiring depreciable property from the decedent may adopt a depreciation method different from that used by the decedent for the depreciable asset. See federal regulation section 1.167(a)-7.

m. Section 641(c) gain for sales or exchanges before August 6, 1997. The gain that is excluded from federal taxable income under 26 U.S.C. Section 641(c) for sales or exchanges before August 6, 1997, constitutes Iowa gross income to the estate or trust. This gain for sales or exchanges before August 6, 1997, is excluded from taxable income for federal purposes because it is subject to a special federal tax under 26 U.S.C. Section 644(a). This special federal tax was repealed for sales or exchanges occurring on or after August 6, 1997. The effect is to tax the gain for sales or exchanges before August 6, 1997, which receives separate treatment for federal income tax purposes, in the same manner as this gain was taxed prior to the enactment of the federal Tax Reform Act of 1976.

n. Nonrecognition of gain—installment sale contracts before October 20, 1980. No gain or loss is realized by the estate of a decedent-seller dying before October 20, 1980, when the purchaser in an installment sale contract inherits the seller's rights under the contract of sale. The merger of the asset with the liability is considered to be a nontaxable transfer. Therefore, any unreported gain from the installment sale contract is not subject to income tax when there is a merger of the asset with the liability. See Senate Finance Committee Report to P.L. 96-471.

o. Recognition of gain—installment sale contracts after October 19, 1980. Effective for estates of decedents dying after October 19, 1980, Section 3 of Public Law 96-471 (Installment Sales Revision Act of 1980) provides for the recognition of the remaining gain on installment sales contracts when the debtor inherits the obligation and thereby causes a merger of the asset with the liability. The rule after October 19, 1980, is if, as a result of the death of the holder of an installment sale obligation (usually the seller), the installment sale obligation is transferred to the debtor (usually the purchaser); or, if the installment sale obligation is canceled either as a result of the holder's death or by the personal representative of the holder's estate, the remaining gain from the installment sale contract not previously reported is recognized by the holder's estate, as if the remaining balance due had been immediately paid in full. The merger of the asset with the debt is treated as a taxable transfer by the estate of the holder (seller) of the obligation and is income in respect of a decedent realized by the holder's estate.

If the obligation was held by a person other than the seller, such as a trust, the cancellation of the obligation will be treated by that person as a taxable transfer immediately after the seller's death. In the absence of some act of canceling the obligation, such as by distribution or notation which results in cancellation under Iowa Code chapter 554 (Uniform Commercial Code), the disposition is considered to occur no later than the time the period of administration of the estate is ended. See Senate Committee Report to P.L. 96-471.

For gain recognition purposes, if the seller and the debtor were related parties, the value of the installment contract is considered to be not less than full face value, regardless of its value for Iowa inheritance tax or federal estate tax purposes. A related party includes, but is not limited to, the spouse, child (including an adopted child), grandchild, or parent of the seller; an estate in which the seller is a beneficiary; a partnership in which the seller is a partner; a corporation in which the seller owns 50 percent or more of the stock; and a trust where the seller is a beneficiary or is treated as the owner.

If the debtor inherits the obligation to pay or another share of the estate, the personal representative of the holder's estate must set off the contract of sale to the debtor when satisfying the debtor's share of the estate if the debtor's share of estate equals or exceeds the face value of the contract. In this case, the entire contract is canceled and all of the unreported gain is income in respect of a decedent to the estate. If the debtor's share of the estate is less than the face value of the contract of sale, the contract of sale is canceled only to the extent of the debtor's share of the estate and only a like percentage of the unreported gain is considered income in respect of a decedent received immediately by the estate. See

Iowa Code section 633.471 for the right of retainer and setoff. *In re Estate of Ferris*, 234 Iowa 960, 14 N.W.2d 889 (1944).

p. Nonresident aliens—sales of Iowa real estate. For sales and exchanges occurring after June 18, 1980, nonresident aliens and estates and trusts with a situs outside the United States must include the gain from the sale or exchange of Iowa real estate as taxable income, even though the real estate was not effectively connected with a trade or business carried on in the United States. See Public Law 96-499. Any gain paid or distributed to a nonresident alien or an estate or trust with a situs outside the United States is subject to Iowa income tax withholding, unless the gain has been previously accumulated and any tax due paid. See 89.4(9)“d” and 701—subrule 46.4(2), item “5,” for the duty to withhold Iowa income tax from distributions to nonresident beneficiaries and individuals.

q. Miscellaneous income. Miscellaneous income is an inclusive term. It includes those items of income that are subject to Iowa income tax under Iowa Code section 422.6 which are not classified as dividends, interest, rent and royalties, income from partnerships and other fiduciaries, business or farm income and gain or loss from the sale or exchange of assets. Examples of miscellaneous income include, but are not limited to: wages and salaries earned by the decedent which are unpaid at death; federal income tax refunds, if the refund was deducted from an Iowa income tax return; and distributions to the estate from an employee’s pension or retirement plan, if subject to Iowa income tax.

r. Grantor trusts. If the income of a trust is subject to the grantor trust rules under 26 U.S.C. Sections 671 to 679, the grantor of the trust or other person specified in the trust instrument, and not the trust, is considered the owner of the income. This income is properly reportable on the Iowa individual income tax return of the grantor or other individual treated as the owner. The fiduciary income tax return of a grantor trust is an informational return only. Items of income, deductions and credits of a grantor trust should be reported on a separate statement attached to the fiduciary return of income. See federal regulation Section 1.671-4. The taxable year of a grantor trust must be the same as the taxable year of the grantor, or of the other individual considered the owner of the income for tax purposes. *William Scheft*, 59 T.C. 428. Examples of grantor trusts are, but not limited to: trusts where the grantor or a nonadverse party has the power to revoke the trust or to return the corpus to the grantor; trusts where the grantor or a nonadverse party has the power to distribute income to or for the benefit of the grantor or the grantor’s spouse; and trusts where the grantor has retained a reversionary interest in the trust, within specified time limits. See federal regulation Section 1.671-1.

s. “Equity trusts”—assignment of future wages and salaries. The assignment of future wages, salaries or other compensation for future services by a grantor to a trust (commonly called “equity” or “family estate” trust) does not shift the tax burden on this income from the grantor to the trust. The trust is subject to the grantor trust rules under 26 U.S.C. Sections 671 to 679. The income of the trust is to be reported by the grantor on an Iowa individual income tax return. *Lucas v. Earl*, 281 U.S. 111, 74 L.Ed. 731, 50 S.Ct. 241 (1930); *Vnuk v. Commissioner*, 621 F.2d 1318 (8th CA 1980); Revenue Ruling 75-257, 2 C.B. 251 (1975); *In re August Erling, Jr., et al.*, Director of Revenue decision, Docket No. 77-237-2C-A (1979).

t. Adjustments to federal taxable income. Iowa Code section 422.4(16) provides that the Iowa taxable income of estates and trusts is federal taxable income, without the deduction for the personal exemption, subject to the specific adjustments set forth in Iowa Code section 422.7 and the modifications relating to federal and state income tax specified in Iowa Code section 422.9. The modifications have these results:

(1) Federal income tax on the income of Iowa situs estates and trusts is deductible for Iowa income tax purposes in the year paid or accrued depending on the method of accounting.

(2) Federal income tax owed by Iowa resident decedents at the time of death is a deduction against estate income in the year paid.

(3) The federal income tax deduction allowable for estates and trusts with a situs outside Iowa is the same as the deduction allowed for an estate or trust with a situs in Iowa.

(4) Federal income tax owed by a nonresident decedent at the time of death may be deducted the same as a deduction allowed for an Iowa resident decedent. See 701—paragraph 41.3(4)“b” for the federal income tax deduction for nonresident individuals.

(5) Iowa income tax paid by the estate is not a deduction in computing Iowa taxable income.

(6) The federal exemption allowed to estates and trusts under 26 U.S.C. Section 642(b), that is, \$600 for an estate, \$300 for simple trust and \$100 for a complex trust, is not deductible for Iowa income tax purposes.

(7) Interest and dividends from federal securities, but not capital gain or loss, is exempt from Iowa income tax and, therefore, is not part of the Iowa taxable income of estates and trusts.

(8) Interest and dividends from securities of a state and its political subdivisions and from foreign securities are included in Iowa taxable income in the year received, regardless of whether such interest and dividends are exempt from federal income tax. However, see 701—40.3(422) and 89.8(7)“e” for the exemption for certain bonds issued by the state of Iowa and its political subdivisions which are not included in Iowa taxable income.

(9) See 89.8(7)“m” for the includability of the gain for sales or exchanges before August 6, 1997, excluded by 26 U.S.C. Section 641(c), in the Iowa taxable income of a trust.

(10) See 701—paragraph 86.5(12)“b” for the inheritance tax exemption for the portion of an employee’s pension or retirement plan subject to Iowa income tax.

89.8(8) Deductions from gross income.

a. *In general.* The deductions allowable in computing taxable income of estates and trusts are generally those relating to a trade or business and the expenses attributable to investment income. The important distinction between the deductions allowable in computing federal adjusted gross income and itemized deductions for individual income tax has only limited application in determining the taxable income of estates and trusts. Many deductions in computing the taxable income of an individual have no application to the deductions allowable in computing the taxable income of an estate or trust, due to the nature of estates and trusts and the sources of their income. For example, medical expense and moving expense deductions are applicable only to individuals, but taxes and interest expense can be incurred by both individuals and estates and trusts. Also the deduction for distribution to beneficiaries has no application to individual income tax.

b. *Interest expense.* Interest paid on obligations secured by property subject to the personal representative or trustee’s right of possession is a deduction from gross income in the year paid. Interest on debts or charges which the personal representative or trustee is obligated to pay is also a deduction against gross income in the year paid. Interest on obligations secured by property, not subject to the personal representative’s right of possession, is not deductible from the gross income of the estate, but is a deduction for the person succeeding to the encumbered property. No distinction is made between business and nonbusiness interest. See Iowa Code section 633.278 (probate code) for circumstances when the personal representative of the decedent’s estate is required to pay the debt and interest on encumbered property, even though the property is not subject to the personal representative’s right of possession. *J.S. Dean*, 35 T.C. 1083 (1961); Revenue Ruling 57-481, 2 C.B. 48 (1957).

c. *Taxes.* The taxes deductible against the gross income of an estate or trust are limited to the taxes deductible for individual income tax purposes under 26 U.S.C. Section 164, subject to the adjustments specified in Iowa Code section 422.9 relating to federal and state income taxes. Real estate and personal property taxes, including the taxes due, but unpaid at death, are only deductible by the estate on the decedent’s property which is subject to the personal representative’s right of possession. Federal income tax on the income of an estate or trust and federal income tax owing by an Iowa decedent at the time of death, including the federal income tax owing on the decedent’s final return for the year of death, are deductible by the estate or trust in the year paid. For tax years on or after January 1, 1982, the federal income tax deduction attributable to Iowa by nonresidents of Iowa shall be the same deduction as is available for resident taxpayers. See 701—subrule 41.3(4) and Iowa Code section 422.5(1)“j.” Examples of taxes not deductible include, but are not limited to: federal estate tax (except federal estate tax paid on income in respect of a decedent); Iowa income and inheritance tax; federal gift taxes; and special assessments increasing the value of property. See 26 U.S.C. Section 275.

d. *Depreciation and depletion—allocation.* If the personal representative of a decedent’s estate has the right to the possession of property eligible for the depreciation allowance, the depreciation is a deduction from the estate’s gross income when the income for the taxable year is accumulated by

the estate. If all or part of the income for the year is distributed to the beneficiaries, the deduction for depreciation is apportioned between the estate and the beneficiaries on the basis of the income allocated to each. In the case of an estate, the deduction for depreciation follows the income.

The same depreciation rules apply to simple and complex trusts, with the exception that if the trustee has the right to maintain a reserve for depreciation, and in fact does so, the deduction for depreciation is allocated to the trust to the extent of the reserve maintained, regardless of whether the income is accumulated or distributed. See 26 U.S.C. Section 167, federal regulation 1.167 H-1(b); Revenue Ruling 74-530, 2 C.B. 188 (1974).

The rules governing the allowance for depreciation are also the rules to be applied to the allowance for depletion under 26 U.S.C. Section 611.

e. The charitable deduction. The charitable deduction allowed estates and trusts under 26 U.S.C. Section 642(c) is not subject to the percentage of income limitation applicable to individual taxpayers under 26 U.S.C. Section 170(b). The allowable deduction is governed by the terms of the will or trust instrument, which can provide for unlimited payments for charitable purposes. However, an unused charitable contribution carryover of the decedent remaining after the decedent's individual income tax liability for the year of death is determined is not available to the estate. The unused carryover terminates at death, except to the extent it may be used by the surviving spouse. See federal regulation Section 1.170A-10(d)(4)(iii). The deduction is limited to payments of gross income or amounts permanently set aside for charitable uses. A simple pecuniary bequest to charity in the decedent's will does not qualify for the charitable deduction from the estate's income. It is a payment from the corpus of the estate. *Frank Trust of 1931*, 145 F.2d 411 (3rd CA 1949). However, the pecuniary bequest to charity is exempt from the Iowa inheritance tax under Iowa Code section 450.4 if it meets the exemption requirements.

f. Other deductions. The category of other deductions includes those deductions allowable in computing taxable income not receiving special itemized treatment on the Iowa fiduciary return of income. The most common kind of other deductions is the expense of administration of an estate or trust paid during the taxable year. Expenses of administration include, but are not limited to: a reasonable fee and the necessary expenses of the attorney employed by the personal representative of an estate or the trustee of a trust; a reasonable fee and the necessary expenses of the personal representative of an estate or the trustee of a trust; accounting fees; court costs; and interest paid on federal estate tax during an extension of time to pay. However, administration expenses are subject to the no double deduction rule. See 26 U.S.C. Section 642(g) and 89.8(8) "g." Salaries or fees paid during the taxable year for the management of a farm or business are expenses directly attributable to the production of a specific kind of income and are more properly deductible on the farm schedule F or the business schedule C.

g. The no double deduction rule. Expenses of administration, certain debts of the decedent like medical expenses incurred prior to death and losses during the period of administration are proper deductions in computing both the taxable income of an estate or trust (or on the decedent's individual return in case of medical expenses) and the taxable estate for federal estate tax purposes under 26 U.S.C. Sections 2053 and 2054. The no double deduction rule only applies to trusts when the trust assets are included for federal estate tax purposes. 26 U.S.C. Section 642(g) prohibits the double deduction of those items which qualify as deductions for both taxes. To prevent the double deduction, it is a prerequisite for the allowance of the deduction for income tax purposes that a statement be filed with the fiduciary return of income waiving the right to claim the item or portion of the item as a deduction on the federal estate tax return. The waiver once filed with the fiduciary return of income is irrevocable. However, unless the waiver has been filed, the decision to claim the deduction or portion of the deduction on the federal estate tax return can be changed anytime prior to the time the item or portion of the item is finally allowed for federal estate tax purposes.

The waiver requirement has no application to estates and trusts not required to file a federal estate tax return.

The no double deduction rule has no application to deductions in respect of a decedent, such as deductions relating to trade or business expenses, interest, taxes, expenses for the production of income and the allowance for depletion, which are deductible both for income tax purposes and federal estate tax

purposes. See 26 U.S.C. Section 691(b) and federal regulations Section 1.691(b)-1 for what constitutes deductions in respect of a decedent.

The no double deduction rule does not apply to the deduction of an item for Iowa inheritance tax purposes. Items are deductible or not in computing the taxable shares for Iowa inheritance tax purposes by reference alone to Iowa Code chapter 450.

Assuming an item is otherwise deductible for income and inheritance tax purposes, the no double deduction rule has the following applications for Iowa income and inheritance tax:

1. For estates and trusts not required to file a federal estate tax return, an item is deductible for both Iowa inheritance tax and Iowa income tax purposes.

2. Estates and trusts required to file a federal estate tax return can always claim the item as a deduction on the Iowa inheritance tax return. In addition, the same item or portion of the item is a deduction for Iowa income tax purposes if the item or portion of the item is not claimed as a deduction on the federal estate tax return. If it is claimed as a deduction on the federal estate tax return, it is not deductible for income tax purposes.

This rule applies both to estates and trusts with a situs within and without Iowa.

h. The net operating loss deduction. Subject to the modifications specified in federal regulation Section 1.642(d)-1, an estate or trust is allowed a deduction for net operating loss which is computed in the same manner as the net operating loss deduction allowable to individual taxpayers. The modification especially applicable to estates and trusts is: The charitable deduction allowable under 26 U.S.C. Section 642(C) is disregarded. See federal regulation Section 1.642(d)-1.

The rule that nonbusiness deductions are only taken into account to the extent of nonbusiness income applies equally to estates and trusts and individual taxpayers. Attorney fees and the fees of the trustee or personal representative, without a showing that these administrative expenses were incurred in carrying on the decedent's or grantor's trade or business, are a nonbusiness deduction. *Refling v. Commissioner*, 47 F.2d 895 (8th CA 1930). Therefore, any excess fees over income are not available for a carryback to a prior taxable year or a carryforward to a future taxable year. *Mary C. Westphal*, 37 T.C. 340 (1961). However, see 89.8(9) "a" for the special rule on excess deductions in the year the estate or trust terminates. Net operating losses are available to the estate or trust and can be carried back for distribution to a beneficiary, with the exception that any unused loss must be distributed to the beneficiaries in the year the estate or trust terminates.

Estates and trusts with a situs outside Iowa are allowed a deduction only for a net operating loss attributable to a trade or business activity carried on in the state of Iowa. In the event the trade or business activity giving rise to the loss is carried on both in Iowa and another state, the net operating loss deduction for Iowa income tax purposes must be prorated on the ratio of the Iowa gross receipts from the trade or business to the total gross receipts from the trade or business. See 701—subrule 40.18(2) for the computation of the net operating loss deduction of a nonresident decedent.

i. Capital loss deduction. The capital loss deduction of an estate or trust is computed in the same manner as the capital loss deduction for individual taxpayers. However, it is a deduction only for the estate or trust and is not distributable to a beneficiary, except in the year the estate or trust terminates. *Grey v. Commissioner*, 118 F.2d 153, 141 ALR 1113 (7th CA 1941); *Jones v. Whittington*, 194 F.2d 812 (10th CA 1952). Capital losses do not enter into the computation of the deduction for income required to be distributed currently to beneficiaries. During the period of administration of the estate or trust, capital losses can be used only to offset capital gain for simple trusts required to distribute income currently. However, beneficiaries may derive immediate benefit from capital losses when capital gain is required or permitted to be distributed to beneficiaries prior to closure of the estate or trust, since the losses can be used to offset gain before distribution.

j. The distribution deduction. Estates and trusts are allowed to deduct the amounts of income required to be distributed currently and also other amounts properly paid, credited or required to be distributed to the extent of the distributable net income for the year. For income tax purposes, an estate of a decedent is treated as a complex trust, because normally the personal representative of an estate has the discretion whether or not to distribute current income. Therefore, most distributions of income from a decedent's estate fall under the category of "other amounts properly paid, credited or required

to be distributed.” However, see *Colthurst v. Colthurst*, 265 N.W.2d 590 (Iowa 1978) for circumstances when the personal representative of an estate is required to distribute current income during the period of administration to a life tenant (the surviving spouse in this case).

The distribution deduction allowed is limited to the distributable net income of the estate or trust for the taxable year. If amounts in excess of distributable net income are distributed to a beneficiary of a decedent’s estate, the excess does not constitute taxable income to the beneficiary. Distributions made to a beneficiary of a complex trust in excess of the distributable net income for the taxable year may or may not be includable in the beneficiary’s taxable income depending on whether the excess distribution is governed by the throwback distribution rules under 26 U.S.C. Sections 665 through 668.

Estates and trusts with tax years beginning on or after August 5, 1997, may elect to treat distributions made within 65 days of the end of the tax year as having been made in the tax year of the estate or trust. If amounts in excess of distributable net income are distributed to a beneficiary of a decedent’s estate, the excess does not constitute taxable income to the beneficiary. Distributions made to a beneficiary of a complex trust in excess of the distributable net income for the taxable year may or may not be includable in the beneficiary’s taxable income depending on whether the excess distribution is governed by the throwback distribution rules under 26 U.S.C. Sections 665 through 668. Effective for distributions made by domestic trusts in tax years beginning after August 5, 1997, there is a repeal of the throwback rules found in 26 U.S.C. Sections 665 through 668. However, the repeal of the throwback rules does not apply to trusts created before March 1, 1984, foreign trusts, or domestic trusts that were once treated as foreign trusts, except as provided by federal regulations.

Income distributed to a beneficiary of an estate or trust retains the same character in the hands of the beneficiary as it had in the estate or trust, with the exception of unused capital loss distributed on closure to a corporation, in which case the loss is treated as a short-term loss, regardless of its character in the estate or trust. See federal regulation Section 1.642(h)-1(g). In addition, unless the will or trust instrument specifically provides otherwise, a distribution to beneficiaries is considered to be a proportionate distribution of the different kinds of income composing the distributable net income of the estate or trust. See 26 U.S.C. Section 662.2(b) and federal regulation Section 1.662(b)-1. The same character and proportionate distribution rule is illustrated by the following:

EXAMPLE:

Decedent A, a resident of Iowa, died February 15, 1997. Under the terms of the will, all the decedent’s property was devised in equal shares to beneficiary B, a resident of Phoenix, Arizona, and beneficiary C, a resident of Cedar Rapids, Iowa. The estate adopted a calendar year as its taxable year. For calendar year 1997, the estate had distributable net income of \$50,000, which is composed of:

Interest income	\$10,000
Dividend income	5,000
Net Iowa farm income	<u>35,000</u>
Total	\$50,000

On December 20, 1997, the estate distributed \$12,500 to beneficiary B, and \$12,500 to beneficiary C. Beneficiaries B and C have received a distribution for 1997 as follows:

<u>Beneficiary B</u>		<u>Beneficiary C</u>	
Interest income	\$2,500	Interest income	\$2,500
Dividends	1,250	Dividends	1,250
Farm income	<u>8,750</u>	Farm income	<u>8,750</u>
Total	\$12,500	Total	\$12,500

The estate is entitled to a deduction of \$25,000 against gross income in 1997 for the distribution to beneficiaries B and C and owes Iowa income tax on the \$25,000 income retained in the estate. Since the interest income of the estate is 20 percent of the distributable net income, 20 percent of the

distribution to beneficiaries B and C is considered interest income. Likewise, 10 percent of the estate's distributable net income is dividends and 70 percent farm income. The distribution to B and C consists of a corresponding percentage of dividends and farm income. Beneficiary C, a resident of Iowa, must report the entire distribution of \$12,500 on a 1997 Iowa individual income tax return. Beneficiary B, a resident of Arizona, is only required to report the farm income portion of the distribution (\$8,750) on a 1997 nonresident individual income tax return, because dividends and interest are income from intangible personal property and were not derived from a business, trade, profession or occupation carried on within Iowa by the nonresident. See 701—subrule 40.16(5).

k. The dividend exclusion. Estates and trusts are eligible for the dividend exclusion allowed individual taxpayers under 26 U.S.C. Section 116 (the Iowa exclusion is \$100 for 1981). The exclusion is allocated to the estate or trust if the dividend income for the taxable year is accumulated. The dividend exclusion is allocated to the beneficiaries when all of the distributable net income for the taxable year is distributed. The distribution must not be diminished by the exclusion. The dividend exclusion is then available to the beneficiaries after the dividends distributed are added to any other dividends received by the beneficiaries during the taxable year. If there is only a partial distribution of the distributable net income of the estate or trust for the taxable year, the dividend exclusion must be prorated between the beneficiaries and the estate or trust on the basis of the percentage of the distributable net income accumulated by the estate or trust and the percentage distributed to the beneficiaries. A partial distribution of the dividends and exclusion is to be reported and used by the beneficiaries for income tax purposes in the same manner as the full distribution of dividends. See federal regulation Sections 1.116-1(a) and 1.661(c)-1.

l. The capital gains deduction. 26 U.S.C. Section 1202(b) provides that an estate or trust is allowed a deduction for net capital gain received during the taxable year. Except for the requirement of allocation between the beneficiaries and the estate or trust, the deduction is computed in the same manner as the net capital gain deduction allowed individuals. See federal regulation Section 1.1202-1 (b). If the net capital gain is allocated to corpus, the estate or trust is entitled to the deduction. If the will or trust instrument requires capital gain to be distributed to the beneficiaries or if the trustee or personal representative of a decedent's estate is authorized to allocate capital gain to income and distributes the capital gain, then the net capital gain deduction is allocated to the beneficiaries and is not a deduction to the estate or trust. The gain distributed must not be diminished by the deduction. It must first be combined with any other capital gains and losses of the beneficiary prior to determining whether the net capital gain deduction is applicable for the beneficiary's taxable year.

If the net capital gain for the taxable year is partially allocated to corpus and partially distributed, then the net capital gain deduction is available to the beneficiaries only on the gain distributed and to the estate or trust only on the gain accumulated. A partial distribution of capital gain is treated for purposes of a beneficiary's income tax liability in the same manner as a full distribution of capital gain.

m. The Iowa throwback rule. Iowa Code section 422.6 allows a trust beneficiary receiving an accumulation distribution subject to the throwback rules under 26 U.S.C. Sections 665 through 668 a credit against the beneficiary's income tax liability for the Iowa income tax paid by the trust on the accumulated income distributed. The Iowa income tax paid by the trust on the accumulated income distributed is deemed distributed to the trust beneficiary, without interest, and is a credit for the year of distribution against the portion of the Iowa income tax liability of the beneficiary which is attributable to the accumulated distribution. The accumulated distribution must be adjusted by the beneficiary to reflect income subject to Iowa income tax. No refund is allowed the trust for the Iowa income tax deemed distributed to the beneficiary. The beneficiary is not allowed a refund if the tax distributed is in excess of the income tax liability attributable to the distribution. Effective for distributions made by domestic trusts in tax years beginning after August 5, 1997, there is a repeal of the throwback rules found in 26 U.S.C. Sections 665 through 668. However, the repeal of the throwback rules does not apply to trusts created before March 1, 1984, foreign trusts, or domestic trusts that were once treated as foreign trusts, except as provided by federal regulations.

n. Federal estate tax paid on income in respect of a decedent. For Iowa income tax purposes, Iowa Code section 422.7 makes no provision for adjusting the deduction for federal estate tax paid when the

income in respect of a decedent includes interest from federal securities. Therefore, the federal estate tax paid on interest from federal securities, which is classified as income in respect of a decedent under 26 U.S.C. Section 691(a), is a deduction for Iowa income tax purposes in the taxable year the interest is received. However, interest and dividends from securities of a state or political subdivision, which are exempt from federal income tax, do not constitute the kind of income in respect of a decedent on which the deduction is computed. Since the deduction under 26 U.S.C. Section 691(c) does not apply to income exempt from federal income tax, there is no deduction on the Iowa return for the federal estate tax paid on the exempt interest, even though under Iowa Code section 422.7 this interest is subject to Iowa income tax.

The deduction allowable in any taxable year is limited to a percentage of the total federal estate tax deduction which is determined by the ratio of income in respect of a decedent received for the year to the total amount of the net income in respect of a decedent on which federal estate tax was paid. See 26 U.S.C. Section 691(c) and federal regulation Section 1.691(c)-1 for the computation of the deduction.

89.8(9) *The final return—special considerations.*

a. General rule. In the year of closure all income received by the estate or trust is considered “other amounts properly paid or credited or required to be distributed” and must be distributed to the beneficiaries according to the terms of the governing instrument. Rev. Ruling 58-423, 2 C.B. 151 (1958). Dividends and capital gains received during the year of closure must be distributed without being diminished by the net capital gain deduction or by the dividend exclusion. See federal regulation Section 1.643(a)-3(d). 26 U.S.C. Section 642(h) provides for an exception to the general rule that net operating and capital losses are only available to the taxpayer incurring the loss. Therefore, in the year of closure, any capital loss and net operating loss carryover that remains unused by the estate or trust is passed through the estate or trust and is allowed as a deduction to the beneficiaries succeeding to the property and may be applied by carrying back the losses, but such losses cannot be carried forward. See federal regulation Section 1.642(h)-1.

If the estate or trust in the year of termination has incurred deductions in excess of gross income which do not qualify for treatment as a net operating or capital loss, such as administration expenses, the excess deductions are passed through the estate or trust and are available to the beneficiaries succeeding to the property. They are available only for the year the estate or trust terminates and only as an itemized deduction in the case of an individual beneficiary. See Revenue Ruling 58-191 1 C.B. 149 (1958). Excess deductions also include any unused net operating loss carryover, if the year the estate or trust terminates is the last carryforward year for the net operating loss. See federal regulation Section 1-642(h)-2(b).

b. Exception to the general rule. If in the year of termination an Iowa ancillary estate makes the required distribution of its income to the primary estate which is not being terminated, instead of to the beneficiaries of the estate, it is proper in the year of closure to treat the income as if it were accumulated by the Iowa ancillary estate. Permitting Iowa income tax to be paid on the income in this special case, in effect, allows the distribution to the primary estate to be made on a tax-paid basis. This exception to the general rule relieves the primary estate from the obligation of filing a second fiduciary return, which it would be required to do except for this special rule.

89.8(10) *Computation of the tax due.*

a. In general. The tax due on the taxable income of an estate or trust is computed by using the same tax rate schedule used for computing the individual income tax liability. The provisions of the Iowa Code relating to the maximum net income of an individual before a tax liability is incurred have no application to the tax liability of an estate or trust. The taxable income of a short taxable year is not required to be annualized for the purpose of computing the tax liability. The tax due cannot be paid in installments. It must be paid in full within the time prescribed by law.

b. Alternative minimum tax. Special rules for estates and trusts. The sum of the items of tax preference determined under 26 U.S.C. Section 57 shall be apportioned between the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable to each under the provisions of federal income tax regulation Section 1.58-3. The minimum taxable income exemption of \$17,500 allowable to an estate or trust shall be reduced to an amount which bears the same ratio to \$17,500 that the sum of the items of tax preference apportioned to the estate or trust bears to the full sum of the items

of tax preference before apportionment. See federal income tax regulation Section 1.58-1(d). See rule 701—39.6(422) for the computation of the Iowa alternative minimum tax.

89.8(11) Credits against the tax.

a. The personal exemption credit. The estate of a decedent and a trust, whether simple or complex, are allowed the same credit against the tax as the credit allowed an individual taxpayer, that is currently \$40. The personal exemption credit is not prorated for short taxable years. The federal exemption allowed estates and trusts under 26 U.S.C. Section 642(b), in lieu of the personal exemption for individuals, has no application to Iowa income tax.

b. Credit for tax paid to another state or foreign country. Iowa Code section 422.8 grants Iowa situs trusts and estates of Iowa resident decedents, which have income derived from sources in another state or foreign country, a credit against the Iowa tax for the income tax paid to the state or foreign country where the income was derived. To be eligible for the credit, the income must have been includable for income tax purposes both in Iowa and the other state or foreign country. The credit allowable against the Iowa tax is limited to the lesser of: (1) the tax paid to the other state or foreign country on the income, or (2) the Iowa income tax paid on the foreign source income. The Iowa income tax paid on the foreign source income is computed by multiplying the Iowa computed tax, less the personal exemption credit, by a fraction of which the foreign source income included in the Iowa gross income is the numerator and the total Iowa gross income is the denominator. The resulting amount is the Iowa tax paid on foreign source income. Any tax paid to another state or foreign country in excess of the Iowa credit allowable is not refundable. Foreign situs trusts and estates of foreign decedents are not allowed a credit against the Iowa tax for the income tax paid another state or foreign country on Iowa source income. This rule is illustrated by the following example:

Decedent A died a resident of Webster City, Iowa, on February 15, 1997. A at the time of death owned income-producing property both in Iowa and the state of Missouri. For the short taxable year ending December 31, 1997, A's estate had the following income and expenses:

Interest	\$ 5,000
Dividends	7,500
Iowa farm income	20,000
Missouri farm income	<u>10,000</u>
Iowa gross income	\$ 42,500
Less allowable deductions	<u>8,000</u>
Iowa taxable income	\$ 34,500
Iowa computed tax	\$2,587.87
Less personal credit	<u>40.00</u>
Tax subject to credit for foreign taxes paid	\$2,547.87
Less credit for tax paid Missouri	<u>413.00</u>
Iowa tax due	\$2,134.87

A's estate paid \$413.00 income tax to the state of Missouri on the \$10,000 Missouri farm income. The Iowa tax on the foreign source income is \$604.20 computed as follows:

$$\frac{\text{Foreign income included in gross income } \$10,000}{\text{Total Iowa gross income } \$42,500} \times \$2,547.87^* = \$604.20$$

*\$2,547.87 is the Iowa computed tax less the \$40.00 personal credit.

The allowable credit for taxes paid the state of Missouri is \$413.00, because it is less than the Iowa tax paid on the Missouri income. If the Missouri tax paid had been greater than the Iowa tax on the Missouri income, the allowable credit would have been the Iowa tax on the Missouri income.

See 701—subrule 42.6(3) for the computation of the credit allowed Iowa resident individuals for income tax paid to another state or foreign country.

c. Motor vehicle fuel tax credit. An estate or trust incurring Iowa motor vehicle fuel tax expense attributable to nonhighway uses may, in lieu of obtaining an Iowa motor vehicle fuel refund, claim as a credit against its Iowa income tax liability, the Iowa motor vehicle fuel taxes paid during the taxable year.

A copy of the Iowa motor vehicle fuel tax credit Form IA 4136 must be submitted with the fiduciary return of income to substantiate the claim for credit. Any credit in excess of the income tax due shall be refunded to the estate or trust, subject to the right of offset against other state taxes owing.

d. Nonresident/part-year resident credit. The nonresident/part-year resident credit is available for part-year trusts described in subrule 89.3(3) and trusts whose situs is outside Iowa. See rule 701—42.5(422) for the computation of the nonresident/part-year resident credit allowed for individuals who are either part-year residents of Iowa or nonresidents of Iowa.

e. Other tax credits. All other tax credits set forth in Iowa Code chapter 422, division II, are also available for any estate or trust that meets the criteria for claiming these tax credits. For tax years beginning on or after January 1, 2013, estates and trusts with a situs in Iowa which are shareholders in S corporations which carry on business within and without Iowa can take advantage of the apportionment provisions for S corporation income set forth in 701—Chapter 50. The criteria to determine whether the S corporation is carrying on business within and without Iowa is set forth in 701—subrule 54.1(4).

This rule is intended to implement Iowa Code sections 422.3 to 422.12, 422.14, 422.23, and 633.471 and chapter 452A.

[ARC 8702B, IAB 4/21/10, effective 5/26/10; ARC 0398C, IAB 10/17/12, effective 11/21/12; ARC 1102C, IAB 10/16/13, effective 11/20/13]

701—89.9(422) Audits, assessments and refunds. Rules 701—43.1(422) to 43.3(422) governing the audit of individual income tax returns, the assessment for tax or additional tax due, and the refund of excessive tax paid shall also govern the audit of the fiduciary income tax return and the assessment and refund of fiduciary income tax.

This rule is intended to implement Iowa Code sections 422.16, 422.25, 422.30, 422.70 and 422.73.

701—89.10(422) The income tax certificate of acquittance.

89.10(1) In general. Iowa Code section 422.27 requires the income tax obligation of an estate or trust to be paid prior to approval of the final report by the court. Iowa Code section 422.27 refers only to the report of the executor, administrator or trustee. In addition, the statute makes reference only to a trustee's final report that is approved by a court. A trust that does not report to and is not subject to the supervision of a court is not required to obtain a certificate of acquittance. However, the statute's reference to a trustee who must report to the court would also include, but is not limited to, a referee in partition and the trustee of the estate of an individual bankrupt under Chapter 7 or 11 of Title 11 of the United States Code. What constitutes a trust is a matter of the trust law of the state of situs.

89.10(2) The application for certificate of acquittance. The final fiduciary return of income serves as an application for an income tax certificate of acquittance. For a certificate of acquittance to be received, the appropriate box on the final fiduciary return must be checked to request the certificate.

89.10(3) Requirements for a certificate of acquittance. The issuance of an income tax certificate of acquittance is dependent upon full payment of the income tax liability of the estate or trust for the period of administration. This includes the obligation to withhold income tax on distributions to nonresident beneficiaries. In the case of an estate, the income tax liability of the decedent for both prior years and the year of death must be paid to the extent of the probate property subject to the jurisdiction of the court. The probate property must be applied to the payment of the decedent's income tax liability according to the order of payment of an estate's debts and charges specified in Iowa Code section 633.425. If the probate property of the estate is insufficient to pay the decedent's income tax obligation in full, the department, in lieu of a certificate of acquittance, shall issue a certificate stating that the probate property is insufficient to pay the decedent's income tax liability and that the department does not object to the closure of the estate. In the event the decedent's income tax obligation is not paid in full, the closure of the decedent's estate does not release any other person who is liable to pay the decedent's income tax obligation.

89.10(4) *The extent of the certificate.* An income tax certificate of acquittance is a statement of the department certifying that all income taxes due from the estate or trust have been paid in full to the extent of the income and deductions reported to the department. The certificate fulfills the statutory requirements of Iowa Code section 422.27 and the Iowa income tax portion of the requirements of Iowa Code sections 633.477 and 633.479. Providing all other closure requirements are met, the certificate permits the closure of the estate or trust by the court. However, the certificate of acquittance is not a release of liability for any income tax or additional tax that may become due, such as the result of an audit by the Internal Revenue Service or because of additional income not reported. See 701—subrule 38.2(1) for the limitations on the period of time to conduct income tax audits.

89.10(5) *No income tax certificate of acquittance required—exception to general rule.* If all of the property included in the estate is held in joint tenancy with rights of survivorship by a husband and wife as the only joint tenants, then in this case the provisions of Iowa Code section 422.27, subsection 1, do not apply and an income tax certificate of acquittance from the department is not required.

This rule is intended to implement Iowa Code sections 422.27, 633.425, 633.477 and 633.479.

701—89.11(422) Appeals to the director. An estate or trust has the right to appeal to the director for a revision of an assessment for additional tax due, the denial or reduction of a claim for refund, the denial of a request for a waiver of a penalty and the denial of a request for an income tax certificate of acquittance. The beneficiary of an estate or trust has the right to appeal a determination of the correct amount of income distributed and a determination of the correct allocation of deductions, credits, losses and expenses between the estate or trust and the beneficiary. The personal representative of an estate and the trustee of a trust have the right to appeal a determination of personal liability for income taxes required to be paid or withheld and for a penalty personally assessed. An appeal to the director must be in writing and must be made within 60 days of the notice of assessment and the other matters which are subject to appeal or for assessments issued on or after January 1, 1995, if the beneficiary of an estate or trust, the personal representative of an estate, or the trustee of a trust fails to timely appeal a notice of assessment, the person may pay the entire assessment and file a refund claim within the period provided by law for filing such claims. 701—Chapter 7 shall govern appeals to the director. See specifically rules 701—7.8(17A) to 701—7.22(17A) governing taxpayer protests.

This rule is intended to implement Iowa Code chapter 17A and sections 421.60 and 422.28.

CHAPTER 90
Reserved

TITLE XII
*MARIJUANA AND CONTROLLED
SUBSTANCES STAMP TAX*
CHAPTER 91
ADMINISTRATION OF MARIJUANA AND
CONTROLLED SUBSTANCES STAMP TAX

701—91.1(453B) Marijuana and controlled substances stamp tax. Iowa Code chapter 453B imposes a tax on “dealers” who possess, distribute, or offer to sell “taxable substances” as defined therein. The taxes imposed by Iowa Code chapter 453B are due and payable immediately upon manufacture, production, acquisition, purchase, or possession by a dealer. Payment of the tax is evidenced by a stamp, label, or other official indicia permanently affixed to the taxable substance.

701—91.2(453B) Sales of stamps. The director or the director’s authorized representative shall offer for sale to members of the public, during normal business hours, stamps which are capable of being affixed to taxable substances. The stamps shall be sold at the Hoover State Office Building, fourth floor, Des Moines, Iowa, and at other locations as may be designated by the director.

The director shall offer for sale four different stamps: (1) a stamp for a substance consisting of or containing marijuana, (2) a stamp for taxable substances other than marijuana which are sold by weight, (3) a stamp for taxable substances other than marijuana which are not sold by weight, and (4) a stamp for each unprocessed marijuana plant. Each package or container which contains a taxable substance must have a stamp affixed to it. The stamps will be issued in denominations requested by the purchaser so long as the minimum purchase price for a single stamp purchase transaction is \$215 or more. In addition, the denomination of individual stamps cannot be less than the price for ten dosage units, multiples of ten dosage units, one whole gram, or multiples of one gram even if the stamp will be affixed to a package containing less than ten dosage units or multiples thereof, or only a portion of one gram or multiples thereof.

The director will accept payment for stamps in the form of cash, cashier’s check, or money order. Payment may not be made by personal check.

The stamps are valid for a period of six months from the date of issuance and the stamps shall contain a statement that the stamps expire after six months from the date of issue. A stamp is “unused” and expires if it has not been affixed to taxable substances within six months of the date of issue.

Stamps may be purchased in person or by mail. Persons (including dealers) purchasing stamps are not required to provide identification such as their name or address when purchasing stamps. Neither the director nor any employee of the department shall reveal any information obtained from a stamp purchaser, nor shall information obtained from a stamp purchaser in the course of purchasing stamps be used against the stamp purchaser in any criminal proceeding, unless the information is independently obtained, except in connection with a proceeding involving taxes due under this chapter from the stamp purchaser against whom a tax was assessed.

[ARC 7727B, IAB 4/22/09, effective 5/27/09]

701—91.3(453B) Refunds pertaining to unused stamps. At any time up to 30 days after the expiration date as indicated on the stamp, any unused stamp may be returned to the department and a refund requested in accordance with Iowa Code section 422.73(1) and rules promulgated thereunder.

Refund information is confidential. Persons seeking a refund for an unused stamp must provide a name in which a refund can be made. However, neither the director nor any employee of the department shall reveal any information obtained from a refund claimant; nor shall information obtained from a refund claimant in the course of a refund claim for an unused stamp be used against the refund claimant in any criminal proceeding, unless the information is independently obtained, except in connection with a proceeding involving taxes under this chapter from the refund claimant against whom a tax was assessed or involving a counterfeit taxable substance tax stamp. If granted, the refund in the form of a warrant may, at the request of the refund claimant, either be picked up in person from the department at the

Hoover State Office Building, Des Moines, Iowa, or sent by mail to an address designated by the refund claimant.

[ARC 7727B, IAB 4/22/09, effective 5/27/09]

These rules are intended to implement Iowa Code chapter 453B.

CHAPTER 103
STATE-IMPOSED AND LOCALLY IMPOSED HOTEL AND
MOTEL TAXES—ADMINISTRATION
[Prior to 12/17/86, Revenue Department[730]]

701—103.1(423A) Definitions, administration, and imposition.

103.1(1) Definitions. For the purposes of this chapter and 701—Chapters 104 and 105, unless the context otherwise requires:

“*Department*” means the department of revenue.

“*Director*” means the director of the department of revenue.

“*Lessor*” means any person engaged in the business of renting lodging to users. “Lessor” is synonymous with the word “retailer.”

“*Locally imposed tax*” means the hotel and motel tax levied by Iowa Code section 423A.4.

“*Lodging*” means rooms, apartments, or sleeping quarters in a hotel, motel, inn, public lodging house, rooming house, or manufactured or mobile home which is tangible personal property, or in a tourist court, or in any place where sleeping accommodations are furnished to transient guests for rent, whether with or without meals.

“*Person*” means the same as the term is defined in rule 701—211.1(423).

“*Renting*” or “*rent*” means a transfer of possession or control of lodging for a fixed or indeterminate term for consideration and includes any kind of direct or indirect charge for such lodging or its use.

“*Sales price*” means the amount of consideration for renting of lodging and means the same as the term is defined in rule 701—211.1(423).

“*State-imposed tax*” means the hotel and motel tax levied by Iowa Code section 423A.3.

“*Tax*” or “*hotel and motel tax*” means either the state-imposed or locally imposed hotel and motel tax levied by Iowa Code sections 423A.3 and 423A.4, respectively.

“*User*” means a person to whom lodging is rented.

All other words and phrases used in this chapter and 701—Chapters 104 and 105 and defined in rule 701—211.1(423) have the meaning set forth in that rule for the purposes of these chapters.

103.1(2) Administration. The department is charged with the administration of the tax, subject to the rules, regulations, and direction of the director. The department is required to administer the tax as nearly as possible in conjunction with the administration of the state sales tax except that portion of the law which implements the streamlined sales and use tax agreement. Therefore, the term “retailer” will be used interchangeably between the two taxes.

103.1(3) Imposition. A state-imposed tax of 5 percent is imposed upon the sales price for the rental of any lodging if the rental occurs in this state. The state-imposed tax shall be collected by any lessor of lodging from the user of that lodging. The lessor shall add the tax to the sales price of the lodging, and the state-imposed tax, when collected, shall be stated as a distinct item, separate and apart from the sales price of the lodging and the local tax imposed, if any, under Iowa Code section 423A.4.

103.1(4) A city or county may impose by ordinance of the city council or by resolution of the county board of supervisors a tax on lodging, at a rate not to exceed 7 percent, which shall be imposed in increments of one or more full percentage points upon the sales price from the renting of lodging. When imposed by a city, the tax shall apply only within the corporate boundaries of that city and when imposed by a county shall apply only outside incorporated areas within that county.

This rule is intended to implement 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.2(423A) Statute of limitations, supplemental assessments and refund adjustments. Within three years after a return is filed, the department shall examine it, determine the tax due, and give notice of assessment to the taxpayer. If no return has been filed, the department may determine the tax due and give notice thereof. If such determination is based upon an examination of books, papers, records, or memoranda, such an examination will not include any transactions completed three years or more prior to such examination.

Whenever books and records are examined by an employee designated by the director, whether to verify a return or claim for refund or in making an audit, an assessment must be issued within one year from the date of the completion of the examination. If not, the period for which the books and records were examined becomes closed and no assessment can be made. In no case is the one-year period of limitation an extension of or in addition to the three-year period of limitation.

The department may, at any time within the period prescribed for assessment or refund adjustment, make a supplemental assessment or refund adjustment whenever it is ascertained that any assessment or refund adjustment is imperfect or incomplete in any respect.

If an assessment or refund adjustment is appealed (protested under rule 701—7.8(17A)) and is resolved whether by informal proceedings or by adjudication, the department and the taxpayer are precluded from making a supplemental assessment or refund adjustment concerning the same issue involved in such appeal for the same tax period unless there is a showing of mathematical or clerical error or a showing of fraud or misrepresentation.

This rule is intended to implement Iowa Code sections 423.37 and 422.70 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—103.3(423A) Credentials and receipts. Employees of the department have official credentials, and the retailer should require proof of the identity of persons claiming to represent the department. No charges shall be made or gratuities of any kind accepted by an employee of the department for assistance given in or out of the office of the department.

All employees authorized to collect money are supplied with official receipt forms. When cash is paid to an employee, the retailer should require the employee to issue an official receipt. Such receipt shall show the retailer's name, address and permit number; the purpose for the payment; and the amount of the payment. The retailer should retain all receipts, and only official receipts for payment will be recognized by the department.

This rule is intended to implement Iowa Code sections 422.68(1) and 422.70 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.4(423A) Retailers required to keep records. Every retailer shall keep and preserve the following records:

1. A daily record of the amount of all cash and time payments and credit sales from the renting of rooms subject to tax under Iowa Code chapter 423A.
2. A record of all deductions and exemptions taken in filing a tax return.

The records required in this rule must be preserved for a period of three years and open for examination by the department during this period of time.

Retailers performing all or part of their record keeping and retention of books, records, and other sources of information under electronic data interchange process or technology, see 701—subrule 11.4(4).

If a tax liability has been assessed and an appeal is pending to the department, state board of tax review, district court, or supreme court, books, papers, records, memoranda or documents specified in this rule which relate to the period covered by the assessment shall be preserved until the final disposition of the appeal. This provision applies equally to parties to the appeal and other retailers who could claim a refund as a result of the resolution of the appeal.

Failure to keep and preserve adequate records shall be grounds for revocation of the state-imposed tax permit.

This rule is intended to implement Iowa Code section 423.41 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.5(423A) Audit of records. The department shall have the right and duty to examine or cause to be examined the books, papers, records, memoranda or documents of a taxpayer for the purposes of verifying the correctness of a return filed or estimating the tax liability of any retailer. The right

to examine records includes the right to examine copies of the retailer's state and federal income tax returns. When a retailer fails or refuses to produce the records for examination when requested by the department, the director shall have authority to require, by a subpoena, the attendance of the retailer and any other witness whom the department deems necessary or expedient to examine and compel the retailer and witness to produce books, papers, records, memoranda or documents relating in any manner to the tax.

The department shall have the obligation to inform the retailer when an examination of the retailer's books, papers, records, memoranda or documents has been completed and the amount of tax liability, if any, due upon completion of the audit. Tax liability includes the amount of tax, interest, penalty and fees which may be due.

This rule is intended to implement Iowa Code sections 422.70 and 423.41 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.6(423A) Billings.

103.6(1) Notice of adjustments.

a. An employee of the department, designated by the director to examine returns or make audits, who discovers discrepancies in returns or learns that a sales price subject to the tax may not have been listed, in whole or in part, or that no return was filed when one was due, is authorized to notify the person of the discovery by ordinary mail. The notice shall not be termed an assessment. It merely informs the person what amount would be due if the information discovered is correct.

b. Right of person upon receipt of notice of adjustment. A person who has received notice of an adjustment in connection with a return may pay the additional amount stated to be due. If payment is made, and the person wishes to contest the matter, the person should then file a claim for refund. However, payment will not be required until a certified assessment has been made (although interest will continue to accrue on any amount of tax which is determined to be due if payment is not made). If no payment is made, the person may discuss with the employee who notified the person of the discrepancy, either in person or through correspondence, all matters of fact and law which the person considers relevant to the situation. This person may also ask for a conference with the department. Documents and records supporting the person's position may be requested.

c. Power of employee to compromise tax claim. Only the director has the power to compromise any tax claims. The power of the employee who notified the person of the discrepancy is limited to the determination of the correct amount of tax.

103.6(2) Notice of assessment. If, after following the procedure outlined in paragraph 103.6(1) "b," no agreement is reached and the person does not pay the amount determined to be correct within 20 days, a notice of the amount of tax due shall be sent to the person responsible for paying the tax. This notice of assessment shall bear the signature of the director and will be sent by mail.

If the notice of assessment is timely protested according to the provisions of rule 701—7.8(17A) and Iowa Code section 423.37, proceedings to collect the tax will not be commenced until the protest is ultimately determined, unless the department has reason to believe that a delay caused by such appeal proceedings will result in an irrevocable loss of tax ultimately found to be due and owing the state of Iowa. The department will consider a protest to be timely if filed no later than 60 days following the date of the assessment notice. See rule 701—7.8(17A).

This rule is intended to implement Iowa Code sections 422.70, 423.37, and 423.39 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—103.7(423A) Collections. If determined expedient or advisable to do so, the director may enforce the collection of the tax liability which has been determined to be due. In such action, the attorney general shall appear for the department and have the assistance of the county attorney in the county in which the action is pending.

The remedies for the enforcement and collection of the tax are cumulative, and action taken by the department or attorney general shall not be construed to be an election on the part of the state or any of its officers to pursue any remedy to the exclusion of any other remedy.

This rule is intended to implement Iowa Code sections 422.70, 423.37, and 423.39 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.8(423A) No property exempt from distress and sale. The provisions of Iowa Code section 422.26 apply with respect to a tax liability determined to be due by the department. The department shall proceed to collect the tax liability after it has become delinquent; and no property of the taxpayer is exempt from the process whereby the tax is collected.

This rule is intended to implement Iowa Code sections 422.26 and 423.42 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.9(423A) Information confidential. When requested to do so by any person having a legitimate interest in such information, the department shall, after being presented with sufficient proof of the entire situation, disclose to such person the amount of unpaid taxes due by a taxpayer. Such person shall provide the department with sufficient proof consisting of all relevant facts and the reason or reasons for seeking information as to the amount of unpaid taxes due by the taxpayer. The information sought shall not be disclosed if the department determines that the person requesting information does not have a legitimate interest. The director may also authorize the examination of returns filed by a retailer by (1) other officers of the state of Iowa, (2) tax officers of another state if a reciprocal arrangement exists, or (3) tax officers of the federal government if a reciprocal arrangement exists. The director is also empowered to publish annual statistical reports relating to the operation of the tax. See rule 701—6.3(17A).

All other information obtained by employees of the department in the performance of their official duties is confidential as provided by law and cannot be disclosed.

This rule is intended to implement Iowa Code section 422.72 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.10(423A) Bonding procedure. The director may, when necessary and advisable in order to secure the collection of the tax, require any person subject to the tax to file with the department a bond in an amount which the director may fix, or in lieu of such bond, securities approved by the director in an amount which the director may prescribe.

The determination of when and in what amount a bond is required will be determined pursuant to rule 701—11.10(422). The bond required under this rule and rule 701—11.10(422) shall be a single requirement with the amount to be determined with reference to both the potential state-imposed tax (see 701—Chapter 241) and the locally imposed tax liabilities, plus any applicable local option taxes. Whether or not the person required to post the bond files a monthly deposit for state-imposed tax purposes, the basis for determining the locally imposed tax portion of the bond shall be an amount sufficient to cover nine months or three quarters of tax liability.

This rule is intended to implement Iowa Code section 423.35 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.11(423A) Sales tax. The hotel and motel tax is levied in addition to the state sales tax imposed in Iowa Code chapter 423. Additionally, the director of revenue is required to administer the hotel and motel tax as nearly as possible in conjunction with the administration of the state sales tax law except that portion of the law which implements the streamlined sales and use tax agreement. See 701—Chapters 12 to 14 for details. The computation of the tax shall be based on the sales price of the room excluding the sales tax.

This rule is intended to implement 2005 Iowa Code Supplement sections 423A.3, 423A.4, and 423A.6.

701—103.12(423A) Judicial review. Judicial review of actions of the director may be sought in accordance with the terms of the Iowa administrative procedure Act in a manner similar to that provided for review of sales tax matter. See 701—Chapter 7 for details.

This rule is intended to implement Iowa Code section 423.38 and 2005 Iowa Code Supplement sections 423A.3 and 423A.4.

701—103.13(423A) Registration. All persons who are required to collect and remit the locally imposed tax are required to register with the department as a hotel and motel tax collector.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.6.

701—103.14(423A) Notification. Before a city's or county's local option hotel and motel tax can become effective, be revised, or be repealed, 45 days' notice of such action must be given to the director in writing by mail.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.4.

701—103.15(423A) Certification of funds. Within 45 days after the date that the quarterly returns and payments are due, the director will certify to the treasurer of state the amount of locally imposed tax to be transferred from the general fund to the local transient guest tax fund which is to be distributed to each city and county which has adopted the tax. Payments received after the date of certification will remain in the general fund until the next quarterly certification.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.7.

CHAPTER 104
HOTEL AND MOTEL—
FILING RETURNS, PAYMENT OF TAX, PENALTY, AND INTEREST
[Prior to 12/17/86, Revenue Department[730]]

701—104.1(423A) Returns, time for filing. On the quarterly sales tax return, every retailer shall report the gross sales subject to the hotel and motel tax for the entire quarter, listing allowable deductions and figuring tax for the entire quarter. The information required for the computation of the hotel and motel tax liability shall be separate from that required for the computation of the retail sales tax liability. Such information and computation must be stated and computed separately, even though the total tax liability may be paid with a single remittance.

The quarterly reports are due on the last day of the month following the end of the calendar quarter during which the tax is collected. If a person is required to collect the hotel and motel tax and file a monthly deposit for retail sales tax purposes, the monthly deposit should not include the hotel and motel tax collected during the period covered by the deposit.

When the due date falls on a Saturday, Sunday or legal holiday, the return is due the first business day following the Saturday, Sunday or legal holiday. If a return is placed in the mail, properly addressed and postage paid, and postmarked on or before the due date for filing, no penalty will attach should the return not be received until after that date. Mailed returns should be addressed to Sales and Use Tax Processing, Department of Revenue, Hoover State Office Building, P.O. Box 10412, Des Moines, Iowa 50319.

This rule is intended to implement Iowa Code sections 421.14 and 423.31 and 2005 Iowa Code Supplement section 423A.6.

701—104.2(423A) Remittances. The correct amount of tax collected and due shall accompany the forms prescribed by the department. The name, address and sales tax permit number of the sender and amount of tax for the quarterly remittance shall be stated. Every return shall be signed and dated. Reporting forms and a self-addressed return envelope shall be furnished by the department to the retailer; and, when feasible, every retailer shall use them when completing and mailing the return and remittance. All remittances shall be made payable to the Treasurer of the State of Iowa.

This rule is intended to implement Iowa Code section 423.31 and 2005 Iowa Code Supplement section 423A.6.

701—104.3(423A) Permits. An Iowa sales tax permit will be required under this chapter. However, the director may require all persons responsible for collecting and remitting a hotel-motel tax to register with the department.

Any person not in the business of renting rooms to transient guests, but who regularly rents rooms or residences at varying locations to transient guests, may register once under this chapter.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.6.

701—104.4(423A) Sale of business. A retailer subject to the provisions of the Iowa Code relating to the hotel and motel tax who sells the business shall file a return within the month following the sale and pay all tax due. Any unpaid tax is due prior to the transfer of title of any personal property to the purchaser and, if unpaid, becomes delinquent one month after the sale.

A retailer discontinuing business shall maintain records for a period of three years from the date of discontinuing business unless a release from the provision is given in writing by the department.

This rule is intended to implement Iowa Code sections 422.51(2), 422.52, 423.31, and 423.33 and 2005 Iowa Code Supplement section 423A.6.

701—104.5(423A) Bankruptcy, insolvency or assignment for benefit of creditors. In cases of bankruptcy, insolvency or assignment for the benefit of creditors by the taxpayer, the taxpayer shall immediately file a return with the tax being due.

This rule is intended to implement Iowa Code section 423.31(6) and 2005 Iowa Code Supplement section 423A.6.

701—104.6(423A) Claim for refund of tax. Refunds of tax shall be made only to those who have actually paid the tax. A person or persons may designate the retailer to collect the tax as an agent for purposes of receiving a refund of tax. Anyone claiming a refund shall prepare the claim on the prescribed form furnished by the department.

A claim for refund shall be filed with the department within three years from the date the tax became due or one year from the date of payment, whichever is later, stating in detail the reasons and facts and, if necessary, attaching supporting documents on which the claim for refund is based. If the claim for refund is denied, and the person wishes to protest the denial, the department will consider a protest to be timely if filed no later than 60 days following the date of denial. See rule 701—7.8(17A).

This rule is intended to implement Iowa Code section 423.47 and 2005 Iowa Code Supplement section 423A.6.

[ARC 0251C, IAB 8/8/12, effective 9/12/12]

701—104.7(423A) Application of payments. Since a combined hotel and motel tax and quarterly state sales tax return is utilized by the department, all payments received with the return will be applied to satisfy state sales tax and hotel and motel tax liabilities, which include penalty and interest. Application of partial payments received with the tax return and any subsequent partial payment received for that tax period will be applied based on a ratio formula, unless properly designated by the taxpayer as provided in Iowa Code section 421.60(2)“d.” The denominator in the ratio shall be the total of the hotel and motel tax due and the state sales tax due less any monthly sales tax deposits. The numerators in the ratio formula shall be the amounts of hotel and motel tax due and the net state sales tax due.

EXAMPLE: XYZ hotel owes a total of \$1,000 in net state sales tax and hotel and motel tax for the quarter. Of the \$1,000 owed, \$600 is for hotel and motel tax and \$400 is for state sales tax. XYZ files its quarterly sales tax return accompanied by a \$500 partial payment. The \$500 partial payment would be applied based on the following computation:

$$\frac{600}{1000} \times 500 = \$300 \text{ Hotel and motel tax}$$

$$\frac{400}{1000} \times 500 = \$200 \text{ State sales tax}$$

All revenues received under Iowa Code chapter 423A are to be credited to the “local transient guest tax fund.” Revenues include all interest and penalties applicable to any hotel and motel tax report or remittance, whether resulting from delinquencies or audits. All revenues received or moneys refunded 180 days after the date on which a city or county terminates its local hotel and motel tax shall be deposited in or withdrawn from the state general fund. The 180-day limitation applies to actual receipts or disbursements and not to accrued but unpaid tax liabilities or potential refunds.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.7.

701—104.8(423A) Interest and penalty.

104.8(1) Penalties. See rule 701—10.6(421) for the calculation of penalty for tax periods beginning on or after January 1, 1991.

104.8(2) Interest. Tax not paid by the due date of the return shall draw interest at the rate described in rule 701—10.2(421). Payments made are first credited to penalty and interest due and then to the

tax liability. See *Ashland Oil Co. v. Iowa Department of Revenue and Finance*, 452 N.W.2d 162 (Iowa 1990).

This rule is intended to implement Iowa Code section 423A.6.
[ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—104.9(423A) Request for waiver of penalty. See rule 701—10.6(421) for the statutory provisions to penalty for tax periods beginning on or after January 1, 1991.

This rule is intended to implement Iowa Code section 423A.6.
[ARC 7761B, IAB 5/6/09, effective 6/10/09]

701—104.10(423A) Extension of time for filing. Upon a proper showing of the necessity for extending the due date, the director is authorized to grant an extension of time in which to file a return. The extension shall not be granted for a period longer than 30 days. The request for the extension must be received on or before the original due date of the return. It will be granted only if the person requesting the extension shall have paid by the twentieth day of the month following the close of such quarter, 90 percent of the estimated tax due.

This rule is intended to implement Iowa Code section 423.31 and 2005 Iowa Code Supplement section 423A.6.

701—104.11(421,423A) Personal liability of corporate officers and partners for unpaid tax. If a retailer fails to pay hotel or motel tax due, any officer of a corporation or association or any partner of a partnership who has control of, supervision of, or the authority for remitting the hotel or motel tax payments and has a substantial legal or equitable interest in the ownership of the corporation or partnership is personally liable for payment of the tax, interest, and penalty if the failure to pay the tax is intentional. The dissolution of a corporation, association, or partnership does not discharge a responsible person's liability for failure to pay tax. Rule 701—12.15(422,423) describes this liability in more detail. The statements of the rule are made with reference to sales tax, but are also applicable to personal liability for hotel and motel tax.

This rule is intended to implement Iowa Code section 421.26 and 2005 Iowa Code Supplement chapter 423A.

701—104.12(421,423A) Good faith exception for successor liability. For taxes due and unpaid, an immediate successor's liability for unpaid hotel and motel tax is extinguished if the immediate successor can show that its purchase of the business owing the tax was done "in good faith." See rule 701—12.14(422,423) for a detailed analysis of immediate successor liability and the "good faith" exception to that liability.

This rule is intended to implement Iowa Code section 421.28 and 2005 Iowa Code Supplement chapter 423A.

CHAPTER 105
LOCALLY IMPOSED HOTEL AND MOTEL TAX
[Prior to 12/17/86, Revenue Department[730]]

701—105.1(423A) Local option. A city or county may impose by ordinance of the city council or by resolution of the board of supervisors a hotel and motel tax subject to the approval of its citizens. The tax when imposed by a city shall apply only within the corporate boundaries of that city and when imposed by a county shall apply only outside incorporated areas within the county. A city or county can impose the tax only after an election at which a majority of those voting on the question favors imposition.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.4.

701—105.2(423A) Tax rate. The hotel and motel tax rate cannot exceed 7 percent and must be imposed in increments of one or more full percentage points. If a jurisdiction seeks to impose, repeal or change the tax rate, the jurisdiction must hold an election. Within ten days of an election favoring the imposition of the tax, repeal of the tax or change in the tax rate, the county auditor must notify the director in writing of the favorable vote by sending a copy of the abstract of votes from the favorable election to the director.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.4.

701—105.3(423A) Tax base. The hotel and motel tax is imposed upon the sales price from the renting of any and all lodging in a facility covered by Iowa Code chapter 423A. The sales price from renting includes any direct or indirect charge for the rooms.

105.3(1) The tax shall not apply: (a) when lodging is furnished to a person if that person rents any rooms or other lodging for more than 31 consecutive days, (b) to the renting of sleeping rooms in dormitories and in memorial unions at all universities and colleges located in the state, (c) to contracts made directly with the federal government, or (d) to the renting of a room to the guest of a religious institution upon real property exempt from tax as the property of a religious institution, if the reason for renting the room is to provide a place for a religious retreat or function and not a place for transient guests generally.

105.3(2) The tax base shall include the entire cost directly or indirectly related to the renting of lodging. If a person is charged for items other than “rent” in connection with the renting of lodging (e.g., food, telephone, laundry or recreation facility use), such charges must be stated separately or the entire charge will be considered “rent.”

This rule is intended to implement 2005 Iowa Code Supplement section 423A.4.

701—105.4(423A) Imposition dates. A local hotel and motel tax shall be imposed on January 1 or July 1 following the notification to the director of revenue. Once imposed, the tax shall remain in effect at the rate imposed for a minimum of one year. See rule 701—103.14(423A) regarding notification.

This rule is intended to implement 2005 Iowa Code Supplement section 423A.4.

701—105.5(423A) Adding or absorbing tax. It is unlawful for any retailer responsible for collecting and remitting the hotel and motel tax to advertise or hold out, or state to the public or to any person, that the tax imposed will be assumed or absorbed by the retailer, or that the tax will not be considered as an element in the price to the public or the person renting a facility subject to the hotel-motel tax. When a retailer advertises in a manner so that it may be readily seen and read by the public that the price “includes tax,” the retailer may charge a lump sum for renting the facility without making a separate charge for the tax. It is the responsibility of the retailer to provide proof that the retailer has complied with the method of advertising or displaying the price.

This rule is intended to implement Iowa Code sections 423.24 and 423A.6.

701—105.6(423A) Termination dates. A local hotel and motel tax may be terminated only on June 30 or December 31. See rule 701—103.13(423A) regarding notification.

This rule is intended to implement Iowa Code Supplement section 423A.4.

TITLE XV
LOCAL OPTION SALES AND
SERVICE TAX

CHAPTER 107
LOCAL OPTION SALES AND SERVICE TAX

[Prior to 12/17/86, Revenue Department [730]]

701—107.1(422B) Definitions. The following words and terms are used in the administration of the local option sales and service tax:

The word “city” means a municipal corporation and includes towns in Iowa which were incorporated prior to July 1, 1975, but a city does not mean a county, township, school district, or any special purpose district or authority.

When the word “department” is used, it means the “Iowa department of revenue.”

The term “unincorporated area of the county” means all areas of a county which are outside the corporate limits of all cities which are located within the geographical area of the county.

When the meaning of the word “sale” cannot be determined by referring to the definition of that word set out in Iowa Code section 422.42(17), its meaning should be determined by studying Iowa Code chapter 554, Uniform Commercial Code, Article 2.

701—107.2(422B) Local option sales and service tax.

107.2(1) Imposition and jurisdiction. Only a county may impose a tax upon the gross receipts of sales of tangible personal property sold within the county and upon the gross receipts from services rendered, furnished, or performed within the county. The local option sales and service tax may not be imposed by a city except under the circumstances described in rule 107.14(422B). However, the tax may be imposed by a county for transactions in a specified city. The tax may not be imposed on any transaction not subject to state sales tax. Effective May 1, 1999, transactions involving the use of natural gas, natural gas services, electricity or electric services are subject to a local excise tax that is to be imposed on the same basis as the state use tax, unless the sale or use involved in such transactions is subject to a franchise fee or user fee during the period the franchise fee or user fee is imposed. Except as otherwise provided in this chapter, all references to local option sales and service tax also include local excise tax, and all rules governing the administration and collection of local option sales and service tax are also applicable to local excise tax. With the exception of the natural gas and electric related transactions previously mentioned, there is no local option use tax. The local sales and service tax may be imposed at any rate of not more than 1 percent. See rule 701—14.2(422,423) for a tax schedule setting out the combined rate for a state sales tax of 5 percent and a local sales tax of 1 percent. Frequency of deposit and quarterly reports of local option tax with the department of revenue is governed by the retail sales tax provisions found in Iowa Code section 422.52. Local option tax collections shall not be included in the computation of the total tax to determine the frequency of filing under Iowa Code section 422.52.

The local option sales and service tax can be imposed upon the unincorporated area of any county only if a majority of those voting in the area favor its imposition. The tax can be imposed upon any incorporated area within a county only if a majority of those voting in that area favor its imposition. All cities within a county contiguous to each other must be treated as part of one incorporated area, and tax can be imposed in such an incorporated area only if the majority of persons voting in the total area covered by the contiguous cities favor imposition of the tax. For the purposes of this rule, the local option sales and service tax can only be imposed in those areas specified in the ordinance of a county board of supervisors which imposes the tax.

Within ten days of the election at which a majority of those voting in favor of the question of imposition, repeal, or change in the rate of tax, the county auditor must give notice of the election results to the director in the form of a copy of the abstract of votes.

107.2(2) Procedures for implementing and repealing the tax.

a. Implementing the tax. The ballot proposition imposing the tax shall specify the type and rate of the tax and other items set forth in Iowa Code section 422B.1. Effective April 1, 2000, the date of imposition of the tax must occur on either January 1 or July 1, but cannot be earlier than 90 days from

the date of the election in which a majority of those voting on the tax favored its imposition. Within ten days of the favorable election, the county auditor must give written notice of the election by sending a copy of the abstract of ballot from the favorable election to the director of revenue. For the purposes of this rule, the “abstract of ballot” is defined as abstract of votes as provided in 721—21.800(4).

A jurisdiction that has a local option tax that is set to expire may vote to impose another local option tax. However, due to the required imposition dates previously set forth, there may be a lapse in the tax because of an expiration of the former local option tax and the required imposition dates for imposition of a local option tax. Effective July 1, 2001, a local option jurisdiction may avoid a lapse in local option tax. To avoid a lapse in the tax, a jurisdiction may place on the ballot that the new local option tax will continue without repeal of the prior tax. If the required vote is in favor of imposition of the local option tax, the continued local option tax can be imposed so there is no lapse in the tax.

b. Repeal of the tax. A county that has imposed a local option tax may have the tax repealed. Repeal of the tax in an unincorporated area or an incorporated city area may occur either by the board of supervisors’ acting upon its own motion or by the board’s acting on a motion submitted by the governing body of an incorporated area asking for the repeal. The repeal is effective on the later of the date of the adoption of the motion of repeal or the earliest date set forth in Iowa Code section 422B.9(1).

Effective April 1, 2000, tax shall only be repealed on June 30, or December 31, but not sooner than 90 days following the favorable election if one is held. If the tax has been imposed prior to April 1, 2000, and at the time of election a date for the repeal was specified on the ballot, the tax may be repealed on that date despite the dates previously set forth.

This rule is intended to implement Iowa Code sections 422B.1 and 422B.8 and 422B.9 as amended by 2001 Iowa Acts, House File 715, section 14.

701—107.3(422B) Transactions subject to and excluded from local option sales tax.

107.3(1) *Sales of tangible personal property.* The local option sales tax is imposed upon the gross receipts from “sales” of tangible personal property which occur within that portion of a county where a tax is imposed. There is no local option use tax. The taxable event which determines where a sale occurs is “delivery” of the tangible personal property pursuant to contract for sale. If “delivery” occurs within a county, a sale has occurred there, and local option sales tax may be due. If delivery has not occurred within a county, local option sales tax is not due. Whether the contract for sale becomes binding or title passes within the county is irrelevant. *Harold D. Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985). Delivery usually occurs when the seller of tangible personal property transfers physical possession of the property to the buyer. In most instances, this transfer takes place at the seller’s place of business. However, if the seller transfers the property to the buyer from the seller’s own vehicle, then the transfer usually takes place at the buyer’s residence or place of business. Finally, if the seller transfers the property to a common carrier or the United States Postal Service for subsequent transport to the buyer, then “delivery” of the property occurs at the time and place where the seller transfers possession of the property to the postal service or the common carrier.

EXAMPLE 1. Assume that the whole of Polk County has enacted a local option sales tax. Assume that Mr. Edwards lives in Polk County and visits Smith’s Furniture Storeroom also located in Polk County. Mr. Edwards enters into a contract to purchase furniture. Smith’s Furniture Storeroom transports the furniture to a common carrier located in Polk County, who in turn transports it to Mr. Edwards’ residence in Polk County. Local option sales tax is imposed since the delivery, and therefore the sale of the tangible personal property, occurred in a taxing jurisdiction. “Delivery” of the furniture occurred when the seller transferred physical possession of the furniture to the common carrier.

EXAMPLE 2. Assume that the whole of Polk County has enacted a local option sales tax and Jasper County has not. Mr. Jones, from Jasper County, comes to Smith’s Furniture Showroom located in Polk County to buy some furniture. There Mr. Jones enters into a contract to purchase furniture. The furniture which has been purchased is placed on a Smith’s Furniture Showroom truck and transported to Mr. Jones’ home in Jasper County. “Delivery” of the furniture has occurred in Jasper County at the buyer’s residence because that is where Smith’s Furniture Showroom (the seller) transferred physical possession of the

furniture to Mr. Jones (the buyer) under their contract of sale. Because delivery has occurred within Jasper County, no Polk County local option sales tax will be collected on the transaction.

EXAMPLE 3. Assume the same factual circumstances as exist in the previous example except that Mr. Jones has driven from Jasper County to Smith's Furniture Showroom in a pickup truck and the furniture which Mr. Jones has contracted to buy is transferred onto his truck at the Smith's Furniture Showroom loading ramp. In this example, "delivery," and thus the sale of the furniture, has taken place in Polk County because that is where the seller transferred physical possession of the furniture to the buyer. Since delivery occurred in Polk County, Polk County local option sales tax would be due upon the gross receipts of the sale.

EXAMPLE 4. Again, assume that the whole of Polk County has enacted a local option sales tax. Again, assume that Jasper County, in which the city of Newton is located, has not. Ms. Wilson, a resident of Polk County, drives to Jackson's Furniture House in Newton to purchase some furniture. There Ms. Wilson signs a contract to purchase furniture. Jackson's Furniture House transports the furniture in its own truck from Newton to Ms. Wilson's home in Des Moines. "Delivery" of the furniture has occurred at Ms. Wilson's residence in Polk County because that is where physical possession of the furniture passed from the seller to the buyer. Since delivery has occurred within Polk County, the sale has occurred there, and the gross receipts of the sale are subject to Polk County's local option sales tax. Jackson's Furniture House is obligated to collect the Polk County local option sales tax and to remit that tax to the department of revenue.

EXAMPLE 5. Assume the same circumstances as in Example 4 except that Ms. Wilson has driven to Jackson's Furniture House in Newton in a pickup truck. The furniture is loaded into her pickup truck from the Jackson's Furniture House loading dock. In this situation delivery has occurred at the seller's loading dock outside Polk County; therefore, no obligation to pay Polk County local option sales tax exists with regard to the gross receipts of the sale.

107.3(2) *Taxation of sales of tangible personal property moved by carrier with and without the use of "F.O.B." or a similar term.*

a. Ordinarily, property "sold" in a local option sales tax jurisdiction is subject to that jurisdiction's tax. Property moved into or out of a local option sales tax jurisdiction by common carrier is "sold" when the seller transfers physical possession of the property to a carrier for shipment to a buyer unless the buyer and seller indicate their intent that the sale will occur elsewhere by use of the term F.O.B. or of a phrase similar to F.O.B. See Iowa Code section 554.2504. Use of an F.O.B. point located at a place other than that where a seller transfers possession of goods to a carrier usually indicates that the buyer and seller have agreed that sale of the goods will occur at the F.O.B. point. See *Harold D. Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985). In the following examples, assume that Dubuque County has enacted a local option sales tax and Polk County has not.

EXAMPLE A. Assume that Company A is located in Dubuque County and Customer B is located in Des Moines, Iowa, in Polk County. Customer B orders a load of office furniture from Company A. A and B agree that A will secure a common carrier to transport the office furniture to B. A secures the services of Dubuque Cartage Co., which takes possession of the furniture in Dubuque, Iowa, and transports it to Des Moines. There is no mention of the term F.O.B. or any other indication of a delivery point in the contract of sale between A and B. In this case, sale of the furniture was in Dubuque County because that is where the seller of the furniture surrendered physical possession of it to the carrier. A is obligated to collect from B the local option sales tax imposed by Dubuque County.

EXAMPLE B. Assume the same facts as in Example A except that under the terms of the contract of sale delivery of the office furniture is "F.O.B. Des Moines." In this case, sale of the office furniture has occurred in Des Moines in Polk County and not in Dubuque County because the buyer and seller have, with the use of the term "F.O.B. Des Moines," agreed that the sale will take place there. Because of this, A cannot collect from B local option sales tax imposed by Dubuque County.

EXAMPLE C. Mr. Jones, a resident of Polk County, drives to Smith's Furniture Showroom located in Dubuque County to buy some furniture. There Mr. Jones enters into a contract to purchase furniture. Delivery of the furniture is to be "F.O.B. Dubuque." Smith's Furniture Showroom transfers the furniture to a common carrier in Dubuque who transports the furniture to Mr. Jones in Polk County. In this

example, sale of the furniture has occurred in Dubuque County because Mr. Jones and Smith's Furniture Showroom have agreed with the use of the term "F.O.B. Dubuque" that the sale will occur there. Because of this, the sale of the furniture is subject to Dubuque County's local option tax.

b. Taxation of property imported into a local option sales tax jurisdiction by a carrier. In the examples below (except for Example E), assume that the whole of Dubuque County, Iowa, has imposed a local option sales tax and that no portion of Polk County has imposed this tax. Further assume, unless otherwise noted, that any seller has the contacts (described in rule 107.8(422B)) with Dubuque County necessary for the county to require the seller to collect its local option sales tax.

EXAMPLE A. Company A is located in Dubuque County. The company orders a load of office furniture from Seller B located in Chicago, Illinois. Under the contract of sale, it is the obligation of B to place the furniture upon a carrier for transport to A. Chicago Transport picks up the furniture at B's loading dock in Chicago. Under these circumstances, sale of the furniture took place when B transferred possession of the furniture to Chicago Transport. Since sale of the furniture occurred in Illinois, the sale of the furniture is not subject to the Dubuque County local option sales tax.

EXAMPLE B. Assume the same facts as in Example A except that the contract for sale of the furniture between A and B calls for delivery of the furniture "F.O.B. Dubuque County." In this case, with the F.O.B. provision, the parties have agreed that sale of the furniture will occur in Dubuque County, Iowa. Thus, B is obligated to collect Dubuque County local option sales tax from A.

EXAMPLE C. Assume, again, that Company A is located in Dubuque County. However, for the purposes of this example, assume that Company B is located in Des Moines in Polk County, Iowa. A orders office furniture from B; shipment to Dubuque, Iowa, is by carrier with no mention of an F.O.B. point or any other indication of a delivery point in the contract between A and B for the sale of the furniture. In this case, sale occurred in Polk County when B placed the furniture in the hands of the carrier. B cannot collect Dubuque County local option sales tax from A.

EXAMPLE D. Assume the facts are as stated in Example C except that the contract between A and B specifies that delivery of the furniture shall be "F.O.B. Dubuque, Iowa." In this case, B is obligated to collect Dubuque County local option sales tax.

EXAMPLE E. Assume that the whole of Polk County has enacted a local option sales tax. Assume that Jasper County, in which the city of Newton is located, has not. Ms. Wilson, a resident of Polk County, drives to Jackson's Furniture House in Newton to purchase some furniture. There Ms. Wilson signs a contract to purchase furniture. Jackson's Furniture House delivers the furniture to a common carrier for shipment F.O.B. Ms. Wilson's home in Polk County. Since delivery (by virtue of the F.O.B. point) is in Polk County, that jurisdiction's local option tax is imposed on the sale.

c. Taxation of exports from a jurisdiction imposing Iowa local option sales tax. Sales of property which a seller transfers to a carrier for subsequent shipment to a point outside Iowa are not subject to Iowa local option sales tax. This exemption does not apply if the property is subsequently returned to a point anywhere within Iowa (not only within the jurisdiction imposing the local option sales tax), unless the return is solely in the course of interstate commerce or transportation; nor does the exemption apply if the buyer or the buyer's agent other than the carrier takes physical possession of the property within the jurisdiction imposing the local option sales tax. For additional material relating to this exemption see rule 701—17.8(422). For the purposes of this paragraph "c," assume that the whole of Dubuque County imposes a local option sales tax, that Company B sells furniture and is located in Dubuque, Iowa, and that Company A is located outside Dubuque, Iowa.

EXAMPLE A. Company A is located in Chicago, Illinois. The company orders a load of office furniture from Company B. Under the contract for sale, transport of the furniture from Dubuque County to Chicago, Illinois, is by carrier with no F.O.B. point or other indication of a delivery point mentioned. Sale of the furniture occurs in Dubuque County because that is the point at which the seller transferred the furniture to the carrier transporting it. However, that sale is exempt from Dubuque County local option sales tax because Company B transferred the furniture to the carrier for shipment to a point outside Iowa (Chicago, Illinois) and the furniture was subsequently used there.

EXAMPLE B. Assume the same facts as in Example A except that Company A's purchasing agent comes to Dubuque County, purchases the furniture there, takes possession of the furniture in Dubuque

County and then arranges for a carrier to transport the furniture from Dubuque County to Chicago, Illinois. In this case, the exemption is not applicable and local option sales tax applies since the buyer (Company A) took possession of the furniture in Dubuque County prior to transferring the furniture to the carrier.

107.3(3) *Place of sale of tangible personal property in various special situations.*

a. The place of sale for sales from vending machines is the location of each individual vending machine. This is the point at which the property is delivered to the consumer.

b. The usual place of sales by an itinerant merchant or peddler or by a salesperson having a route is the customer's home, business establishment, or any other point at which the itinerant peddler meets with a customer and solicits an order or completes a contract for sale. The point where the property which is the subject of the contract of sale is delivered is the point which determines if the local option sales tax is imposed.

EXAMPLE. A Super Sweep vacuum cleaner salesperson has a sales route which takes in most of Polk County, Iowa. Assume that local option sales tax is imposed only within the corporate boundaries of Polk City, Polk County. The salesperson travels to Polk City and enters into contracts for sales of vacuum cleaners to persons A, B, and C. Under the contract for sale with person A, the vacuum cleaner is immediately delivered from the salesperson's truck to person A. Under the contract with person B, the vacuum cleaner will be delivered to that person's home in Polk City at a later date. Under the contract with person C, the vacuum cleaner will be delivered, at a future date, to the home of that person's mother in Des Moines. The gross receipts from the sales to persons A and B would be subject to local option sales tax, but not the gross receipts from the sale to person C.

c. If a person who purchases items for resale or processing withdraws those items from inventory or from a stock of materials held for processing, the gross receipts from the sales of such items are subject to local option sales tax if they are withdrawn within the area of a county in which the local option tax is imposed, regardless of where these items were purchased.

EXAMPLE. Assume that the whole of Polk County has a local option sales tax and Jasper County does not. Ms. Carver's home and furniture store are located in Polk County. In Jasper County she purchases five unfinished rocking chairs and the stain and varnish to finish them for sale. She gives the Jasper County retailer exemption certificates stating that the rockers are purchased for resale and the stain and varnish for use in processing. After returning to Polk County Ms. Carver finishes one rocking chair, and instead of selling it, uses it in her own home. Polk County local option sales tax is due upon the value of the rocker, stain, and varnish withdrawn and used.

107.3(4) *Sales of tangible personal property to contractors, contractor-retailers, and the use of property by the manufacturer as building material.*

a. Owners, contractors, subcontractors, or builders purchasing building materials, supplies, and equipment for the erection of buildings, or the alteration, repair, or improvement of real property are liable for payment of local option sales tax if they take delivery of any material, supplies, or equipment in that portion of a county in which the tax is imposed. Neither the place where the parties contract for sale, nor the place where the materials, supplies or equipment are stored or used is of importance in determining liability for the tax.

As of May 4, 1988, construction contractors may apply for refund of additional local option sales or service tax paid as a result of the imposition of or an increase in the rate of local option tax if the following circumstances exist:

(1) The additional tax was paid upon tangible personal property incorporated into an improvement to real estate in fulfillment of a written construction contract fully executed prior to the date local option sales tax is imposed or its rate increased, and

(2) The contractor has paid the full amount of both state and local option sales tax due to the department or to a retailer, and

(3) The claim is filed on forms provided by the department within six months of the date on which the contractor has paid the tax.

See rule 701—19.2(422,423) for a description of a similar right of refund applicable to state sales tax. The rule contains several examples useful in understanding this right of refund for local option

tax paid. This local option tax right of refund is not applicable to equipment transferred under a mixed construction contract. See rule 701—19.9(422,423) for a description of a mixed construction contract and rule 701—19.10(422,423) for a description of “equipment.”

b. In the case of contractors, subcontractors, or builders who are also retailers (see rule 701—19.4(422,423) for a description of these persons) local option sales tax may be imposed by a county in which those persons withdraw building materials, supplies, and equipment from inventory for construction purposes or in which the property is delivered to users or consumers who have purchased it.

c. The use within any county of tangible personal property by that property’s manufacturer, as building materials, supplies, or equipment in the performance of a construction contract, or for any purpose except for resale or processing is a sale at retail within the county by the manufacturer. The local option sales tax is computed upon the cost for the manufacturer of the fabrication or production of the materials, supplies, or equipment.

701—107.4(422B) Transactions subject to and excluded from local option service tax.

107.4(1) Local option service tax is imposed upon any enumerated service if the service is rendered, furnished, or performed within the area of a county where that tax is imposed. If only the product or result of a service is used within such an area, no local option service tax may be imposed upon the gross receipts of that service. For the purposes of Examples 1, 2, and 3 in this subrule, assume that a local option service tax is imposed within all of Polk County and that no such tax is imposed within Jasper County.

EXAMPLE 1. Boat repair is a taxable, enumerated service. George, a resident of Polk County, takes his boat to Jasper County to be repaired by Bob. Completely within the boundaries of Jasper County, Bob renders the enumerated service of boat repair. Bob then returns the boat to George’s home in Polk County. No tax is due upon Bob’s charges for the repair. The entire service of boat repair was rendered in Jasper County where there is no local option tax. Even if George and Bob had entered into a contract for the repair of the boat within Polk County, this transaction would not be subject to Polk County’s local option service tax. Rendering or furnishing of the service, not entry into a binding contract for performance of the service, is the taxable event for the purpose of local option service tax.

EXAMPLE 2. Mr. Jolson is a contractor-retailer who performs roof repair services and also has a store where he sells roofing materials. The store is located in Jasper County. Roof repair is a taxable service. Mr. Keller’s home is located in Polk County. At the store in Jasper County, Mr. Keller and Mr. Jolson contract for repair of Mr. Keller’s roof. Mr. Jolson then enters Polk County, repairs the roof on Mr. Keller’s home, and returns to Jasper County. The gross receipts from this roof repair would be subject to Polk County local option service tax regardless of where Mr. Keller and Mr. Jolson entered into the contract for repair of the roof.

EXAMPLE 3. “Machine repair of all kinds” is a taxable enumerated service. Ms. Robinson lives in Jasper County. Ms. Beatty owns a shop which repairs refrigerators. Ms. Robinson’s refrigerator breaks down. She calls Ms. Beatty, who drives her truck to Ms. Robinson’s home in Jasper County. If Ms. Beatty repairs the refrigerator at Ms. Robinson’s home in Jasper County, the repair is not subject to Polk County local option service tax. If Ms. Beatty placed Ms. Robinson’s refrigerator on the truck, took it to her shop in Polk County, repaired it there and then took the refrigerator back to Ms. Robinson’s home, the service would be subject to Polk County local option service tax. In the first instance, the service was performed within Jasper County; in the second instance, it was performed within Polk County.

EXAMPLE 4. As of July 1, 1985, “water softening” is a taxable enumerated service. For the purposes of this example, assume that a local option service tax has been imposed in Polk City, Polk County, but nowhere else within Polk County. Katz Water Softening Service has customers in Des Moines, Polk City, and the unincorporated areas of Polk County. Assuming that water softening service is performed where a customer’s water softener is located, services rendered to customers within Polk City would be taxable. Services rendered to customers in Des Moines and the unincorporated areas of Polk County would not be taxable. The location of Katz’s office would not be material in determining whether service for a particular customer is taxable or not.

107.4(2) Reserved.

701—107.5(422B) Single contracts for taxable services performed partly within and partly outside of an area of a county imposing the local option service tax.

107.5(1) If a contract for a taxable service is substantially performed partly within and partly without the areas of a county imposing a local option service tax, it will be presumed that all of the contract is performed within the area of the county imposing the tax unless that portion of the service not subject to tax is separately stated, separately billed, and is reasonable in amount. For purposes of the examples in this subrule, assume that the whole of Polk County imposes a local option service tax, but Jasper County and Boone County do not.

EXAMPLE 1. “Painting” is a taxable enumerated service. Mrs. Pauley owns three houses, one each in Polk, Jasper, and Boone Counties. Pelz Painting Service contracts with Mrs. Pauley to paint all three houses for \$6,000. The contract specifically states that \$2,000 of this amount is to be paid for painting the Polk County house. The houses are all approximately equal in size. Since the amount paid for painting the Polk County house is separately stated, separately itemized, and reasonable in amount, Polk County local option sales tax is due upon the \$2,000 amount only.

EXAMPLE 2. “Tangible personal property rental” is a taxable enumerated service. Assume that Kim’s Tree Trimming Company rents a machine from Bob’s Rent-All. The rental contract states that a machine will be rented for three months for \$6,000 and that \$5,500 of this amount is paid for rental of the machine in Jasper County and \$500 of this amount for rental of the machine for use in Polk County. After investigation, it is learned that during a three-month period of the rental contract the machine was used for one week in Jasper County and for two months, three weeks and two days in Polk County. The amount paid for use of the machine in Polk County is separately stated and separately itemized; however, it is not reasonable in amount. Local option sales tax would be due on some greater amount than \$500.

EXAMPLE 3. Sam Shovel runs a detective agency. He is hired by Mrs. Lane to conduct an investigation. Over the course of a month Mr. Shovel conducts the investigation partly in Polk, partly in Jasper, and partly in Boone County. The investigation involves travel, examination of documents, surveillance, interviews, and conducting chemical tests on various pieces of material. It is virtually impossible to fairly apportion the amounts of the final bill which are attributable to Polk, Jasper, and Boone Counties, respectively. Unless Sam Shovel can prove that the amount of his activity attributable to Polk County is inconsequential or insubstantial, the entire amount of his final bill to Mrs. Lane is subject to Polk County local option service tax.

107.5(2) Reserved.

701—107.6(422B) Motor vehicle, recreational vehicle, and recreational boat rental subject to local option service tax. The principles used to determine whether motor vehicle, recreational vehicle, and recreational boat rental are subject to Iowa tax are set out in rule 701—26.68(422). Basic principles which determine whether rentals are or are not subject to Iowa sales tax can be used to determine if the rentals are subject to a local option service tax. For example, a short-term rental of a vehicle has occurred within a county imposing a local option sales tax when, pursuant to a rental contract, possession of a vehicle is transferred to a customer. The tax is collectible when any lump sum or periodic payment is due under the rental agreement and paid within the local option county. Transfer of possession of the vehicle must have occurred in the county imposing the local option tax; a contract for rental need not have been executed there.

EXAMPLE 1. Assume that the whole of Polk County has a local option service tax. Customer A signs a rental contract with and takes possession of a rental car from an office of a rental agency located in Des Moines. Thereafter, A drives the car from Des Moines to Dubuque, Iowa, and back. In Des Moines, the rental agency collects gross receipts from the rental of \$100. Such gross receipts would be subject to Polk County local option sales tax.

EXAMPLE 2. Assume the same facts as in Example 1 except that customer B drives the automobile to Dubuque, Iowa, where no local option tax is imposed and drops it off at a rental agency office there. Also in Dubuque, the customer pays a total charge for the rental of \$50. No Polk County local option service tax is due. Transfer of possession occurred in Polk County, but payment for the rental did not.

EXAMPLE 3. Assume the same facts as in Examples 1 and 2, except that before taking possession of the vehicle in Des Moines, customer A pays the rental agency a \$25 deposit. Also, rental of the vehicle is on a mileage and per-day basis. Customer A drives the vehicle to Dubuque, Iowa. There it is discovered that the mileage and per day charges add up to \$50. Customer A pays the rental agency an additional \$25 in Dubuque which has no local option tax. Polk County local option service tax is due upon the \$25 deposit paid in Des Moines, but not upon the \$25 paid in Dubuque. Only the payment made under the lease in Des Moines is subject to Polk County local option tax.

EXAMPLE 4. Assume the same taxation situation as in Example 1. Customer A rents a car in Dubuque, Iowa, which has no local option tax and drives it to Des Moines which has a local option tax. In Des Moines, A pays \$50 for the use of the car. Since transfer of possession of the vehicle did not take place in Polk County, the leasing transaction is not subject to local option service tax. Payment under the lease alone, within a county, does not allow imposition of that county's local option sales tax.

701—107.7(422B) Special rules regarding utility payments. Delivery of gas and water occurs and the services of electricity, heat, communication, and cable television are rendered, furnished, or performed at the address of the subscriber who is billed for the purchase of this property or services. If a telephone subscriber with an address in a local option service tax county uses a telephone credit card within Iowa but outside that county to make an intrastate telephone call, billings to the subscriber's number within the local option service tax county are subject to local option tax.

EXAMPLE. Assume the whole of Polk County, but no other county in Iowa, has a local option service tax. Mrs. Adams lives in Polk County and has a telephone credit card. While staying at a Fort Dodge hotel, Mrs. Adams uses a telephone credit card to call a number in Cedar Rapids. The charge for this use is billed to Mrs. Adams' number in Polk County. The amount of the charge is subject to Polk County local option service tax.

701—107.8(423B) Contacts with county necessary to impose collection obligation upon a retailer.

107.8(1) Nexus requirements for retailers prior to July 1, 1999, and after June 30, 2005. Before any retailer can be required to collect the local option sales or service tax, certain minimal connections must exist between the county imposing the tax and the retailer. These connections are required by the due process clause of the Fourteenth Amendment and the commerce clause of the United States Constitution. Basically, for due process purposes, the retailer must be purposefully directing its activities at the county's residents in such a way that the retailer is availing itself of an economic market in the county. Maintaining any sort of office, sending any solicitor or salesperson, whether independent contractor or employee, transporting property which the retailer sells into the county in the retailer's own vehicle, or continuous solicitation of business within a county, are nonexclusive examples of purposefully directed activities for which the obligation to collect local option sales tax can be imposed upon a retailer. *Quill Corporation v. North Dakota*, 504 U.S. 298, 112 S.Ct. 1904, 119 L.Ed.2d 91 (1992). An Iowa retailer's physical presence within a county is no longer necessary to require the retailer to collect the county's local option tax. However, a retailer located outside the state of Iowa that does not have a physical presence in the county imposing the local option tax cannot be required, under the commerce clause of the United States Constitution, to collect this state's local option sales tax; *Quill*, supra. Such physical presence in the county exists if it occurs through the retailer's presence or by the presence of independent contractors who act on behalf of the retailer. A retailer that sells to a purchaser that possesses a valid direct pay permit issued by the department need not collect local option sales or service tax from the purchaser. Instead, the purchaser must remit tax directly to the department. However, a retailer should obtain a valid exemption certificate from the purchaser for the tax not collected. For further details regarding direct pay permits see rule 701—12.3(422) and for further details regarding exemption certificates see rule 701—15.3(422,423).

EXAMPLE A. Assume that Dubuque County has a local option tax and Polk County does not. Customer A is located in Dubuque County and Company B in Polk County. A buys office furniture from B with delivery of the furniture to be by common carrier "F.O.B. Dubuque, Iowa." Company B has no employees or property in Dubuque County, solicits no business there, and does not engage

in any other activities purposefully directed toward Dubuque County. Thus, Company B engages in no purposefully directed activities in Dubuque County which could be used to require B to collect Dubuque County local option sales tax. In this case, even though sale of the furniture took place in Dubuque County (see rule 107.3(422B)) B cannot be required to collect local option sales tax from A.

EXAMPLE B. Assume that the whole of Polk County has enacted a local option sales tax. Assume that Jasper County, in which the city of Newton is located, has not. Ms. Wilson, a resident of Polk County, drives to Jackson's Furniture House in Newton to purchase some furniture. There Ms. Wilson signs a contract to purchase furniture with delivery "F.O.B. Des Moines, Polk County." Jackson's Furniture House transfers the furniture to a common carrier who transports it to Ms. Wilson in Polk County. Unlike the retailer in Example A above, Jackson's Furniture House actively solicits business in Polk County by way of television and newspaper advertising. It also transports some furniture to Polk County customers in its own trucks, and its employees at times enter Polk County to repair furniture previously sold to Polk County residents. Jackson's Furniture House is obviously engaged in purposefully directed activities toward Polk County (some of the activities involving its physical presence there and some not), and by virtue of those activities is obligated to collect Polk County's local option sales tax.

EXAMPLE C. Assume the same facts as in Example B immediately above except assume that Jackson's Furniture House engages continuously and intentionally in soliciting business in Polk County by way of television and newspaper advertising, but has no "physical presence" in Polk County. Jackson's Furniture House has no employees delivering or repairing furniture in Polk County, and no property in that jurisdiction; for example, no trucks or furniture repair tools. Jackson's Furniture House is still engaged in "purposeful activity" in Polk County consisting of a continuous and widespread solicitation of business which is of such a nature that this activity requires it to collect local option tax on the gross receipts from its sales there.

EXAMPLE D. For the purposes of understanding this example, assume that the whole of Polk County has enacted a local option sales tax. Don's Mail Order House has offices and a warehouse in Kansas City, Missouri. Don's Mail Order House continuously solicits business in Polk County by way of advertising there on local television and radio and by sending fliers and catalogs to Polk County residents through the mails. However, Don's Mail Order House has no physical presence anywhere in Polk County. It sends no representatives into Polk County for any purpose, owns no property there, and has no independent contractors performing activities on its behalf in Polk County. So, as a result of its solicitations which are purposefully directed at the Polk County market, the due process clause of the Fourteenth Amendment of the United States Constitution does not prohibit Polk County from requiring Don's Mail Order House to collect its tax. However, since Don's Mail Order House is an out-of-state retailer (in contrast to the retailer described in Example C above) with no physical presence in Polk County, the commerce clause of the United States Constitution prevents the county from requiring that Don's Mail Order House collect its local option tax. Under the facts as stated in this example, it would be unconstitutional to require Don's Mail Order House to collect Polk County's local option sales tax.

EXAMPLE E. Assume the existence of the same facts as in Example D except that Don's Mail Order House has a representative with an office located in Polk County whose job it is to solicit and develop business for Don's Mail Order House in the state of Iowa. Because of that representative's presence in Polk County, the commerce clause of the United States Constitution no longer prohibits Polk County from requiring Don's Mail Order House to collect its local option sales tax.

The "connections" with a county described in this rule are not to be confused with the concepts of "sale" and "delivery" mentioned in rule 107.3(422B) above. A retailer may have connections with a county imposing a local option sales tax significant to the point that the county can, constitutionally, require the retailer to collect its tax if the retailer sells goods or performs taxable services within the county. However, if the retailer neither sells goods nor performs services within that county, the retailer cannot be forced to collect a tax there. Conversely, if a retailer delivers (and thus sells) goods in a county imposing a local option sales tax, but does not have the connections described in this rule with that county, then the retailer cannot be made to collect that county's local option tax even if it is making sales of goods there. It is only very rarely, if ever, that a retailer would be performing services within a county but would not have the connections with that county necessary to require the retailer to collect its tax.

107.8(2) *Nexus requirements for retailers effective from July 1, 1999, through and including June 30, 2005.* Effective from July 1, 1999, through and including June 30, 2005, to be obligated to collect a local option tax imposed by a jurisdiction, a retailer must have physical presence within that local option jurisdiction and “delivery,” as defined in rule 107.3(422B), must occur within the jurisdiction. A retailer is considered to have physical presence within a local option tax jurisdiction if the retailer has, among other things, an employee or a representative or a site owned, leased or rented within the jurisdiction. For additional information, see the definition of “retailer” as provided in 2003 Iowa Code sections 422.42(13) and 423.1(8) and the definition of “retailer” set out in 2005 Iowa Code section 423.1(42). See rule 701—30.1(423) for a list of other activities which will create nexus for local option tax purposes.

Rules 701—107.1(422B) to 701—107.8(423B) are intended to implement Iowa Code section 422.53 and 2005 Iowa Code Supplement chapter 423B.

701—107.9(423B,423E) **Sales not subject to local option tax, including transactions subject to Iowa use tax.** The local option sales and service tax is imposed upon the same basis as the Iowa state sales and service tax, with six exceptions:

1. The sales price from the sale of or service of providing motor fuel or special fuel as defined under Iowa Code chapter 452A is subject to local option tax. However, the sales price from the sale or service of these types of fuels is exempt from local option tax if all of the following criteria are met:

- The motor or special fuel must be consumed by a motor vehicle for highway use, or used in watercraft or aircraft;
- Fuel tax must have been paid on the transaction; and
- A refund has not been or will not be allowed.

2. For taxes imposed prior to July 1, 2005, the sales price from the rental of rooms, apartments, or other lodging which was taxed under Iowa Code chapter 422A during the period in which the hotel and motel tax was imposed under that chapter shall be exempt from local option sales tax. As of July 1, 2005, the sales price of lodging is no longer subject to the sales tax imposed by Iowa Code chapter 423; thus, the sales price of lodging is not subject to the local option sales tax. Also, as of July 1, 2005, Iowa Code chapter 422A is repealed. See 701—Chapter 241 for a description of the new state-imposed tax on lodging; see 701—Chapters 103, 104, and 105 for a description of the new local option hotel and motel tax.

3. The sales price from the sale of natural gas or electricity in a city or county is exempt from tax if the sales price is subject to a franchise or user fee during the period the franchise or user fee is imposed.

4. A local taxing jurisdiction is prohibited from taxing the sales price from a pay television service consisting of a direct-to-home satellite service. Section 602 of the federal government’s Telecommunications Act of 1996 defines a “direct-to-home satellite service” as “only programming transmitted or broadcast by satellite directly to the subscribers’ premises or in the uplink process to the satellite.” A “local taxing jurisdiction” is “any municipality, city, county, township, parish, transportation district, or assessment jurisdiction, or any other local jurisdiction in the territorial jurisdiction of the United States, with the authority to impose a tax or fee, but does not include a state.”

5. The sales price from sales of equipment by the Iowa state department of transportation is exempt from local option sales tax.

6. Certain construction-related equipment and other items are exempt.

The general application of this exception is as follows: The sales price from the sale of self-propelled building equipment, pile drivers, motorized scaffolding, or attachments that are customarily drawn or attached to self-propelled building equipment, motorized scaffolding, including auxiliary attachments which improve the performance, safety, operation, or efficiency of the equipment, and replacement parts, and that are directly and primarily used by contractors, subcontractors, and builders for new construction, reconstruction, alterations, expansion, or remodeling of real property or structures is exempt from local option sales tax. As of July 1, 2005, taxation of the above-mentioned machinery and equipment is removed from Iowa Code chapter 423 and thus is not subject to the local option sales tax. See 701—Chapter 241, division II, for an explanation of the new state excise tax imposed on sales of construction machinery and equipment.

The following definitions apply to this rule:

“Directly used” includes equipment used by contractors, subcontractors, and builders for new construction, reconstruction, alterations, expansion, or remodeling of real property or structures. To determine if equipment is “directly used,” one must first ensure that the equipment is used during the specified activity and not before that process has begun or after it has ended. If the machinery or equipment is used in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures, to be “directly used,” it must constitute an integral and essential part of such activity as distinguished from a use in such an activity that is incidental, merely convenient, or is remote. The fact that the machinery or equipment is essential or necessary to new construction, reconstruction, alterations, expansion, or remodeling of real property or structures does not mean that it is also “directly used” in such an activity. Machinery or equipment may be necessary to one of the previously mentioned activities, but so remote from it that it is not directly used in the activity.

In determining whether machinery or equipment is used directly, consideration should be given to the following factors:

1. The physical proximity of the machinery or equipment to other machinery or equipment whose direct use is unarguable. The closer the machinery or equipment whose direct use is questionable is to the machinery or equipment whose direct use is not questionable, the more likely it is that the former is directly used in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures.

2. The proximity in time of the use of machinery or equipment whose direct use is questionable to the use of machinery whose direct use is not questionable. The closer in time the use, the more likely that the questionable machinery or equipment’s use is direct rather than remote.

3. The active causal relationship between the use of the machinery or equipment in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures.

The fewer intervening causes between the use of the machinery or equipment and the production of the product, the more likely it is that the machinery or equipment is directly used in the activities at issue.

“Equipment” means tangible personal property (other than a machine) directly and primarily used in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures. “Equipment” may be characterized as property which performs a specialized function, which, of itself, has no moving parts, or if it does possess moving parts, its source of power is external to it.

“Primarily used” includes machinery and equipment utilized in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures. Machinery or equipment is “primarily used” in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures if more than 50 percent of the total time the machinery or equipment is used in the activity at issue (new construction, reconstruction, alterations, expansion, or remodeling of real property or structures). If a unit of machinery or equipment is used more than 50 percent of the time for the activity at issue and the balance of time for other business purposes, the exemption applies. If a unit of machinery or equipment is used 50 percent or more of the time for business purposes and not being used in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures, the exemption does not apply.

“Real property” includes the earth, the ground, a building, structure and other tangible personal property incorporated into the ground or a building that becomes a part of the ground, structure or the building if removal of the property from the ground or building will substantially damage the property, ground, or building or substantially diminish the value of the property, ground, or building. The ground or the earth is not machinery or equipment. A building is not machinery or equipment. *Mid-American Growers, Inc. v. Dept. of Revenue*, 493 N.E.2d 1097 (Ill. App. Ct. 1986). Instead, a building or structure that is affixed to the ground is considered to be real property. Fence posts embedded in concrete and electrical wiring, light fixtures, fuse boxes, and switches are examples of property sold for incorporation into the ground or a building, respectively. A test which can be applied to differentiate between equipment and real property is the following: If property is sold to a contractor, and the retailer would be required to consider the property “building material” and charge the contractor sales tax upon the purchase of this building material, then sale of the property is not exempt from local option tax.

“*Replacement parts*” means those parts essential to any repair or reconstruction necessary to self-propelled building equipment, pile drivers, motorized scaffolding, or attachments customarily drawn or attached to self-propelled building equipment, motorized scaffolding, including auxiliary attachments which improve the performance, safety, operation, or efficiency of such equipment or equipment’s exempt use in new construction, reconstruction, alterations, expansion, or remodeling of real property or structures. “Replacement parts” does not include attachments and accessories not essential to the operation of the machinery or equipment itself (except when sold as part of the assembled unit) such as cigarette lighters, radios, canopies, air-conditioning units, cabs, deluxe seats, and tools or utility boxes.

“*Self-propelled building equipment*” has the same meaning as that in 701—subrule 17.9(5), paragraph “c,” where the term is defined as an implement which is capable of movement from one place to another under its own power. “Self-propelled building equipment” includes, but is not limited to, skid-loaders, earthmovers and tractors.

Since the local option tax is imposed only on the same basis and not on any greater basis than the Iowa sales and service tax, local option tax is not imposed on any transactions subject to Iowa use tax, including use tax applicable to vehicles subject to registration or subject only to the issuance of a certificate of title. Also, exemptions which are applicable only to Iowa use tax cannot be claimed to exempt any transaction subject to local option sales tax. However, if a transaction involves the use of natural gas, natural gas service, electricity, or electric service, then local excise tax is imposed on the same basis as Iowa use tax under Iowa Code chapter 423. Local excise tax is to be collected and administered in the same manner as local option sales and service tax. Except as otherwise provided in this chapter, all rules governing local option sales and service tax also apply to local excise tax.

When tangible personal property is sold within a local option sales tax jurisdiction and the seller is obligated to transport it to a point outside Iowa or to transfer it to a common carrier or to the mails or parcel post for subsequent movement to a point outside Iowa, the sales price from the sale is exempt from local option sales tax provided the property is not returned to any point within Iowa except solely in the course of interstate commerce or transportation. (Iowa Code subsection 423.3(43)). Property sold in a local option sales tax jurisdiction for subsequent transport to a point outside the jurisdiction but otherwise within the borders of Iowa is not exempt from tax.

This rule is intended to implement 2005 Iowa Code Supplement sections 423B.5 and 423E.3.

701—107.10(422B) Local option sales and service tax payments to local governments. For periods after July 1, 1997, when a local sales and service tax is imposed, the director of revenue within 15 days of the beginning of each fiscal year shall send to each city or county where the local option tax is imposed, an estimate of the tax moneys each city or county will receive for the year and for each month of the year. For periods after July 1, 2002, the director of revenue by August 15 of each fiscal year shall send to each city or county where the local option tax is imposed an estimate of the tax moneys each city or county will receive for the year and for each month of the year. At the end of each month, the director may revise the estimates for the year and remaining months. The director shall remit 95 percent of the estimated monthly tax receipts for the city or county to the city or county on or before August 31 of the fiscal year and the last day of each month thereafter. The director shall remit a final payment of the remainder of tax money due to the city or county for the fiscal year before November 10 of the next fiscal year. If an overpayment has resulted during the previous fiscal year, the first payment of the new fiscal year shall be adjusted to reflect any overpayment. An adjustment for an overpayment which resulted in a previous year will be reflected beginning with the November payment. The shares are to be remitted to the board of supervisors if the tax is imposed in the unincorporated areas of the county, and to each city where the tax is imposed.

Each county’s account is to be proportionately distributed to participating governments 75 percent on the basis of the most recent certified federal census population, and 25 percent on the basis of the sum of property tax dollars levied by participating boards of supervisors or by cities for the three years from July 1, 1982, through June 30, 1985.

“The most recent certified federal census” is the final count from the most recent decennial census conducted by the United States Department of Commerce, Bureau of the Census, as modified by subsequent certifications from the United States Bureau of the Census. If a subsequent certified census occurs which modifies the “most recent certified federal census” for a participating jurisdiction, then the formula set forth in this rule for computations for distribution of the tax shall reflect any population adjustments reported by the subsequent certified census.

The “sum of property tax dollars levied” by boards of supervisors or city councils for the three years from July 1, 1982, through June 30, 1985, is the amount obtained by using data from county tax rate reports and city tax rate reports compiled by the office of management.

Division of the amount from each county’s account to be distributed is done with these steps.

1. The total amount in the county’s account to be distributed is first divided into two parts. One part is equal to 75 percent of the total amount to be distributed. The second part is the remainder to be distributed.

2. The part comprised of 75 percent of the total receipts to be distributed is further divided into an amount for each participating city or unincorporated area. This division is based upon the most recent certified federal census population and any subsequent certified census. Population for each participating city and unincorporated area is determined separately and totaled. The population for each sales tax imposing city or unincorporated area is divided by the total population to produce a percentage for each city or the unincorporated area. The percentages are rounded to the nearest one-hundredth of a percent with the total of all percentages equal to 100 percent. Each government’s percentage is multiplied by 75 percent of the sales tax receipts to be distributed. Distributions are to be rounded to the nearest cent. There are two types of certified federal censuses. The first is the usual decennial census which is always conducted throughout the entire area of any county imposing a local option sales tax.

The second type of certified federal census is the “interim” or “subsequent” census which is conducted between decennial censuses. An interim or subsequent census is not necessarily conducted within an entire county but may be used to count increases or decreases in only one or some of the jurisdictions within that county, for instance, one particular municipality. If an interim census is conducted within only certain participating jurisdictions of a county where a local option sales tax is imposed, the changes in population which that census reflects must be included within both the numerator and the denominator of the fraction which is used to compute the participating jurisdiction’s share of the revenue from the county’s account which is based on county population. See 1996 O.A.G. 10-22-96 (Miller to Richards). See also Example 3 of this rule for a demonstration of how an interim census can affect a population distribution formula.

3. The remaining 25 percent of the amount to be distributed is further divided based upon property taxes levied. The sum of property tax dollars to be used is the amount levied for the three years from July 1, 1982, through June 30, 1985. Property taxes levied by participating cities or the board of supervisors, if the local sales tax is imposed in unincorporated areas, are to be determined separately then totaled. The property tax amount for each sales tax imposing city and the board of supervisors, if the sales tax is imposed in unincorporated areas, is divided by the totaled property tax to produce a percentage. The percentages are rounded to the nearest one-hundredth of a percent with the total of all percentages equal to 100 percent. Each percentage is multiplied by 25 percent of the sales tax receipts to be distributed. Distributions are to be rounded to the nearest cent.

4. For each participating city, or the board of supervisors if unincorporated areas of the county participate, the amount determined in “3” is added to the amount found in “2.” This amount is then to be remitted to the appropriate local government.

In order to illustrate the division of local option sales and service tax receipts, the following examples are provided. The numbers are shown in an attempt to reflect reality but are hypothetical.

EXAMPLE 1. If a local option sales tax is approved for all of Pottawattamie County, the distribution of \$100,000 in countywide receipts would be made in this manner:

Step 1:

Distribution Basis	Amount
Population	\$ 75,000.00
Property Taxes Levied	<u>25,000.00</u>
Total	<u>\$100,000.00</u>

Step 2:

Jurisdiction	Certified Population		Receipts to be
	Number	Percentage	Distributed
Avoca	1,650	1.91%	\$ 1,432.50
Carson	716	0.83%	622.50
Carter Lake	3,438	3.98%	2,985.00
Council Bluffs	56,449	65.30%	48,975.00
Crescent	547	0.63%	472.50
Hancock	254	0.29%	217.50
Macedonia	279	0.32%	240.00
McClelland	177	0.20%	150.00
Minden	419	0.49%	367.50
Neola	839	0.97%	727.50
Oakland	1,552	1.80%	1,350.00
Treynor	981	1.13%	847.50
Underwood	448	0.52%	390.00
Walnut	897	1.04%	780.00
Unincorporated	<u>17,796</u>	<u>20.59%</u>	<u>15,442.50</u>
Total	<u>86,442</u>	<u>100.00%</u>	<u>\$75,000.00</u>

NOTE: The portion of the city of Shelby in Pottawattamie County is excluded.

Step 3:

Jurisdiction	Three-Year Total Taxes Levied		Receipts to be
	Amount	Percentage	Distributed
Avoca	\$454,556	0.82%	\$ 205.00
Carson	202,882	0.37%	92.50
Carter Lake	946,026	1.71%	427.50
Council Bluffs	30,290,732	54.81%	13,702.50
Crescent	7,732	0.01%	2.50
Hancock	56,705	0.10%	25.00
Macedonia	64,504	0.12%	30.00
McClelland	24,300	0.04%	10.00
Minden	155,112	0.28%	70.00
Neola	206,560	0.38%	95.00

Jurisdiction	Three-Year Total Taxes Levied		Receipts to be
	Amount	Percentage	Distributed
Oakland	319,153	0.58%	145.00
Treynor	346,849	0.63%	157.50
Underwood	139,571	0.25%	62.50
Walnut	264,145	0.48%	120.00
Unincorporated	<u>21,782,457</u>	<u>39.42%</u>	<u>9,855.00</u>
Total	<u>\$55,262,284</u>	<u>100.00%</u>	<u>\$25,000.00</u>

Step 4:

Jurisdiction	Amount to be Distributed		Total
	By Population	By Taxes	Distribution
Avoca	\$ 1,432.50	\$ 205.00	\$ 1,637.50
Carson	622.50	92.50	715.00
Carter Lake	2,985.00	427.50	3,412.50
Council Bluffs	48,975.00	13,702.50	62,677.50
Crescent	472.50	2.50	475.00
Hancock	217.50	25.00	242.50
Macedonia	240.00	30.00	270.00
McClelland	150.00	10.00	160.00
Minden	367.50	70.00	437.50
Neola	727.50	95.00	822.50
Oakland	1,350.00	145.00	1,495.00
Treynor	847.50	157.50	1,005.00
Underwood	390.00	62.50	452.50
Walnut	780.00	120.00	900.00
Unincorporated	<u>15,442.50</u>	<u>9,855.00</u>	<u>25,297.50</u>
Total	<u>\$75,000.00</u>	<u>\$25,000.00</u>	<u>\$100,000.00</u>

EXAMPLE 2. If a local option sales tax is approved for Avoca, Oakland and Treynor in Pottawattamie County and \$10,000 is to be distributed, the distribution would be made in this manner:

Step 1:

Distribution Basis	Amount
Population	\$ 7,500.00
Property Taxes Levied	<u>2,500.00</u>
Total	<u>\$10,000.00</u>

Step 2:

Jurisdiction	Certified Population		Receipts to be
	Number	Percentage	Distributed
Avoca	1,650	39.45%	\$2,958.75
Oakland	1,552	37.10%	2,782.50
Treynor	<u>981</u>	<u>23.45%</u>	<u>1,758.75</u>
Total	<u>4,183</u>	<u>100.00%</u>	<u>\$7,500.00</u>

Step 3:

Jurisdiction	Three-Year Total Taxes Levied		Receipts to be
	Amount	Percentage	Distributed
Avoca	\$ 454,556	40.56%	\$1,014.00
Oakland	319,153	28.48%	712.00
Treynor	<u>346,849</u>	<u>30.96%</u>	<u>774.50</u>
Total	<u>\$1,120,558</u>	<u>100.00%</u>	<u>\$2,500.00</u>

Step 4:

Jurisdiction	Amount to be Distributed		Total
	By Population	By Taxes	Distribution
Avoca	\$2,958.75	\$1,014.00	\$ 3,972.75
Oakland	2,782.50	712.00	3,494.50
Treynor	<u>1,758.75</u>	<u>774.00</u>	<u>2,532.75</u>
Total	<u>\$7,500.00</u>	<u>\$2,500.00</u>	<u>\$10,000.00</u>

EXAMPLE 3. For the purposes of understanding this example, assume that the numbers for “certified population” from Step 2 of Example 2 immediately above are derived from the 1990 decennial census. Assume further that in 1993 an interim census is conducted by the Bureau of the Census in Avoca and Oakland only, and nowhere else in Pottawattamie County. As a result of that interim census, the Bureau of the Census certifies the population of Avoca to be 1,752 and the population of Oakland to be 1,493. The towns’ percentages of receipts to be distributed are recomputed in the following manner:

$$\text{Avoca's Percentage Equals } \frac{1752}{1752 + 1493 + 981} = 41.45\%$$

$$\text{Oakland's Percentage Equals } \frac{1493}{1493 + 1752 + 981} = 35.32\%$$

Amounts in Step 2 are then revised as follows:

Jurisdiction	Certified Population		Receipts to be
	Number	Percentage	Distributed
Avoca	1,752	41.46%	\$3,109.50
Oakland	1,493	35.33%	2,649.75
Treynor	<u>981</u>	<u>23.21%</u>	<u>1,740.75</u>
Total	<u>4,226</u>	<u>100.00%</u>	<u>\$7,500.00</u>

The “amount to be distributed by population” found in Step 4 of Example 2 would then be recomputed based on the new figures.

Rule 107.10(422B) is intended to implement Iowa Code section 422B.10 as amended by 2002 Iowa Acts, House File 2622, section 12.

701—107.11(422B) Procedure if county of receipt’s origins is unknown. If the director is unable to determine from which county gross receipts were collected, those receipts shall be allocated among the various counties in which local option sales and service tax is imposed according to the following procedure:

1. The calculations performed under this procedure shall be performed at least quarterly, but in no event less often than the treasurer of the state is obligated to distribute shares of each county’s account in the local sales and service tax fund.

2. The total amount of receipts for which the director is unable to determine a county of collection which have accumulated since the last allocation of these receipts shall be added together to form one lump sum.

3. The amount of population (according to the most recent certified federal census) within the areas of each individual county in which a local option sales and service tax is imposed shall be determined.

4. The amount of population so determined in “3” above for each county shall be added to the amount for every other county in Iowa in which the local option sales and service tax is imposed, until the figure for the amount of population of all areas of Iowa in which the local option sales and service tax is imposed is determined.

5. The sum determined to exist in “2” above shall be multiplied by a fraction, the numerator of which is the population of any one county determined in “3” above and the denominator of which is the number calculated by the method described in “4.” The procedure described herein in “5” shall be used until the amount of tax due to every county imposing local option sales and service tax is calculated. After calculations are complete, the treasurer of the state must distribute shares of each county’s account in the local sales and service tax fund. See rule 107.10(422B) for characterization of the term “most recent certified federal census” and for methods of rounding off percentages and monetary sums.

This rule is intended to implement Iowa Code subsection 422B.10(1).

701—107.12(422B) Computation of local option tax due from mixed sales on excursion boats. Particular difficulties exist in calculating the amount of local option sales tax due for sales occurring on an excursion gambling boat sailing into and out of jurisdictions imposing the local option sales tax. Ordinarily, local option sales tax is payable if tangible personal property is delivered under a contract for sale or if taxable services are rendered, furnished, or performed within that portion of a county where a tax is imposed. However, it can be quite difficult to determine if a moving excursion gambling boat is at any one point in time within or outside of a jurisdiction imposing the local option tax. Thus, it is difficult to determine if a delivery of property or provision of a service on the boat has occurred inside or outside of a local option tax jurisdiction. Because of this, the department will accept the use of any formula which rationally apportions the progress of an excursion gambling boat among jurisdictions which impose a local option tax and those that do not.

Below are four examples setting out two possible formulas for apportionment. Examples A and C utilize a “distance” formula for apportionment. Examples B and D utilize a “time” formula for apportionment. In Examples A and B, state sales tax is included in the sale price of the taxable items. In Examples C and D, state sales tax is added to taxable gross receipts. In all examples, local option sales tax is included in the sales price; also, for every example, it is assumed that the local option sales tax rate is 1 percent in every jurisdiction where it is imposed.

EXAMPLE A. The “Auric” is based in Clinton. Assume that during a particular cruise there occurs \$10,000 worth of vending machine and nongambling game sales. State sales tax and local option tax must be included in the amounts charged for these vending machine and nongambling game sales. Assume that the Auric, on an ordinary cruise, travels round trip for 50 miles on the Mississippi River, 25 of those miles through waters which are part of a local option sales tax jurisdiction and 25 of those miles which

are not. The amount of state sales tax due and the amount of local option sales tax due using a “distance” apportionment formula are determined as follows:

Computation of state sales tax due

1. $\$10,000 \div 1.04 = \$9,615.38$
2. $\$10,000 - \$9,615.38 = \$384.62 =$ amount of state sales tax due

Computation of local option tax due

1. $\$9,615.38 \div 1.01 = \$9,520.18$
2. $\$9,615.38 - \$9,520.18 = \$95.20$
3. $\$95.20 \times \frac{1}{2} = \$47.60 =$ amount of local option sales tax due

EXAMPLE B. The gambling excursion boat “Blue Diamond” is based in Davenport. Assume that, as in Example A, during a particular cruise there occurs \$10,000 worth of vending machine and nongambling game sales. Again, state sales tax and local option tax are included in the amounts charged for these vending machine and nongambling game sales. The Blue Diamond spends three hours on the water during an ordinary cruise. One hour is spent sailing in waters where no local option sales tax is imposed; two hours are spent in waters where the local option tax is imposed. In this case, the Blue Diamond’s operator can use a formula based on time spent sailing inside and outside of a local option tax-imposing jurisdiction rather than distance traveled within and without such a jurisdiction as in Example A, so long as there is a reasonable amount of evidence to indicate that the formula reflects with some accuracy the ratio of nontaxable and taxable sales. In this case, all calculations are the same as those performed in Example A, except that the last calculation is performed as follows:

$$\$95.20 \times \frac{2}{3} = \$63.40 = \text{amount of local option sales tax due}$$

EXAMPLE C. The excursion gambling boat “Golconda” is based in Dubuque, Iowa. On an ordinary cruise, it will travel a round trip of 50 miles on the Mississippi River. During 25 of those 50 miles the Golconda is passing through waters which are part of a local option sales tax jurisdiction. Assume that on one particular cruise, \$100,000 in taxable gross receipts is collected on the boat. Local option sales tax is included in the \$100,000 amount but not state sales tax. Thus, the total amount collected is \$104,000; \$100,000 in gross receipts, \$4,000 in state sales tax. Local option tax is calculated as follows: Divide \$100,000 by 1.01. This result is \$99,009.90. Subtract this from \$100,000 leaving \$990.10. \$990.10 is the amount of local option tax which would be due if all sales during the cruise had occurred in a jurisdiction imposing a local option tax. Since only half the distance traveled was in a jurisdiction imposing the tax, \$990.10 is multiplied by .5 to discover the amount of local option tax due (\$495.05).

EXAMPLE D. The gambling excursion boat “Black Jack” is based in Davenport. Assume that during a particular cruise there is \$150,000 in taxable gross receipts collected on the Black Jack. The full amount collected is \$156,000; \$6,000 in state sales tax and \$150,000 in gross receipts. The Black Jack spends three hours on the water during an ordinary cruise. One hour is spent sailing in waters where no local option sales tax is imposed; two hours are spent in waters where the local option tax is imposed. In this case, as in Example B, the Black Jack’s operator can use a formula based on time spent sailing inside and outside of a local option tax-imposing jurisdiction rather than distance traveled within and without such a jurisdiction so long as there is a reasonable amount of evidence to indicate that the formula reflects with some accuracy the ratio of nontaxable and taxable sales. In this example tax is computed as follows:

1. $\$150,000 \div 1.01 = \$148,514.85$
2. $\$150,000 - \$148,514.85 = \$1,485.15$
3. $\$1,485.15 \times \frac{2}{3} = \$989.11 =$ amount of tax due

Upon beginning operation, a licensee may choose to employ either the “distance” method of apportionment set out in Examples A and C or the “time” method set out in B and D above without informing the department in advance of filing a sales tax return of its choice. A licensee cannot use both methods of apportionment. If a licensee commencing operation wishes to use another method of apportionment, the licensee must petition the department for permission to use this alternative method, and present whatever evidence the department shall rationally require that the alternative method better reflects the ratio of taxable to nontaxable sales before using the alternative method. Any licensee

wishing to change from any existing method of apportionment to another method must also petition the department and receive permission to change its method of apportionment.

This rule is intended to implement Iowa Code sections 99F.10(6) and 422B.8.

701—107.13(421,422B) Officers and partners, personal liability for unpaid tax. If a retailer or purchaser fails to pay local option sales tax when due for taxes due and unpaid on and after July 1, 1990, any officer of a corporation or association, or any partner of a partnership, who has control of, supervision of, or the authority for remitting local option sales tax payments and has a substantial legal or equitable interest in the ownership of the corporation or partnership is personally liable for payment of the tax, interest, and penalty if the failure to pay the tax is intentional. This personal liability is not applicable to local option tax due and unpaid on accounts receivable. The dissolution of a corporation, association, or partnership does not discharge a responsible person's liability for failure to pay tax. See rule 701—12.15(422,423) for a description of various criteria used to determine personal liability and for a characterization of the term "accounts receivable."

This rule is intended to implement Iowa Code section 421.26 and chapter 422B.

701—107.14(422B) Local option sales and service tax imposed by a city.

107.14(1) On or before January 1, 1998, a city may impose by ordinance of its council a local sales and service tax if all of the following circumstances exist:

- a.* The city's corporate boundaries include areas of two Iowa counties.
- b.* All the residents of the city live in one county as determined by the latest federal census preceding the election described in paragraph "c" immediately below. Effective May 20, 1999, at least 85 percent of the residents of the city must live in one county to qualify.
- c.* The county in which the city's residents reside has held an election on the questions of the imposition of a local sales and service tax and a majority of those voting on the question in the city favored its imposition. Effective May 20, 1999, the city residents must live in the county and have held an election on the question of the imposition of the local sales and service tax and a majority of those voting on the question in the city favored its imposition.

d. The city has entered into an agreement on the distribution of the sales and service tax revenues collected from the area where the city tax is imposed with the county where such area is located.

107.14(2) Imposition of the tax is subject to the following restrictions:

- a.* The tax shall only be imposed in the area of the city located in the county where none of its residents reside. Effective May 20, 1999, the tax shall only be imposed in the area of the city located in the county where not more than 15 percent of the city's residents reside.
- b.* The tax shall be at the same rate and become effective at the same time as the county tax imposed in the other area of the city.
- c.* The tax once imposed shall continue to be imposed until the county-imposed tax is reduced or increased in rate or repealed, and then the city-imposed tax shall also be reduced or increased in rate or repealed in the same amount and be effective on the same date.
- d.* The tax shall be imposed on the same basis as provided in rule 107.9(422B).
- e.* The city shall assist the department of revenue to identify the businesses in the areas which are to collect the city-imposed tax. The process shall be ongoing as long as the city tax is imposed.
- f.* The agreement on the distribution of the revenue collected from the city-imposed tax shall provide that 50 percent of such revenue shall be remitted to the county in which the part of the city where the city tax is imposed is located.

This rule is intended to implement Iowa Code chapter 422B as amended by 1999 Iowa Acts, chapter 156, sections 5 and 6.

701—107.15(422B) Application of payments. Since a combined state sales and local option return is utilized by the department, all payments received will be applied to satisfy state sales tax and local option sales and service tax, which include tax, penalty and interest. Application of payments received with the tax return and any subsequent payments received will be applied based on a ratio formula, unless properly

designated by the taxpayer as provided in Iowa Code section 421.60(2) “d.” The ratio for applying all payments received with the return and all subsequent payments for the given tax period will be based upon the calculated total of state sales and local option sales and service tax due for the given tax period in relation to combined total payment of sales and local option sales and service tax actually received for that tax period.

This rule is intended to implement Iowa Code Supplement section 422B.10.

701—107.16(422B) Construction contractor refunds. Construction contractors may apply to the department for a refund of local option tax paid on goods, wares, or merchandise based on certain conditions.

107.16(1) Conditions for refund. All of the following conditions must be met before a contractor is eligible to claim a local option tax refund:

a. The goods, wares or merchandise is incorporated into an improvement to real estate in fulfillment of a written contract fully executed prior to the date of the imposition or increase in rate of the local option tax. The refund shall not apply to equipment transferred in fulfillment of a mixed contract.

b. The contractor has paid to the department or to a retailer the full amount of the state and local option tax.

c. Prior to July 1, 2001, the claim must be filed on forms provided by the department and must be filed within six months of the date the tax is paid. Effective July 1, 2001, the claim for refund must be filed with the department within one year from the date the tax is paid.

107.16(2) The refund must be paid by the department from the appropriate city or county account in the local option tax fund.

107.16(3) Erroneous and false refund claims. A contractor who makes an application for refund that is in error is liable for payment of the excess refund paid plus interest as set forth in Iowa Code section 421.7.

For collection of payments under this rule, see Iowa Code section 422B.11.

This rule is intended to implement Iowa Code section 422B.11 as amended by 2001 Iowa Acts, House File 715, section 15.

¹701—107.17(422B,422E) Discretionary application of local option tax revenues. Effective July 1, 2001, the governing authority of the local option jurisdiction or school board has the discretion to determine whether revenues received from local option tax are to be applied to bond obligations as provided in Iowa Code section 76.4 as amended by 2001 Iowa Acts, House File 739.

This rule is intended to implement Iowa Code section 76.4 as amended by 2001 Iowa Acts, House File 739.

² At its meeting held October 9, 2000, the Administrative Rules Review Committee delayed the effective date of 107.16 until adjournment of the 2001 Session of the General Assembly.

CHAPTER 108
LOCAL OPTION SCHOOL INFRASTRUCTURE
SALES AND SERVICE TAX

These rules govern school infrastructure local option sales and services taxes voted on and approved prior to April 1, 2003. For school infrastructure local option sales and services taxes voted on and approved on or after April 1, 2003, see 701—Chapter 109.

701—108.1(422E) Definitions. The following words and terms are used in the administration of the local option school infrastructure sales and service tax:

“*County*” means an involuntary political or civil division of the state, created by general statute, to aid in the administration of government and is simply a governmental auxiliary. *Shirkey v. Keokuk County*, 275 N.W. 706, 712, 225 Iowa 1159 (1938). A county is generally known to include a designated geographic area which may comprise municipalities, cities, or towns.

“*Department*” means the Iowa department of revenue.

“*Director*” means the director of the Iowa department of revenue.

“*Sale*” means the same as defined in 701—107.1(422B).

“*School district*” means a school corporation that has exclusive jurisdiction in all school matters over a designated geographic area. See Iowa Code section 274.1.

“*School infrastructure*” means those activities for which a school district is authorized to contract indebtedness and issue general obligation bonds under Iowa Code section 296.1. Qualifying activities include construction, reconstruction, repair, purchasing, or remodeling of schoolhouses, stadiums, gyms, fieldhouses, or bus garages. School infrastructure activities also include the procurement of schoolhouse construction sites and making site improvements. Additional qualifying activities include the payment or retirement of outstanding bonds previously issued for school infrastructure purposes as defined in this rule and the payment or retirement of such bonds.

However, “school infrastructure” does not include activities related to a teacher’s or superintendent’s home or homes.

This rule is intended to implement Iowa Code chapter 422E.

701—108.2(422E) Authorization, rate of tax, imposition, use of revenues, and administration.

108.2(1) Authorization and imposition. Effective April 20, 1998, a local option school infrastructure sales and service tax will only be imposed after an election in which a majority of those voting on the question favors the imposition of the tax. A local option school tax that has been approved by an election will be applied to all incorporated and unincorporated areas of that county. A request for the local option school tax may be made either by the county or a school district which contains at least 50 percent of the county population in which it is located. Each type of request has specific requirements for proposing the tax under this chapter. The requirements are set forth as follows:

a. Imposition by county. A petition must be submitted to a county board of supervisors requesting imposition of a local school infrastructure sales and service tax. To qualify, the petition must be signed by eligible voters of the whole county in a number equal to 5 percent of the persons in the whole county who voted in the last preceding state general election. Within 30 days of receiving the petition, the county board of supervisors must inform the county commissioner of elections to submit the question of imposing the tax to the registered voters of the whole county.

b. Imposition by school district. A motion or motions requesting the question of imposing a local option school infrastructure sales and service tax may be proposed and adopted by the governing body of a school district or school districts located within a county. To qualify for imposing this tax, a school district located within a county must contain a total, or a combined total in the case of more than one school district, of at least 50 percent of the population of the county. Upon adoption of the motion, the governing body of a school district must notify the county board of supervisors of the adoption of the motion. A motion is no longer valid at the time of the regular election of members of the governing body which adopted the motion. The county board of supervisors must then submit the motion to the

county commissioner of elections, who will publish the notice of the ballot proposition regarding the local option school infrastructure sales and service tax.

108.2(2) *Ballot proposition—procedure for imposition of the tax whether by county or the school district.* A county commissioner for elections must submit the question for imposing the tax under this chapter at a state general election or a special election held at any time other than the time of a city regular election. The election cannot be sooner than 60 days after publication of the notice of the ballot proposition. The ballot proposition must be in the form established by the state commissioner of elections. For additional information regarding the form and content of the ballot proposition, see 721—21.803(77GA, HF2282).

108.2(3) *Tax rate, election, and repeal.* The maximum rate of tax imposed under this rule shall be 1 percent. The tax shall be imposed without regard to any other local sales and service tax authorized under the Iowa Code. The rate of tax may be increased up to 1 percent, decreased, or repealed after an election in which a majority of those voting are in favor of the question of rate change or repeal of the tax. However, the tax cannot be repealed before the tax has been in effect for one year.

The election for a change in the tax rate or repeal of the tax may be called and held under the same conditions as previously set forth for the election imposing the tax. The election may be held not sooner than 60 days following the publication of the notice of the ballot proposition.

Local option school infrastructure sales and service tax is automatically repealed at the expiration of ten years from the date of imposition or a shorter period provided in the ballot proposition.

A local option school infrastructure sales and service tax cannot be repealed or reduced in rate if bond obligations are outstanding unless sufficient funds to pay the principal, interest, and premium, if any, on the outstanding obligation at and prior to maturity have been properly set aside and pledged for that purpose.

For elections held on or after April 1, 2000, the tax may only be imposed with an effective date of either January 1 or July 1, but not sooner than 90 days following the favorable election.

For elections held on or after April 1, 2000, this tax shall be repealed on either June 30 or December 31, but not sooner than 90 days following a favorable election if one is held. If a tax has been imposed prior to April 1, 2000, and at the time of the election a date for repeal was specified on the ballot, the tax may be repealed on that date despite the previously mentioned dates set forth.

108.2(4) *Use of revenues.* Local option sales and service tax revenues received under this chapter shall be used for infrastructure purposes as defined in rule 701—108.1(422E). In addition, certain cities may obtain revenues from the local option school tax. A school district in a county that has imposed this tax may enter into an Iowa Code chapter 28E agreement with a city or cities whose boundaries encompass all or a part of the school district; the city may then receive a portion of the revenues from this tax as determined by the 28E agreement. A city may utilize revenues from this tax for school infrastructure purposes or any valid purposes authorized by the governing board of the city.

108.2(5) *Notice of election results.* The county auditor must give written notice by certified mail to the director of the results of an election in which a majority of those voting on the question favors the imposition, repeal, or change in the rate of the tax, within ten days of the date of the election. This written notice must consist of a copy of the abstract of votes from the favorable election. For a definition of “abstract of votes” see 721—subrule 21.803(4).

108.2(6) *Administration of the tax.* The local option school infrastructure sales and service tax is to be imposed on the gross receipts of sales of tangible personal property sold within the local option jurisdiction and upon the gross receipts from services rendered, furnished, or performed within the local option jurisdiction. This tax may only be imposed by a county in the manner set forth previously in this rule. The tax may not be imposed on any transaction not subject to state sales tax. Effective May 1, 1999, transactions involving the use of natural gas, natural gas services, electricity or electric service are subject to a local excise tax that is to be imposed on the same basis as the state use tax, unless the sale or use involved in such transactions is subject to a franchise fee or user fee during the period the franchise fee or user fee is imposed. Except as otherwise provided in this chapter, all references to local option school infrastructure tax also include local excise tax and all rules governing the administration and collection of local option school infrastructure tax are also applicable to local excise tax. For further details, see

701—108.5(422E). With the exception of the natural gas and electric related transactions previously mentioned, there is no local option use tax. See rule 701—14.2(422,423) for a tax table setting forth the combined rate for a state sales tax of 5 percent and the local sales tax rate of 1 percent. Frequency of deposits and quarterly reports of local option tax filed with the department of revenue are governed by the retail sales tax provisions found in Iowa Code section 422.52. Local option tax collections shall not be included in the computation of the total tax to determine the frequency of the filing under Iowa Code section 422.52.

Prior to April 1, 2000, a local option school infrastructure tax cannot be imposed until 40 days after there has been a favorable election to impose the tax. All local option school infrastructure tax must be imposed January 1, April 1, July 1, or October 1. The tax can be repealed only on March 31, June 30, September 30, or December 31. However, this tax must not be repealed before the tax has been in effect for one year. For imposition and repeal date restrictions on or after April 1, 2000, see subrule 108.2(3).

This rule is intended to implement Iowa Code Supplement section 422E.2 as amended by 2000 Iowa Acts, House File 2136, section 37.

701—108.3(422E) Collection of the tax. After a majority vote favoring the imposition of the tax under this chapter, the county board of supervisors shall impose the tax at the rate specified and for a duration not to exceed ten years or less as specified on the ballot. To determine the amount of tax to be imposed on a sale, the taxable amount must not include any state gross receipts taxes or any other local option taxes. A retailer need only have a state tax permit to collect the local option sales and service tax under this chapter. This tax is to be imposed and collected in the following manner:

1. Sale of tangible personal property. This local option sales and service tax is imposed on the gross receipts from “sales” of tangible personal property in which delivery occurs within a jurisdiction imposing the tax. Department rule 701—107.3(422B), which governs transactions subject to and excluded from local option sales tax, is applicable to and governs transactions subject to tax under this chapter as well. As a result, the text of 701—107.3(422B) is incorporated by reference into this chapter.

2. The sale of enumerated services. Department rules 701—107.4(422B), 701—107.5(422B), and 701—107.6(422B), which govern transactions subject to and excluded from local option service tax, single contracts for taxable services performed partly within and partly outside of an area of a county imposing the local option service tax, and motor vehicle, recreational vehicle, and recreational boat rentals subject to local option service tax, respectively, are applicable to and govern transactions subject to tax under this chapter. As a result, the text of 701—107.4(422B), 701—107.5(422B), and 701—107.6(422B) is incorporated by reference into this chapter.

This rule is intended to implement Iowa Code section 422E.3.

701—108.4(422E) Similarities to the local option sales and service tax imposed in Iowa Code chapter 422B and 701—Chapter 107. The administration of the tax imposed under this chapter is similar to the local option tax imposed under Iowa Code chapter 422B and 701—Chapter 107. As a result, a few of the rules set forth in 701—Chapter 107 are also applicable and govern the local option sales and service school infrastructure tax as well. Accordingly, the following rules are incorporated by reference into this chapter and will govern their respective topics in relation to the local option sales and service school infrastructure tax:

1. 701—paragraph 107.2(2) “a” Continuation of local option tax.
2. 701—107.7(422B) Special rules regarding utility payments.
3. 701—107.8(422B) Contacts with county necessary to impose collection obligation upon a retailer.
4. 701—107.9(422B,422E) Sales not subject to local option tax, including transactions subject to Iowa use tax.
5. 701—107.12(422B) Computation of local option tax due from mixed sales on excursion boats.
6. 701—107.13(421,422B) Officers and partners, personal liability for unpaid tax.
7. 701—107.15(422B) Application of payments.

8. 701—107.17(422B,422E) Discretionary application of local option tax revenues.

This rule is intended to implement Iowa Code sections 76.4 as amended by 2001 Iowa Acts, House File 739, and 422E.3 as amended by 2001 Iowa Acts, House File 715, section 16.

701—108.5(422E) Sales not subject to local option tax, including transactions subject to Iowa use tax. The local option sales and service tax for school infrastructure is imposed upon the same basis as the Iowa state sales and service tax. However, like the local option sales and service tax set forth in Iowa Code chapter 422B and department rule 701—107.9(422B), there are sales and services that are subject to Iowa state sales tax, but such sales or services are not subject to local option sales and service tax. Department rule 701—107.9(422B), which governs the sales not subject to local option sales and service tax pursuant to Iowa Code section 422B.8, is incorporated by reference into this chapter and will govern the local option sales and service tax for school infrastructure tax with the following exception:

For transactions prior to May 1, 1999. The gross receipts from the sale of natural gas or electricity in a city or county which are subject to a franchise or user fee are not exempt from the local option school infrastructure sales and service tax.

Effective May 1, 1999, transactions involving the use of natural gas, natural gas services, electricity or electric service are subject to a local excise tax that is to be imposed on the same basis as the state use tax, unless the sale or use involved in such transactions is subject to a franchise fee or user fee during the period the franchise fee or user fee is imposed. Except as otherwise provided in this chapter, all references to local option school infrastructure tax also include local excise tax, and all rules governing the administration and collection of local option school infrastructure tax are also applicable to local excise tax. With the exception of the natural gas and electric related transactions previously mentioned, there is no local option use tax.

This rule is intended to implement Iowa Code section 422E.1 as amended by 1999 Iowa Acts, chapter 151, section 36, and Iowa Code section 422E.3 as amended by 1999 Iowa Acts, chapter 151, sections 37 and 38.

701—108.6(422E) Deposits of receipts. The director of revenue shall credit tax receipts, interest, and penalties from the tax under this chapter. If the director is unable to determine from which county any of the receipts from this tax were collected, those receipts shall be allocated among the possible counties based on the allocation rules set forth in 701—107.11(422B).

This rule is intended to implement Iowa Code section 422E.3.

701—108.7(422E) Local option school infrastructure sales and service tax payments to school districts. The director of revenue within 15 days of the beginning of each fiscal year shall send to each school district where the local option school infrastructure sales and service tax is imposed an estimate of the tax moneys each school district will receive for the year and for each month of the year. For periods after July 1, 2002, the director of revenue shall by August 15 of each fiscal year send to each school district where the local option school infrastructure sales and service tax is imposed an estimate of the tax moneys each school district will receive for the year and for each month of the year. At the end of each month, the director may revise the estimates for the year and remaining months. The director shall remit 95 percent of the estimated monthly tax receipts for the school district to the school district on or before August 31 of the fiscal year and the last day of each month thereafter. The director shall remit a final payment of the remainder of tax money due for the fiscal year before November 10 of the next fiscal year. If an overpayment has resulted during the previous fiscal year, the first payment of the new fiscal year shall be adjusted to reflect any overpayment. An adjustment for an overpayment that has resulted during the previous fiscal year will be reflected beginning with the November payment.

If more than one school district or a portion of a school district is located within the county, tax receipts shall be remitted to each school district or portion of a school district in which the county tax is imposed in a pro-rata share based upon the ratio which the percentage of actual enrollment for the school district that attends school in the county bears to the percentage of the total combined actual enrollments

for all school districts that attend school in the county. A student's enrollment is based on the residency of the student. The formula to compute this ratio is the following:

$$\frac{\text{actual enrollment for the school district at issue}}{\text{combined actual enrollment for the county}}$$

The combined actual enrollment for the county, for purposes of this tax, shall be determined for each county imposing the tax under this rule by the Iowa department of management based on the actual enrollment figures reported by October 1 of each year to the department of management by the department of education pursuant to Iowa Code section 257.6(1). Enrollment figures to be used for the purpose of this formula are the enrollment figures reported by the department of education for the fiscal year preceding the date of implementation of the local option school infrastructure sales and service tax.

EXAMPLE: In November of 1999, Polk County holds a valid election that results in a favorable vote to impose the local option school infrastructure sales and service tax. The tax will be implemented in Polk County on July 1, 2000. The fiscal year preceding the implementation of the tax is July 1, 1999, through June 30, 2000. To determine the proper ratio of funds to be distributed to the multiple school districts located in Polk County, the enrollment figures reported by the department of education to the department of management by October of 1999 must be obtained to compute the formula as set forth.

For additional information regarding the formula for tax revenues to be distributed to the school districts, see the department of education's rules regarding this tax under 281—Chapter 96, Iowa Administrative Code.

This rule is intended to implement Iowa Code section 422E.3 as amended by 2002 Iowa Acts, House File 2622, section 13.

701—108.8(422E) Construction contract refunds. Effective May 20, 1999, and retroactively applied to July 1, 1998, construction contractors may apply to the department for a refund of local option school infrastructure tax paid on goods, wares, or merchandise if the following conditions are met:

1. The goods, wares or merchandise are incorporated into an improvement to real estate in fulfillment of a written contract fully executed prior to the date of the imposition or increase in rate of the local option school infrastructure tax. The refund shall not apply to equipment transferred in fulfillment of a mixed contract.

2. The local option school infrastructure tax must have been effective in the jurisdiction on or after July 1, 1998.

3. The contractor has paid to the department or to a retailer the full amount of the state and local option tax.

4. The claim is filed on forms provided by the department and is filed within six months of the date the tax is paid.

The refund shall be paid by the department from the appropriate school district's account in the local sales and services tax fund.

The penalty provisions contained in Iowa Code section 422B.11(3) apply regarding erroneous application for refund of tax under this chapter.

This rule is intended to implement Iowa Code section 422E.3 as amended by 1999 Iowa Acts, chapter 156, section 19.

701—108.9(422E) 28E agreements. A school district which has imposed the tax under this chapter has the authority to enter into an agreement authorized and defined in Iowa Code chapter 28E with one or more cities whose boundaries encompass all or a part of the area of the school district. Such an agreement will set forth a designated amount of revenues from the tax imposed under this chapter that a city or each city may receive. A city or cities entering into an Iowa Code chapter 28E agreement is authorized to expend its designated portion of taxes imposed under this chapter for any valid purpose permitted and defined under this chapter as a school infrastructure purpose or for any purpose authorized by the governing body of the city.

Effective May 20, 1999, and for taxes imposed under this chapter on or after July 1, 1998, a county whose boundaries encompass all or a part of an area of a school district may enter into an Iowa Code chapter 28E agreement with that school district. The terms of the Iowa Code chapter 28E agreement will designate a portion of tax revenues received from the tax imposed under this chapter that a county is entitled to receive. A county entering into an Iowa Code chapter 28E agreement with a school district in which tax under this chapter has been imposed is authorized to expend its designated portion of such tax revenues to provide property tax relief within the boundaries of the school district located in the county.

Effective May 20, 1999, and for taxes imposed under this chapter on or after July 1, 1998, a school district where local option school infrastructure tax is imposed is also authorized to enter into an Iowa Code chapter 28E agreement with another school district which is located partially or entirely in or is contiguous to the county where the tax is imposed. The school district shall only expend its designated portion of the local option school infrastructure revenues for infrastructure purposes.

This rule is intended to implement Iowa Code section 422E.4 as amended by 1999 Iowa Acts, chapter 156, section 20.

¹ At its meeting held October 9, 2000, the Administrative Rules Review Committee delayed the effective date of 108.4“6” until adjournment of the 2001 Session of the General Assembly.

CHAPTER 109
NEW SCHOOL INFRASTRUCTURE LOCAL OPTION SALES AND SERVICES TAX—
EFFECTIVE ON OR AFTER APRIL 1, 2003, THROUGH FISCAL YEARS
ENDING DECEMBER 31, 2022

These rules govern school infrastructure local option sales and services taxes that are voted on and approved on and after April 1, 2003. Taxes imposed on and after April 1, 2003, automatically expire after ten years of imposition or less if stated in the ballot proposition. Regardless of when the school infrastructure local option sales and services tax was approved, the term, or the date of repeal in a ballot proposition, all school infrastructure local option sales and services taxes will automatically repeal on December 31, 2022.

Payments of the tax revenue under this chapter are based on estimates and projections. Accordingly, if an overpayment of tax to a school district occurs, subsequent payments to that school district will be adjusted to recoup the overpayment.

701—109.1(422E) Use of revenues and definitions.

109.1(1) Use of revenues. Revenues from this tax may be used for the following:

a. “School infrastructure needs,” which are activities that a school district has authorized by contract of indebtedness and the issuance of general obligation bonds under Iowa Code section 296.1 and payment or retirement of outstanding bonds previously issued for school infrastructure as defined in this chapter. “School infrastructure needs” does not include activities related to a school teacher’s or school superintendent’s home or homes. Allowed “activities” consist of the following: construction; reconstruction; repair; demolition work; purchases for construction or remodeling of schoolhouses, stadiums, gyms, fieldhouses, and bus garages. Allowed “activities” include all activities in which revenues are allowed to be expended under Iowa Code Supplement section 298.3, which include: purchase and improvement of grounds; construction of schoolhouses or building and opening roads to these facilities; purchase of buildings; purchase, lease or lease-purchase of equipment or technology exceeding \$500 value per unit; payment of debts contracted for the erection of schoolhouses or buildings; procuring or acquisition of library facilities; repairing, remodeling, reconstructing, improving, or expanding the schoolhouses or buildings, and any additions to existing schoolhouses; expenditures for energy conservation; rental of facilities under Iowa Code chapter 28E; purchase of transportation equipment for transporting students; lease-purchase agreements for school buildings and equipment exceeding \$5,000 per single unit; equipment purchases for recreational purposes; payments to municipalities or other entities as required in Iowa Code section 403.19(2); and activities set forth under the educational and recreational tax as provided in Iowa Code section 300.2.

b. Property tax relief. Revenues from this school infrastructure local option sales and services tax may be used to provide property tax relief.

109.1(2) Definitions. The following definitions shall be used in interpreting the rules of this chapter:

“*Department*” means the Iowa department of revenue.

“*Director*” means the director of the Iowa department of revenue.

“*Guaranteed school infrastructure amount*” or “*guaranteed amount or payment*” means an amount of revenues from the school infrastructure local option sales and services tax to be received by a school district based on the statewide tax revenues per student, multiplied by the quotient of the tax rate percentage imposed in the county, divided by 1 percent and multiplied by the quotient of the number of quarters the tax is imposed during the fiscal year, divided by four quarters.

“*Sales tax capacity per student*” means the estimated amount of revenues that a school district receives or would receive if a school infrastructure local option sales and services tax is imposed at 1 percent in the county pursuant to Iowa Code Supplement section 422E.2, divided by the school district’s actual enrollment. Actual enrollment for a school district is obtained from the department of education as provided in 109.4(1).

“*Statewide tax revenues per student*” currently means \$575 per student. The general assembly shall review this amount annually to determine its appropriateness.

“*Supplemental school infrastructure amount*” or “*supplemental amount*” or “*supplemental payment*” means the guaranteed school infrastructure amount for the school district less its pro-rata share of the school infrastructure local option sales and services tax as provided in 109.4(1).

701—109.2(422E) Imposition of tax. For a school infrastructure local option sales and services tax to be valid, it must be imposed in accordance with the following:

109.2(1) *Petition for the tax.* A petition requesting imposition of the tax must be submitted to the board of supervisors or by motion of a school district or school districts.

109.2(2) *Ballot.* A ballot proposition must be substantially similar to the petition by the board of supervisors or motions of the school district(s). The ballot must include the rate of tax, imposition and repeal date, and the specific purpose or purposes for which the revenues will be expended. The form of the ballot is governed by the state commissioner of elections.

109.2(3) *Publication.* The ballot for the imposition of the tax must be published to notify voters of the desire for the tax and the particulars concerning the tax. The notice consisting of the ballot for the tax must be published at least 60 days prior to the election on imposition of the tax.

109.2(4) *Rate of tax.* The rate of tax must not be more than 1 percent.

109.2(5) *Proposition of the tax.* Only a county commissioner of elections shall submit the question of imposition of the tax to the voters.

109.2(6) *Election.* The election regarding imposition of the tax must be held at least 60 days after publication of the notice of the ballot for this tax. The election must be held at the state general election or a special election. An election regarding imposition of the tax shall not be held at a city regular election.

a. Election necessary. Elections are necessary to impose, repeal, or change the rate of the tax, or to change the use in revenues from the tax. Elections for repeal, change in rate, or change in use must be held in the same manner as the election for imposition. If an election is held for change in use of the revenues from the tax, the election must be held only in the school district where the change in use is proposed to occur.

b. Effective dates. The following dates govern the imposition and repeal of the tax:

(1) Effective dates must be no sooner than 90 days following the favorable election to approve the tax. The tax may only be imposed with an effective date of January 1 or July 1.

(2) Repeal dates must be no sooner than 90 days following a favorable election to repeal the tax. Repeal must occur on either June 30 or December 31. All school infrastructure local option sales and services tax under this chapter is repealed effective December 31, 2022, regardless of the repeal date in the ballot of the tax. The tax cannot be extended beyond December 31, 2022.

The tax shall not be repealed nor the rate of tax reduced if obligations are outstanding which are payable as provided in Iowa Code Supplement section 422E.4. However, this provision does not apply to the repeal of the tax on December 31, 2022.

c. Notice of election result. Within 10 days after the election at which there was a vote favoring imposition, repeal or change in rate, the county auditor must send a written notice of the election results to the director. The notice must be a copy of the abstract of votes from the favorable election.

d. Election costs. Cost of an election shall be apportioned among the school districts within the county on a pro-rata basis in proportion to the number of registered voters in each school district who reside within the county and the total number of registered voters within the county.

109.2(7) *Revenue purpose statement.* No later than 60 days prior to the election, each school district located in the county may submit a revenue purpose statement to the county commissioner. The revenue purpose statement states the specific purpose or purposes for which the tax or supplemental amount will be expended. Such purposes are limited to those set forth in 701—109.1(422E). A copy of the revenue purpose statement must be made available for public inspection, posted at the appropriate polling places of each school district during polling hours, and published in a newspaper of general circulation in the school district no sooner than 20 days and no later than 10 days prior to the election on imposition of the tax.

109.2(8) *Lack of a revenue purpose statement or remaining revenues.* If a revenue purpose statement is not filed 60 days prior to the election or if revenues remain after fulfilling the purpose specified in the

revenue purpose statement, the revenues must be used to reduce the following levies in the following order:

- a. Bond levies under Iowa Code sections 298.18 and 298.18A and all other debt levies, until the moneys received or the levies are reduced to zero.
- b. The regular physical plant and equipment levy under Iowa Code section 298.2 until the moneys received or the levy is reduced to zero.
- c. The voter-approved physical plant and equipment levy and income surtax, if any, under Iowa Code section 298.2, until the moneys received or the levy and income surtax, if any, are reduced to zero.
- d. The public educational and recreational levy under Iowa Code section 300.2, until the moneys received or the levy is reduced to zero.
- e. The schoolhouse tax levy under Iowa Code section 278.1, subsection 7 (Code 1989), until the moneys received or the levy is reduced to zero.
- f. Any money remaining after the reduction of the above levies may be used for any authorized infrastructure purpose of a school district.

701—109.3(422E) Application of law. All provisions found in 701—Chapter 108, which governs the collection of regular local option school infrastructure sales and services tax, are applicable to this chapter unless specific changes are set forth in this chapter. Consequently, the collection of tax by retailers and the transactions exempt from this tax are the same as in 701—Chapter 108.

701—109.4(422E) Collection of tax and distribution. When the director receives school infrastructure local option sales and services taxes from retailers, the director shall credit tax receipts, interest, and penalty to the school district's corresponding account within the secure an advanced vision for education (SAVE) fund as provided in Iowa Code Supplement section 422E.3A. Credits shall be made to accounts within SAVE that are maintained in the name of the school districts within the county. If the director cannot determine from which county receipts were collected, then the receipts must be allocated among the possible counties based on the department's allocation rules set forth below.

109.4(1) Pro-rata share based on enrollment. By June 1 preceding each fiscal year the director must compute the guaranteed school infrastructure amount for each school district, each school district's sales tax capacity per student, and the supplemental school infrastructure amount for the coming fiscal year. Each school district that has approved imposition of the tax under this chapter shall receive a guaranteed distribution amount of the tax revenues. Revenues from this tax will be allocated to each school district's respective account by the department. If a county has more than one school district or a portion of a school district, tax revenues must be remitted to each school district or portion of a school district in which the tax is imposed on a pro-rata basis. The allocation on the pro-rata basis will be based upon the ratio of the actual enrollment for the school district that attends school in the county to the total combined actual enrollments for all of the school districts that attend school in the county. The formula to compute this ratio is the following:

$$\frac{\text{Actual enrollment for the school district}}{\text{Total combined actual enrollments of all school districts in county}}$$

Combined actual enrollment for a county is based on actual enrollment figures reported by October 1 by the department of education to the department of management. The actual enrollment figures are forwarded by March 1 annually to the department of revenue so the department can compute estimate payments for the following fiscal year.

School districts that voted on and approved a school infrastructure local option sales and services tax prior to April 1, 2003, but seek to not have distribution under this new computation formula shall not be included in the computations of estimates for the county or counties in which the school district is located.

If a school district is located in more than one county, the amount to be distributed to that school district will be computed separately for each county based on the school district's actual enrollment in each county.

109.4(2) *Jurisdictions with tax approved prior to April 1, 2003.* Jurisdictions that approved implementation of this tax prior to April 1, 2003, shall receive revenues based on the following formulas:

a. Prior to April 1, 2003, approval and above per student capacity. A school district that approved the school infrastructure local option sales and services tax prior to April 1, 2003, and has a sales tax capacity per student above the guaranteed school infrastructure amount set forth in 109.1(422E) will receive an amount equal to its pro-rata share as computed in 109.4(1). A school district may elect to change the amount it receives and receive its distribution based on 109.4(1) for all subsequent years for the duration of the term of the tax for that jurisdiction. To receive this distribution, a school district must have passed a resolution by October 1, 2003, to agree to receive distribution of the revenues from the tax based on the full amount to be received under 701—Chapter 108.

b. Prior to April 1, 2003, approval and below per student capacity. A school district that approved the school infrastructure local option sales and services tax prior to April 1, 2003, and has a sales tax capacity per student below the guaranteed school infrastructure amount will receive an amount equal to its pro-rata share as computed in 109.4(1) and receive a supplemental amount as defined in 109.1(422E) for the remainder of the term of the tax in that jurisdiction. A school district may opt out of receiving this supplemental amount and choose to receive its distribution based on 109.4(1) for all subsequent years for the duration of the term of the tax for that jurisdiction. To opt out, a school district must have passed a resolution by October 1, 2003, to agree to receive distribution of the revenues from the tax based on the full amount to be received under 701—Chapter 108.

109.4(3) *Jurisdictions with tax voted on and approved on or after April 1, 2003.* Jurisdictions that have approved implementation of this tax on or after April 1, 2003, will receive revenues based on the following formulas:

a. A school district that has voted on and approved this tax on or after April 1, 2003, will receive an amount equal to its pro-rata share as computed in 109.4(1), not to exceed its guaranteed amount revenues. If a school district's pro-rata share does not meet the guaranteed amount of revenues then the district must receive a supplemental amount.

b. A school district that approves the continuation of the tax on or after April 1, 2003, will receive an amount equal to its pro-rata share as computed in 109.4(1), not to exceed its guaranteed amount. However, if the school district's pro-rata share is less than its guaranteed amount, the school district will receive a supplemental amount.

It must be noted that payment to a school district shall not exceed the guaranteed school district amount. A school district that qualifies for a supplemental payment shall not receive more than the guaranteed amount in any subsequent year.

701—109.5(422E) Insufficient funds. There may arise a deficiency in the SAVE fund to pay the supplemental payments in full. In this situation, the amount available in the SAVE fund must first be used to increase the amount to the school district with the lowest sales tax capacity per student to an amount equal to the amount for the school district or school districts with the next lowest sales tax capacity per student, and then increase the amount to school districts to an amount equal to the amount for the school district or school districts with the next lowest sales tax capacity per student and continue on in this manner until money is no longer available or all school districts reach their guaranteed school infrastructure amount.

701—109.6(422E) Use of revenues by the school district. Nothing in these rules prevents a school district from using its sales tax capacity per student or its guaranteed amount to pay principal and interest on obligations issued pursuant to Iowa Code Supplement section 422E.4.

109.6(1) *Districts with below guaranteed amount.* School districts with a sales tax capacity per student below its guaranteed amount must use the amount equal to its supplemental amount to pay

principal and interest on outstanding bonds previously issued for school infrastructure needs as set forth in Iowa Code Supplement section 422E.1(3). Any money remaining after the payment of these obligations may be used for authorized infrastructure purposes of the school district. After July 1, 2003, an election may be held for voters in the school district to approve a revenue purpose statement which includes items for which the additional revenues may be expended after payment of the district's bond obligations.

109.6(2) *Spending limitation on small enrollment—certificate of need.* A school district shall not expend the supplemental amount received for new construction or for payments for bonds issued for new construction. In order to expend supplemental money for new construction or bonds for new construction, the school district must, prior to expenditure, apply to the department of education for a certificate of need.

To determine whether a certificate of need should be issued or denied, see Iowa Code Supplement section 422E.3A(6) or the rules of the department of education for factors that will be considered.

A certificate of need for the above-defined school districts is not required in order to pay the following:

a. Outstanding bonds issued for new construction pursuant to Iowa Code section 296.1, prior to April 1, 2003.

b. To repair schoolhouses or buildings, equipment, technology, or transportation equipment for transporting students as set forth in Iowa Code Supplement section 298.3; or

c. Construction necessary to comply with the Americans with Disabilities Act pursuant to 42 U.S.C. Sections 12101-12117.

701—109.7(422E) Bonds. Negotiable, interest-bearing school bonds may be issued by the school district's board of directors without an election. Revenues from tax imposed under this chapter must be used to repay principal and interest of these bonds. Proceeds from these bonds must be used only for school infrastructure needs as defined in this chapter. These bonds may only be issued by a school district that has imposed tax under this chapter. The maximum period for principal on bonds to be payable cannot exceed the date of repeal stated in the ballot proposition.

701—109.8(422E) 28E agreements. A school district which has imposed the tax under this chapter has the authority to enter into an agreement authorized and defined in Iowa Code chapter 28E with one or more cities whose boundaries encompass all or a part of the area of the school district. Such an agreement will set forth a designated amount of revenues that a city or each city may receive from the tax imposed under this chapter. A city or cities entering into an Iowa Code chapter 28E agreement are authorized to expend their designated portion of taxes imposed under this chapter for any valid purpose permitted and defined under this chapter as a school infrastructure purpose or for any purpose authorized by the governing body of the city.

A school district where school infrastructure local option sales and services tax is imposed is also authorized to enter into an Iowa Code chapter 28E agreement with another school district which is located partially or entirely in or is contiguous to the county where the tax is imposed. The school district shall expend its designated portion of the school infrastructure local option sales and services tax revenues only for infrastructure purposes.

A county entering into an Iowa Code chapter 28E agreement with a school district in which tax under this chapter has been imposed is authorized to expend its designated portion of such tax revenues to provide property tax relief within the boundaries of the school district located in the county.

Effective July 1, 2003, a school district that has imposed tax under this chapter may enter into an Iowa Code chapter 28E agreement with a community college or area education agency that is located partially or entirely in or is contiguous to the county where the tax is imposed. The community college must expend its designated portion of the tax under this chapter only for infrastructure purposes. The area

education agency must expend its designated portion of the tax under this chapter only for infrastructure and maintenance purposes.

These rules are intended to implement Iowa Code Supplement sections 422E.1 to 422E.3, 422E.3A, 422E.4 and 422E.6.

TITLE XVI
REASSESSMENT EXPENSE FUND
 CHAPTER 120
 REASSESSMENT EXPENSE FUND
 [Prior to 12/17/86, Revenue Department[730]]

701—120.1(421) Reassessment expense fund. The reassessment expense fund is created in the office of the treasurer of state for the purpose of providing loans to city and county conference boards for conducting reassessments of property. The director of revenue is responsible for maintaining and administering the reassessment expense fund. Persons wishing to obtain information pertaining to the reassessment expense fund or to make submissions or requests should direct correspondence to the attention of the Director, Department of Revenue, Hoover State Office Building, Des Moines, Iowa 50319.

This rule is intended to implement Iowa Code section 421.30.
 [ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—120.2(421) Application for loan. Applications for loans from the reassessment expense fund may be made by a conference board established under Iowa Code section 441.2. The application shall be made on forms provided by the director of revenue and shall be submitted to the director. Applications shall contain the following information:

1. A statement of the amount of funds in the special appraisal fund, any unencumbered balance in the assessment expense fund, and the maximum amount of revenue which could be raised from the assessment expense fund and the special appraisal fund.
2. A detailed statement as to how moneys obtained from the reassessment expense fund will be expended, such statement to be itemized to indicate specific expenditures for personnel, supplies and materials, mileage, public information, and payment for any work performed under contract with a professional appraisal firm.
3. A copy of the assessing jurisdiction's most recent budget as approved by the office of management.
4. A copy of any proposed contract with a professional appraisal company.

This rule is intended to implement Iowa Code section 421.30.
 [ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—120.3(421) Criteria for granting loan. In determining whether to grant a loan from the reassessment expense fund and the amount of any loan, the director shall consider the following factors:

1. The amount of moneys presently on hand and not encumbered or intended for another purpose in both the assessment expense fund and the special appraisal fund.
2. When the assessing jurisdiction can next begin to collect revenues from the tax levied for the special appraisal fund.
3. The reasonableness and accuracy of the jurisdiction's statement as to how the funds are to be expended, giving special attention as to whether such funds will be expended in such a manner as to ensure compliance with the reassessment order.
4. The capability of the jurisdiction to repay the loan within the time period specified in Iowa Code section 421.30.

This rule is intended to implement Iowa Code section 421.30.

TITLE XVII
ASSESSOR CONTINUING EDUCATION
CHAPTER 122
ADMINISTRATION
[Prior to 12/17/86, Revenue Department[730]]

701—122.1(441) Establishment. Iowa Code section 441.8 established a program of continuing education to be developed and administered by the director of revenue, hereinafter referred to as the director. To administer the program, the director has established an assessor education advisory committee, hereinafter referred to as the committee.

This rule is intended to implement Iowa Code section 441.8.

701—122.2(441) General operation. The chairperson of the committee shall be the director. The director shall appoint to the committee a representative of the property tax division of the department of revenue and two assessor representatives. The assessor representatives shall serve four-year staggered terms. To initiate the staggered-term policy, one assessor shall serve through December 31, 2009, and the other assessor shall serve through December 31, 2011. The committee will meet at least once each year.

This rule is intended to implement Iowa Code section 441.8.

701—122.3(441) Location. Persons may obtain information about the committee and its activities at the Department of Revenue in the Hoover State Office Building, Des Moines, Iowa 50319. Persons wishing to obtain information or make submissions should address their correspondence to that address.

This rule is intended to implement Iowa Code section 441.8.

701—122.4(441) Purpose. The committee is established to assist the director in developing and administering a program of continuing education for Iowa assessors and deputy assessors. The program will emphasize assessment and appraisal procedures, assessment laws, rights and responsibilities of taxpayers and property owners related to the assessment of property for taxation, duties of assessors and deputy assessors, and other matters related to the positions of assessor and deputy assessor. The director, with the assistance of the committee, will designate the courses to be offered in the program, the content of the courses, and the number of hours of classroom instruction for each course. An evaluation of the program will be conducted at least annually with any necessary changes made.

The director shall certify those assessors and deputy assessors who have received sufficient credit to be eligible for reappointment to their present position.

This rule is intended to implement Iowa Code section 441.8.

[Filed 12/30/05, Notice 11/9/05—published 1/18/06, effective 2/22/06]

[Filed 2/8/08, Notice 1/2/08—published 2/27/08, effective 4/2/08]

CHAPTER 123
CERTIFICATION

[Prior to 12/17/86, Revenue Department[730]]

701—123.1(441) General. Courses in the continuing education program may be taken for tested credit or nontested credit. To receive tested credit for a course, an assessor or deputy assessor must attend each session of the course and attain a grade of at least 70 percent on an examination given at the conclusion of the course. To receive nontested credit for a course, an assessor or deputy assessor must attend each session of the course. Credit will be given for each course equal to the number of hours of classroom instruction contained in the course. A course may be taken for credit only once during the assessor's or deputy assessor's current term of office. A person cannot receive both tested credit and nontested credit for the same course, except for those courses specifically designated by the director of revenue. At the discretion of the director, up to 30 hours of tested credit may be granted for the completion of a narrative appraisal meeting the satisfactory criteria established by a professional appraisal society designated by the director. Only one narrative appraisal may be approved for credit during an assessor's or deputy assessor's current term of office. A term of office for purposes of these rules is six years.

701—123.2(441) Confidentiality. Examinations shall be held confidential by the members of the assessor education advisory committee and by persons designated by the director to have access to the examinations. Persons given access to the examinations are those persons administering the examinations, the instructors of the course for which the examinations are given and those persons entrusted with the storage and retention of examinations by the director. The department of revenue will store records of attendance at the courses and scores of the examinations. Any person having access to examinations shall not divulge in any manner not provided by law the results of any examination.
[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—123.3(441) Certification of assessors. An assessor who has received credit equal to at least 150 hours of classroom instruction, of which at least 90 hours are tested credit, during the assessor's current term shall be certified to the assessor's conference board as eligible for reappointment to that position. Upon written request by an assessor seeking a waiver of the continuing education requirements, the director may waive the requirements for good cause. Certification shall be only that the incumbent has met the requirements to be eligible for reappointment. No scores or other information will be given to the conference board.

A person who was appointed to complete an unexpired term shall be certified as eligible for reappointment if the person completes the required credits determined as follows:

$$\frac{\text{Number of months of unexpired term filled}}{72} \times 150$$

For example, if a person were appointed to fill the last 24 months of an unexpired term, the credit necessary for certification would be 50 hours determined as follows:

$$\frac{24}{72} \times 150 = 50 \text{ hours}$$

If the person appointed to complete an unexpired term is an assessor, the assessor may carry forward any credit hours received in the previous position in excess of the number that would be necessary to be considered current in that position. For example, if the assessor had completed four years of a six-year term and had completed 120 hours of continuing education credit, the assessor could carry forward to the new assessment jurisdiction 20 hours of credit ($120 - 4/6 \times 150$).

In situations in which the required number of hours of credit must be prorated, at least 60 percent of the credits earned must be tested credit. For example, if a person must earn 31 hours of credit for

certification during a 15-month period, at least 19 of the hours must be tested credit ($31 \times .60 = 18.6 = 19$). Partial credit hours shall be rounded to the nearest whole number.

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—123.4(441) Certification of deputy assessors. A deputy assessor who has received credit equal to at least 90 classroom hours of instruction, of which at least 60 hours are tested, during each six-year period following the deputy's appointment as deputy assessor, shall be certified to the assessor employing the deputy as eligible to continue as deputy assessor in that position. Certification shall be only that the deputy has or has not met the requirements to be eligible to remain in that position. No scores or other information will be given to the assessor. For situations in which the required number of credit hours must be prorated, see rule 123.3(441).

If a deputy assessor fails to comply with continuing education requirements, the deputy shall be removed from that position and not reinstated until successful completion of the required hours of credit. Upon written request by a deputy seeking a waiver of the continuing education requirements, the director may waive the requirements for good cause. The number of credit hours required for the deputy to be eligible for appointment as a deputy in another jurisdiction shall be prorated according to the completed portion of the deputy's six-year term.

701—123.5(441) Type of credit. A course, seminar, workshop, or symposium for which an examination is given may be taken for tested credit or nontested credit at the discretion of the assessor or deputy assessor. However, a course may not be taken twice—once for tested credit and again for nontested credit—unless specific approval is granted by the director. At the discretion of the director, up to 30 hours tested credit may be given for a narrative appraisal approved by a professional organization. In order to receive credit for a narrative appraisal, an assessor or deputy assessor is required to provide a letter from the professional organization stating the date the appraisal was approved.

701—123.6(441) Retaking examination. If an assessor or deputy assessor successfully retakes an examination for a course for which nontested credit previously had been granted, the credit will be changed to tested credit upon receipt by the director of evidence of passing the examination.

701—123.7(441) Instructor credit. An assessor or deputy assessor who serves as an instructor for a course approved by the director for continuing education may receive nontested credit for the number of hours of classroom instruction. The credit shall be granted only once for each course, and cannot be granted for a course for which the instructor previously received credit as a student.

701—123.8(441) Conference board and assessor notification. Upon receiving credit for the required number of hours of tested and nontested credit, an assessor or deputy assessor should request that the director notify the appropriate conference board or assessor that the continuing education requirements have been satisfied to ensure timely notification.

Rules 123.1(441) to 123.8(441) are intended to implement Iowa Code Supplement section 441.8 and Iowa Code section 441.11.

701—123.9(441) Director of revenue notification. The chairperson of the conference board shall give written notice to the director of revenue of the appointment or reappointment of an assessor and the effective date within ten days of the decision of the board, and the assessor shall give written notice to the director of the appointment of a deputy assessor and the effective date within ten days of the decision of the assessor.

This rule is intended to implement Iowa Code sections 441.6 and 441.10.

[Filed 5/25/79, Notice 4/18/79—published 6/13/79, effective 7/18/79]

[Filed ARC 7726B (Notice ARC 7592B, IAB 2/25/09), IAB 4/22/09, effective 5/27/09]

CHAPTER 124 COURSES

[Prior to 2/17/86, Revenue Department[730]]

701—124.1(441) Course selection. The courses selected by the assessor education advisory committee for the continuing education program shall emphasize the areas outlined in rule 701—122.4(441). In establishing courses, the committee will consider current assessor training programs in Iowa and other states, and information from other sources.

[ARC 7726B, IAB 4/22/09, effective 5/27/09]

701—124.2(441) Scheduling of courses. Courses will be scheduled in such a way as to offer a variety of times to allow flexibility for assessors and deputy assessors to schedule their continuing education program. The number of participants for any course may be limited at the time the course is established to ensure proper training can be given each participant.

701—124.3(441) Petitioning to add, delete or modify courses. The director accepts and encourages the public to provide input into the development of the assessor education program. Any person or group may petition to add, delete or modify all or part of the program by submitting a written request for the committee's consideration.

The overriding consideration in determining whether a specific course is acceptable as continuing education is that it be a formal program of learning which contributes directly to the professional competence of an assessor or deputy assessor.

A continuing education course will qualify only if:

1. An outline of the course content and a description or copy of the final examination are prepared and filed with the director. In addition, any course changes are required to be filed with the director.
2. The course is at least one hour (50-minute period) in length.
3. The course is conducted by a qualified instructor, discussion leader, or lecturer. A qualified instructor, discussion leader, or lecturer is any individual whose background, training, education or experience makes it appropriate for that person to lead a discussion on the subject matter of the particular course.
4. Certificates of attendance must be sent to the director and the student.
5. An organization or person desiring accreditation of a course shall apply to the director for accreditation at least 60 days in advance of the commencement of the course on an application provided by the director (Form 51-002 "Application for Course Certification"). The director shall approve or deny the application. The application shall state the dates; subjects offered; total hours of instruction; names and qualifications of the instructor, discussion leader or lecturer; a statement of the objectives of the course and how the objectives will be attained; an outline of the course content; a copy of the final examination; and any other pertinent information.

701—124.4(441) Course participation. It is the responsibility of individual assessors or deputy assessors to comply with the enrollment provisions of respective courses designated and established by the committee.

701—124.5(441) Retaking a course. If an assessor or deputy assessor fails a course by receiving a grade of less than 70 percent on the final examination or does not meet attendance requirements established by the director, the course may be retaken. Once a person has passed a course and received credit for the course, no further credit can be received by taking the course again, except for those courses so designated by the director. However, if an assessor or deputy assessor wishes to retake a course as a refresher for the materials contained in the course, the assessor or deputy assessor may do so, though no final examination need be taken. If a course is applied for by a person already having received credit, that person will only be allowed in the course if space is available after consideration is first given to persons seeking credit for certification in the course.

701—124.6(441) Continuing education program for assessors. The director, with the assistance of the committee, has determined the initial course content of the continuing education program for Iowa assessors. Courses, seminars, workshops, and schools administered by the American Institute of Real Estate Appraisers (AIREA), the International Association of Assessing Officers (IAAO), the Iowa Department of Revenue (IDR), the Society of Real Estate Appraisers (SREA), the American Society of Farm Managers and Rural Appraisers (ASFMRA), the Iowa State Association of Assessors (ISAA), the National Association of Independent Fee Appraisers (NAIFA), graduate centers, universities, community colleges and technical institutes, as qualify under rule 701—122.4(441), have been approved for certification. A copy of the approved courses may be obtained from the Director of the Department of Revenue, Hoover State Office Building, Des Moines, Iowa 50319. The director, with the assistance of the committee, shall recertify courses at least every six years. At the request of the director, the organization conducting a course shall provide the director with copies of course evaluation forms completed by students.

Upon registration for an approved course, it is the responsibility of the assessor or deputy assessor to request that notification of attendance and test score be forwarded by the appropriate organization(s) to the director justifying certification.

After the taking of a course it is the responsibility of the assessor or deputy assessor to request credit for the course by completing an application provided by the director (Form 51-001 “Application for Course Credit”) and submitting it to the Director of the Iowa Department of Revenue, Hoover State Office Building, Des Moines, Iowa 50319.

The department of revenue will serve as the principal storage facility for records of attendance and scores of examination. The information shall be confidential in nature. Certification to the conference boards by the director shall be only that the incumbent has met the requirements of the continuing education program and is eligible for reappointment.

These rules are intended to implement Iowa Code section 441.8.

CHAPTER 125
REVIEW OF AGENCY ACTION
[Prior to 12/17/86, Revenue Department[730]]

701—125.1(441) Decisions final. Decisions of the director shall be considered final agency action for purposes of appeal. Any person aggrieved by an action of the director may appeal to the district court as provided by law. Results of examinations are not decisions of the director and are not appealable directly to court. If a person feels aggrieved on the results of an examination or course, the person may petition the director in accordance with rule 701—124.3(441).

701—125.2(441) Grievance and appeal procedures. Prior to appealing to district court any aggrieved person may petition the director in writing to reconsider an action. In addition, the director will consider grievances which have been filed based on any area in which the director has jurisdiction.

A petition or grievance must be filed with the director within 30 days of the decision or action leading to the grievance. The petition must state the reasons for reconsideration of the director's action and a grievance must contain the facts leading to the grievance and a statement showing the director has jurisdiction.

The director shall appoint a grievance committee comprised of three members of the assessor education advisory committee to review petitions and grievances, meet with the affected parties if necessary, and recommend in writing to the director a proposed resolution of the matter. The director will consider the recommendation of the grievance committee at its next meeting and inform the affected parties of the decision in writing within ten days. The date of the written reply by the director shall constitute final agency action for purposes of appeal.

These rules are intended to implement Iowa Code section 441.8.

CHAPTER 126
PROPERTY ASSESSMENT APPEAL BOARD

701—126.1(421,441) Applicability and definitions.

126.1(1) *Applicability and scope.* The rules set forth in this chapter govern the proceedings for all cases filed on or after January 1, 2015, in which the property assessment appeal board (board) has jurisdiction to hear appeals from the action of a local board of review.

126.1(2) *Definitions.* For the purpose of these rules, the following definitions shall apply:

“*Appellant*” means the party filing the notice of appeal with the secretary of the property assessment appeal board.

“*Board*” means the property assessment appeal board as created by Iowa Code section 421.1A and governed by Iowa Code chapter 17A and section 441.37A.

“*Department*” means the Iowa department of revenue.

“*Local board of review*” means the board of review as defined by Iowa Code section 441.31.

“*Party*” means each person or entity named or admitted as a party or properly seeking and entitled as of right to be admitted as a party.

“*Presiding officer*” means the chairperson, member or members of the property assessment appeal board who preside over an appeal of proceedings before the property assessment appeal board.

“*Secretary*” means the secretary for the property assessment appeal board.

126.1(3) *Waivers.*

a. In response to a request, or on its own motion, the board may grant a waiver from a rule adopted by the board, in whole or in part, as applied to a specific set of circumstances, if the board finds, based on clear and convincing evidence, that:

(1) The application of the rule would pose an undue hardship on the person for whom the waiver is requested;

(2) The waiver would not prejudice the substantial rights of any person;

(3) The provisions of the rule subject to a petition for waiver are not specifically mandated by statute or another provision of law; and

(4) Substantially equal protection of public health, safety, and welfare will be afforded by means other than that prescribed in the rule for which the waiver is requested.

b. Persons requesting a waiver may submit their request in writing. The waiver request must state the relevant facts and reasons the requester believes will justify the waiver, if the reasons have not already been provided to the board in another pleading.

c. Grants or denials of waiver requests shall contain a statement of the facts and reasons upon which the decision is based. The board may condition the grant of the waiver on such reasonable conditions as appropriate to achieve the objectives of the particular rule in question. The board may at any time cancel a waiver upon appropriate notice and opportunity for hearing.

126.1(4) *Time requirements.* Time shall be computed as provided in Iowa Code section 4.1(34).

126.1(5) *Judgment of the board.* Nothing in this chapter should be construed as prohibiting the exercise of honest judgment, as provided by law, by the board in matters pertaining to valuation and assessment of individual properties.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—126.2(421,441) Appeal and certification.

126.2(1) *Appeal and jurisdiction.* The procedure for appeals and parameters for jurisdiction are as follows:

a. Jurisdiction is conferred upon the board by written notice of appeal given to the secretary. The written notice of appeal shall include a petition setting forth the basis of the appeal and the relief sought. The written notice of appeal shall be filed with the secretary within 20 calendar days after the date of adjournment of the local board of review or May 31, whichever is later. Appeals postmarked within this time period shall also be considered to have been timely filed.

b. Notice of appeal may be delivered in person, mailed by first-class mail, delivered to an established courier service for immediate delivery, or e-mailed to the board at paab@iowa.gov.

c. For an appeal filed by e-mail to be timely, it must be received by the board by 11:59 p.m. on the last day for filing as established within the time period set forth in paragraph 126.2(1)“a.”

126.2(2) Form of appeal. The notice of appeal shall include:

- a. The appellant’s name, mailing address, e-mail address, and telephone number;
- b. The address of the property being appealed and its parcel number;
- c. A copy of the letter of disposition by the local board of review;
- d. A short and plain statement of the claim showing that the appellant is entitled to relief;
- e. The relief sought; and
- f. If the party is represented by an attorney or designated representative, the attorney or designated representative’s name, mailing address, e-mail address, and telephone number.

126.2(3) Scope of review.

a. Grounds for appeal. The appellant may appeal the action of the board of review relating to protests of assessment, valuation, or the application of an equalization order. No new grounds in addition to those set out in the protest to the local board of review can be pleaded, but additional evidence to sustain those grounds may be introduced. The board shall determine anew all questions arising before the local board of review which relate to the liability of the property to assessment or the amount thereof.

b. Burden of proof. There shall be no presumption as to the correctness of the valuation of the assessment appealed from. The burden of proof is on the appellant; however, when the appellant offers competent evidence by at least two disinterested witnesses that the market value of the property is less than the market value determined by the assessor, the burden of proof thereafter shall be upon the party seeking to uphold the valuation.

c. The appeal is a contested case.

126.2(4) Notice to local board of review. The secretary shall mail a copy of the appellant’s written notice of appeal and petition to the local board of review whose decision is being appealed. Notice to all affected taxing districts shall be deemed to have been given when written notice is provided to the local board of review.

126.2(5) Certification by local board of review.

a. *Initial certification.*

(1) Within 21 days after notice of appeal is given, the local board of review shall certify to the board the original notice of assessment if any, the petition to the board of review, and a copy of the board of review’s letter of disposition.

(2) The local board of review shall also submit to the board in writing the name, address, telephone number, and e-mail address of the attorney representing the local board of review before the board. The local board of review may request additional time to certify a copy of its record to the board by submitting a request in writing or by e-mail to the board at paab@iowa.gov.

b. *Full record certification prior to hearing.*

(1) At least 21 calendar days prior to the contested case hearing, the local board of review shall certify to the board the complete property record card for the subject property, the protest hearing minutes of the local board of review kept pursuant to Iowa Code chapter 21, and any information provided to or considered by the local board of review as part of the protest.

(2) The local board of review shall also send a copy of the full record to the opposing party.

126.2(6) Docketing. Appeals shall be assigned consecutive docket numbers. Records consisting of the case name and the corresponding docket number assigned to the case shall be maintained by the secretary. The records of each case shall also include each action and each act done, with the proper dates, as follows:

- a. The title of the appeal including jurisdiction and parcel identification number;
- b. Brief statement of the grounds for the appeal and the relief sought;
- c. Postmarked date of the local board of review’s letter of disposition;
- d. The manner and date/time of service of notice of appeal;
- e. Date of notice of hearing;

701—126.5(421,441) Motions and settlements.

126.5(1) Authority of board to issue procedural orders. The board may issue preliminary orders regarding procedural matters. The secretary shall mail copies of all procedural orders to the parties.

126.5(2) Motions. No technical form for motions is required. All prehearing motions shall be in writing, shall be filed with the secretary and shall contain the reasons and grounds supporting the motion. The board shall act upon such motions as justice may require. Motions based on matters which do not appear of record shall be supported by affidavit. Any party may file a written response to a motion no later than 10 days from the date the motion is filed, unless the time period is extended or shortened by the board or presiding officer. The presiding officer may schedule oral argument on any motion.

a. Filing of motions. Motions pertaining to the hearing, except motions for summary judgment, must be filed and served at least 10 days prior to the date of hearing unless there is good cause for permitting later action or the time for such action is lengthened or shortened by the board or presiding officer.

b. Motions for summary judgment.

(1) Motions for summary judgment shall comply with the requirements of Iowa Rule of Civil Procedure 1.981 and shall be subject to disposition according to the requirements of that rule to the extent such requirements are not inconsistent with the provisions of this chapter or any other provision of law governing the procedure in contested cases.

(2) Motions for summary judgment must be filed and served no later than 90 days after service of the notice of appeal, unless good cause is shown for a later filing. Good cause may include, but is not limited to, information the moving party obtains through discovery. Any party resisting the motion shall file and serve a resistance within 20 days, unless otherwise ordered by the board or presiding officer, from the date a copy of the motion was served. The time fixed for hearing or nonoral submission shall be not less than 30 days after the filing of the motion, unless a shorter time is ordered by the presiding officer. A summary judgment order rendered on all issues in a contested case is subject to rehearing pursuant to subrule 126.9(2).

c. Motions to withdraw. An appellant may withdraw the appeal prior to the hearing. Such a withdrawal of an appeal must be in writing or by e-mail to paab@iowa.gov and signed by the appellant or the appellant's designated representative. Unless otherwise provided, withdrawal shall be with prejudice and the appellant shall not be able to refile the appeal. Within 20 days of the board's granting of a withdrawal of appeal, the appellant may make a motion to reopen the file and rescind the withdrawal based upon fraud, duress, undue influence, or mutual mistake.

126.5(3) Settlements. Parties to a case may propose to settle all or some of the issues in the case at any time prior to the issuance of a final decision. A settlement of an appeal shall be jointly signed by the parties, or their designated representatives, and filed in writing or by an electronic copy e-mailed to paab@iowa.gov. The board will not approve settlements unless the settlement is reasonable in light of the whole record, consistent with law, and in the public interest. Board adoption of a settlement constitutes the final decision of the board on issues addressed in the settlement.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—126.6(421,441) Hearing scheduling and discovery plan.

126.6(1) When required. For appeals involving properties classified commercial or industrial and assessed at \$2 million or more, a scheduling order shall be sent to the parties to set dates for discovery, designation of witnesses, filing of motions, exchange of evidence, and a contested case hearing. In any other appeal, the parties may jointly enter a scheduling order or the board may, on its own motion, issue a scheduling order. The dates established in a scheduling order under this rule shall supersede any dates set forth in any other rule in this chapter.

126.6(2) Prehearing conference. A party may request a prehearing conference to resolve scheduling issues.

126.6(3) Modification. The parties may jointly agree to modify a scheduling order. If one party seeks to modify a scheduling order, the party must show good cause for the modification.

126.6(4) *Failure to comply.* A party that fails to comply with a scheduling order shall be required to show good cause for failing to comply with the order and that the other party is not substantially prejudiced. Failing to comply with a scheduling order may result in sanctions including, but not limited to, the exclusion of evidence or dismissal of the appeal.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—126.7(421,441) Discovery and evidence.

126.7(1) *Discovery procedure.* Discovery procedures applicable in civil actions under the Iowa Rules of Civil Procedure are available to parties in cases before the board. Unless lengthened or shortened by these rules, the board or presiding officer, time periods for compliance with discovery shall be as provided in the Iowa Rules of Civil Procedure.

126.7(2) *Discovery motions.* Prior to filing any motion related to discovery, parties shall make a good-faith effort to resolve discovery disputes without the involvement of the board or presiding officer. Any motion related to discovery shall allege that the moving party has made a good-faith attempt to resolve the discovery issues involved with the opposing party. Opposing parties shall be given the opportunity to respond within 10 days of the filing of the motion unless the time is shortened by order of the board or presiding officer. The board or presiding officer may rule on the basis of the written motion and any response or may have a hearing or other proceedings on the motion.

126.7(3) *Evidence.*

a. Admissibility. The presiding officer shall rule on admissibility of evidence and may take official notice of facts in accordance with all applicable requirements of law. Evidence obtained in discovery may be used in the case proceeding if that evidence would otherwise be admissible in that proceeding.

b. Stipulations. Stipulation of facts by the parties is encouraged. The presiding officer may make a decision based on stipulated facts.

c. Scope of admissible evidence. Evidence in the proceeding shall be confined to the issues contained in the notice from the board prior to the hearing, unless the parties waive their right to such notice or the presiding officer determines that good cause justifies expansion of the issues. Admissible evidence is that which, in the opinion of the board, is determined to be material, relevant, or necessary for the making of a just decision. Irrelevant, immaterial or unduly repetitious evidence may be excluded. A finding shall be based upon the kind of evidence on which reasonably prudent persons are accustomed to rely for the conduct of their serious affairs, and may be based upon such evidence even if it would be inadmissible in a jury trial. Hearsay evidence is admissible. The rules of privilege apply in all proceedings before the board.

d. Exhibits, exhibit and witness lists, and briefs. The party seeking admission of an exhibit must provide an opposing party with an opportunity to examine the exhibit prior to the ruling on its admissibility. Copies of documents to be used as evidence, exhibit lists, and a list of witnesses intended to be called at hearing shall be served on the opposing party at least 21 calendar days prior to the hearing, unless the time period is extended or shortened by the board or presiding officer or the parties have entered a scheduling order under rule 701—126.6(421,441). All exhibits and briefs admitted into evidence shall be appropriately marked and be made part of the record. The appellant shall mark exhibits with consecutive numbers. The appellee shall mark exhibits with consecutive letters.

e. Objections. Any party may object to specific evidence or may request limits on the scope of examination or cross-examination. Such an objection shall be accompanied by a brief statement of the grounds upon which the objection is based. The objection, the ruling on the objection, and the reasons for the ruling shall be noted in the record. The presiding officer may rule on the objection at the time it is made or may reserve a ruling until the written decision.

f. Offers of proof. Whenever evidence is ruled inadmissible, the party offering that evidence may submit an offer of proof on the record. The party making the offer of proof for excluded oral testimony shall briefly summarize the testimony or, with permission of the presiding officer, present the testimony. If the excluded evidence consists of a document or exhibit, it shall be marked as part of an offer of proof and inserted in the record.

126.7(4) Subpoenas.*a. Issuance of subpoena for witness.*

(1) An agency subpoena shall be issued to a party on request. The request shall be in writing and include the name, address, and telephone number of the requesting party. In absence of good cause for permitting later action, a request for subpoena must be received at least 10 days before the scheduled hearing.

(2) Except to the extent otherwise provided by law, parties are responsible for service of their own subpoenas and payment of witness fees and mileage expenses.

b. Issuance of subpoena for production of documents.

(1) An agency subpoena shall be issued to a party on request. The request shall be in writing and include the name, address, and telephone number of the requesting party. In absence of good cause for permitting later action, a request for subpoena must be received at least 20 days before the scheduled hearing.

(2) Except to the extent otherwise provided by law, parties are responsible for service of their own subpoenas.

c. Motion to quash or modify. Upon motion, the board or presiding officer may quash or modify a subpoena for any lawful reason in accordance with the Iowa Rules of Civil Procedure.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—126.8(421,441) Hearings before the board.

126.8(1) Prehearing conference. An informal conference of parties may be ordered at the discretion of the board or presiding officer or at the request of any party for any appropriate purpose. Any agreement reached at the conference shall be made a part of the record in the manner directed by the board or presiding officer.

126.8(2) Notice of hearing. Unless otherwise designated by the board, the hearing shall be held in the hearing room of the board. All hearings are open to the public. If a hearing is requested, the secretary shall mail a notice of hearing to the parties at least 30 days prior to the hearing. The parties may jointly waive the 30-day notice by following the provisions of subrule 126.8(3). The notice of hearing shall contain the following information:

- a.* A statement of the date, time, and place of the hearing;
- b.* A statement of legal authority and jurisdiction under which the hearing is to be held;
- c.* A reference to the particular sections of the statutes and rules involved;
- d.* That the parties may appear and present oral arguments;
- e.* That the parties may submit evidence and briefs;
- f.* That the hearing will be electronically recorded by the board;
- g.* That a party may obtain a certified court reporter for the hearing at the party's own expense;
- h.* That audiovisual aids and equipment are to be provided by the party intending to use them;
- i.* A statement that, upon submission of the appeal, the board will take the matter under advisement. A letter of disposition will be mailed to the parties; and
- j.* A compliance notice required by the Americans with Disabilities Act (ADA).

126.8(3) Waiver of 30-day notice. The parties to the appeal may jointly waive the 30-day written notice requirement for a hearing. The waiver must be in writing or by e-mail to paab@iowa.gov and signed by the parties or their designated representatives. By waiving notice, the parties acknowledge they are ready to proceed with the hearing. The parties will be contacted when a hearing date is available but notice for said date may be less than 30 days. The parties will have the right to accept or reject the hearing date.

126.8(4) Continuance. Any hearing may be continued for "good cause." Requests for continuance prior to the hearing shall be in writing or by e-mail to paab@iowa.gov and promptly filed with the secretary of the board immediately upon "the cause" becoming known. An emergency oral continuance may be obtained from the board or presiding officer based on "good cause" and at the discretion of the board or presiding officer. In determining whether to grant a continuance, the board or presiding officer may consider:

- a. Prior continuances;
- b. The interests of all parties;
- c. The likelihood of informal settlement;
- d. The existence of an emergency;
- e. Any objection;
- f. Any applicable time requirements;
- g. The existence of a conflict in the schedules of counsel, parties, or witnesses;
- h. The timeliness of the request; and
- i. Other relevant factors, including the existence of a scheduling order.

126.8(5) Telephone proceedings. The board or presiding officer may conduct a telephone conference in which all parties have an opportunity to participate to resolve preliminary procedural motions. Other proceedings, including contested case hearings, may be held by telephone. The board will determine the location of the parties and witnesses for telephone hearings. The convenience of the witnesses or parties, as well as the nature of the case, will be considered when the location is chosen.

126.8(6) Hearing procedures. A party to the appeal may request a hearing, or the appeal may proceed without a hearing. The local board of review may be present and participate at such hearing. Hearings may be conducted by the board or by one or more of its members.

a. *Authority of presiding officer.* The presiding officer presides at the hearing and may rule on motions, require briefs, issue a decision, and issue such orders and rulings as will ensure the orderly conduct of the proceedings.

b. *Representation.* Parties to the appeal have the right to participate or to be represented in all hearings. Any party may be represented by an attorney or by a designated representative.

c. *Participation in hearing.* The parties to the appeal have the right to introduce evidence relevant to the grounds set out in the protest to the local board of review. Subject to terms and conditions prescribed by the presiding officer, parties have the right to introduce evidence on issues of material fact, cross-examine witnesses present at the hearing as necessary for a full and true disclosure of the facts, present evidence in rebuttal, and submit briefs and engage in oral argument.

d. *Decorum.* The presiding officer shall maintain the decorum of the hearing and may refuse to admit or may expel anyone whose conduct is disorderly.

e. *Conduct of the hearing.* The presiding officer shall conduct the hearing in the following manner:

(1) The presiding officer shall give an opening statement briefly describing the nature of the proceedings;

(2) The parties shall be given an opportunity to present opening statements;

(3) The parties shall present their cases in the sequence determined by the presiding officer;

(4) Each witness shall be sworn or affirmed by the presiding officer and shall be subject to examination and cross-examination. The presiding officer may limit questioning in a manner consistent with law; and

(5) When all parties and witnesses have been heard, parties may be given the opportunity to present final arguments.

126.8(7) Dismissal. If a party fails to appear or participate in an appeal hearing after proper service of notice, the presiding officer may dismiss the appeal unless a continuance is granted for good cause. If an appeal is dismissed for failure to appear, the board shall have no jurisdiction to consider any subsequent appeal on the appellant's protest.

126.8(8) Transcript of hearing. All hearings shall be electronically recorded. Any party may provide a certified court reporter at the party's own expense. Any party may request a transcription of the hearing. The board reserves the right to impose a charge for copies and transcripts.

126.8(9) Members participating. Each appeal may be considered by one or more members of the board, and the chairperson of the board may assign members to consider appeals. If the appeal is considered by less than the full membership of the board, the determination made by such members shall be forwarded to the full board for approval, rejection, or modification. Decisions shall affirm, modify, or reverse the decision, order, or directive from which an appeal was made. In order for the decision to be valid, a majority of the board must concur on the decision on appeal.

126.8(10) Disqualification of board member. A board member or members must, on their own motion or on a motion from a party in the proceeding, withdraw from participating in an appeal if there are circumstances that warrant disqualification.

a. A board member or members shall withdraw from participation in the making of any proposed or final decision in an appeal before the board if that member is involved in one of the following circumstances:

- (1) Has a personal bias or prejudice concerning a party or a representative of a party;
 - (2) Has personally investigated, prosecuted, or advocated in connection with the appeal, the specific controversy underlying that appeal, or another pending factually related matter, or a pending factually related controversy that may culminate in an appeal involving the same parties;
 - (3) Is subject to the authority, direction, or discretion of any person who has personally investigated, prosecuted, or advocated in connection with that matter, the specific controversy underlying the appeal, or a pending factually related matter or controversy involving the same parties;
 - (4) Has acted as counsel to any person who is a private party to that proceeding within the past two years;
 - (5) Has a personal financial interest in the outcome of the appeal or any other significant personal interest that could be substantially affected by the outcome of the appeal;
 - (6) Has a spouse or relative within the third degree of relationship who:
 1. Is a party to the appeal, or an officer, director or trustee of a party;
 2. Is a lawyer in the appeal;
 3. Is known to have an interest that could be substantially affected by the outcome of the appeal;
- or
4. Is likely to be a material witness in the appeal; or
 - (7) Has any other legally sufficient cause to withdraw from participation in the decision making in that appeal.

b. Motion for disqualification.

(1) If a party asserts disqualification on any appropriate ground, including those listed in paragraph 126.8(10)“*a*,” the party shall file a motion supported by an affidavit pursuant to Iowa Code section 17A.11. The motion must be filed as soon as practicable after the reason alleged in the motion becomes known to the party. If, during the course of the hearing, a party first becomes aware of evidence of bias or other grounds for disqualification, the party may move for disqualification, but must establish the grounds by the introduction of evidence into the record.

(2) If a majority of the board determines that disqualification is appropriate, the board member shall withdraw. If a majority of the board determines that withdrawal is not required, the board shall enter an order to that effect. A party asserting disqualification may seek an interlocutory appeal and a stay as provided under 701—Chapter 7.

c. The term “personally investigated” means taking affirmative steps to interview witnesses directly or to obtain documents or other information directly. The term “personally investigated” does not include general direction and supervision of assigned investigators, unsolicited receipt of information which is relayed to assigned investigators, review of another person’s investigative work product in the course of determining whether there is probable cause to initiate a proceeding, or exposure to factual information while performing other functions of the board, including fact gathering for purposes other than investigation of the matter which culminates in an appeal. Factual information relevant to the merits of an appeal received by a person who later serves as presiding officer or a member of the board shall be disclosed if required by Iowa Code section 17A.11 and this rule.

d. Withdrawal. In a situation where a presiding officer or any other board member knows of information which might reasonably be deemed to be a basis for disqualification and decides voluntary withdrawal is unnecessary, that person shall submit the relevant information for the record by affidavit and shall provide for the record a statement of the reasons for the determination that withdrawal is unnecessary.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—126.9(421,441) Posthearing motions.

126.9(1) *Motion to reopen records.* The board or presiding officer, on the board's or presiding officer's own motion or on the motion of a party, may reopen the record for the reception of further evidence. A motion to reopen the record may be made anytime prior to the issuance of a final decision.

126.9(2) *Rehearing and reconsideration.*

a. Application for rehearing or reconsideration. Any party to a case may file an application for rehearing or reconsideration of the final decision. The application for rehearing or reconsideration shall be filed within 20 days after the final decision in the case is issued.

b. Contents of application. Applications for rehearing or reconsideration shall specify the findings of fact and conclusions of law claimed to be erroneous, with a brief statement of the alleged grounds of error. Any application for rehearing or reconsideration asserting that evidence has arisen since the final order was issued as a ground for rehearing or reconsideration shall present the evidence by affidavit that includes an explanation of the competence of the person to sponsor the evidence and a brief description of the evidence sought to be included.

c. Notice to other parties. A copy of the application shall be timely mailed by the applicant to all parties of record not joining therein. If the application does not contain a certificate of service, the board shall serve copies on all parties.

d. Requirements for objections to applications for rehearing or reconsideration. An answer or objection to an application for rehearing or reconsideration must be filed within 14 days of the date the application was filed with the board, unless otherwise ordered by the board.

e. Disposition. Any application for a rehearing shall be deemed denied unless the board grants the application within 20 days after its filing.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—126.10(17A,441) Judicial review.

126.10(1) *Appeals of board decisions.* A party may seek judicial review of a decision rendered by the board by filing a written notice of appeal with the clerk of the district court where the property is located within 20 days after the letter of disposition of the appeal by the board is mailed to the appellant. Iowa Code chapter 17A applies to judicial review of the board's final decision. The filing of the petition does not itself stay execution or enforcement of the board's final decision. The board may grant a stay on appropriate terms or other temporary remedies during the pendency of judicial review.

126.10(2) *Stays of agency actions.* Any party to a contested case proceeding may petition the board for a stay or other temporary remedies pending judicial review of all or part of that proceeding. The petition shall state the reasons justifying a stay or other temporary remedy. In determining whether to grant a stay, the board or presiding officer shall consider the factors listed in Iowa Code section 17A.19(5) "c." A stay may be vacated by the board upon application of any other party.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

701—126.11(22,421) Records access.

126.11(1) *Location of record.* A request for access to a record should be directed to the custodian.

126.11(2) *Office hours.* Open records shall be made available during all customary office hours, which are 8 a.m. to 4:30 p.m. Monday through Friday excluding holidays.

126.11(3) *Request for access.* Requests for access to open records may be made in writing, in person, by e-mail, or by telephone. Requests shall identify the particular records sought by name or description in order to facilitate the location of the record. Mail, e-mail, and telephone requests shall include the name, address, and telephone number of the person requesting the information. A person shall not be required to give a reason for requesting an open record.

126.11(4) *Response to requests.* Access to an open record shall be provided promptly upon request unless the size or nature of the request makes prompt access infeasible. If the size or nature of the request for access to an open record requires time for compliance, the custodian shall comply with the request as soon as feasible. Access to an open record may be delayed for one of the purposes authorized by Iowa Code section 22.8(4) or 22.10(4). The custodian shall promptly give notice to the requester of the reason for any delay in access to an open record and an estimate of the length of that delay and, upon request,

shall promptly provide that notice to the requester in writing. The custodian of a record may deny access by members of the public to the record only on the grounds that such a denial is warranted under Iowa Code sections 22.8(4) and 22.10(4), or that it is a confidential record, or that its disclosure is prohibited by a court or board order. Access by members of the public to a confidential record is limited by law and, therefore, may generally be provided only in accordance with the applicable provisions of law.

126.11(5) *Security of record.* No person may, without permission from the secretary, search or remove any record from board files. Examination and copying of board records shall be supervised by the secretary. Records shall be protected from damage and disorganization.

126.11(6) *Copying.* A reasonable number of copies of an open record may be made in the board's office. If photocopy equipment is not available, the custodian shall permit examination of the record and shall arrange to have copies promptly made elsewhere.

126.11(7) *Fees.*

a. When charged. The board may charge fees in connection with the examination or copying of records only if the fees are authorized by law. To the extent permitted by applicable provisions of law, the payment of fees may be waived when the imposition of fees is inequitable or when a waiver is in the public interest.

b. Copying and postage costs. Price schedules for published materials and for photocopies of records supplied by the board are available from the custodian. Copies of records may be made by or for members of the public on board photocopy machines or from electronic storage systems at cost as determined and made available by the custodian. When the mailing of copies of records is requested, the actual costs of such mailing may also be charged to the requester.

c. Supervisory fee. An hourly fee may be charged for actual board expenses in supervising the examination and copying of requested records when the supervision time required is in excess of one hour. The custodian shall provide the hourly fees to be charged for supervision of records during examination and copying. That hourly fee shall not be in excess of the hourly wage of a board clerical employee who ordinarily would be appropriate and suitable to perform this supervisory function.

d. Advance deposits.

(1) When the estimated total fee chargeable under this subrule exceeds \$25, the custodian may require a requester to make an advance payment to cover all or a part of the estimated fee.

(2) When a requester has previously failed to pay a fee chargeable under this subrule, the custodian may require advance payment of the full amount of any estimated fee before the custodian processes a new request from that requester.

[ARC 2108C, IAB 8/19/15, effective 9/23/15]

These rules are intended to implement Iowa Code sections 421.1, 421.1A, 421.2, 441.37A, 441.38 and 441.49 and chapters 17A and 22.

TITLE XVIII
DEBT COLLECTION

CHAPTER 150

FEDERAL OFFSET FOR IOWA INCOME TAX OBLIGATIONS

701—150.1(421,26USC6402) Purpose and general application of offset of a federal tax overpayment to collect an Iowa income tax obligation. Effective for refunds of overpayments to the Internal Revenue Service (IRS) that are payable beginning January 1, 2000, the IRS may offset, in whole or in part, an amount of federal refund payable to an Iowa resident by the amount of any past due legally enforceable Iowa income tax obligation owed by such taxpayer. The purpose of this chapter is to establish a procedure to identify taxpayers that owe Iowa income tax liabilities and to establish a procedure for requesting the offset of the taxpayer's federal tax overpayment to collect a past due legally enforceable Iowa income tax obligation.

701—150.2(421,26USC6402) Definitions. The following definitions are applicable to the federal offset program:

“Assessment” means the determination of a past due tax obligation and includes self-assessments. An assessment includes the Iowa income tax, interest, penalties, fees or other charges associated with the past due legally enforceable Iowa income tax obligation.

“Department,” “state of Iowa,” “Iowa” or “the state” means the Iowa department of revenue.

“Director” means the director of the Iowa department of revenue.

“Overpayment” means a federal tax refund due and owing to a person or persons.

“Past due legally enforceable Iowa income tax obligation” means a debt which resulted from a judgment rendered by a court of competent jurisdiction which has determined an amount of state income tax to be due or a determination after an administrative hearing which has determined an amount of state income tax to be due and which is no longer subject to judicial review. In addition, this term also includes a debt which resulted from a state income tax which has been assessed but not collected, for which the time for redetermination has expired, and which has not been delinquent for more than ten years.

“Resident of Iowa” means any person with a federal overpayment for the year in which Iowa seeks offset and such person has an Iowa address listed on that person's federal return for the tax period of overpayment.

“Secretary” means the Secretary of the Treasury for the federal government.

“State income tax obligation” or “Iowa income tax obligation” is intended to cover all Iowa income taxes. This term includes all local income taxes administered by the Iowa department of revenue or determined to be a “state income tax” under Iowa law. Such taxes may include, but are not limited to, individual income tax, income surtax, fiduciary income tax, withholding tax, or corporate income tax, and penalties, interest, fines, judgments, or court costs relating to such tax obligations.

“Tax refund offset” means withholding or reducing, in whole or in part, a federal tax refund payment by an amount necessary to satisfy a past due legally enforceable state income tax obligation owed by the payee (taxpayer) of the tax refund payment. This rule only involves the offset of tax refund payments under 26 U.S.C. 6402(e); it does not cover the offset of federal payments other than tax refund payments for the collection of past due legally enforceable state income tax obligations.

“Tax refund payment” means the amount to be refunded to a taxpayer by the federal government after the Internal Revenue Service (IRS) has applied the taxpayer's overpayment to the taxpayer's past due tax liabilities in accordance with 26 U.S.C. 6402(a) and 26 CFR 301.6402-3(a)(6)(i).

701—150.3(421,26USC6402) Prerequisites for requesting a federal offset. The following are the requirements that the state of Iowa must meet before the state can request an offset of a federal overpayment against an Iowa income tax obligation:

150.3(1) Pre-offset notice. At least 60 days prior to requesting the offset of a taxpayer's federal overpayment for an Iowa income tax obligation, the state of Iowa must provide notice by certified mail,

return receipt requested, to the person owing the Iowa income tax liability. This notice must state the following information:

- a.* That the state proposes to request the offset of the person's federal overpayment against a specified Iowa income tax obligation and that such an obligation is past due and legally enforceable;
- b.* That the authority for this offset is Internal Revenue Service Restructuring and Reforms Act of 1998, Pub. L. 105-206, 112 Stat. 685, 779 (1998), as implemented by this chapter;
- c.* That the person owing the obligation has 60 days from the date of the notice to present evidence to the department that all or part of the obligation at issue is not past due or not legally enforceable;
- d.* The mailing address for submitting such evidence;
- e.* That failure to timely submit the evidence waives the taxpayer's right to protest the amount, validity or qualification of the Iowa income tax obligation for offset at any time in the future; and
- f.* Where contact can be made with the department for additional information or questions.

150.3(2) The state must consider any evidence presented by the person owing the obligation and determine whether the amount or amounts are past due and legally enforceable.

150.3(3) The state must have made written demand on the taxpayer to obtain payment of the state income tax obligation for which the request for offset is being submitted.

150.3(4) Additional pre-offset notices. The department must provide a taxpayer with an additional pre-offset notice if the amount of the obligation to be subject to offset is increased due to a new assessment. However, a new pre-offset notice is not required to be sent to the taxpayer by the department if there is an increase in the amount to be offset due to accrued interest, penalties or other charges associated with an Iowa income tax obligation in which notice has previously been given.

150.3(5) Before offset of the federal refund can be requested by the state of Iowa, the person's Iowa income tax liability must be at least \$25, unless otherwise provided based on the discretion of the department and the Secretary. If an individual owes more than one Iowa income tax obligation, the minimum amount will be applied to the aggregate amounts of such obligations owed to Iowa.

150.3(6) Offset applies to residents of Iowa as defined under these rules.

701—150.4(421,26USC6402) Procedure after submission of evidence. Upon timely receipt of evidence by the department from the taxpayer as set forth in 150.3(1) "c," the department has 60 days to review the evidence and notify the taxpayer whether the evidence submitted is sufficient to terminate the intended offset. If the department determines that the evidence is sufficient, the procedure to initiate the federal offset shall be terminated for that obligation and the taxpayer's record of Iowa income tax obligation for that particular obligation shall be adjusted accordingly. However, if the department determines that the evidence is insufficient to show that the amount or amounts at issue are not, in whole or in part, a past due and legally enforceable income tax obligation, the department must notify the taxpayer within 60 days of receiving the evidence from the taxpayer.

The contest of an offset under these rules is subject to judicial review under Iowa Code section 17A.19 as "other agency action."

In cases in which a taxpayer claims immunity from state taxation due to being an enrolled member of an Indian tribe who lives on that member's reservation and derives all of that member's income from that reservation, Iowa must consider such claims de novo on the merits, unless such claims have been previously adjudicated by a court of competent jurisdiction.

701—150.5(421,26USC6402) Notice by Iowa to the Secretary to request federal offset. Iowa must notify the Secretary of an Iowa income tax obligation in the manner prescribed by the Secretary.

701—150.6(421,26USC6402) Erroneous payments to Iowa. If Iowa receives a notice from the Secretary that an erroneous payment has been made to Iowa under these rules, Iowa must promptly pay to the Secretary, in accordance with such rules and regulations as the Secretary may prescribe, an amount equal to the amount of the erroneous payment (without regard to whether any other amounts payable to Iowa under these rules have been paid to Iowa). In the alternative, Iowa may return the erroneous payment directly to the taxpayer. If this latter alternative is used by Iowa, then Iowa must

notify the Secretary of the erroneous offset being paid to the taxpayer, and the taxpayer's records will be adjusted accordingly.

701—150.7(421,26USC6402) Correcting and updating notice to the Secretary. Iowa must notify the Secretary of any deletion or decrease in the amount of past due legally enforceable Iowa income tax obligation referred to the Secretary for collection by offset under these rules. Iowa may also notify the Secretary of any increases in the amount or amounts referred to the Secretary for collection by offset under these rules provided that Iowa has complied with the requirements of these rules with regard to such amount or amounts.

These rules are intended to implement Iowa Code chapter 421 and 26 U.S.C. 6402(e) et seq.

CHAPTER 151
COLLECTION OF DEBTS OWED THE STATE
OF IOWA OR A STATE AGENCY

701—151.1(421) Definitions. For purposes of this chapter, the following definitions shall govern:

“*Debtor*” means any person having a delinquent account, charge, fee, loan, or other indebtedness due the state of Iowa or any state agency.

“*Department*” means the Iowa department of revenue or the director of the Iowa department of revenue and the director’s representative.

“*Director*” is the director of revenue.

“*Liability*” or “*debt*” means any liquidated sum due and owing to the state of Iowa or any state agency which has accrued through contract, subrogation, tort, operation of law, or any legal theory regardless of whether there is an outstanding judgment for that sum.

“*Person*” or “*entity*” means individual, corporation, business trust, estate, trust, partnership or association, limited liability company, or any other legal entity, but does not include a state agency.

“*State agency*” or “*agency*” means a board, commission, department, including the department of revenue, or other administrative office or unit of the state of Iowa. “State agency” does not include the general assembly, the governor, or any political subdivision of the state, or its offices and units.

701—151.2(421) Scope and purpose. The purpose of these rules is to improve collection efforts by establishing a centralized collection system in the department for use by state agencies to collect delinquent accounts.

701—151.3(421) Participation guidelines. Those state agencies qualified to use this chapter’s collection provisions should utilize those provisions when it is cost-effective to do so. Final determination regarding whether or not it will be cost-effective to collect any debt owed will be at the discretion of the director. Generally, it will not be cost-effective to pursue collection of a debt if the total anticipated collection cost will exceed the amount of the claim that could reasonably be expected to be realized. The cost-effectiveness criteria which the director applies will not be the same for every agency. Circumstances differ among agencies.

701—151.4(421) Duties of the agency. The agency seeking the use of the centralized collection system shall have the following duties regarding the department and debtors.

151.4(1) Notification to the department. The agencies must provide a list of debtors to the department of revenue. This list must be in a format and type prescribed by the department and include information relevant to the identification of the debtor and the source and amount of the debt. The agencies shall terminate all collection activities once notification is given to the department.

151.4(2) Change in status of debt. A state agency which has provided liability information to the department of revenue must notify the department immediately of any change in the status of a debt. This notification shall be made no later than ten calendar days from the occurrence of the change. Change in status may come from payment of the debt or liability, invalidation of the liability, alternate payment arrangements with the debtor, bankruptcy, or other factors.

701—151.5(421) Duties of the department—performance of collection. The department will develop procedures for administering the collection program on an agency basis. Procedures may vary in order to achieve the greatest efficiency in administering the collection program for each agency.

701—151.6(421) Payment of collected amounts. Payments of collected amounts shall be made by the department monthly, but other arrangements can be made if agency requirements specify a different time period. Payments will be made to the agency, to the general fund, split between the two, or as required by the agency depending on the circumstances of each agency.

701—151.7(421) Reimbursement for collection of liabilities. Costs incurred by the department in administering the collection program will be charged to the state agency requesting collection. The costs will be charged to the agency or deducted from the gross proceeds collected whichever the director determines is reasonable based on the requesting agency's circumstances. Costs may include direct expenses such as salaries, travel, telephone, supplies, equipment, and system modification and development costs; or indirect costs such as space, security, or utility costs. If the above-described procedure is prohibited by paramount state or federal law, the director shall allow charges, deductions, or reimbursement in a manner which conforms to the paramount law.

701—151.8(421) Confidentiality of information. Information shared between state agencies shall be deemed confidential and shall be disclosed only to the extent that sufficient information is given that is relevant to the identification of persons liable to state agencies. The confidentiality provisions of Iowa Code sections 422.20 and 422.72 do not apply to tax information contained in the centralized computer data bank. The information is to be used for purpose of debt collection or license application or renewal.

701—151.9(421) Subpoena of records from public or private utility companies. The director may, to the extent permissible by federal law, subpoena certain records held by a public or private utility company with respect to an individual who has a debt or obligation placed with the centralized collection unit of the department. This authority may be used only after reasonable efforts have been made by the centralized collection unit of the department to locate the individual.

151.9(1) Definitions.

a. "Public or private utility company" means a public utility, cable, video, or satellite television company, cellular telephone company, or Internet service provider.

b. "Reasonable efforts," for purposes of this rule, will be considered complete when the following procedures have been performed by the department:

(1) The department has received returned and undeliverable mail sent to the individual's most recent address known to the department; and

(2) The department has attempted to reach the individual at the listed telephone number and discovered that the telephone number is incorrect or the telephone has been disconnected.

c. "Utility" means the same as "public or private utility company" as defined in paragraph 151.9(1)"a."

151.9(2) Procedure for issuing a subpoena; data transfer.

a. The department will contact the utility to obtain agreement upon the subpoena process; the form, format and transmission method of a secure data file; and the schedule for both the subpoena and the data.

b. The department shall submit the subpoena to the utility's designated recipient on or before the date a secure data file is submitted for processing. The subpoena will include the director's authority to make the request, the name of the file submitted for processing, the information to be provided for each individual, the expected response date, and the department's contact information. The data file provided to the utility by the department will include social security numbers, names, and last-known addresses in the mutually agreed-upon format.

c. Upon receipt of the department's data file, the utility will match the data file against its current customer information and return to the department the current last name, first name, middle name, address 1, address 2, city, state, ZIP code and telephone number for any current customer information that matches the social security number and designated characters of the last name as provided by the department. The department will not request or require any information from the utility other than the current address and telephone number.

d. Within 30 days of receiving the department's data file, the utility will process and return the data file to the department using the agreed-upon secure file transfer process.

e. When the data file is returned, the department will match the returned data with the social security number and designated characters of the current customer's last name before updating its collections system with the new address or telephone number.

f. The department will use the address and telephone number received from the utility to contact the individual for collection purposes.

151.9(3) Confidentiality. The utility must keep confidential all records received from the department. After the department has received the requested information from the utility, the utility must delete the data files it received in a secure manner. The department must keep confidential all records received from the utility in compliance with all applicable state and federal laws regarding individual privacy and the privacy rights of public and private utility companies.

This rule is intended to implement Iowa Code section 421.17(32).
[ARC 0124C, IAB 5/16/12, effective 6/20/12]

These rules are intended to implement Iowa Code sections 421.17, 422.20, and 422.72.

[Filed emergency 10/22/93—published 11/10/93, effective 10/22/93]

[Filed 12/17/93, Notice 11/10/93—published 1/5/94, effective 2/9/94]

[Filed ARC 0124C (Notice ARC 0052C, IAB 3/21/12), IAB 5/16/12, effective 6/20/12]

CHAPTER 152
DEBT COLLECTION AND SELLING OF PROPERTY
TO COLLECT DELINQUENT DEBTS

701—152.1(421,422,626,642) Definitions.

“Delinquent debtor” means an individual, corporation, limited liability company, business trust, estate, trust, partnership, or any other legal entity that owes a delinquent liability, or unpaid taxes to the state or a liability which is collectible by the state.

“Department” means the Iowa department of revenue.

“Director” means the director of revenue.

“Property” means real property, tangible and intangible property, and includes a homestead.

“State” means the state of Iowa.

This rule is intended to implement Iowa Code sections 421.17 and 422.26 and Iowa Code chapters 626 and 642.

701—152.2(421,422,626,642) Sale of property. Property may be seized and sold to satisfy unpaid taxes, delinquent liabilities owed to the state, and liabilities collected by the state upon the approval of the person appointed by the director to collect unpaid taxes, delinquent liabilities owed to the state, and liabilities collected by the state. If the property to be sold is real estate or a homestead, it will only be sold with the written authorization of the director. A homestead may be sold to satisfy delinquent taxes collected under Iowa Code section 422.26 and any other similar section. (See O. P. Att’y. Gen. Hardy to Bair, Director of Revenue, 8-23-94) However, a homestead may not be sold for collection of any other liability owed to or collected by the state other than taxes unless specifically authorized by statute.

This rule is intended to implement Iowa Code sections 421.17 and 422.26 and Iowa Code chapters 626 and 642.

701—152.3(421,422,626,642) Means of sale. The department shall, when the sale of property has been approved by a person authorized by the director or when the director has authorized in writing the sale of real property or a homestead to satisfy unpaid taxes, delinquent liabilities owed to the state and liabilities collected by the state, issue a distress warrant or obtain a writ of execution directed to the county sheriff in the county where the property is located, or by other means authorized by statute to satisfy delinquent liabilities owed to the state and liabilities collected by the state, and proceed as authorized by relevant provisions of the Iowa Code, including chapters 422, 626, and 642.

This rule is intended to implement Iowa Code sections 421.17 and 422.26 and Iowa Code chapters 626 and 642.

[Filed 10/31/96, Notice 9/25/96—published 11/20/96, effective 12/25/96]

CHAPTER 153
LICENSE SANCTIONS FOR COLLECTION OF DEBTS OWED THE STATE OF IOWA OR
A STATE AGENCY

701—153.1(272D) Definitions. For purposes of this chapter, the following definitions shall govern:

“*Certificate of noncompliance*” means a document provided by the unit certifying that the named person has outstanding liability placed with the unit and has not entered into an approved payment plan to pay the liability.

“*Liability*” means a debt or obligation placed with the unit for collection that is greater than \$1,000. For purposes of this chapter, “liability” does not include child support payments collected pursuant to Iowa Code chapter 252J.

“*License*” means a license, certification, registration, permit, approval, renewal, or other similar authorization issued to a person by a licensing authority which evidences the admission to, or granting of authority to engage in, a profession, occupation, business, industry, or recreation. “License” includes licenses for hunting and fishing or for other recreational activity.

“*Licensee*” means a person to whom a license has been issued, or who is seeking the issuance of a license.

“*Licensing authority*” means the supreme court, or an instrumentality, agency, board, commission, department, officer, organization, or any other entity of the state, which has authority within this state to suspend or revoke a license or to deny the renewal or issuance of a license authorizing a person to engage in a business, occupation, profession, recreation, or industry.

“*Obligor*” means a person with a liability placed with the unit.

“*Person*” means a licensee.

“*Unit*” means the centralized collection unit of the department of revenue.

“*Withdrawal of a certificate of noncompliance*” means a document provided by the unit certifying that the certificate of noncompliance is withdrawn and that the licensing authority may proceed with issuance, reinstatement, or renewal of the person's license.

701—153.2(272D) Purpose and use. The unit may use license sanctions as a process to help collect liabilities placed with the unit except for child support cases.

701—153.3(272D) Challenge to issuance of certificate of noncompliance. Actions initiated by the unit under this chapter shall not be subject to contested case proceedings or further review pursuant to Iowa Code chapter 17A, and any resulting court hearing shall be an original hearing before the district court.

701—153.4(272D) Use of information. Information obtained by the unit and the licensing authority under this chapter shall be used solely for the purposes of this chapter. Information may be exchanged between the unit and the licensing authority.

701—153.5(272D) Notice to person of potential sanction of license. Before issuing a certificate of noncompliance, the unit must send a notice to the person by regular mail to the person's last-known address. The notice must include all of the following:

1. The address and telephone number of the unit and the person's unit account number.
2. A statement that the person may request a conference with the unit to contest the action.
3. A statement that if the person fails to contact the unit to schedule a conference within 20 days of the notice's mailing, the unit shall issue a certificate of noncompliance bearing the person's name, social security number, and unit account number to any appropriate licensing authority, certifying that the obligor has an outstanding liability placed with the unit.
4. A statement that in order to stay the issuance of a certificate of noncompliance, the unit must receive a written request for conference within 20 days of the notice's mailing to the person.
5. The names of the licensing authorities to which the unit intends to issue a certificate of noncompliance.

6. A statement that if the unit issues a certificate of noncompliance to an appropriate licensing authority, the licensing authority shall initiate proceedings to refuse to issue or renew, or to suspend or revoke the person's license, unless the unit provides the licensing authority with a withdrawal of a certificate of noncompliance.

701—153.6(272D) Conference. The person may request a conference with the unit to challenge the unit's issuance of a certificate of noncompliance following the mailing of the notice of potential license sanction or at any time after a licensing authority serves notice of suspension, revocation, denial of issuance, or nonrenewal of a license. The request for a conference shall be made in writing to the unit. If the conference is requested pursuant to and after the unit's mailing of a notice of potential license sanction under rule 701—153.5(272D), the request must be received by the unit within 20 days following the mailing or service of that notice.

153.6(1) Notification. The unit shall notify the person of the date, time, and location of the conference by regular mail, with the date of the conference to be no earlier than 10 days following the unit's issuance of the notice of the conference. If the person fails to appear at the conference, the unit shall issue a certificate of noncompliance.

153.6(2) Location. The conference may be conducted by telephone or in person at the location of the unit.

701—153.7(272D) Issuance of certificate of noncompliance. If the person fails to appear at the conference, the unit shall issue a certificate of noncompliance. If the person does not timely request a conference or pay the amount of liability owed within 20 days of the notice's mailing, the unit shall issue a certificate of noncompliance. However, the unit will not issue a certificate of noncompliance if:

1. The unit finds a mistake in the identity of the person;
2. The unit finds a mistake in determining the amount of the liability;
3. The unit determines the amount of the liability is less than \$1,000;
4. The obligor pays the amount due or enters into an acceptable payment plan;
5. The obligor is in bankruptcy; or
6. The unit finds additional time is required for the person to comply.

701—153.8(272D) Stay of certificate of noncompliance. The unit shall grant the person a stay of the issuance of a certificate of noncompliance upon receiving a timely written request for a conference.

701—153.9(272D) Written agreements. The obligor and the unit may enter into a written agreement for payment of the liability owed.

153.9(1) Criteria for written agreement. The written agreement shall take into consideration and include all of the following:

- a. Obligor's ability to pay.
- b. A statement that the obligor will not incur additional liabilities of any amount during the term of the payment plan.
- c. The method, amount, and dates of payments by the obligor.
- d. A statement that upon breach of the written agreement by the obligor, the unit shall issue a certificate of noncompliance to any appropriate licensing authority.

153.9(2) Other remedies. A written agreement entered into pursuant to this rule does not preclude any other remedy provided by law.

701—153.10(272D) Decision of the unit.

153.10(1) If the unit mails a notice to a person and the person requests a conference, the unit shall issue a written decision if any of the following conditions exist:

- a. The person fails to appear at a scheduled conference.
- b. A conference is held and the unit makes a decision based upon that conference.
- c. The obligor fails to comply with a written agreement entered into by the obligor and the unit.

153.10(2) Mailing of decision. The unit shall send a copy of the written decision to the person by regular mail at the person's most recent address of record. If the decision is made to issue a certificate of noncompliance or to withdraw the certificate of noncompliance, a copy of the certificate of noncompliance or of the withdrawal of the certificate of noncompliance shall be attached to the written decision.

153.10(3) Contents of decision. The written decision shall state all of the following:

a. That the certificate of noncompliance or withdrawal of the certificate of noncompliance has been mailed to the licensing authorities named in the notice provided by the unit.

b. That upon receipt of a certificate of noncompliance, the licensing authority shall initiate proceedings to suspend, revoke, deny issuance, or deny renewal of a license, unless the licensing authority receives a withdrawal of a certificate of noncompliance from the unit.

c. That in order to obtain a withdrawal of a certificate of noncompliance from the unit, the obligor shall enter into a written agreement with the unit, comply with an existing written agreement with the unit, or pay the total amount of liability owed.

d. That if the unit issues a written decision which includes a certificate of noncompliance, the person may request a hearing before the district court. The person may retain an attorney at the person's own expense to represent the person at the hearing. The district court's review shall be limited to mistakes of fact surrounding the amount of the liability owed or the identity of the person.

701—153.11(272D) Withdrawal of certificate of noncompliance. Once it has issued a certificate of noncompliance, the unit shall issue a withdrawal of the certificate of noncompliance only if any of the following applies:

1. The unit or the court finds a mistake in the identity of the person;
2. The unit or the court finds a mistake in the amount owed;
3. The obligor enters into a written agreement with the unit to pay the liability owed, the obligor complies with an existing written agreement, or the obligor pays the total amount of liability owed; or
4. The unit finds that a hardship exists, such as catastrophic illness or state or federally declared disasters.

701—153.12(272D) Certificate of noncompliance to licensing authority.

153.12(1) The unit shall issue a certificate of noncompliance to any appropriate licensing authority. The certificate of noncompliance shall contain the person's name and social security number and shall request that the licensing authority do the following:

a. Initiate its procedures to revoke or suspend the person's license or to deny the issuance or renewal of a license; and

b. Provide to the person notice of intent to suspend, revoke, deny issuance, or deny renewal of a license, including the effective date of the action.

153.12(2) The suspension, revocation, or denial shall be effective no sooner than 30 days following provision of notice to the person.

701—153.13(272D) Requirements of the licensing authority.

153.13(1) Records. A licensing authority shall collect and maintain records of its licensees. The records shall be made available to the unit so that the unit may match to the records the names of persons with any liabilities placed with the unit for collections. The records must be submitted in an electronic format and updated on a periodic basis and must include, at a minimum, the following:

a. The licensee's first and last names.

b. The licensee's current known address.

c. The licensee's social security number.

153.13(2) Certificate of noncompliance. Upon receipt of a certificate of noncompliance, a licensing authority shall initiate its existing rules and procedures for the suspension, revocation, or denial of issuance or renewal of a license to a person.

153.13(3) Notice. The licensing authority shall provide to a person notice of intent to suspend, revoke, or deny issuance or renewal of a license under the provisions of 2008 Iowa Acts, Senate File 2428, sections 7 to 15. The notice shall be effective 30 days following the provision of notice to the person and shall state at a minimum all of the following:

- a. That the licensing authority has received a certificate of noncompliance from the unit and intends to suspend, revoke, or deny issuance or renewal of the person's license;
- b. That the person must contact the unit to schedule a conference or to otherwise obtain a withdrawal of a certificate of noncompliance;
- c. That the licensing authority will revoke, suspend or deny the person's license unless a withdrawal of certificate of noncompliance is received from the unit within 30 days from the date of the notice;
- d. That in the event the licensing authority's rules and procedures conflict with the additional rules and procedures under this chapter, the rules and procedures of this chapter shall apply;
- e. That mistakes of fact in the amount of the liability owed and the person's identity may not be contested to the licensing authority; and
- f. That the person may request a district court hearing as outlined in subrule 153.10(3) "d."

153.13(4) Withdrawal. Upon receipt of a withdrawal of a certificate of noncompliance from the unit, the licensing authority shall immediately reinstate, renew, or issue a license if the person is otherwise in compliance with the licensing authority's requirements.

701—153.14(272D) District court hearing. For purposes of this rule, "notice of intent" means a licensing agency's notice to a person of its intent to suspend, revoke, or deny renewal or issuance of a license under the provisions of 2008 Iowa Acts, Senate File 2428, sections 7 to 15.

153.14(1) Actions that may be reviewed. A person may file an application for review with the district court following:

- a. The issuance of a written decision and certificate of noncompliance by the unit; or
- b. The provision of a notice of intent by a licensing authority.

153.14(2) Application. A person may seek review of the actions listed in subrule 153.14(1) and request a hearing before the district court by filing an application with the district court in the county in which the majority of the liability was incurred. The person must send a copy of the application to the unit by regular mail. The application must be filed no later than 30 days after the unit issues a written decision and certificate of noncompliance or the licensing authority issues its notice of intent.

153.14(3) Stay. The filing of an application for review and hearing before the district court will automatically stay any action by the licensing authority as outlined in the licensing authority's notice of intent.

153.14(4) Scheduling. The clerk of the district court shall schedule a hearing and mail a copy of the scheduling order to the person, the unit, and the licensing authority.

153.14(5) Certification prior to hearing. Upon receipt from the clerk of court of a copy of a scheduling order and prior to the hearing, the unit shall certify to the court a copy of its written decision and certificate of noncompliance indicating the date of issuance, and the licensing authority shall certify to the court a copy of its notice of intent.

153.14(6) Hearing. The hearing on the person's application shall be scheduled and held within 30 days of the application's being filed. However, if the person fails to appear at the scheduled hearing, the stay shall be lifted and the licensing authority shall continue its procedures pursuant to its notice of intent.

153.14(7) Scope of review. The district court's review shall be limited to demonstration of the amount of the liability owed or the identity of the person.

153.14(8) Findings. If the court finds the unit was in error either in issuing a certificate of noncompliance or in its failure to issue a withdrawal of certificate of noncompliance, the unit shall issue a withdrawal of certificate of noncompliance to the appropriate licensing authority. If the court finds the unit was justified in issuing a certificate of noncompliance or in not issuing a withdrawal of

certificate of noncompliance, a stay imposed under subrule 153.14(3) shall be lifted and the licensing authority shall proceed with action as outlined in its notice of intent.

These rules are intended to implement 2008 Iowa Acts, Senate File 2428, sections 7 to 15.

CHAPTER 154
CHALLENGES TO ADMINISTRATIVE LEVIES AND
PUBLICATION OF NAMES OF DEBTORS

701—154.1(421) Definitions. For purposes of this chapter, the following definitions shall govern:

“*Department*” means the Iowa department of revenue.

“*Director*” means the director of the Iowa department of revenue.

“*Facility*” means the centralized debt collection facility of the department of revenue.

“*Financial institution*” includes a bank as defined in Iowa Code section 524.103, credit union as defined in Iowa Code section 533.51, or savings and loan as defined in Iowa Code section 534.102. “Financial institution” also includes an institution which holds deposits for an agent, broker-dealer, or an issuer as defined in Iowa Code section 502.102.

“*Obligor*” means a person who is indebted to the state of Iowa or a state agency for any delinquent accounts, charges, fees, loans, taxes, or other indebtedness due the state or indebtedness being collected by the state.

“*Person*” means individual, corporation, business trust, estate trust, partnership, limited liability company or association, or any other legal entity, but does not include a state agency.

701—154.2(421) Administrative levies. The centralized debt collection facility may administratively initiate an action to seize one or more accounts in a financial institution of a person who has a delinquent account, charges, fees, loans, taxes, or other indebtedness owed to the state or being collected by the state. The facility initiates an administrative levy by notifying a financial institution of the name and social security number of the obligor, a statement that the obligor is believed to have an account at the financial institution, and a statement that the obligor’s account is subject to seizure and that the financial institution is authorized and required to forward moneys to the centralized collection facility. The notice must contain the maximum amount that shall be forwarded to the facility which cannot exceed the amount of the indebtedness.

The facility must notify an obligor of the administrative levy. The notice must contain the name and social security number of the obligor, a statement that the obligor is believed to have an account at the financial institution, a statement that the obligor’s account is subject to seizure and the financial institution is authorized and required to forward moneys to the facility, the maximum amount to be forwarded to the facility, the time frames the financial institution must meet in forwarding any amounts, a statement that any challenge to the action must be in writing and must be received by the facility within ten days of the date of the notice to the obligor, and the address of the facility.

701—154.3(421) Challenges to administrative levies. A challenge to an administrative levy can only be made by an obligor or an account holder of interest. A challenge to an administrative levy will be reviewed by the centralized debt collection facility of the department. This review is not subject to the provisions of Iowa Code chapter 17A.

701—154.4(421) Form and time of challenge. The obligor or an account holder of interest must submit a written challenge to an administrative levy within ten days of the date of the notice. The written challenge shall be submitted to the individual identified as the contact for the facility.

701—154.5(421) Issues that may be raised. The issues raised by the challenging party, which are limited to a mistake of fact, may include but are not limited to:

1. The challenging party has the same name as the obligor but is not the correct person.
2. The challenging party does not have an interest in the account that is being seized.
3. The amount listed in the notice to the obligor is greater than the amount actually owed.
4. The written challenge must be mailed to: Centralized Collection Facility, P.O. Box 6128, Des Moines, Iowa 50309, with adequate postage.

701—154.6(421) Review of challenge. Review of a challenge to an administrative levy shall be conducted by the facility within ten days of receipt of the written challenge. If the challenging party is not available for the review on the scheduled date, the review shall take place without the challenging party being present. Information in favor of the challenging party shall be considered by the facility in the review. The facility may utilize additional information if available. Only a mistake of fact, including but not limited to, a mistake of identity of the obligor or a mistake in the amount owed to or being collected by the state shall be considered as a reason to dismiss or modify the action.

701—154.7(421) Actions where there is a mistake of fact. Actions to be taken if the facility determines that a mistake of fact has occurred:

1. If a mistake of identity has occurred or the obligor does not have a delinquent or accrued amount owed to or being collected by the state, the facility shall notify the financial institution that the administrative levy has been released. The facility shall provide the obligor with a copy of the notice by regular mail.

2. If the delinquent or accrued amount owed to or being collected by the state is less than the amount indicated in the notice of administrative levy, the facility shall provide a notice to the financial institution of the revised amount, with a copy of the original notice, and issue a notice to the obligor by regular mail. Upon written receipt of the notice from the facility, the financial institution shall release funds in excess of the revised amount and forward the revised amount to the facility pursuant to the administrative levy.

701—154.8(421) Action if there is not a mistake of fact. If the facility finds that no mistake of fact has occurred, the facility shall provide notice to that effect to the challenging party by regular mail and notify the financial institution to forward the moneys pursuant to the administrative levy.

701—154.9 to 154.15 Reserved.

701—154.16(421) List for publication. The director may compile and make available for publication a list of names, with last-known addresses and amounts of indebtedness owed to or being collected by the state if the indebtedness is subject to the centralized debt collection procedure established in Iowa Code subsection 421.17(34). The director shall determine when to compile the list, but shall not be required to do so.

701—154.17(421) Names to be published. Names selected for release for publication shall be based on the records of the facility. The director may not include the names of persons who owe less than \$100 or the threshold amounts determined by the director. The threshold amounts may vary by the debt types being collected by the central collection facility. The director may withhold names from publication if in the director's opinion publication would not assist in the collection of the debt.

The director will not release for publication names of parties who have made arrangements with the facility to pay the outstanding debt and are current in liquidating the debt based on the arrangements made.

701—154.18(421) Release of information. The director may release the information, as the director deems necessary, as follows:

1. The director will issue a press release to the daily and weekly newspapers describing the manner in which a copy of the list of names for publication may be obtained. The director will make the list available in an electronic medium of the director's choice.

2. The director will release to credit reporting agencies the names selected for release for publication upon request. The names are to be released in the same electronic medium as the names are released to the press.

These rules are intended to implement Iowa Code Supplement sections 421.17 and 421.17A.

CHAPTERS 155 to 210
Reserved

TITLE XIX
STREAMLINED SALES AND USE TAX RULESCHAPTER 211
DEFINITIONS

This chapter includes cross references to provisions in 701—Chapters 15 to 20, 21, 26, 30, 32 and 33 that were applicable prior to July 1, 2004.

701—211.1(423) Definitions. The definitions set out in this chapter are applicable wherever the terms they define appear in this title unless the context indicates otherwise.

“*Agent*” means a person appointed by a seller to represent the seller before the member states.

“*Agreement*” means the streamlined sales and use tax agreement authorized by 2003 Iowa Acts, First Extraordinary Session, chapter 2, division XIV, to provide a mechanism for establishing and maintaining a cooperative, simplified system for the application and administration of sales and use taxes.

“*Agricultural production*” is limited to what would ordinarily be considered a farming operation undertaken for profit. The term “agricultural production” refers to the raising of crops or livestock for market on an acreage. See *Bezdek’s Inc. v. Iowa Department of Revenue* (Linn County District Court, May 14, 1984). Included within the meaning of the phrase “agricultural production” is any feedlot operation whether or not the land upon which a feedlot operation is located is used to grow crops to feed the livestock in the feedlot and regardless of whether or not the livestock fed are owned by persons conducting the feedlot operation, and operations growing and raising hybrid seed corn or other seed for sale to nurseries, ranches, orchards, and dairies. “Agricultural production” includes the raising of flowering, ornamental, or vegetable plants in commercial greenhouses or elsewhere for sale in the ordinary course of business. “Agricultural production” also includes any kind of aquaculture; commercial greenhouses; and raising catfish. Logging, production of Christmas trees, beekeeping, and the raising of mink, other nondomesticated furbearing animals, and nondomesticated fowl (other than ostriches, rheas, and emus) continue to be excluded from the term “agricultural production.” The above list of exclusions and inclusions within the term “agricultural production” is not exhaustive. “Agricultural products” includes flowering, ornamental, or vegetable plants and those products of aquaculture.

“*Business*” means any activity engaged in by any person or caused to be engaged in by the person with the object of gain, benefit, or advantage, either direct or indirect.

“*Certificate of title*” means a certificate of title issued for a vehicle or for manufactured housing under Iowa Code chapter 321.

“*Certified automated system*” means software certified under the agreement to calculate the tax imposed by each jurisdiction on a transaction, determine the amount of tax to remit to the appropriate state, and maintain a record of the transaction.

“*Certified service provider*” means an agent certified under the agreement to perform all of a seller’s sales or use tax functions, other than the seller’s obligation to remit tax on its own purchases.

“*Chemical*” means a substance which is primarily used for producing a chemical effect. A chemical effect results from a chemical process wherein the number and kind of atoms in a molecule are changed in form (e.g., where oxygen and hydrogen are combined to make water). A chemical process is distinct from a physical process wherein only the state of matter changes (e.g., where water is frozen into ice or heated into steam).

“*Computer*” means an electronic device that accepts information in digital or similar form and manipulates the information for a result based on a sequence of instructions.

“*Computer software*” means a set of coded instructions designed to cause a computer or automatic data processing equipment to perform a task.

“*Delivered electronically*” means delivered to the purchaser by means other than tangible storage media.

“Delivery charges” means charges assessed by a seller of personal property or services for preparation and delivery to a location designated by the purchaser of personal property or services including, but not limited to, transportation, shipping, postage, handling, crating, and packing charges.

“Department” means the department of revenue.

“Direct mail” means printed material delivered or distributed by United States mail or other delivery service to a mass audience or to addressees on a mailing list provided by the purchaser or at the direction of the purchaser when the cost of the items is not billed directly to the recipients. “Direct mail” includes tangible personal property supplied directly or indirectly by the purchaser to the direct mail seller for inclusion in the package containing the printed material. “Direct mail” does not include multiple items of printed material delivered to a single address.

“Director” means the director of revenue.

“Domesticated fowl” means any domesticated bird raised as a source of food, either eggs or meat. “Domesticated fowl” includes, but is not limited to, chickens, ducks, turkeys, pigeons, ostriches, rheas, and emus which are raised for meat rather than for racing or as pets. Excluded from the meaning of “domesticated fowl” are nondomesticated birds, such as pheasants, raised for meat or any other purpose.

“Educational institution” means an institution which primarily functions as a school, college, or university with students, faculty, and an established curriculum. The faculty of an educational institution must be associated with the institution, and the curriculum must include basic courses which are offered every year. “Educational institution” includes an institution primarily functioning as a library.

“Electronic” means related to technology having electrical, digital, magnetic, wireless, optical, electromagnetic, or similar capabilities.

“Farm deer” means the same as defined in Iowa Code section 170.1.

“Farm machinery and equipment” means machinery and equipment used in agricultural production.

“First use of a service” means when a service is rendered, furnished, or performed in Iowa or, if rendered, furnished, or performed outside of Iowa, when the product or result of the service is used in Iowa.

“Goods, wares, or merchandise” means the same as “tangible personal property.”

“Governing board” means the group comprised of representatives of the member states of the agreement, which is created by the agreement to be responsible for the agreement’s administration and operation.

“Implement of husbandry” means any tool, equipment, or machine necessary to the carrying on of the business of agricultural production and without which the work could not be done. *Reaves v. State*, 50 S.W.2d 286 (Tex. Crim. App. Ct. 1932). An airplane or helicopter designed for and used primarily in spraying or dusting of plants which are raised as part of agricultural production for market is an implement of husbandry.

“Installed purchase price” means the amount charged, valued in money whether paid in money or otherwise, by a building contractor to convert manufactured housing from tangible personal property into realty. “Installed purchase price” includes, but is not limited to, amounts charged for the building contractor’s installing a foundation and electrical and plumbing hookups. “Installed purchase price” excludes any amount charged for landscaping in connection with the conversion.

“Lease or rental.”

1. “Lease or rental” means any transfer of possession or control of tangible personal property for a fixed or indeterminate term for consideration. A “lease or rental” may include future options to purchase or extend.

2. “Lease or rental” includes agreements covering motor vehicles and trailers when the amount of consideration may be increased or decreased by reference to the amount realized upon sale or disposition of the property as defined in 26 U.S.C. Section 7701(h)(1).

3. “Lease or rental” does not include any of the following:

- A transfer of possession or control of property under a security agreement or deferred payment plan that requires the transfer of title upon completion of the required payments.

- A transfer of possession or control of property under an agreement that requires the transfer of title upon completion of required payments, and payment of any option price does not exceed the greater of \$100 or 1 percent of the total required payments.

- Providing tangible personal property along with an operator for a fixed or indeterminate period of time. A condition of this exclusion is that the operator is necessary for the equipment to perform as designed. For the purpose of this paragraph, an operator must do more than maintain, inspect, or set up the tangible personal property.

4. This definition of “lease or rental” shall be used for sales and use tax purposes regardless of whether a transaction is characterized as a lease or rental under generally accepted accounting principles, the Internal Revenue Code, the Uniform Commercial Code, or other provisions of federal, state, or local law.

“*Livestock*” means domestic animals which are raised on a farm as a source of food or clothing, *Van Clief v. Comptroller of State of Md.*, 126 A.2d 865 (Md. 1956) and *In the Matter of Simonsen Mill Inc.*, Declaratory Ruling of the State Board, Docket No. 211, April 24, 1980. “Livestock” includes cattle, sheep, hogs, goats, chickens, ducks, turkeys, ostriches, rheas, emus, bison, and farm deer. “Farm deer” is defined as set forth in Iowa Code section 170.1 and commonly includes animals belonging to the Cervidae family, such as fallow deer, red deer or elk and sika. However, “farm deer” does not include unmarked free-ranging elk. Fish and any other animals which are products of aquaculture are considered to be “livestock” as well.

Excluded from the term “livestock” are horses, mules, other draft animals, dogs, cats, and other pets. Also excluded from the term “livestock” are mink, bees, or other nondomesticated animals even if raised in captivity and even if raised as a source of food or clothing. Also excluded from “livestock” is any animal raised for racing.

“*Manufactured housing*” means “manufactured home” as defined in Iowa Code section 321.1.

“*Manufacturer*” means any person, firm, or corporation that purchases, receives, or holds personal property for the purpose of adding to its value by any process of manufacturing, refining, purifying, or combining of different materials or by packing of meats with an intent to sell at a gain or profit.

“*Member state*” means any state which has signed the agreement.

“*Mobile home*” means “manufactured or mobile home” as defined in Iowa Code section 321.1.

“*Model 1 seller*” means a seller that has selected a certified service provider as its agent to perform all the seller’s sales and use tax functions, other than the seller’s obligation to remit tax on its own purchases.

“*Model 2 seller*” means a seller that has selected a certified automated system to perform part of its sales and use tax functions, but retains responsibility for remitting the tax.

“*Model 3 seller*” means a seller that has sales in at least five member states, has total annual sales revenue of at least \$500 million, has a proprietary system that calculates the amount of tax due each jurisdiction, and has entered into a performance agreement with the member states that establishes a tax performance standard for the seller. As used in this definition, a “seller” includes an affiliated group of sellers using the same proprietary system.

“*Nonresidential commercial operations*” means industrial, commercial, mining, or agricultural operations, whether for profit or not, but does not include apartment complexes or mobile home parks.

“*Not registered under the agreement*” means lack of registration by a seller with the member states under the central registration system referenced in 2005 Iowa Code section 423.11, subsection 4.

“*Person*” means an individual, trust, estate, fiduciary, partnership, limited liability company, limited liability partnership, corporation, or any other legal entity.

“*Place of business*” means any warehouse, store, place, office, building, or structure where goods, wares, or merchandise is offered for sale at retail or where any taxable amusement is conducted, or each office where gas, water, heat, communication, pay television, or electric services are offered for sale at retail. When a retailer or amusement operator sells merchandise by means of vending machines or operates music or amusement devices by coin-operated machines at more than one location within the state, the office, building, or place where the books, papers, and records of the taxpayer are kept shall be deemed to be the taxpayer’s place of business.

“*Plants*” means fungi such as mushrooms, crops commonly grown in this state such as corn, soybeans, oats, hay, alfalfa hay, wheat, sorghum, and rye. Also included within the meaning of the term “plants” are flowers, small shrubs, and fruit trees. Excluded from the meaning of the term “plants” are fir trees raised for Christmas trees and any trees raised to be harvested for wood.

“*Prewritten computer software*” means software designed and developed by the author or other creator to the specifications of a specific purchaser when it is sold to a person other than the purchaser. The combining of two or more prewritten computer software programs or prewritten portions of prewritten programs does not cause the combination to be other than prewritten computer software. “Prewritten computer software” also means computer software, including prewritten upgrades, which is not designed and developed by the author or other creator to the specifications of a specific purchaser.

When a person modifies or enhances computer software of which the person is not the author or creator, the person shall be deemed to be the author or creator only of such person’s modifications or enhancements. Prewritten computer software or a prewritten portion of the prewritten software that is modified or enhanced to any degree, when such modification or enhancement is designed and developed to the specifications of a specific purchaser, still is classified as prewritten computer software. However, when there is a reasonable, separately stated charge or an invoice or other statement of the price given to the purchaser for such modification or enhancement, such modification or enhancement shall not constitute prewritten computer software.

“*Property purchased for resale in connection with the performance of a service*” means property which is purchased for resale in connection with the rendition, furnishing, or performance of a service by a person who renders, furnishes, or performs the service if all of the following occur:

1. The provider and user of the service intend that a sale of the property will occur.
2. The property is transferred to the user of the service in connection with the performance of the service in a form or quantity capable of a fixed or definite price value.
3. The sale is evidenced by a separate charge for the identifiable piece of property.

“*Purchase*” means any transfer, exchange, or barter, conditional or otherwise, in any manner or by any means whatsoever, for a consideration.

“*Purchase price*” means the same as “sales price” as defined in this rule.

“*Purchaser*” means a person to whom a sale of personal property is made or to whom a service is furnished.

“*Reagent*” means a substance used for various purposes (i.e., in detecting, examining, or measuring other substances, in preparing materials, in developing photographs) because it takes part in one or more chemical reactions or biological processes. A reagent is also a substance used to convert one substance into another by means of the reaction that it causes. To be a reagent for purpose of the exemption, a substance must be primarily used as a reagent.

“*Receive*” and “*receipt*” mean any of the following:

1. Taking possession of tangible personal property.
2. Making first use of a service.
3. Taking possession or making first use of digital goods, whichever comes first.

“Receive” and “receipt” do not include possession by a shipping company on behalf of a purchaser.

“*Registered under the agreement*” means registration by a seller under the central registration system referenced in 2005 Iowa Code section 423.11, subsection 4.

“*Relief agency*” means the state or any county, city and county, city, or district thereof, or any agency engaged in actual relief work.

“*Retailer*” means and includes every person engaged in the business of selling tangible personal property or taxable services at retail or the furnishing of gas, electricity, water, pay television, or communication service, and tickets or admissions to places of amusement and athletic events or operating amusement devices or other forms of commercial amusement from which revenues are derived. However, when in the opinion of the director it is necessary for the efficient administration of these rules to regard any salespersons, representatives, truckers, peddlers, or canvassers as agents of the dealers, distributors, supervisors, employers, or persons under whom the salespersons, representatives, truckers, peddlers, or canvassers operate or from whom they obtain tangible personal property sold by

them irrespective of whether or not they are making sales on their own behalf or on behalf of such dealers, distributors, supervisors, employers, or persons, the director may so regard them, and may regard such dealers, distributors, supervisors, employers, or persons as retailers for the purposes of these rules. "Retailer" includes a seller obligated to collect sales or use tax.

"Retailer maintaining a place of business in this state" or any like term includes any retailer having or maintaining within this state, directly or by a subsidiary, an office, distribution house, sales house, warehouse, or other place of business, or any representative operating within this state under the authority of the retailer or its subsidiary, irrespective of whether that place of business or representative is located here permanently or temporarily, or whether the retailer or subsidiary is admitted to do business within this state pursuant to Iowa Code chapter 490.

"Retailer's price" means the total amount of consideration, including cash, credit, property, and services, valued in money, which a retailer states must be paid before the personal property or services offered by the retailer are sold or furnished, without deduction for one or more of the items mentioned in paragraph "b" of the definition of "sales price."

"Retailers who are not model sellers" means all retailers other than model 1, model 2, or model 3 sellers.

"Retail sale" or *"sale at retail"* means any sale, lease, or rental for any purpose other than resale, sublease, or subrent.

"Sales" or *"sale"* means any transfer, exchange, or barter, conditional or otherwise, in any manner or by any means whatsoever, for consideration.

"Sales price" means the measure subject to sales tax.

a. "Sales price" means the total amount of consideration, including cash, credit, property, and services, for which personal property or services are sold, leased, or rented, valued in money, whether received in money or otherwise, without any deduction for any of the following:

1. The seller's cost of the property sold.
2. The cost of materials used, labor or service cost, interest, losses, all costs of transportation to the seller, all taxes imposed on the seller, and any other expenses of the seller.
3. Charges by the seller for any services necessary to complete the sale, other than delivery and installation charges.
4. Delivery charges.
5. Installation charges.
6. The value of exempt personal property given to the purchaser where taxable and exempt personal property have been bundled together and sold by the seller as a single product or piece of merchandise.
7. Credit for any trade-in authorized by 2005 Iowa Code section 423.3, subsection 58.

b. "Sales price" does not include:

1. Discounts, including cash, term, or coupons that are not reimbursed by a third party that are allowed by a seller and taken by a purchaser on a sale.
2. Interest, financing, and carrying charges from credit extended on the sale of personal property or services, if the amount is separately stated on the invoice, bill of sale, or similar document given to the purchaser.
3. Any taxes legally imposed directly on the consumer that are separately stated on the invoice, bill of sale, or similar document given to the purchaser.
4. The amounts received for charges included in paragraph "a," paragraphs "3" through "7," if they are separately contracted for and separately stated on the invoice, billing, or similar document given to the purchaser and the amounts represent charges which are not the sales price of a taxable sale or of the furnishing of a taxable service.

5. Trade discounts given or allowed by manufacturers, distributors, or wholesalers to retailers or by manufacturers or distributors to wholesalers and payments made by manufacturers, distributors, or wholesalers directly to retailers or by manufacturers or distributors to wholesalers to reduce the sales price of the manufacturer's, distributor's, or wholesaler's product or to promote the sale or recognition

of the manufacturer's, distributor's, or wholesaler's product. This paragraph does not apply to coupons issued by manufacturers, distributors, or wholesalers to consumers.

c. For the purposes of this definition, the sales price from a rental or lease includes rent, royalties, and copyright and license fees.

"Sales tax" means the tax levied under 2005 Iowa Code sections 423.2 to 423.4.

"Seller" means any person making sales, leases, or rentals of personal property or services.

"Services" means all acts or services rendered, furnished, or performed, other than services used in processing of tangible personal property for use in retail sales or services, for an employer who pays the wages of an employee for a valuable consideration by any person engaged in any business or occupation specifically enumerated in 2005 Iowa Code section 423.2. The tax shall be due and collectible when the service is rendered, furnished, or performed for the ultimate user of the service.

"Services used in the processing of tangible personal property" means the reconditioning or repairing of tangible personal property of the type normally sold in the regular course of the retailer's business and which is held for sale.

"Solvent" means a substance in which another substance can be dissolved and which is primarily used for that purpose.

"Sorbent" means a solid material, often in a powder or granular form, which acts to retain another substance, usually on the sorbent's surface, thereby removing the other substance from the gas or liquid phase. The sorbent and the second material bond together at the molecular or atomic scale via physiochemical interactions. A substance is not a sorbent based on an ability to absorb heat or thermal energy.

"State" means any state of the United States and the District of Columbia.

"System" means the central electronic registration system maintained by Iowa and other states which are signatories to the agreement.

"Tangible personal property" means personal property that can be seen, weighed, measured, felt, or touched, or that is in any other manner perceptible to the senses. "Tangible personal property" includes electricity, water, gas, steam, and prewritten computer software.

"Tax" means the tax upon retail sales or use of tangible personal property or taxable services.

"Taxpayer" means any person who is subject to Iowa sales and use tax, whether acting on the person's own behalf or as a fiduciary.

"Trailer" means every trailer, as is now or may be hereafter so defined by Iowa Code chapter 321, which is required to be registered or is subject only to the issuance of a certificate of title under Iowa Code chapter 321.

"Use" means and includes the exercise by any person of any right or power over tangible personal property incident to the ownership of that property. A retailer's or building contractor's sale of manufactured housing for use in this state, whether in the form of tangible personal property or of realty, is a use of that property.

"User" means the immediate recipient of the services who is entitled to exercise a right of power over the product of such services.

"Use tax" means the tax levied under 2005 Iowa Code chapter 423, subchapter III, for which the retailer collects and remits tax to the department.

"Value of services" means the price to the user exclusive of any direct tax imposed by the federal government or under these rules.

"Vehicles subject to registration" means any vehicle subject to registration pursuant to Iowa Code section 321.18.

This rule is intended to implement 2005 Iowa Code Supplement chapter 423.

CHAPTER 212
ELEMENTS INCLUDED IN AND EXCLUDED
FROM A TAXABLE SALE AND SALES PRICE

Rules in this chapter include cross references to provisions in 701—Chapter 26 that were applicable prior to July 1, 2004.

701—212.1(423) Tax not to be included in price. When a retailer prices an article for retail sale and displays or advertises the same to the public with that price marked, the price so marked or advertised shall include only the sales price of such article unless it is stated on the price tag that the price includes tax.

EXAMPLE. The advertised or marked price is \$1. When a sale is made, the purchaser pays or agrees to pay \$1.05, which represents the purchase price plus tax, which, when added, becomes a part of the sale price or charge.

This rule does not prohibit advertising or displaying the sale price plus tax or the price including tax, as shown in the following examples:

“This dress—\$10 plus tax”; “This dress—\$10 plus 50 cents tax”; or “This dress—\$10.50 including tax.”

When a retailer conspicuously advertises in such manner and position so that it may be readily seen and read by the public that the price “includes tax,” the retailer will be allowed to determine sales price by dividing the total of such retailer’s price which includes tax by the applicable percentage. For example, a retailer in a jurisdiction that has the state sales tax plus a 1 percent local option tax would use a factor of 106 percent.

However, where an invoice is given to the purchaser as a part of the sale, either the invoice must show the tax separately from the retailer’s price or it must be stated on each invoice that tax is included in the retailer’s price. If the invoice states “tax included,” the seller may determine sales price by the applicable percent method described above. It shall be the responsibility of the retailer that uses or has used the applicable percent method for reporting to provide proof that the retailer has complied with the method of advertising or displaying the retailer’s price, as described above.

This rule is intended to implement Iowa Code sections 423.14 and 423.24.

701—212.2(423) Finance charge. Interest or other types of additional charges that result from selling on credit or under installment contracts are not subject to sales tax when such charges are separately stated and when such charges are in addition to an established cash sales price. However, if finance charges are not separately stated and a sale is made for a lump sum amount, the tax is due on the total retailer’s price.

When interest and other types of additional charges are added as a condition of a sale in order to obtain title rather than as a charge to obtain credit where title to goods has previously passed, such charges will be subject to tax even though they may be separately stated. *State ex rel. Turner v. Younker Bros., Inc.*, 210 N.W.2d 550 (Iowa 1973); *Road Machinery Supplies of Minneapolis, Inc. v. The Commissioner of Revenue*, Minnesota Tax Court of Appeals, 1977, 2 Minn. CCH State Tax Reporter II 200-835, 1977 WL 963 (Minn. Tax.). See rule 701—213.3(423) relating to conditional sales contracts.

This rule is intended to implement Iowa Code section 423.1(47)“b”(2).

701—212.3(423) Retailers’ discounts, trade discounts, rebates and coupons.

212.3(1) Retailers’ discounts. A retailer’s discount reduces the retailer’s price of a property or service with the remainder being the actual sales price of the goods charged in the account. The purchaser entitled to the discount will never owe the retailer’s price as a debt, the debt being the sales price after the agreed discount has been deducted. The word “discount” means “to buy at a reduction.” *Benner Tea Company v. Iowa State Tax Commission*, 252 Iowa 843, 109 N.W.2d 39 (1961).

Any discount a retailer allows that reduces a retailer’s price to a sales price is a proper deduction when collecting and reporting tax. This is not the case when the retailer offers a discount to a purchaser

but bills and collects tax on the retailer's price rather than on the sales price. The customer must receive the benefit of the discount, for sales tax purposes, in order for the retailer to exclude the discount from the sales price when collecting and reporting tax.

Certain retailers bill their customers on a gross and net basis, with the difference considered to be a discount for payment purposes. When a customer does not resolve the bill within the net payment period, tax shall apply on the gross charge shown on the billing, the gross charge having become the taxable sales price by virtue of the customer's failure to take the action which allows the discount to be taken.

212.3(2) Rebates. A "rebate" is a return of part of an amount paid for a product. Manufacturers' rebates are not discounts and cannot be used to reduce the sales price received from a sale or to reduce the purchase price of a product. This subrule applies even though the rebate is used by the retailer to reduce the retailer's price to a sales price or is used by the purchaser as a down payment. The rebate is considered a transaction between the manufacturer and the purchaser. See 1972 O.A.G. 332.

212.3(3) Coupons. Coupons issued by the producer of a product are not discounts and cannot be used as an abatement from the retailer's price of the product. Coupons issued by the retailer which actually reduce the price of the product to the purchaser are treated as a discount as provided in subrule 212.3(1). *Saxon-Western Corporation v. Mahin*, 369 N.E.2d 1185 (Ill. 1979).

EXAMPLE 1. C acquires a 30¢ off coupon issued by manufacturer of A-B Band-aids for A-B Band-aids. The coupon can be redeemed at a store which sells the product. C goes to store D and purchases a box of A-B Band-aids which shows a price of \$1.50. C pays \$1.20 plus the 30¢ coupon. D is reimbursed the 30¢ for the coupon by the manufacturer. Tax is due on the \$1.50 because D's total sales price is \$1.50. The coupon is not used as a discount in this situation.

EXAMPLE 2. E offers a two-for-the-price-of-one coupon for its super hamburger. Each hamburger normally sells for \$2. The coupon can only be redeemed at E's retail store. F acquires the coupon and redeems it at E's store. The purchase price for F was \$2 for both hamburgers. The tax is due on the \$2 because this amount is the sales price for E, even though the value of the two hamburgers would normally be \$4. In this situation, the sales price for the two hamburgers is \$2.

212.3(4) Trade discounts. A "trade discount" is a discount from a seller's list price which is offered to a class or category of customer, e.g., retailers or wholesalers. Trade discounts given or allowed by manufacturers, distributors, or wholesalers to retailers or by manufacturers or distributors to wholesalers and payments made by manufacturers, distributors, or wholesalers directly to retailers or by manufacturers or distributors to wholesalers to reduce the sales price of a manufacturer's, distributor's, or wholesaler's product (e.g., cigarettes) or to promote the sale or recognition of the manufacturer's, distributor's, or wholesaler's product are not to be included in any taxable sales price. This subrule does not apply to coupons issued by manufacturers, distributors, or wholesalers to consumers; see subrule 212.3(3).

This rule is intended to implement Iowa Code section 423.1(47) "b"(1).

701—212.4(423) Excise tax included in and excluded from sales price.

212.4(1) An excise tax which is not an Iowa sales or use tax may be excluded from the sales price or purchase price of the sale or use of property or taxable services only if all of the following conditions exist:

a. The excise tax is imposed upon the identical sales price on which the Iowa sales tax is imposed or upon the purchase price which measures the amount of taxable use or upon a use identical to the Iowa taxable use and not upon some event or activity which precedes or occurs after the sale or use.

b. The legal incidence of the excise tax falls upon the purchaser who is also responsible for payment of the Iowa sales tax. The purchaser must be obligated to pay the excise tax either directly to the government in question or to another person (e.g., the retailer) who acts as a collector of the tax. See *Gurley v. Rhoden*, 421 U.S. 200, 95 S. Ct. 1605, 44 L.Ed.2d 110 (1975) for a description of the circumstances under which the legal, as opposed to the economic, burden of an excise tax falls upon the purchaser.

c. The name of the excise tax is specifically stated, and the amount of the excise tax is separately set out on the invoice, bill of sale, or another document which embodies a record of the sale.

EXAMPLE 1. The federal government imposes an excise tax upon the act of manufacturing tangible personal property within the United States. The amount of the tax is measured as a percentage of the price for the first sale of the property, which is usually to a wholesaler. However, one particular manufacturer sells its manufactured goods at retail in Iowa. Even if this tax meets the requirements for exclusion of paragraphs “*b*” and “*c*” above, it is not excludable because it does not meet the requirements of paragraph “*a*.” The tax is not imposed upon the act of selling but upon the prior act of manufacturing. The tax is merely measured by the amount of the proceeds of the sale.

EXAMPLE 2. The federal government imposes an excise tax of 4 percent on a retailer’s sales price from sales of tangible personal property. The law allows the retailer to separately identify and bill a customer for the tax. However, if a retailer fails to pay the tax, the government cannot collect it from a purchaser, and if the government assesses tax against the retailer and secures a judgment requiring the retailer to pay the tax, the retailer that has failed to collect the tax from a purchaser on the initial sale has no right of reimbursement from the purchaser. This tax is not excludable from Iowa excise tax. Its economic burden falls upon the purchaser. However, since neither the government nor the retailer has any legal right to demand payment of the tax from a purchaser, the legal incidence of the tax is not upon the purchaser; and the tax would not meet the requirements of paragraph “*b*” above.

212.4(2) The following federal excise taxes are to be included in the sales price upon which Iowa sales tax is to be paid for purposes of collecting Iowa sales tax:

a. The federal gallonage taxes imposed by 26 U.S.C. Sections 5001, 5041, and 5051 on distilled spirits, wines, and beer.

b. The tax imposed by 26 U.S.C. Section 5701 with regard to cigars, cigarettes, cigarette papers and tubes, smokeless tobacco, and pipe tobacco.

c. The federal tax imposed under 26 U.S.C. Section 4081 on gasoline.

d. The federal tax imposed by 26 U.S.C. Section 4071 which expires October 1, 2005, on tires.

212.4(3) The following excise taxes are excluded from the amount of the sales price:

a. The federal tax imposed by 26 U.S.C. Section 4251(a) on the communication services of local telephone service, toll telephone service, and teletypewriter exchange service.

b. The federal tax imposed by 26 U.S.C. Section 4051 upon the first retail sale of automobile and truck chassis and bodies; truck trailer and semitrailer chassis and bodies and tractors of the kind chiefly used for highway transportation in combination with trailers or semitrailers.

This rule is intended to implement Iowa Code section 423.1(47)“*b*”(3).

701—212.5(423) Trade-ins.

212.5(1) Trade-ins. When tangible personal property is traded toward the purchase price of other tangible personal property, the sales price shall be only that portion of the purchase price which is payable in money to the retailer if the following conditions are met:

a. The tangible personal property is traded to a retailer, and the property traded is the type normally sold in the regular course of the retailer’s business; and

b. The tangible personal property traded to a retailer is intended by the retailer to be ultimately sold at retail; or

c. The tangible personal property traded to a retailer is intended to be used by the retailer or another in the remanufacturing of a like item.

EXAMPLE 1. A owns a car valued at \$5,000. A trades his used car to XY car dealer for a used car valued at \$12,000. XY car dealer normally sells used cars. Use tax would be due on the \$7,000 in money which A paid to XY car dealer, as both conditions “*a*” and “*b*” have been met.

EXAMPLE 2. John Doe has a pickup truck with a value of \$2,000. John wants a boat, so he offers to trade his \$2,000 pickup to ABC boat dealer for the purchase of a boat valued at \$5,000. ABC boat dealer is a new and used boat dealer. ABC boat dealer agrees to accept the \$2,000 pickup and \$3,000 cash in trade for the boat. In this example, the tax would be computed on \$5,000. The trade-in provision

would not apply because condition “a” has not been met. The property traded is not the type of property normally sold by ABC boat dealer in the regular course of the boat dealer’s business.

EXAMPLE 3. ABC Corporation trades 500 bushels of corn and \$500 cash to the local cooperative elevator for the purchase of various hand tools. In its regular course of business, the local cooperative elevator sells grain for processing into bread. The trade-in provision in this example would not apply because condition “b” has not been met. When ultimately sold by the cooperative elevator, the grain traded toward the purchase price of the hand tools is sold for processing and not at retail.

EXAMPLE 4. Hometown Appliance store is in the business of selling stoves, refrigerators, and other various appliances in Iowa. Hometown Appliance has a refrigerator valued at \$650. Customer A wishes to trade a used refrigerator toward the purchase price of the new refrigerator. Hometown Appliance agrees to accept A’s used refrigerator at a value of \$150 toward the purchase price of the new refrigerator. A pays Hometown Appliance \$500 in cash. The trade-in provision applies as both conditions “a” and “b” have been met, and tax would be due on the \$500.

Several months later, Hometown Appliance sells the used refrigerator it received from customer A to the local school district, which is exempt from sales tax on its purchase. The trade-in provision on the original transaction is still applicable because both conditions “a” and “b” were met. The sale is “at retail,” even if the sales price is exempt from tax.

EXAMPLE 5. ABC Auto Supply is in the business of selling various types of automobile and farm implement supplies. The normal selling price for a car generator is \$80. ABC Auto Supply allows a \$20 trade-in credit to any customer who wishes to trade in an unworkable generator. At the time ABC Auto Supply accepts the unusable generator, it knows that the generator will not be sold at retail; however, ABC Auto Supply also knows that the generator will be sold to XYZ Company, which is in the business of rebuilding generators by using existing parts plus new parts. In this example, the trade-in provision would apply since conditions “a” and “c” have been met.

212.5(2) All the provisions of subrule 212.5(1) apply to the trade-in of vehicles subject to registration when the trade involves retailers of vehicles.

When vehicles subject to registration are traded among persons who are not retailers of vehicles subject to registration, the conditions set forth in 212.5(1) need not be met. The purchase price is only that portion of the purchase price represented by the difference between the total purchase price of the vehicle subject to registration acquired and the value of the vehicle subject to registration traded.

This rule applies only when a vehicle is traded for tangible personal property, regardless of whether the transaction is between a retailer and a nonretailer or between two nonretailers. The vehicle traded in must be owned by the person(s) trading in the vehicle. It is presumed that the name or names indicated on the title of the vehicle dictate ownership of the vehicle as set forth in Iowa Code chapter 321.

EXAMPLE 1. John Doe has an automobile with a value of \$2,000. John and his neighbor Bill Jones, who has an automobile valued at \$3,500, decide to trade automobiles. John pays Bill \$1,500 cash. Vehicles subject to registration are subject to use tax, which is payable to the county treasurer at the time of registration. In this example, John would owe use tax on \$1,500 since this is the amount John paid Bill and tax is only due on the cash difference. Bill would not owe any use tax on the vehicle acquired through the trade.

EXAMPLE 2. Joe has a Ford automobile with a value of \$5,000. Joe and his friend Jim, who has a Chevrolet automobile also valued at \$5,000, decide to trade automobiles. Joe and Jim make an even trade, automobile for automobile, with no money changing hands. In this example, there is no tax due on either automobile because there is no exchange of money.

212.5(3) Trade for services. The trade-in provisions referenced in Iowa Code section 423.1(47) “a”(7) and found in Iowa Code section 423.3(59) do not apply to taxable enumerated services. When taxable enumerated services are traded, the sales price would be determined based on the value of the service or other consideration.

EXAMPLE. A and B agree that A will purchase a car which B now owns. The two parties agree on a purchase price of \$9,000. In return for transfer of title from B, A agrees to pay B \$7,000 in cash and to paint B’s house with paint provided by B. A and B agree that the value of B’s house painting services is \$2,000. House painting is a taxable enumerated service; reference rule 701—26.34(422). Since the

trade-in provisions are not applicable to the value of taxable enumerated services, the purchase price of the car is \$9,000 and not \$7,000.

212.5(4) Three-way trade-in transactions. In a three-way transaction, the agreement provides that a lessee sell to a third-party dealer a vehicle (or other tangible personal property) which the lessee owns. The lessor then purchases another vehicle from the third-party dealer at a reduced price and leases the vehicle to the lessee. The difference between the reduced sale price and retail price of the vehicle is not allowed as a trade-in on the vehicle for use tax purposes.

EXAMPLE. A enters into a three-way agreement with B, the lessor. Under the terms of the contract, A sells a 2005 Ford Taurus owned by A to C, a used car dealer. The retail price for the Ford Taurus is \$30,000. C then sells the Ford Taurus to B for the reduced price of \$25,000. B then leases the Ford Taurus to A for a period of 12 months. The \$5,000 difference between the reduced sale price and the retail price of the vehicle is not allowed as a trade-in on the sale of the vehicle for use tax purposes. See also *Reynolds Motor Co. et al. v. Iowa Dep't. of Revenue*, Equity 72050, Dist. Ct. of Scott Cty., Iowa, August 28, 1987.

This rule is intended to implement Iowa Code sections 423.1(47) "a"(7) and 423.3(59).

701—212.6(423) Installation charges when tangible personal property is sold at retail. When the sale of tangible personal property includes a charge for installation of the personal property sold, the current rate of tax shall be measured on the entire sales price from the sale. The installation charges would not be taxable if the installation service is not an enumerated service, and where a sales agreement exists, the installation charges are separately contracted. If the written contract contains no provisions separately itemizing such charges, tax is due on the full contract price with no deduction for installation charges, whether or not such installation charges are itemized separately on the invoice.

If the installation services are enumerated services, the installation charges would not be taxable if (1) the services are exempt from tax (e.g., the services are performed on or connected with new construction, reconstruction, alteration, expansion or remodeling of a building or structure); or the services are rendered in connection with the installation of new industrial machinery or equipment, and (2) where a sales agreement exists, the installation charges are separately contracted. If the written contract contains no provisions separately itemizing such charges, tax is due on the full contract price with no deduction for installation charges, whether or not such installation charges are itemized separately on the invoice. If no written contract exists, the installation charges must be separately itemized on the invoice to be exempt from tax. See rule 701—219.13(423).

This rule is intended to implement Iowa Code sections 423.1(47) "a"(5) and 423.1(47) "b"(4).

701—212.7(423) Service charge and gratuity. When the purchase of any food, beverage or meal automatically and invariably results in the inclusion of a mandatory service charge to the total price for such food, beverage or meal, the amounts so included shall be subject to tax. The term "service charge" means either a fixed percentage of the total price of or a charge for food, a beverage or a meal.

The mandatory service charge shall be considered: (1) a required part of a transaction arising from a taxable sale and a contractual obligation of a purchaser to pay to a vendor a charge arising directly from and as a condition of the making of the sale and (2) a fixed labor cost included in the price for food, a beverage or a meal even though such charge is separately stated from the charge for the food, beverage or meal.

When a gratuity is voluntarily given for food, a beverage or a meal, it shall be considered a tip and not subject to tax. *Cohen v. Playboy Club International, Inc.*, 19 Ill. App. 3d 215, 311 N.E.2d 336; *Baltimore Country Club, Inc. v. Comptroller of Treasury*, 272 Md. 65, 321 A.2d 308.

This rule is intended to implement Iowa Code sections 423.1(47) and 423.2(1).

701—212.8(423) Payment from a third party. The sales price from the sales of tangible personal property, services, or enumerated services includes consideration received by the seller from third parties. The following conditions shall apply:

212.8(1) The seller actually receives consideration from a party other than the purchaser, and the consideration is directly related to a price reduction or discount on the sale;

212.8(2) The seller has an obligation to pass the price reduction or discount through to the purchaser;

212.8(3) The amount of the consideration attributable to the sale is fixed and determinable by the seller at the time of the sale of the item to the purchaser; and

212.8(4) One of the following criteria is met:

a. The purchaser presents a coupon, certificate or other documentation to the seller to claim a price reduction or discount where the coupon, certificate or documentation is authorized, distributed or granted by a third party with the understanding that the third party will reimburse any seller to whom the coupon, certificate or documentation is presented;

b. The purchaser identifies himself or herself to the seller as a member of a group or organization entitled to a price reduction or discount (a “preferred customer” card that is available to any patron does not constitute membership in such a group); or

c. The price reduction or discount is identified as a third-party price reduction or discount on the invoice received by the purchaser or on a coupon, certificate or other documentation presented by the purchaser.

This rule is intended to implement Iowa Code chapter 423.

CHAPTER 213
MISCELLANEOUS TAXABLE SALES

Rules in this chapter include cross references to provisions in 701—Chapters 15 and 18 that were applicable prior to July 1, 2004.

701—213.1(423) Tax imposed. The Iowa state retail sales tax is imposed at the rate of 5 percent of the sales price from the sale at retail of tangible personal property and certain enumerated services. The rules in this chapter deal with certain specific attributes of the Iowa state retail sales tax, but such rules are by no means exclusive in explaining what are taxable sales and are not exclusive in explaining which transactions constitute taxable sales. There are other transactions which constitute taxable sales under the law and which are not specifically dealt with in these rules.

This rule is intended to implement Iowa Code section 423.2.

701—213.2(423) Athletic events. The sales price from the sale of tickets or admissions to athletic events occurring in the state of Iowa and sponsored by educational institutions, without regard to the use of the proceeds from such sales, shall be subject to tax, except when the events are sponsored by elementary and secondary educational institutions.

This rule is intended to implement Iowa Code section 423.2(3).

701—213.3(423) Conditional sales contracts. Iowa Code section 423.1(46) defines sales to include “conditional sales.” A conditional sale is a sale in which the vendee receives the right to the use of the goods which are the subject matter of the sale, but the transfer of title to the vendee is dependent on the performance of some condition by the vendee, usually the full payment of the purchase price.

Conditional sales in most cases are evidenced by the facts supporting the nature of the vendor’s business, the intent of the parties, and the facts supporting the control over the tangible personal property by the vendee. A conditional sales contract would exist where: the vendee/lessee has total control over the property and is responsible for all losses or damages; the transfer of the property is complete except for title, which passes upon the condition of full payment; and where such full payment is performed under nearly all the vendor’s “lease” agreements, except in cases of default; and the vendor has no intent of retaining control over the property except for purposes of selling it or financing it for sale. In determining whether an agreement constitutes a conditional sale or a true lease, substance shall prevail over form, and the terminology of the written agreement will be considered only to the extent that it accurately represents the true relationship of the parties.

When a conditional sale exists, the seller shall bill the purchaser for the full amount of tax due, and sales tax is due on the full contract price upon delivery of the property which is the subject of the contract. *Harold D. Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985). No further tax is due on the periodic payments. Interest and finance charges shall not be considered part of the sales price if they are separately stated and reasonable in amount and are, therefore, not subject to tax. *State ex rel. Turner v. Younker Bros., Inc.*, 210 N.W.2d 550, 562 (Iowa 1973).

This rule is intended to implement Iowa Code sections 423.1(46) and 423.2(1).

701—213.4(423) The sales price of sales of butane, propane and other like gases in cylinder drums, etc. Sales of butane, propane and other like gases in cylinder drums and other similar containers purchased for cooking, heating and other purposes shall be taxable. However, see rule 701—231.16(423), which provides for a phase-out of and eventual complete exemption from tax for propane and other gases sold for use in residential heating.

When gas of this type is sold and motor vehicle fuel tax is collected by the seller, sales or use tax shall not be due. If Iowa motor vehicle fuel tax is not collected by the seller at the time of the sale, sales or use tax shall be collected and remitted to the department, unless the sale is specifically exempt.

If tax is not collected by the seller at the time of sale, any tax due shall be collected by the department at the time the user of the product makes application for a refund of the motor vehicle fuel tax.

The sales price from the rental of cylinders, drums and other similar containers by the distributor or dealer of the gas shall be subject to tax when the title remains with the dealer. The sales price of gas converter equipment which might be sold to an ultimate consumer shall be subject to tax.

This rule is intended to implement Iowa Code sections 423.1(46) and 423.2(1).

701—213.5(423) Antiques, curios, old coins, collector's postage stamps, and currency exchanged for greater than face value. Curios, antiques, art work, coins, collector's postage stamps and such articles sold to or by art collectors, philatelists, numismatists and other persons who purchase or sell such items of tangible personal property for use and not primarily for resale are sales at retail, and their sales price shall be subject to tax.

213.5(1) The sales price of stamps, whether canceled or uncanceled, which are sold by a collector or person engaged in retailing stamps to collectors shall be taxable.

213.5(2) The distinction between stamps which are purchased by a collector and stamps which are purchased for their value as evidence of the privilege of the owner to have certain mail carried by the United States government is that which determines whether or not the sales price of a stamp is taxable or not taxable. A stamp becomes an article of tangible personal property having market value when, because of the demand, it can be sold for a price greater than its face value. On the other hand, when a stamp has only face value, as evidence of the right to certain services or an indication that certain revenue has been paid, its sales price shall not be subject to either sales or use tax.

213.5(3) The sales price from any exchange, transfer, or barter of merchandise for a consideration paid in gold, silver, or other coins or currency shall be subject to tax to the extent of the agreed-upon value of the coins or currency so exchanged. This agreed-upon value constitutes the sales price or purchase price subject to tax. Currency or coins become articles of tangible personal property having a value greater than face value when the currency or coins are exchanged for a price greater than face value. However, when a coin or other currency, in the course of circulation, is exchanged at its face value, the sales price of the sale shall be subject to tax for the face value alone. *Losana Corp. v. Porterfield*, 14 Ohio St.2d 42, 236 N.E.2d 535 (1968).

EXAMPLE 1. Taxpayer operates a furniture store. The taxpayer offers to exchange furniture for silver coins at ten times the face value of any coins dated prior to January 1, 1965. Upon any exchange pursuant to the offer, the value of the coins for purposes of determining the tax on the exchange will be equivalent to the value as agreed upon by the parties, without regard to the face value of the coins.

EXAMPLE 2. Taxpayer operates a hardware store. In the regular course of business, the taxpayer receives silver coins dated prior to January 1, 1965. Taxpayer has received the coins at face value for the sales price and only that value is subject to tax. Also see Attorney General Opinion Griger to Bair, Director of Revenue, May 15, 1980, #80-5-13.

This rule is intended to implement Iowa Code sections 423.1(47), 423.2(1) and 423.5.

701—213.6(423) Communication services furnished by hotel to its guests. As a common practice, hotels in the state of Iowa purchase telephone communication services from telephone companies and furnish those services to the guests of the hotel. The hotel makes a charge for this communication service to its guests in an amount which exceeds the cost of such service to it from the telephone company. Tax shall apply to the entire charge which the hotel makes to its guests for such communication service, regardless of whether a guest's calls are local or long-distance within the state. However, the hotel would purchase any communication service which it furnishes for a charge to a guest exempt from tax as a service purchased for subsequent resale.

This rule is intended to implement Iowa Code section 423.2(2).

701—213.7(423) Consignment sales. When a retailer receives tangible personal property on consignment from others and the consigned merchandise is sold in the ordinary course of business with other merchandise owned or services performed by the retailer, the retailer or consignee shall be making sales at retail. In these cases, the consignee shall file a return and remit tax to the department along with the returns and remittances of tax on the sales price from the sale of other merchandise.

The sales price of sales of tangible personal property by an agent or consignee for another person shall be exempt if the sales meet the requirements of a casual sale or any other exemptions.

This rule is intended to implement Iowa Code section 423.2(1).

701—213.8(423) Electrotypes, types, zinc etchings, halftones, stereotypes, color process plates, wood mounts and art productions. The sales price of electrotypes, types, zinc etchings, halftones, stereotypes, color process plates, wood mounts and art productions shall be subject to tax when sold to users or consumers. Reference rule 701—18.33(422,423) for sales to printers. The listed articles do not become an integral or component part of merchandise intended to be sold ultimately at retail. *Long v. Roberts & Son*, 234 Ala. 570 176 So. 213 (1937); *People ex rel. Walker Engraving Corporation v. Groves*, 268 N.Y. 648, 193 N.E. 539 (1935).

This rule is intended to implement Iowa Code sections 423.2(1) and 423.3(51).

701—213.9(423) Explosives used in mines, quarries and elsewhere. A person engaged in the business of selling explosives to miners, quarries or others shall be subject to sales tax on the sales price from the sale of such property at retail in Iowa. The purchaser shall be liable for use tax upon all purchases for use in Iowa not subject to sales tax. *Linwood Stone Products Company v. State Department of Revenue, Iowa*, 175 N.W.2d 393 (1970).

This rule is intended to implement Iowa Code sections 423.2(1) and 423.5(1).

701—213.10(423) Sales on layaway. The sales price from sales on layaway is subject to tax. A layaway sale involves two separate and distinct contracts. Under the first contract, the customer and the retailer enter into an agreement to give the customer an option to purchase a certain item of tangible personal property. Under the second contract, the sale of property takes place. During the period of the option to purchase, the item is placed aside “on layaway” and is not available for sale to the general public. This option to purchase is exercised by the customer’s making one or more “layaway payments.” The customer exercises the option to buy by completing the layaway payments. The last layaway payment is also the tendered payment under the separate contract for sale of the property. The contract for sale is complete when the seller delivers the property to the buyer. See *Holland v. Brown*, 15 Utah 2d 422, 394 P.2d 77 (1964) and *Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985). Tax must be reported during the period (e.g., the quarter or month) in which delivery under the contract for sale portion of the layaway occurs. This will nearly always be the reporting period in which physical transfer of possession passes from the retailer to the buyer.

A sale on layaway should not be confused with a “conditional sale.” The differences are these: (1) In a conditional sale, physical transfer of property occurs before, rather than after, the buyer makes all periodic payments necessary to purchase the property; and (2) in a conditional sale, physical possession of and title to the property pass to the buyer at different times. In a conditional sales situation, physical possession passes first; then after all periodic payments are made, title (ownership) passes to the buyer. In a layaway sale, both possession and title pass at the same time after all payments are made. The conditional sale is a much more common commercial arrangement than the sale on layaway.

This rule is intended to implement Iowa Code sections 423.1(46) and 423.2(1).

701—213.11(423) Memorial stones. Persons engaged in the business of selling memorial stones are selling tangible personal property, the sales price of which shall be subject to tax. When the seller of a memorial stone agrees to erect a stone upon a foundation, the total sales price from such sale shall be taxable. Any separately itemized charge for engraving is part of the taxable sales price of a memorial stone.

The sales price of any designs, lettering or engraving performed on a memorial stone or monument is also subject to tax. See *In Re Des Moines-Winterset Monuments, Inc.*, Docket No. 79-228-6A-DR, March 13, 1980.

This rule is intended to implement Iowa Code section 423.2(1).

701—213.12(423) Creditors and trustees. Pursuant to the provisions of any piece of chattel paper or any other document evidencing a creditor's interest in tangible personal property, the sales price from the sale of tangible personal property at a public auction shall be taxable even if the sale is made by virtue of a court decree of foreclosure by an officer appointed by the court for that purpose.

The tax applies to the sales price of inventory and noninventory goods, provided the owner is in the business of making retail sales of tangible personal property or taxable services. *In Re Hubs Repair Shop, Inc.*, 28 B.R. 858 (Bkrtcy. 1983).

This rule is intended to implement Iowa Code sections 423.2(1) and 423.5(1).

701—213.13(423) Sale of pets. A retailer selling pets shall procure a permit and report tax on the sales price from the sale of such pets.

This rule is intended to implement Iowa Code sections 423.1(54) and 423.2(1).

701—213.14(423) Redemption of meal tickets, coupon books and merchandise cards as a taxable sale. When meal tickets, coupon books, or merchandise cards are sold by persons engaged exclusively in selling taxable commodities or services, tax shall be levied at the time such items are redeemed by the customer. Tax shall not be added at the time of actual purchase of the meal ticket, coupon book, or merchandise card. When a retailer sells gift certificates, tax shall be added at the time the gift certificate is redeemed.

This rule is intended to implement Iowa Code sections 423.1 and 423.2.

701—213.15(423) Rental of personal property in connection with the operation of amusements. The sales price from rental of tangible personal property in connection with the operation of amusements shall be taxable. Such rentals shall include all tangible personal property or equipment used by patrons in connection with the operation of commercial amusements, notwithstanding the fact that the rental of such personal property may be billed separately.

This rule is intended to implement Iowa Code section 423.2(1).

701—213.16(423) Repossessed goods. When tangible personal property which has been repossessed either by the original seller or by a finance company is resold to final users or consumers, the sales price from those sales is subject to tax.

A retailer repossessing previously sold merchandise shall be entitled to claim a credit on tax paid for bad debts in the same fashion as any other retailer that has paid tax to the department upon a sales price which ultimately constitutes a bad debt. Reference rule 701—15.4(422,423) for a description of the circumstances under which bad debts are and are not allowed as a credit on tax paid.

This rule is intended to implement Iowa Code sections 423.2(1) and 423.5(1).

701—213.17(423) Sales of signs at retail. A person engaged in selling illuminated signs, bulletins, or other stationary signs (whether manufactured by that person or by others) to users or consumers is selling tangible personal property at retail. The sales price shall be taxable, even when the sales price of the sign includes a charge for maintenance or repair service in addition to the charge for the sign.

This rule is intended to implement Iowa Code sections 423.2(1) and 423.5(1).

701—213.18(423) Tangible personal property made to order. When a retailer contracts to fabricate items of tangible personal property from materials available in stock or through placing orders for materials which have been selected by customers, all expenses and profits from the sale of such fabricated articles shall be included in the sales price. The retailer shall not deduct fabrication or production charges, even though such charges are separately billed.

This rule is intended to implement Iowa Code sections 423.2(1) and 423.5(1).

701—213.19(423) Used or secondhand tangible personal property. The sales price on the sale of used or secondhand tangible personal property in the form of goods, wares, or merchandise shall be

taxable in the same manner as new property. This condition eliminates any consideration for secondhand merchandise to be treated differently than new merchandise when sold at retail for sales tax purposes.

This rule is intended to implement Iowa Code sections 423.2(1) and 423.5(1).

701—213.20(423) Carpeting and other floor coverings. The sale of carpeting and other floor coverings to any person constitutes a sale at retail of tangible personal property, and the sales price of these sales is subject to sales or use tax unless the carpeting and other floor coverings are purchased for resale or are otherwise exempt from tax.

The sales price of floor coverings other than carpeting which are shaped to fit a particular room or area and which are attached to the supporting floor with cement, tacks, or by some other method making a permanent attachment with the building or structure are considered to be building materials and shall be taxable in the same manner as building materials which are used or consumed in the performance of a construction contract. See rule 701—219.2(423) and 701—subrule 219.3(3) for tax treatment.

The sale of carpeting is not to be treated as the sale of a “building material.” The sales price of rugs, mats, linoleum, and other types of floor coverings which are not attached but which are simply laid on finished floors and are not considered building materials is subject to tax unless the floor coverings are purchased for resale or are otherwise exempt from tax.

The sale of “carpeting” to owners, contractors, subcontractors or builders is not the sale of a building material, but the sale of ordinary tangible personal property, which can be purchased for resale by owners, contractors, subcontractors or builders. “Carpeting” is any floor covering made of fabric, usually of wool or synthetic fibers. For purposes of this rule, “carpeting” also includes any pads, tack strips, adhesive, and other materials other than subflooring necessary for installation of the carpeting. Sellers of carpeting should charge purchasers sales tax unless the carpeting is purchased for resale or some other exempt purpose, in which case the purchaser must provide the seller with an exemption certificate upon demand.

The sales price of carpeting, with installation, is taxable in the following manner:

1. If separate contracts exist for the sale of the carpeting and for the installation, only the sales price of the carpeting is subject to tax.
2. If the selling price of the carpeting and the installation charge are stated as one charge or lump sum, the entire charge is subject to sales tax.
3. If the invoice itemizes the installation charge separately from the selling price of the carpet, only the selling price of the carpet is subject to sales tax if the installer and the purchaser of the carpet intend that a sale of the carpet shall occur. See 701—subrule 225.4(1) for more information.

In the following examples, assume that contractor A purchases carpeting from supplier B for installation in customer C’s home. Whether or not A will purchase the carpeting from B for A’s own consumption (and thus, A will pay the tax to B) or A will purchase the property from B for resale to C (and thus, C will pay the tax to A) depends upon any contracts existing between A (the contractor) and C (the customer).

EXAMPLE A. A contracts with C to install carpeting in C’s home. Separate contracts exist between A and C for the sale of the carpeting and for its installation. Under these circumstances, A purchases the carpeting from B for resale to C. No tax is due upon the sales price of the transaction between A and B; tax is due upon A’s resale of the carpet to C, but not upon A’s charges for carpet installation, a nontaxable service.

EXAMPLE B. A charges C one lump sum for the carpeting and installation. In this case, A collects sales tax from C on the entire lump sum. The lump sum is treated, for sales tax purposes, as the sales price from the sale of tangible personal property; so A purchases the carpet from B for resale and without tax.

EXAMPLE C. A and C contract for the sale of the carpet separate from its installation. A sends C one invoice for the installation and sale of the carpet with the installation charge listed on the invoice separately from the selling price of the carpet. Under these circumstances, only the selling price of the carpet listed on the invoice is subject to sales tax and A purchases the carpet from B for resale and thus, without obligation to pay sales tax to B.

This rule is intended to implement Iowa Code section 423.2(1) “b.”

701—213.21(423) Goods damaged in transit. If goods shipped by a retailer have been delivered under a contract for sale to a consumer, and thereafter the goods are damaged in the course of transit to the consumer, the retailer and purchaser shall be liable for tax upon the full sale price of the goods, as the sale to the consumer has been completed. *Harold D. Sturtz v. Iowa Department of Revenue*, 373 N.W.2d 131 (Iowa 1985).

If the goods have not been delivered to the consumer, the sale to the consumer has not been completed, and the retailer shall not be taxed for the amount agreed to be paid by the consumer.

EXAMPLE. A company in Chicago transports furniture in its own truck to customer B in Des Moines. Under the contract of sale, delivery of the furniture would occur in Des Moines and sales tax would ordinarily be due upon the sales price of the sale. However, in East Moline, Illinois, the furniture truck is involved in an accident, and B's furniture is destroyed. There was no delivery of the furniture to B, thus no sale to B and thus no sales tax is due. Had the point of delivery been Chicago, Illinois, a sale would have occurred outside this state, but no use tax would be due because B never made any "use" of the furniture in Iowa.

This rule is intended to implement Iowa Code section 423.2.

701—213.22(423) Snowmobiles, motorboats, and certain other vehicles. The sales price of snowmobiles, all-terrain vehicles, dirt bikes, race karts or go-carts, and motorboats shall be subject to tax when purchased and shall not be classified as vehicles subject to registration.

This rule is intended to implement Iowa Code chapter 423.

701—213.23(423) Photographers and photostaters. Tax shall apply to the sales price of photographs and photostat copies, whether or not produced to the special order of the customer, and to charges for the making of photographs or photostat copies out of materials furnished by the customer. A deduction shall not be allowed for the expenses incurred by the photographer, such as rental of equipment or salaries or wages paid to assistants or models, whether or not the expenses are itemized in billings to customers.

Tax shall not apply to the sales price of tangible personal property to photographers and photostat producers which becomes an ingredient or component part of photographs or photostat copies sold, such as mounts, frames and sensitized paper; but tax shall apply to the sales price of materials to photographers or producers which is used in the processing of photographs or photostat copies.

The sales price of photographs by a person engaged in the business of making and selling photographs to newspaper or magazine publishers for reproduction shall be taxable.

This rule is intended to implement Iowa Code sections 423.2 and 423.5.

701—213.24(423) Sale, transfer or exchange of tangible personal property or taxable enumerated services between affiliated corporations.

213.24(1) In general. The sales price of the sale, transfer or exchange of tangible personal property or taxable services among affiliated corporations, including but not limited to a parent corporation to a subsidiary corporation, for a consideration is subject to tax. A bookkeeping entry for an "account payable" qualifies as consideration as well as the actual exchange of money or its equivalent. The sales price of transactions between affiliated corporations may not be subject to tax where it can be shown that the affiliated corporations are operating as a unit within the meaning of Iowa Code sections 423.1(32) and 423.1(46).

213.24(2) Affiliated corporations acting as a unit. If an affiliated corporation acts as an agent for another affiliated corporation in a transaction listed in 213.24(1), the corporations may be considered as acting as a unit. There may not be taxable transactions between the affiliates, but this does not create an exemption for the purchase of tangible personal property or taxable services.

EXAMPLE. Corporation A and Corporation B are affiliated corporations. Corporation A is in the business of negotiation, arbitration, and mediation. Corporation B runs a fleet of taxis. Corporation A acts as Corporation B's agent in negotiating a contract between B and an outside third party C for C to do all of B's vehicle repair at a very favorable price. In spite of a bookkeeping entry listing a sale of the contract for repair from A to B, in securing the contract, the corporations have "acted as a unit," and

the “sale” from A to B is not subject to Iowa tax. However, any payments from A to C or from B to C in return for C’s performance of taxable vehicle repair would be subject to tax, and C must collect Iowa sales tax on the sales price of those services.

This rule should not be equated with the unitary business concept used in corporation income tax law.

This rule is intended to implement Iowa Code sections 423.1(32) and 423.1(46).

701—213.25(423) Urban transit systems. A privately owned urban transit system which is not an instrumentality of federal, state or county government is subject to sales tax on fuel purchases which are within the urban transit system’s charter.

Tax shall not apply to the sales price of fuel purchases made by a privately owned urban transit company for use outside the urban transit system charter in which a fuel tax has been imposed and paid and no refund has been or will be allowed.

Whether an urban transit company will be considered an instrumentality of federal, state or county government for the purpose of receiving sales tax exemption on its fuel purchases, which are also exempted from fuel tax and used for public purposes, depends upon consideration of the following:

1. Whether the urban transit system is created by government.
2. Whether the urban transit system is wholly owned by government.
3. Whether the urban transit system is operated for profit.
4. Whether the urban transit system is primarily engaged in the performance of some essential governmental function.
5. Whether the payment of tax will impose an economic burden upon the corporation, or whether payment of tax serves to materially impair the usefulness or efficiency of the corporation or the payment of tax materially restricts the corporation in the performance of its duties.

The considerations enumerated above are not all-inclusive, and the presence of some considerations and absence of others does not necessarily establish the exemption. *Unemployment compensation of North Carolina v. Wachovia Bank and Trust Company*, 2 S.E.2d 592, 595, 215 No. Car. 491 (1939); 1976 O.A.G. 823, 827, 828.

This rule is intended to implement Iowa Code sections 423.3(1) and 423.3(31).

[Filed 11/16/05, Notice 10/12/05—published 12/7/05, effective 1/11/06]

CHAPTER 214
MISCELLANEOUS NONTAXABLE TRANSACTIONS

Rules in this chapter include cross references to provisions in 701—Chapters 16 and 18 that were applicable prior to July 1, 2004.

701—214.1(423) Corporate mergers which do not involve taxable sales of tangible personal property or services. If title to or possession of tangible personal property or ownership of services is transferred from one corporation to another pursuant to a statutory merger, the transfer is not a “sale” in which the sales price is subject to tax if all of the following circumstances exist: (1) the merger is pursuant to statute (for example, Iowa Code section 490.1106); (2) by the terms of that statute, the title or possession of property or services transferred passes from a merging corporation to a surviving corporation and not for any consideration; and (3) the merging corporation is extinguished and dissolved the moment the merger occurs and, as a result of this dissolution, cannot receive any benefit from the merger.

Transactions which are not of the type described above may involve taxable sales. See the following court cases relating to this area: *Nachazel v. Mira Co Mfg.*, 466 N.W.2d 248 (Iowa 1991); *D. Canale & Co v. Celauro*, 765 S.W.2d 736 (Tenn 1989); and *Commissioner of Revenue v. SCA Disposal Services*, 421 N.E.2d 766 (Mass 1981).

EXAMPLE A. Nonaffiliated Corporations A and C enter into a voluntary merger agreement governed by Iowa Code section 490.1106. A and C are separate and independent, one from the other, and neither is a subsidiary of another corporation. No officer of the one is an officer of the other. A and C voluntarily negotiate an arms-length merger agreement which results in the transfer of A’s assets to C and the dissolution of A. In return, A’s stockholders receive stock in C. The sales price of A’s transfer of tangible personal property to merged company C is not subject to sales or use tax.

EXAMPLE B. Corporations B, D, and E are independent entities. They enter into a merger agreement governed by Iowa Code section 490.1106 and agree to merge into one surviving corporation which will (after the dissolution of B and D) be E. They agree that the shares of merging corporations will be converted into shares of E on an equal basis. The sales price of the transfers of property by the corporations which are parties to the merger are not sales subject to Iowa tax.

EXAMPLE C. Corporation F receives all of Corporation G’s outstanding shares from G’s sole stockholder. In return, G’s sole stockholder receives stock from F. After the transaction, Corporation G continues to exist as a subsidiary of Corporation F. This particular transaction involves a trade or barter of the stock shares of F and G. There is a barter of the stocks and thus a “sale” as that term is understood for the purposes of Iowa sales tax law. However, because the sale involves only intangible property (the stock shares), that sale is not taxable. The stock exchange transaction would not prevent taxation of subsequent transfers of tangible personal property or services between F and G.

EXAMPLE D. Corporation H buys all the assets of Corporation I, which include machinery, equipment, finished goods, and raw materials. Corporation H pays cash for these assets. This transaction does involve the sale of tangible personal property, and the sales price of the sale may be subject to Iowa sales tax. However, reference 701—subrule 18.28(2) concerning a casual sale exemption applicable to the liquidation of a business.

This rule is intended to implement Iowa Code section 423.1(46).

701—214.2(423) Sales of prepaid merchandise cards. Sales of prepaid merchandise cards (other than prepaid telephone calling cards (reference 701—subrule 16.51(3))) are not sales of tangible personal property and are not sales the sales price of which is subject to Iowa tax. If a purchaser uses a prepaid merchandise card to purchase taxable tangible personal property or taxable services, sales tax is computed on the sales price at the time of the sale and deducted from the prepaid amount remaining on the merchandise card.

EXAMPLE. Customer A purchases a prepaid merchandise card from ABC Clothing Company in the amount of \$200. Customer A purchases a sweater for \$50 from ABC Clothing Company. ABC Clothing

Company will debit A's card \$52.50 ($\50×1.05) for the state tax rate of 5 percent or \$53 ($\50×1.06) if one local option tax rate of 1 percent is applicable.

This rule is intended to implement Iowa Code sections 423.1(46) and 423.2(1).

701—214.3(423) Demurrage charges. Charges for returning tangible personal property after the agreed-upon date which are true demurrage charges supported by a written agreement do not constitute taxable sales and the charges are exempt from tax.

This rule is intended to implement Iowa Code section 423.1(47).

701—214.4(423) Beverage container deposits. Tax shall not apply to beverage container deposits. This rule is also applicable to all mandatory beverage container deposits required under the provisions of Iowa Code chapter 455C, including deposits on items sold through vending machines.

This rule is intended to implement Iowa Code chapter 455C.

701—214.5(423) Exempt sales by excursion boat licensees. The sales price of the following sales by licensees authorized to operate excursion gambling boats is exempt from Iowa sales and use tax: (1) charges for admission to excursion gambling boats, and (2) the sales price from gambling games authorized by the state racing and gaming commission and conducted on excursion gambling boats.

The sales price from charges other than those for admissions or authorized gambling games would ordinarily be taxable. The following is a nonexclusive list of taxable licensee sales: parking fees, sales of souvenirs, vending machine sales, prepared meals, liquor and other beverage sales, and the sales price from nongambling video games and other types of games which do not involve gambling.

This rule is intended to implement Iowa Code section 99F.10(6).

701—214.6(423) Advertising agencies, commercial artists and designers as an agent or as a nonagent of a client.

214.6(1) In general. A true agency relationship depends upon the facts with respect to each transaction. An agent is one who represents another, called the principal, in dealings with third persons. Advertising agencies, commercial artists, and designers may act as agents on behalf of their clients in dealing with third persons or they may act on their own behalf. To the extent advertising agencies, artists and designers act as agents of their clients in acquiring tangible personal property, they are neither purchasers of the property with respect to the supplier nor sellers of the property with respect to their principals.

When advertising agencies, commercial artists, and designers act as agents of their clients in purchasing property for their clients, the tax applies to the sales price from the sale of such property to the advertising agencies, commercial artists, and designers. Unless such advertising agencies, commercial artists and designers act as true agents, they will be regarded as the retailers of tangible personal property furnished to their clients and the tax will apply to the total sales price received for such property. Further, nothing in this rule should be construed to be in variance with the opinion of the Iowa Supreme Court in *Rowe v. Iowa State Tax Commission*, 249 Iowa 1207, 91 N.W.2d 548 (1958).

To establish that a particular acquisition is made in the capacity of an agent for a client, advertising agencies, commercial artists, and designers (collectively referred to herein as "agency") shall act as follows:

- a. The agency must clearly disclose to the supplier the name of the client for whom the agency is acting as an agent.
- b. The agency must obtain, prior to the acquisition, and retain written evidence of agent status with the client.
- c. The price billed to the client, exclusive of any agency fee, must be the same as the amount paid to the supplier. The agency may make no use of the property for its own account, such as commingling the property of a client with another, and the reimbursement for the property should be separately invoiced or shown separately on the invoice to the client.

Some charges may represent reimbursement for tangible personal property acquired by the agency as agents for its clients and compensation for performing of agency services related thereto. When an advertising agency, commercial artist, or designer establishes that it has acquired tangible personal property as agents for its clients, tax does not apply to the charge made by the agency to its client for reimbursement charges by a supplier or to the charges made for the performance of the agency's services directly related to the acquisition of personal property.

Advertising agencies, commercial artists, and designers acting as agents shall not issue resale certificates to suppliers.

Advertising agencies, commercial artists, and designers act as retailers of all items of tangible personal property produced or fabricated by their own employees when they sell to their clients. Advertising agencies, commercial artists, and designers are not agents of their clients with respect to the acquisition of materials incorporated into items of tangible personal property prepared by their employees and sold at retail to their clients.

214.6(2) Scope. The scope of this rule is not confined simply to advertising agencies, commercial artists and designers, but also applies to all other businesses whose activities would bring them within the scope of this rule (e.g., printers).

This rule is intended to implement Iowa Code sections 423.2 and 423.5.

CHAPTER 219
SALES AND USE TAX ON CONSTRUCTION ACTIVITIES

Rules in this chapter include cross references to provisions in 701—Chapters 15 to 20, 21, 26, 30, 32 and 33 that were applicable prior to July 1, 2004.

701—219.1(423) General information. 2005 Iowa Code subsection 423.2(1) imposes a tax upon the sales price from the sales of tangible personal property, consisting of goods, wares or merchandise sold at retail in this state to consumers and users. Also subject to tax are certain enumerated services. Those services relating to the construction industry include carpentry; roof, shingle and glass repair; electrical repair and installation; excavating and grading; house and building moving; laboratory testing; landscaping; machinery operator services; machine repair of all kinds; oilers and lubricators; painting, papering, and interior decorating; pipe fitting and plumbing; wood preparations; termite, bug, roach, and pest eradicators; tin and sheet metal repair; welding; well drilling; and wrecking services. Under Iowa law, contractors are consumers or users of certain tangible personal property. Contractors may also be retailers of tangible personal property and taxable enumerated services. It should be noted that these services are exempt from taxation when performed on or in connection with new construction, reconstruction, alteration, expansion, or remodeling of a building or structure. The services of a general building contractor, architect or engineer are exempt from tax when performed on or in connection with new construction, reconstruction, alteration, expansion, or remodeling of a building or structure. For the purposes of this exemption, a structure is defined as that which is artificially built up or composed of parts joined together in some definite manner and which also has some obvious or apparent functional use or purpose. Nonexclusive examples of structures include buildings; roads, whether paved or otherwise; dikes; drainage ditches; and ponds. See rule 701—219.12(423) relating to structures.

This chapter details the obligation of contractors, contractor-retailers, retailers, and repairpersons to pay or collect sales tax on the sales price from sales of building materials, supplies, equipment, and other tangible personal property and the obligation of these parties to collect tax or claim exemption for their performances of taxable services. How one is classified, whether as a contractor, contractor-retailer, retailer, or repairperson is the basis for determining many of those obligations. It can be very difficult for a person starting a business to determine if that business will be engaged in contracting, retailing, a combination of the two, or providing repair services. However, one status must be chosen. Any reasonable assessment of a new business's status will be honored by the department. A status, once chosen, should not be changed, unless it has become clear from an extended course of dealing that the business has become something other than what it was established to be. For instance, if a business is founded to engage in contracting and purchases construction materials based on the fact that it is a contractor, but the founder must sell construction materials at retail if the business is to survive, and after two years' operation half the revenue is from construction contracts and half from retail sales, then the business has become a contractor-retailer and henceforth should purchase construction materials based on that status. Changing the status of a business from job to job to avoid the obligation to pay or collect tax is not a lawful activity.

2005 Iowa Code section 423.5 imposes a tax that is assessed upon tangible personal property purchased for use in this state and on taxable services which are rendered, furnished or performed in Iowa or where the product or result of such service is used in Iowa. "Use" of tangible personal property in Iowa is defined to mean and include the exercise by any person of any right or power over tangible personal property incident to the ownership of that property.

701—219.2(423) Contractors—consumers of building materials, supplies, and equipment by statute. 2005 Iowa Code subsection 423.2(1)"b" provides that sales of building materials, supplies and equipment to owners, contractors, subcontractors or builders for the erection of buildings or the alteration, repair or improvement of real property are retail sales in whatever quantity sold. This means that a contractor, subcontractor, or builder cannot claim an exemption for resale when purchasing building materials or supplies even if the contractor, subcontractor, or builder later separately itemizes

material and labor charges for construction contracts. Building materials and supplies would generally consist of items which are incorporated into real property, lose their identity as tangible personal property and cannot be removed without altering the realty, or which are consumed by the contractor during the performance of the construction contract. See subrules 219.3(1), 219.3(2) and 219.3(3). Building equipment would ordinarily consist of machinery and tools. See subrule 219.3(4). The fact that a contractor, subcontractor or builder holds an Iowa retail sales tax permit and has a tax number does not entitle that person to purchase building materials, supplies and equipment without paying sales tax to the vendor. See rules 701—219.3(423) and 701—219.4(423).

When bidding on a contract, a contractor (general, special or subcontractor) should anticipate that sales or use taxes will increase the cost of materials by the tax unless the sponsor is a designated exempt entity; reference 701—subrule 19.12(5). The necessary allowance should be made in figuring the bid inasmuch as the contractor will be held responsible for paying the tax on building supplies, materials and equipment. The tax should not be identified as a separate item in the formal bid since the contractor cannot charge sales tax.

701—219.3(423) Sales of building materials, supplies, and equipment to contractors, subcontractors, builders or owners. Suppliers or dealers that sell materials and supplies to contractors, subcontractors, builders or owners are required to collect Iowa sales tax from those persons based upon the sales price from such sales. Reference 701—subrule 19.12(5), which deals with construction contracts with designated exempt entities, for an explanation of one of the few exceptions to this requirement. The fact that a contractor, subcontractor, or builder holds an Iowa retail sales tax permit and has a tax number does not entitle that person to purchase building materials, supplies and equipment without paying sales tax to the vendor. See rules 701—219.2(423) and 701—219.4(423). Materials purchased out of state for use in Iowa are subject to the Iowa use tax which is payable in the quarter that the materials are delivered into the state.

219.3(1) Building materials. The term “building materials” as used in this rule means materials used in construction work, and is not limited to materials used in constructing a building with sides and covering. The term may also include any type of materials used for improvement of the premises or anything essential to the completion of a building or structure for the use intended. *State v. James A. Head & Company, Inc.*, 306 So. 2d 5 (Ala. 1974).

219.3(2) Building supplies. The term “building supplies” as used in this rule means anything that is furnished for and used directly in the carrying on of the work of an owner, contractor, subcontractor or builder and which is used or consumed by the contractor. Such items do not have to enter into and become a physical part of the structure like building materials, but they do become as much a part of the structure as the labor which is performed on it. *United States Fidelity & Guaranty Co. v. Feenaughty Machinery Co.*, 85 P.2d 1085, 197 Wash. 569.

219.3(3) Typical items. While not intended to be inclusive, the following is a list of typical items regarded as building materials and supplies:

- Asphalt
- Bricks
- Builders’ hardware
- Caulking material
- Cement
- Central air conditioning
- Cleaning compounds
- Conduit
- Doors
- Ducts
- Electric wiring, connections, and switching devices
- Fencing materials
- Flooring
- Glass

Gravel
Insulation
Lath
Lead
Lighting fixtures
Lime
Linoleum¹
Lubricants
Lumber
Macadam
Millwork
Modular and mobile homes
Mortar
Oil
Paint
Paper
Piping, valves, and pipe fittings
Plaster
Plates and rods used to anchor masonry foundations
Plumbing supplies
Polyethylene covers
Power poles, towers, and lines
Putty
Reinforcing mesh
Rock salt
Roofing
Rope
Sand
Sheet metal
Steel
Stone
Stucco
Tile
Wallboard
Wall coping
Water conditioners
Weather stripping
Windows
Window screens
Wire netting and screen
Wood preserver

219.3(4) *Building equipment.* The term “building equipment” as used in this rule means any vehicle, machine, tool, implement or other device used by a contractor in erecting structures for others, or reconstructing, altering, expanding or remodeling property of others which does not become a physical component part of the property upon which work is performed, and which is not necessarily consumed in the performance of such work. “Building equipment” includes, but is not limited to, such items as:

Compressors
Drill presses
Electric generators
Forms
Hand tools

Lathes
Replacement parts for equipment
Scaffolds
Tools
Vehicles including grading, lifting and excavating vehicles

Construction equipment purchased by a contractor which is intended for use in the performance of an Iowa construction contract is subject to the Iowa sales or use tax. Equipment which is rented for use on or in connection with an Iowa construction contract would normally be rented subject to tax. See rule 701—219.21(423) for an explanation of the existing exemption in favor of rented machinery used by a contractor on a job site.

¹ Floor coverings which are shaped to fit a particular room or area and which are attached to the supporting floor with cement, tacks or tack strips or by some other method making a permanent attachment are considered to be building materials. Reference rule 701—16.48(422,423) for an exception concerning carpeting. Carpeting (whether attached to the floor or not) is not treated as a building material for the purposes of this chapter. Rugs, mats and linoleum types of floor coverings which are not attached but which are simply laid on finished floors are also not considered to be building materials.

701—219.4(423) Contractors, subcontractors or builders who are retailers. In some instances, contractors, subcontractors and builders are in a dual business which includes reselling to the general public on a recurring “over-the-counter” basis the same type of building materials and supplies which are used by the contractors, subcontractors and builders in their own construction work. A person operating in such a manner is referred to in this rule as a contractor-retailer. Any person who is engaged in the performance of construction contracts and who also sells building materials or other items at retail is obligated to examine the person’s business and determine if it is that of a contractor or a contractor-retailer. A sale by a contractor-retailer of building materials, supplies and equipment which does not provide for installation of the merchandise sold is considered a retail sale and subject to sales tax. Conversely, a sale by a contractor-retailer of building supplies, materials and equipment which provides for installation of the merchandise is considered a construction contract and tax shall be paid by the contractor-retailer based upon the cost of materials at the time the materials are withdrawn from inventory for use in a construction contract performed in Iowa. When a contractor-retailer does repair work, the contractor-retailer is acting as a retailer and not a contractor and must collect tax on the sales price charged for materials used in the repair and on the sales price charged for any labor used in the repair which is a taxable service or on the entire charge if materials and labor are not separately invoiced. Reference rule 701—18.31(422,423) and rule 701—219.13(423).

The following is a list of the characteristics of the usual contractor-retailer:

1. A contractor-retailer is a business which makes frequent retail sales to the public or to other contractors and also engages in the performance of construction contracts (see rule 701—219.8(423)). In determining whether a business is a contractor-retailer or a retailer only, the department looks to the totality of business activity and not only to one portion of the business’s activity. Thus, the maintenance of a small retail outlet does not automatically transform a contractor-retailer into a retailer, and a large number of retail sales without a retail outlet can qualify a business as a contractor-retailer.

2. A business cannot claim the status of a contractor-retailer unless the business is in possession of a valid sales tax permit to report tax due from retail sales and from withdrawals of materials or supplies from inventory for use in construction contracts.

3. A contractor-retailer must purchase building materials, supplies, and equipment placed in its inventory for resale; the contractor-retailer should not pay sales or use tax to its suppliers for these items. Instead, the contractor-retailer should provide suppliers with valid resale exemption certificates. When a valid certificate is furnished, the vendor is relieved from the responsibility of collecting the tax if the purchaser has demonstrated that the purchaser is a contractor-retailer under the provisions of this rule. Reference rule 701—15.3(422,423) and rule 701—219.19(423) for a detailed explanation of this matter.

4. A contractor-retailer purchasing construction material which will not be placed in its inventory must purchase that material subject to Iowa sales or use tax. For example, if a contractor-retailer purchases wet concrete for use in a construction project, that purchase is taxable.

5. A contractor-retailer usually has a retail outlet, but if not, frequent sales to individuals or other contractors qualify a business as a contractor-retailer.

6. Contractor-retailers do not pay tax on materials withdrawn from inventory for use in construction projects performed outside Iowa. See 2005 Iowa Code subsection 423.2(1)“b.”

The business records of a contractor-retailer must clearly reflect the use made of items purchased, and the records must be in such form that the director can readily determine that the proper sales and use tax liability is being reported and paid.

The following examples are offered to illustrate the responsibility for paying and remitting sales tax under this rule:

EXAMPLE 1. ABC Company operates a retail outlet that sells lumber and other building materials and supplies. ABC Company is also a contractor which builds residential and commercial structures. ABC Company would be considered a contractor-retailer and would, therefore, purchase all inventory items for resale. Those items which are used in the performance of a construction contract would be subject to tax in the period that they are withdrawn from inventory. The tax would be computed on the cost of the items withdrawn from inventory. Those items which are sold over the counter in the retail outlets would be subject to tax at the time of sale. The tax would be computed on the over-the-counter sales price.

EXAMPLE 2. EFG Company is a mechanical contractor and has no retail outlets. EFG Company rarely sells any of its inventory to other persons or to other contractors. EFG Company would not be considered a contractor-retailer under this rule. However, EFG Company would be considered a contractor and must pay tax to its vendor at the time it purchases any building materials, supplies and equipment. However, on those rare occasions when an inventory item is sold to another person or to another contractor, tax must be collected at the time of sale; therefore, EFG Company should have a sales tax permit. An adjustment can be made to the sales tax report by taking a credit for tax previously paid on the item sold.

EXAMPLE 3. Home Town Construction Company is owned and operated by two individuals in a rural Iowa farming community. They do not have a retail outlet but they frequently make sales of building materials which are in their inventory to local residents. Home Town Construction Company would be a contractor-retailer and could purchase all inventory items for resale. Those items which are used in the performance of a construction contract would be subject to tax in the period they are withdrawn from inventory. The tax would be computed on the cost of the items withdrawn from inventory. Those items which are sold to residents would be subject to the tax at the time of sale. The tax would be computed on the sales price of the items.

EXAMPLE 4. Down Home Construction Company is operated by two individuals in a rural Iowa farming community. They do not have a retail outlet and rarely make sales of building materials from their inventory to local residents. Down Home Construction Company would not be considered a contractor-retailer under this rule. Rather, Down Home Construction Company would be considered a contractor and must pay tax to its vendor at the time it purchases any building materials, supplies and equipment. When sales are made to local residents, tax must be collected at the time of sale; therefore, Down Home Construction Company should have a sales tax permit. However, Down Home Construction Company can adjust its sales tax report by taking a credit for tax paid to its vendor on an item sold to a local resident.

EXAMPLE 5. Intown Home Construction Company places modular homes on slabs or basement foundations; makes electrical, plumbing and other connections; and otherwise prepares the modular homes for sale as real estate. Intown also has a sales tax permit, maintains an inventory of modular homes for sale, and sells homes from the inventory as tangible personal property to owners who later convert the property to real estate. Intown is a contractor-retailer and is obligated to pay or collect sales tax, respectively, at the time a modular home is withdrawn from inventory for use as material in a construction contract or at the time a modular home is withdrawn from inventory for sale to an owner. See rule 701—231.11(423) for an explanation of the basis on which tax is computed.

EXAMPLE 6. Smith’s Plumbing has a retail store in Davenport, but it also installs plumbing fixtures and lines in new construction and remodeling projects. Plumbing supplies that are taken from an

inventory in Davenport for a new home being built in Rock Island, Illinois, are withdrawn exempt from Iowa sales tax because the construction contract is performed outside Iowa. However, those supplies may be subject to Illinois sales or use tax.

701—219.5(423) Building materials, supplies, and equipment used in the performance of construction contracts within and outside Iowa.

219.5(1) The use of building materials, supplies, or equipment in the performance of construction contracts by the manufacturer outside Iowa is not a sale of tangible personal property and, therefore, is not a taxable event. The use of tangible personal property as building materials, supplies, or equipment by the manufacturer in the performance of construction contracts in Iowa is a sale at retail and a taxable event. The tax is computed on the manufacturer's fabricated cost or cost of production. See rule 701—219.6(423) for a characterization of the term manufacturer's "fabricated cost."

219.5(2) A contractor-retailer's withdrawal of materials from inventory for use in construction contracts outside this state is not a taxable event.

219.5(3) A contractor is a consumer by statute. A contractor's purchase of materials for use in a construction contract is subject to tax whether the materials are purchased for use in construction contracts performed in Iowa or outside this state.

219.5(4) A manufacturer's purchase of tangible personal property consumed as building material in the manufacturer's or the manufacturer's subcontractor's performance of construction contracts within Iowa is taxable. The tax is computed on the fabricated cost or cost of production of the materials. See rule 701—219.6(423) for a characterization of the term "fabricated cost." The purchase of tangible personal property consumed by a manufacturer as building material in the manufacturer's or the manufacturer's subcontractor's performance of a construction contract outside Iowa is not subject to tax.

219.5(5) Reference rule 701—32.8(423) for an exemption from use tax for building materials, supplies, or equipment purchased outside Iowa, brought into this state, and subsequently used in the performance of a construction contract outside this state.

701—219.6(423) Tangible personal property used or consumed by the manufacturer thereof. When a person who is primarily engaged in the manufacture of building materials, supplies, or equipment for sale and not for the person's own use or consumption, considering the totality of the business, from time to time uses or consumes the building materials, supplies, or equipment for construction purposes, the person is deemed to be making retail sales to one's self and subject to tax on the basis of the fabricated cost of the items so used or consumed for construction purposes. If equipment, building materials, or supplies are used by a manufacturer in the performance of a construction contract, a "sale" occurs only if the equipment, materials, or supplies are used in the performance of a construction contract in Iowa. For purposes of this rule, the term "fabricated cost" means and includes the cost of all materials as well as the cost of labor, power, transportation to the plant, and other plant expenses but not installation on the job site. *Associated General Contractors of Iowa v. State Tax Commission*, 255 Iowa 673, 123 N.W.2d 922 (1963). Also see rule 701—219.4(423) relating to contractors and rule 701—219.5(423) relating to materials, supplies, and equipment used in construction contracts within and outside Iowa.

701—219.7(423) Prefabricated structures.

219.7(1) Basic concepts and general rules. A "prefabricated structure" is any structure assembled in a factory and capable of transport to the location where it will be used in the performance of a construction contract by placement on a foundation either by the buyer or a designated contractor. The term "prefabricated structure" includes a "modular home" as defined in rule 701—231.11(423), a mobile home whether or not sold subject to the issuance of a certificate of title, "manufactured housing" (reference definition in rule 701—33.10(423)), sectionalized housing, precut housing packages, and panelized construction. With a few major exceptions (see subrule 219.7(2) regarding the "60 percent rule" and reference rule 701—33.10(423) regarding the taxation of manufactured housing while it is real property), the sales and use tax treatment of prefabricated structures generally follows the treatment of construction materials, that is, tax is due when those structures are sold to or used by owners,

contractors, subcontractors, or builders. Sales of prefabricated structures which have not been erected on a foundation are considered sales of tangible personal property and thus are taxable at the time of retail sale. The usual basis for computing sales or use tax is the purchase price charged to a consumer or user by the seller of a prefabricated structure. *Custom Built Homes Co. v. Kansas State Commission of Revenue and Taxation*, 184 Kan. 31, 334 P.2d 808 (1959). Sales or use tax is due on the full purchase price when a prefabricated structure is delivered under a contract for sale or sold for use in Iowa. *Dodgen Industries Inc. v. Iowa State Tax Commission*, 160 N.W.2d 289 (Iowa 1968).

219.7(2) *Exceptions to the general rules.* There are a number of exceptions to the general rules stated above in 219.7(1). Those exceptions are applicable to modular and mobile homes and manufactured housing. They are explained as follows:

a. Modular homes. Only 60 percent of the sales price from the sale of a modular home is subject to Iowa tax. See rule 701—231.11(423). This 60 percent rule is applicable only to a “modular home” as that phrase is defined in rule 701—231.11(423) and not to other types of prefabricated structures which do not meet the definition of the term “modular home” such as sectionalized housing or panelized construction. Also, the 60 percent rule is not applicable to the sale of materials used in the assembly of a modular home, only to the sale of the finished product.

b. Mobile homes and manufactured housing. Iowa use tax and not Iowa sales tax is imposed on mobile homes or manufactured housing sold subject to the issuance of a certificate of title, and, similar to 219.7(2) “a” above, use tax is imposed only upon 60 percent of the purchase price of these mobile homes or manufactured housing. Reference rule 701—32.3(423). All mobile homes sold in Iowa or sold outside Iowa for use in this state are sold subject to Iowa use tax, whether sold for placement within or outside a mobile home park; see 2005 Iowa Code chapter 423 and Iowa Code chapter 435.

219.7(3) *Tax consequences of sales of modular homes by various parties, some operating in a dual capacity.*

a. A retailer (dealer) that is not additionally a contractor or manufacturer of modular homes purchases those homes tax-free from a wholesaler or manufacturer for subsequent resale to contractors or owners. Tax must be collected when the dealer sells the modular home to an owner or contractor.

b. A contractor that is not a dealer must pay tax when purchasing a modular home for use in a construction contract or for some other purpose. A contractor’s sale of a modular home to an owner or another contractor is treated as explained in Examples 2 and 4 of rule 701—219.4(423).

c. A dealer that is also a contractor will purchase homes tax-free for inclusion in its inventory. Tax is imposed when the dealer withdraws a home from inventory for sale or use in the performance of a construction contract as explained in rule 701—219.4(423).

d. A manufacturer that acts as its own dealer and sells its own modular homes at retail to contractors or owners will collect tax on the sales price from its sales of those modular homes to its customers. This situation is in contrast to that described in subrule 701—219.7(4) in which a manufacturer uses its own modular homes in the performance of construction contracts and the tax due is computed on a sum other than the sales price from the sale of a home.

What is stated in this subrule concerning sales of modular homes is generally applicable to the use tax on mobile homes and manufactured housing. However, one distinct difference is that mobile homes and manufactured housing are seldom, if ever, purchased by a dealer for any subsequent use in the performance of construction contracts. A dealer will often purchase a mobile home or manufactured housing for subsequent resale to a customer as tangible personal property and then will place or install the mobile home or manufactured housing on a site prepared by the customer. This is not the performance of a construction contract (see rule 701—219.8(423)), and the dealer is a retailer who installs tangible personal property and is not a construction contractor.

219.7(4) *Manufacturers who perform construction contracts.* When companies whose principal business is the manufacture of prefabricated structures use those structures in the performance of construction contracts, this use is treated as a retail sale of the structures on the manufacturer’s part. See rule 701—219.6(423) for a detailed description of the sales tax treatment of this sort of transaction. The 60 percent rule (see 219.7(2) above) is not applicable when calculating the amount of tax owed by a manufacturer.

219.7(5) Examples. The following examples are intended to illustrate who must collect or remit sales or use tax when a manufacturer sells a modular home to a contractor or owner or acts as a contractor in erecting the home. The incidence of tax depends on several factors, such as the nature of the manufacturer's business, the point of delivery, the contractual agreement for erection and whether or not a sale for resale has occurred.

EXAMPLE 1. The manufacturer is located outside Iowa. The manufacturer contracts with an Iowa customer to build a home in the manufacturer's factory. The manufacturer also contracts to completely erect the home, install the furnace, and do electrical and other necessary work to make the home ready for occupancy. The main source of the manufacturer's income relates to on-site construction. The manufacturer has paid a sales tax equal to Iowa tax in its state of residency. The manufacturer would be considered to be performing a construction contract in Iowa and would owe use tax in Iowa; however, a sales tax credit would be allowed for tax paid to the other state.

EXAMPLE 2. The manufacturer is located outside Iowa. An Iowa unrelated builder/dealer contracts with the customer for the home and then contracts with the manufacturer for construction, delivery, and installation on the customer's foundation. The manufacturer delivers the home into Iowa on the manufacturer's own truck. The customer, by contractual agreement, is obligated to pay for the home on delivery of the property, so the sale takes place in Iowa. In this situation, the manufacturer is involved in the sale of tangible personal property rather than the sale of real estate and must collect Iowa sales tax on 60 percent of the sales price to the Iowa builder/dealer.

EXAMPLE 3. The manufacturer is located outside Iowa. The manufacturer contracts to sell a home to a customer (owner) in Iowa. The manufacturer hires a common carrier to deliver the home to the Iowa customer. The manufacturer has no activity in Iowa that would create a "nexus" requiring the manufacturer to collect Iowa tax. In this situation, the Iowa customer is required to remit use tax on 60 percent of the purchase price of the home.

EXAMPLE 4. The manufacturer may be located in Iowa or outside Iowa. The manufacturer sells a home to a dealer in Iowa that will resell the home to the final customer. The manufacturer may deliver the home, or delivery may be made by a common carrier. The manufacturer has no contractual obligation for erection. In this situation, the manufacturer is making a sale for resale and is not required to collect tax. The manufacturer must have a valid resale certificate on file from the dealer. The dealer, if in Iowa, would be required to collect tax when the home is sold.

EXAMPLE 5. The manufacturer is located in Iowa. The manufacturer contracts to furnish, deliver, and perform the setup on a home in a state other than Iowa. The manufacturer withdraws the home from inventory and transports the home to the other state for setup. In this situation, the Iowa manufacturer does not owe any Iowa tax because 2005 Iowa Code subsection 423.2(1) "b" exempts building materials and supplies that manufacturers withdraw from inventory for construction outside Iowa.

EXAMPLE 6. The manufacturer is located in Iowa. The manufacturer sells a home to an Iowa customer and agrees, under separate contract, to transport the home to the job site and perform the setup. The manufacturer should collect tax on 60 percent of the sales price of the home. The customer also wants a garage. The manufacturer agrees to sell the lumber, nails, and shingles to the customer who would build the garage. This sale would be considered a sale at retail, and the manufacturer should collect tax on the entire sales price of these materials. The same would be true if the manufacturer sold appliances separate from the sale of the home; sales tax would be due on the entire sales price of the appliances.

EXAMPLE 7. The manufacturer may be located inside or outside Iowa. The manufacturer sells a modular home to a dealer that is a general contractor. The dealer subcontracts the work of placing the home on a foundation to various third parties, which transport the home to its site, excavate for and pour the concrete slab, and perform plumbing, electrical hookup, and all other services which are part of the construction contract for placing the modular home at its location. Since the sale of the modular home is to a dealer that is a contractor, the manufacturer will collect and the dealer will pay tax on 60 percent of the modular home's invoice price.

701—219.8(423) Types of construction contracts. The term “construction contract” is defined as an agreement under the terms of which an individual, corporation, partnership or other entity agrees to furnish the necessary building or structural materials, supplies, equipment or fixtures and to erect the same on the project site for a second party known as a sponsor. Nonexclusive examples of the types of construction contracts include: lump-sum contracts; cost plus contracts; time and material contracts; unit price contracts; guaranteed maximum or upset price contracts; construction management contracts; design built contracts; and turnkey contracts.

The following is a nonexclusive list of activities and items which could fall within the meaning of a construction contract or are generally associated with new construction, reconstruction, alteration, or expansion of a building or structure. The list is provided merely for the purpose of illustration. It should not be used to distinguish machinery and equipment from real property or structures since such a determination is factual. See rules 701—219.11(423) and 701—219.12(423) for details.

- Ash removal equipment (installed as distinguished from portable units)
- Automatic sprinkler systems (fire protection)
- Awnings and venetian blinds which become attached to real property
- Boilers (installed as distinguished from portable units)
- Brick work
- Builder’s hardware
- Burglar alarm and fire alarm fixtures
- Caulking materials work
- Cement work
- Central air conditioner installation
- Coal handling equipment (installed as distinguished from portable units)
- Concrete work
- Counters, lockers (installed as distinguished from portable units), and prefabricated cabinets
- Drapery installation
- Electric conduit work and items relating thereto
- Electric distribution lines
- Electric transmission lines
- Floor covering which is permanently installed—see rule 701—16.48(422,423) for an exception to this regarding carpeting
- Flooring work
- Furnaces, heating boilers and heating units
- Glass and glazing work
- Gravel work (excluding landscaping)
- Installation of modular homes on foundations
- Lathing work
- Lead work
- Lighting fixtures
- Lime work
- Lumber and carpenter works
- Macadam work
- Millwork installation
- Mortar work
- Oil work
- Paint booths and spray booths (installed as distinguished from portable units)
- Painting work
- Paneling work
- Papering work
- Passenger and freight elevators
- Piping valves and pipe fitting work
- Plastering work

- Plumbing work
- Prefabricated cabinets, counters, and lockers (installed as opposed to portable units)
- Putty work
- Refrigeration units (central plants installation as distinguished from portable units)
- Reinforcing mesh work
- Road construction (concrete, bituminous, gravel, etc.)
- Roofing work
- Sheet metal work
- Sign installation (other than portable sign installation)
- Steel work
- Stone work
- Stucco work
- Tile work—ceiling, floor and walls
- Underground gas mains
- Underground sewage disposal
- Underground water mains
- Vault doors and equipment
- Wallboard work
- Wall coping work
- Wallpaper work
- Water heater and softener installation
- Weather stripping work
- Wire net screen work
- Wood preserving work

701—219.9(423) Machinery and equipment sales contracts with installation. Machinery and equipment sales contracts with installation are transactions which are considered a sale of tangible personal property to a final consumer. Therefore, the individual who sells the equipment with installation must purchase the machinery and equipment tax-free as a purchase for resale. This rule should not be confused with subrule 219.3(3) regarding building equipment. The contract should itemize the sales tax separately. If a contractor wishes to avoid an itemization of sales and use tax on machinery and equipment which remains tangible personal property, the contractor can do so by figuring the tax as a general overhead expense and including a statement in the contract and related invoices that “sales tax is included in the contract price.”

If the sales transaction is one completed out of state and shipped in interstate commerce to a consumer or a user in Iowa, and not otherwise exempt from tax, the final purchaser is required to pay Iowa use tax on the purchase price of the machinery and equipment.

In a “mixed contract” (a construction contract mingled with a machinery and equipment sales contract), the elements of the contract should be separated for sales tax purposes. See rule 701—219.10(423).

Certain services which are enumerated in 2005 Iowa Code section 423.2 are subject to tax when performed under a contract for the installation of machinery and equipment which is not done in connection with new construction, reconstruction, alteration, expansion or remodeling of a building or structure. Reference rule 701—15.14(422,423) relating to installation charges. Examples of the enumerated services are: electrical installation; plumbing; welding; and pipe fitting. Other labor charges for job site installation which do not involve a taxable enumerated service are not subject to tax if the charges are separately contracted or, if no written contract exists, are separately itemized on the billing from the seller to the purchaser.

EXAMPLE. Company B contracts with Company A to furnish and install a portable conveyor unit in Company A’s new building. Company B can purchase the portable conveyor unit tax-free because the portable conveyor unit maintains its identity as tangible personal property after installation and does not become a component part of the real property. Company B would then charge tax to Company A on

the sale of the portable conveyor unit. Installation charges would be part of the total sales price subject to tax unless they are separately contracted or, if no written contract exists, separately itemized on the billing from Company B to Company A.

701—219.10(423) Construction contracts with equipment sales (mixed contracts). Construction contracts with equipment sales, commonly known as mixed contracts, place a dual burden on the contractor, as a contractor is a consumer of construction materials and also a retailer of the machinery and equipment. As a consumer by statute of construction building materials, supplies, and building equipment, a contractor is required to pay sales tax to the supplier at the time of purchase or remit use tax to the department if purchasing building materials, supplies, and building equipment from an out-of-state supplier. Reference 701—Chapter 30 of the rules regarding use taxes. Machinery and equipment must be purchased for resale by the contractor if the machinery and equipment does not become real property. This means that the contractor does not pay tax to a supplier at the time of purchase of machinery and equipment, but instead, the contractor is responsible for collecting sales tax on the sales price from a sponsor and remitting it to the department.

EXAMPLE. Company A contracts with Company B to have Company B build a new building and install all of the production machinery and equipment for the new building. Company B must pay tax on its purchases of building materials and supplies which lose their identity as tangible personal property and become a component part of the real property. Company B also purchases some refrigeration units for the new building which maintain their identity as tangible personal property. These units must be purchased tax-free by Company B because they will be resold. Company B would then charge Company A the tax on the units which retain their identity as tangible personal property. The installation charges for the units which remain as tangible personal property would be part of the total sales price subject to tax unless they are separately contracted or, if no written contract exists, are separately itemized on the billing from Company B to Company A.

When a mixed construction contract is let for a lump-sum amount, the machinery and equipment furnished and installed shall be considered, for the purposes of this rule only, as being sold by the contractor for an amount equal to the cost of the machinery and equipment.

Persons required to collect sales tax in Iowa under machinery and equipment contracts or a mixed contract are required to have a sales tax or a retailer's use tax permit.

701—219.11(423) Distinguishing machinery and equipment from real property. A construction contract may include many activities, but it does not include a contract for the sale and installation of machinery or equipment. Machinery and equipment includes property that is tangible personal property when it is purchased and remains tangible personal property after installation. Generally, tangible personal property can be moved without causing damage or injury to itself or to the structure, it does not bear the weight of the structure, and it does not in any other manner constitute an integral part of a structure. For exemptions related to the sale of computers, machinery, and equipment if the sale occurs as part of a contract entered into on or after July 1, 2016, see rules 701—230.14(423) to 701—230.22(423).

219.11(1) The following is a list of property that, under normal conditions, remains tangible personal property after installation. The list is nonexclusive and is offered for illustrative purposes only:

a. Furniture, radio and television sets and antennas, washers and dryers, portable lamps, home freezers, portable appliances and window air-conditioning units.

b. Portable items such as casework, tables, counters, cabinets, lockers, athletic and gymnasium equipment, and other related easily movable property attached to the structure.

c. Machinery, equipment, tools, appliances, and materials used exclusively as such by manufacturers, industrial processors and others performing a processing function with the items, including:

(1) Computers, machinery, and equipment directly and primarily used in processing by a manufacturer (see rule 701—230.15(423)).

(2) Computers, machinery, and equipment directly and primarily used to maintain the integrity of the product or to maintain unique environmental conditions required for either the product or the computers, machinery, and equipment used in processing by a manufacturer (see rule 701—230.16(423)).

(3) Computers, machinery, and equipment directly and primarily used in research and development of new products or processes of processing (see rule 701—230.17(423)).

(4) Computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise (see rule 701—230.18(423)).

(5) Computers, machinery, and equipment directly and primarily used in recycling or reprocessing of waste products (see rule 701—230.19(423)).

(6) Pollution-control equipment used by a manufacturer, including but not limited to that required or certified by an agency of Iowa or the United States government (see rule 701—230.20(423)).

d. Office, bank, and savings and loan association furniture and equipment, including office machines.

e. Radio, television, and cable television station equipment, but not broadcasting towers.

f. Certain equipment used by restaurants and in institutional kitchens; for instance, dishwashers, stainless steel wall cabinets, stainless steel natural gas stoves, stainless steel natural gas convection ovens, and combination ovens and steamers with stands. This paragraph is not applicable to similar items used in residential kitchens. See Petition of Taylor Industries Inc. (Dkt No. 94-30-6-0367, 3-14-95).

219.11(2) The following is a list of property that, under normal conditions, becomes a part of realty. The list is nonexclusive and is offered for illustrative purposes only:

a. Boilers and furnaces.

b. Built-in household items such as kitchen cabinets, dishwashers, sinks (including faucets), fans, garbage disposals, and incinerators.

c. Buildings, and structural and other improvements to buildings, including awnings, canopies, foundations for machinery, floors (including computer room floors), walls, general wiring and lighting facilities, roofs, stairways, stair lifts, sprinkler systems, storm doors and windows, door controls, air curtains, loading platforms, central air-conditioning units, building elevators, sanitation and plumbing systems, decks, and heating, cooling and ventilation systems.

d. Fixed (year-round) wharves and docks.

e. Improvements to land including patios, retaining walls, roads, walks, bridges, fencing, railway switch tracks, ponds, dams, ditches, wells, underground irrigation systems, drainage, storm and sanitary sewers, and water supply lines for drinking water, sanitary purposes, and fire protection. See rule 701—226.10(423) relating to drainage tile.

f. Mobile and modular homes installed on foundations.

g. Planted nursery stock.

h. Residential water heaters, water softeners, intercoms, garage door opening equipment, pneumatic tube systems, and music and sound equipment (except portable equipment).

i. Safe deposit boxes, drive-up and walk-up windows, night depository equipment, remote TV auto teller systems, vault doors, and camera security equipment (except portable equipment).

j. Seating in auditoriums and theaters and theater stage lights (except portable seating and lighting).

k. Swimming pools (wholly or partially underground (except portable pools)).

l. Truck platform scale foundations.

m. Walk-in cold storage units that become a component part of a building.

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—219.12(423) Tangible personal property that becomes structures. Items that are manufactured as tangible personal property can, by their nature, become structures. However, the determination is factual and must be made on an item-by-item basis. For exemptions related to the sale of computers, machinery, and equipment occurring as part of a contract entered into on or after July 1, 2016, see rules

701—230.14(423) to 701—230.22(423). The following is a listing of criteria that courts have used in making such a determination:

1. The degree of architectural and engineering skills necessary to design and construct the structure.
2. The overall scope of the business and the contractual obligations of the person designing and building the structure.
3. The amount and variety of materials needed to complete the structure, including the identity of materials prior to assembly and the complexity of assembly.
4. The size and weight of the structure.
5. The permanency or degree of annexation of the structure to other real property which would affect its mobility.
6. The cost of building, moving or dismantling the structure.
7. For property sold as part of a contract entered into on or after July 1, 2016, computers, machinery, or equipment used for an exempt purpose under Iowa Code section 423.3(47) remains tangible personal property. See rules 701—230.14(423) to 701—230.22(423).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—219.13(423) Tax on enumerated services. The tax on the services enumerated in 2005 Iowa Code section 423.2 is basically a tax on labor. When such services are performed on or connected with new construction, reconstruction, alteration, expansion or remodeling of real property or structures, the services are exempt from tax. Neither the repair nor the rental of machinery on the job site is exempt from tax under this rule. See rule 701—219.21(423) for an explanation of the exemption in favor of rented machinery used by a contractor on a job site.

The distinction between a repair (see subrule 219.13(1)) and new construction, reconstruction, alteration, expansion and remodeling activities (see subrule 219.13(2)) can, oftentimes, be difficult to grasp. Therefore, the intent of the parties and the scope of the project may become the factors which determine whether certain enumerated services are taxable. An area of particular difficulty is the distinction between repair and remodeling. Remodeling a building or other structure means much more than making repairs or minor changes to it. Remodeling is a reforming or reshaping of a structure or some substantial portion of it to the extent that the remodeled structure or portion of the structure is in large part the equivalent of a new structure or part thereof. See *Board of Commissioners of Guadalupe County v. State*, 43 N.M. 409, 94 P.2d 515 (1939) and *City of Mayville v. Rosing*, 19 N.D. 98, 123 N.W. 393 (1909).

219.13(1) Repair is synonymous with mend, restore, maintain, replace and service. A repair contemplates an existing structure or tangible personal property which has become imperfect and constitutes the restoration to a good and sound condition. A repair is not a capital improvement; that is, it does not materially add to the value or substantially prolong the useful life of the property.

2005 Iowa Code section 423.1(42) defines a person engaged in the business of performing taxable services as a retailer. Since retailers may purchase building materials, supplies and equipment for resale, persons making taxable repairs (repairpersons and servicepersons) are not considered to be contractors and are not subject to the provisions of 2005 Iowa Code subsection 423.2(1)“b.” In addition, such persons are not considered to be owners, subcontractors or builders. Repairpersons and servicepersons will normally purchase building materials and supplies free of tax for subsequent resale to their customers; contractor-retailers will also do this. However, contractors, subcontractors or builders who may make repairs are subject to 2005 Iowa Code subsection 423.2(1)“b” and must pay tax at the time building materials, supplies and equipment are purchased from vendors even though the contractors, subcontractors or builders hold a valid sales tax permit. See rules 701—219.2(423) and 701—219.3(423). In determining who is a contractor and who is a retailer of repair services, the department looks to the total business of the entity in question and not to any one portion of it. Thus, the fact that a business whose overall activity is contracting has a division engaged in taxable repair services does not transform that business into a retailer providing services rather than a contractor. When contractors do repair work, they may separately itemize labor and materials charges and collect

sales tax on all charges. A contractor's markup on a materials charge is part of any taxable sale. A contractor can take a credit for any tax paid on the purchase of materials that are sold as part of a service transaction.

When other persons making repairs sell tangible personal property at retail in connection with any taxable service enumerated in 2005 Iowa Code section 423.2, those persons shall collect and remit tax on the sales price. The person making repairs shall purchase tangible personal property for resale when the property is used in the repair job and is resold to a customer. Reference rule 701—18.31(422,423) for an explanation of when persons performing services sell the property that the persons use in performing those services to their customers. Nonexclusive examples of repair situations are as follows:

- a. Repair of broken or defective glass.
- b. Replacement of broken, defective or rotten windows.
- c. Replacing individual or damaged roof shingles.
- d. Replacing or repairing a segment of worn-out or broken kitchen cabinets.
- e. Repair or replacement of broken or damaged garage doors or garage door openers.
- f. Replacing or repairing a part of a broken or worn tub, shower, or faucets.
- g. Replacing or repairing a broken water heater, furnace or central air conditioning compressor.
- h. Restoration of original wiring in a house or building.

219.13(2) The following are examples of new construction, reconstruction, alteration, expansion and remodeling activities:

- a. The building of a garage or adding a garage to an existing building would be considered new construction.
- b. Adding a redwood deck to an existing structure would be considered new construction.
- c. Replacing a complete roof on an existing structure would be considered reconstruction or alteration.
- d. Adding a new room to an existing building would be considered new construction.
- e. Adding a new room by building interior walls would be considered alteration.
- f. Replacing kitchen cabinets with some modification would be considered an improvement.
- g. Paneling existing walls would be considered an improvement.
- h. Laying a new floor over an existing floor would be considered an improvement.
- i. Rebuilding a structure damaged by flood, fire or other uncontrollable disaster or casualty would be considered reconstruction.
- j. Building a new wing to an existing building would be considered an expansion.
- k. Rearranging the interior physical structure of a building would be considered remodeling.
- l. Installing manufactured housing or a modular or mobile home on a foundation would be considered new construction. However, reference rule 701—33.10(423) for a description of the special treatment of taxable installation charges when the taxable sale of manufactured housing as real estate occurs.
- m. Replacing an entire water heater, water softener, furnace or central air conditioning unit.
- n. Sign installation and well-drilling services are generally performed in connection with new construction.

In all the examples, the contractor is responsible for paying tax to any supplier on materials. However, there would be no tax on any enumerated services.

219.13(3) "*On or connected with.*" The term "on or connected with" is broad and should be used to convey generally accepted meaning. Therefore, in a specific situation, the facts relating thereto are controlling in determining whether the exemption is applicable. "On or connected with" does not connote that those things connected have to be primary or subsidiary to the construction, reconstruction, alteration, expansion or remodeling of the real property.

a. *Incidental relationship.* An incidental relationship can qualify the activity for exemption if the relationship forms an intimate connection with the construction activity. For example, the service of excavating and grading relating to the clearing of land to begin construction of a building would qualify for the exemption; however, excavating and grading land without motive toward construction would not

qualify for exemption even though at some later date plans to construct a building were created and a structure was actually erected.

b. Proximity in time. The presence of a time relationship can also be a factor in determining the applicability of exemption. For example, tax would not apply to separate labor charges relating to the installation of institutional kitchen equipment in a building while remodeling of the real property was in progress. (Tax could apply to the sales price of the institutional kitchen equipment; see rule 701—230.14(423)). However, if a year after all construction activity has ended, the owner decides to install a piece of institutional kitchen equipment in the building, any taxable enumerated services relating thereto would be subject to tax. Further, if, following construction, the land is graded for the purpose of seeding a new lawn, the exemption would be applicable. However, if the lawn does not grow and the land is regraded the following year, the exemption would not be applicable. Therefore, the motive behind the activity and the course of events that could reasonably be expected to occur would be a further consideration in determining if the exemption is applicable.

c. Physical proximity. A physical relationship is also a factor that should be evaluated. If a building is constructed to house machinery, any enumerated services relating to the installation of that machinery would be exempt from tax. For example, piping joining two pieces of equipment housed in separate buildings would qualify for exemption if the equipment in either building was installed while such new construction, reconstruction, alteration, expansion or remodeling to the structure was also taking place to house the equipment.

d. Totality of the facts and circumstances. An incidental relationship, a time relationship, and close physical proximity may not be enough to support the conclusion that a taxable service is performed in connection with new construction or reconstruction. For example, a homeowner hires a general contractor to add a new room to an existing home (which is new construction; see 219.13(2) “d”). The existing home is in need of a number of the repairs described in subrule 219.13(1); for example, it is in need of rewiring and replacement of a broken window. The general contractor rewires the home and repairs the window in addition to building the new room. The taxable services which the general contractor performs while rewiring the home and repairing the window are not performed in connection with the construction of the new room simply because those services happen to be performed at the same time and on the same home as the new construction. If the addition of the new room were the cause of the need for the taxable service (e.g., the window was broken during construction of the new room) and not just a convenient occasion for performance of the service, that performance would be exempt from tax. The facts and motives are important in the determination of the taxability of services relating to construction activities. However, it should also be noted that taxes on enumerated services are applicable to repair or installation work that is not a construction activity. See subrule 219.13(1) relating to persons who make repairs or perform enumerated services for more information.

219.13(4) Excavating includes digging, hollowing out, scooping out, or making a hole in the earth. It also includes removal of materials or substance found beneath the surface. Grading includes a change in the earth’s structure by scraping and filling to a common level or a fixed line known as a grade. The enumerated services of excavating and grading are not subject to tax if performed on or connected with new construction. Removal of overburden which is directly related to road building, building of dikes, building of farm ponds, and creating drainage ditches would not be taxable as such activities would be considered on or connected with the creation of a structure. See *Maasdam v. Kirkpatrick*, 214 Iowa 1388 (1932). However, the mere removal of overburden, without more, would be taxable as the enumerated service of excavating or grading under 2005 Iowa Code subsection 423.2(6).

219.13(5) Services associated with new construction or reconstruction, for example, which are not taxable include, but are not limited to, brick laying, concrete finishing, tiling, siding installation, laying of linoleum and other flooring and carpet installation. No tax can be collected on the performance of these services even when they are furnished in connection with the performance of repairs.

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—219.14(423) Transportation cost. Transportation charges and delivery charges are not subject to the Iowa sales and use tax when they are separately contracted or, if no written contract exists, are separately itemized on the billing from the seller to the purchaser. Reference rule 701—15.13(422,423).

701—219.15(423) Start-up charges. Start-up charges are not subject to the Iowa sales and use tax when they are separately contracted or, if no written contract exists, are separately itemized on the billing from the seller to the purchaser.

701—219.16(423) Liability of subcontractors. A subcontractor who is providing materials and labor on the actual construction of the building or structure has the same status and tax responsibilities as a general contractor under the Iowa statutes. However, where an individual or firm is hired to provide machinery and equipment to a general contractor or another subcontractor, the individual or firm is considered a material supplier rather than a subcontractor. This is true even though the machinery and equipment are supplied with installation. Items of machinery and equipment sold by material suppliers to contractors shall be sold for resale and the contractor must provide the material supplier with a valid resale certificate.

701—219.17(423) Liability of sponsors. The sponsor cannot be held responsible for a tax liability incurred on building materials, supplies and equipment by a general contractor or subcontractor in the completion of a construction contract. Likewise, a general contractor cannot be held responsible for the tax liability incurred on building materials, supplies and equipment by a subcontractor in the completion of a construction contract. The tax responsibility regarding machinery and equipment contracts depends on where the sale was consummated. If the sale was consummated in Iowa, the seller is responsible for the collection and remittance of tax unless a valid exemption certificate is given by the purchaser. If the sale was consummated outside Iowa and the seller does not remit use tax to the department, then a use tax would be due from the Iowa user.

701—219.18(423) Withholding. A sponsor of a contract with a nonregistered out-of-state (nonresident) contractor may be asked to withhold the final payment of the contract as a guarantee that sales and use taxes will be paid. The withholding requirement may also apply to registered out-of-state contractors at the discretion of the department. The department will issue a notice to the sponsor to support the withholding of funds. In order to seek a release of the notice, the out-of-state contractor is required to file a report with the department consisting of the following departmental forms:

1. Form 35-012, which is a listing of subcontractors to whom the out-of-state contractor has awarded a construction contract. This statement should be submitted on each project as it becomes available.

2. Form 35-013, which is a list of material suppliers both in state and out of state from whom tangible personal property has been purchased for use in completing each project or contract.

3. Form 35-001, which is a summary of the provisions of the actual contract.

All letters of release furnished by the department are subject to audit and, therefore, are not unconditional release from any Iowa sales or use tax liability. All letters of release will be issued within 60 days upon receipt of the proper information unless an error or discrepancy is noted.

701—219.19(423) Resale certificates. Whenever machinery and equipment which will remain tangible personal property after installation is purchased for a machinery and equipment contract by a contractor from a supplier or a material supplier, it should be purchased for resale. See rule 701—219.9(423). Resale purchases are most commonly related to machinery and equipment sales contracts with installation and mixed construction contracts. Contractor-retailers and persons making repairs may also purchase materials for resale as long as they collect tax on their retail sales and pay the tax themselves on items withdrawn from inventory for use in the performance of a construction contract. See rule 701—219.4(423) and subrule 219.13(1). Resale certificates can be obtained by contacting the Iowa department of revenue. Reference rule 701—15.3(422,423) for detailed information on resale certificates.

701—219.20(423) Reporting for use tax. An Iowa contractor can report use tax either on a consumer's use tax return or as consumed goods on a sales tax return. Tax is due in the quarter the materials are delivered into Iowa. Nonresident contractors should report use tax on a consumer's use tax return. Consumer's use tax returns for nonresident contractors must be obtained directly from the department of revenue unless the contractor is registered with the department.

701—219.21(423) Exempt sale, lease, or rental of equipment used by contractors, subcontractors, or builders.

219.21(1) Exempt lease or rental of machinery and equipment. On and after July 1, 2004, the sales price on the lease or rental only of the following types of machinery and equipment is exempt from tax: all machinery, equipment, and replacement parts directly and primarily used by contractors, subcontractors, and builders for new construction, reconstruction, alterations, expansion, or remodeling of real property or structures and all machinery, equipment, and replacement parts which improve the performance, safety, operation, or efficiency of the equipment and replacement parts so used. A contractor's, subcontractor's, or builder's purchases of this equipment would continue to be taxable, as would a lessor's purchases of machinery, equipment, or replacement parts for subsequent exempt rental to a contractor, subcontractor, or builder. Reference rule 701—26.18(422,423) for an extensive explanation of this matter.

219.21(2) Exempt sales, including lease or rental of equipment. Beginning July 1, 2005, the sales price on the sale in any form, including lease or rental, of the following types of equipment is exempt from the tax imposed by Iowa Code chapter 423: self-propelled building equipment, self-constructed cranes, pile drivers, structural concrete forms, regular and motorized scaffolding, generators, or attachments customarily drawn or attached to those items of equipment, including auxiliary attachments which improve the performance, safety, operation, or efficiency of the equipment and replacement parts and are directly and primarily used by contractors, subcontractors, and builders for new construction, reconstruction, alterations, expansion, or remodeling of real property or structures. The sales price from a sale in a form other than that of a lease or rental is not exempt from all excise tax. See 701—Chapter 241, division II, for an explanation of the new excise tax imposed on these transactions as of July 1, 2005.

These rules are intended to implement 2005 Iowa Code subsections 423.1(42), 423.2(1) "b" and "c," 423.2(6), 423.3(64), and 423.5(2) and 2005 Iowa Code Supplement subsections 423.3(37) and 423.3(85).

CHAPTER 223
SOURCING OF TAXABLE SERVICES

701—223.1(423) Definitions.

“Agreement” means the streamlined sales and use tax agreement authorized by subchapter IV of Iowa Code chapter 423 to provide a mechanism for establishing and maintaining a cooperative, simplified system for the application and administration of sales and use tax.

“Department” means, for the purpose of this chapter, the Iowa department of revenue.

“First use of a service” occurs, for the purpose of this chapter, at the location at which the service is received.

“First use of a service performed on tangible personal property” means, for the purpose of this chapter, receiving, with the ability to use, whether or not actually used, the tangible personal property on which the taxable service was performed.

“Governing board” means the group comprised of representatives of the member states of the agreement and created by the agreement to be responsible for the agreement’s administration and operation.

“Receive” or *“receipt,”* with regard to sales of services, means making “first use of services” pursuant to this chapter. For purposes of receipt of services performed on tangible personal property under rule 701—223.3(423), the location (or locations) where the purchaser (or the purchaser’s donee) regains possession or can potentially make first use of the tangible personal property on which the seller performed the service is the location (or locations) of the receipt of the service. The location where the seller performs the service is not determinative of the location where the purchaser receives the service. The terms “receive” and “receipt” do not include possession by a shipping company on behalf of the purchaser; this is treated as though the retailer delivered to the purchaser the tangible personal property on which the service was performed. When a shipping company delivers tangible personal property on which the service was performed, the service is deemed “received” where the shipping company delivers the tangible personal property to the purchaser. For the purposes of sales of personal care services described in rule 701—223.4(423), the location (or locations) where the service is performed on the purchaser (or the purchaser’s donee) is the location where the purchaser receives the service.

“Retailer” means and includes every person engaged in the business of selling taxable services at retail. “Retailer” includes a seller obliged to collect sales or use tax.

“Seller” means a person making sales, leases or rentals of services.
[ARC 0310C, IAB 9/5/12, effective 10/10/12]

701—223.2(423) General sourcing rules for taxable services. Except as otherwise provided in the agreement, retailers providing taxable services in Iowa shall source the sales of those services under the general destination sourcing regime described in Iowa Code section 423.15. In determining whether to apply the provisions of Iowa Code section 423.15 to the sale of a taxable service, it is necessary to determine the location where the service is received, first used, or could potentially be first used, by the purchaser or the purchaser’s donee. With respect to taxable services performed on tangible personal property, the location where the retailer performs the taxable service does not determine the location where the purchaser receives the service. This rule and subsequent rules in Chapter 223 clarify the application of the definition of “receive” or “receipt” to various categories of services to assist in applying the sourcing provisions of Iowa Code section 423.15 to sales of services. The provisions of these rules do not affect the obligation of a purchaser or lessee to remit additional tax, if any, to another taxing jurisdiction based on the use of the service at another location.

223.2(1) If an Iowa purchaser is determined to owe sales tax in another state based on first use, Iowa use tax may still apply. If, subsequent to the first use in another state, the product or result of a service is used in Iowa, Iowa use tax applies. (See Iowa Code section 423.5.)

223.2(2) If tax has been imposed on the sales price of services performed on tangible personal property in another state at a rate that is less than the Iowa use tax rate, the purchaser will have to pay Iowa use tax at a rate measured by the difference between the Iowa use tax rate and the tax rate imposed

in the state where the service was first used. (See Iowa Code section 423.22.) There is no local option use tax.

EXAMPLE: An Iowa resident first uses the results of services performed on tangible personal property in another state and pays that state's 5 percent sales tax to that state. The Iowa resident returns to Iowa to use the tangible personal property on which the service was performed. Iowa's use tax rate on the services performed on the tangible personal property is 6 percent. The resident must remit to the department 1 percent use tax; no local option use tax is due. If, on the other hand, the other state's sales tax rate is equal to or greater than Iowa's use tax rate, the Iowa resident does not have to remit use tax to the department on the services performed on tangible personal property.

[ARC 0310C, IAB 9/5/12, effective 10/10/12]

701—223.3(423) First use of services performed on tangible personal property.

223.3(1) *First use of services performed on tangible personal property defined.* A service performed on tangible personal property is a service that changes some aspect of the property, such as its appearance or function. Services with respect to tangible personal property, but not necessarily performed on tangible personal property, such as inspection and appraisal, are not addressed in this rule. Except as otherwise provided in the agreement or the rules adopted by the governing board, a service performed on tangible personal property is first used at, and sourced to, the location where the customer receives, regains possession of, or can potentially make first use of, whether or not actually used, the tangible personal property on which the seller performed the service. In general, this is the location where the tangible personal property is returned to the purchaser or the purchaser's donee.

223.3(2) *Sourcing of taxable services performed on tangible personal property as applied to local option sales and service tax.* A local option sales and service tax shall be imposed on the same basis as the state sales and service tax. With respect to sourcing of taxable services performed on tangible personal property, the local option sales and service tax sourcing rules shall be the same as the general destination regime described in Iowa Code section 423.15 and as set forth in rules 701—223.1(423) and 701—223.2(423) and subrule 223.3(1). However, the location of the taxable service performed on tangible personal property shall be sourced to the taxing jurisdiction, rather than to the state, where the customer regains possession or can potentially make first use of the tangible personal property on which the seller performed the service. Iowa does not impose a local option use tax.

223.3(3) *Specific examples of taxable enumerated services.* Specific examples of services performed on tangible personal property taxable in Iowa under Iowa Code section 423.2 include, but are not limited to:

- a. Alteration and garment repair;
- b. Vehicle repair and vehicle wash and wax;
- c. Boat repair;
- d. Carpentry;
- e. Roof, shingle and glass repair;
- f. Dry cleaning, pressing, dyeing, and laundering;
- g. Electrical and electronic repair and installation;
- h. Farm implement repair of all kinds;
- i. Furniture, rug, carpet, and upholstery repair and cleaning;
- j. Gun and camera repair;
- k. Household appliance, television, and radio repair;
- l. Jewelry and watch repair;
- m. Machine repair of all kinds, including office and business machine repair;
- n. Motor repair;
- o. Motorcycle, scooter, and bicycle repair;
- p. Pet grooming;
- q. Wood preparation;
- r. Sewing and stitching;
- s. Shoe repair and shoeshine; and

t. Taxidermy services.

223.3(4) *Examples of sourcing rules for motor and machine repair.* The following examples are intended to clarify when motor and machine repair services are deemed “received.”

EXAMPLE A: Ms. Brown of Muscatine, Iowa, takes her lawnmower to a repair shop in Moline, Illinois, to have its engine repaired. When the lawnmower is repaired, she picks it up at the Illinois repair shop and returns to Muscatine. The repair service is received at the repair shop location in Illinois since Ms. Brown has the potential first use of the repaired item at that location. The repair transaction is sourced to Illinois. Ms. Brown’s subsequent use of the repair services performed on the lawnmower obliges her to remit use tax to the department to the extent Iowa’s use tax rate exceeds Illinois’s tax rate on lawnmower repair services. That is, Ms. Brown must remit Iowa use tax at a rate measured by the difference between Iowa’s use tax rate and the tax rate imposed in Illinois on lawnmower repair services. If Illinois does not tax motor and machine repair, Ms. Brown must remit use tax to the Department at a rate equal to Iowa’s entire use tax rate.

EXAMPLE B: Same facts as in subrule 223.3(4), Example A, except that the Illinois repair shop delivers the repaired lawnmower to the owner’s residence in Iowa. In this case, the potential first use is at Ms. Brown’s residence. Thus, Ms. Brown receives the repair service at, and the repair service is sourced to, her residence in Iowa; Iowa sales tax is due.

EXAMPLE C: Mr. Cho, a homeowner in Iowa, contacts an appliance repair service provider located in Missouri to have a clothes dryer repaired. The repair service provider dispatches a technician to Mr. Cho’s home in Iowa to make the needed repairs. Mr. Cho received the repair service in Iowa because the potential first use of the repaired clothes dryer was in Iowa. This transaction is sourced to Iowa; Iowa sales tax is due.

EXAMPLE D: A manufacturer in Iowa uses gauges in its production process to ensure that its product meets specifications. Periodically, the manufacturer ships the gauges to a test laboratory in Minnesota to verify that they are producing proper measurements. The test laboratory tests the gauges and adjusts the calibration on the gauges. The test laboratory ships the gauges back to the manufacturer’s location in Iowa. The manufacturer regained possession and had potential first use of the gauges in Iowa so the transaction is sourced to the location of the manufacturer in Iowa; Iowa sales tax is due.

EXAMPLE E: Same facts as in subrule 223.3(4), Example D, except that the manufacturer picks up the calibrated gauges from the test laboratory in Minnesota. The potential first use of the calibrated gauges (the result of the test laboratory services) is in Minnesota, and the transaction is sourced to the test laboratory’s location in Minnesota. The manufacturer must remit use tax to the department to the extent Iowa’s use tax rate exceeds Minnesota’s tax rate on test laboratory services. That is, the manufacturer is obliged to pay Iowa use tax at a rate measured by the difference between Iowa’s use tax rate and the tax rate imposed in Minnesota on test laboratory services. If Minnesota does not tax test laboratory services, the manufacturer must remit use tax to the department at a rate equal to Iowa’s entire use tax rate.

EXAMPLE F: Same facts as in subrule 223.3(4), Example D, except that the manufacturer hires a shipping company, such as a common or contract carrier, to pick up the tested and recalibrated gauges from the test laboratory and deliver them to the manufacturer’s location in Iowa. Since the terms “receive” and “receipt” do not include possession by a shipping company on behalf of the purchaser, the transaction is sourced to the manufacturer’s location in Iowa where the manufacturer regains possession and has potential first use of the gauges. Iowa sales tax is due.

223.3(5) *Examples of sourcing rules for the painting of tangible personal property.* The following examples are intended to clarify when the service of painting of tangible personal property is deemed “received.”

EXAMPLE A: A law office in Iowa has antique bookcases it wishes to have painted. The bookcases are picked up by a painter and taken to and painted in the painter’s shop in Illinois. The painter then delivers the painted bookcases to the law office. The transaction is sourced to the location of the law office in Iowa; Iowa sales tax is due. If, instead, the law office sends one of its employees to the painter’s shop in Illinois to pick up the painted bookcases, the transaction is sourced to the painter’s location in Illinois where possession or potential first use occurs. The law office must remit use tax to the department to the extent Iowa’s use tax rate exceeds Illinois’s tax rate on painting services. If Illinois does not tax

painting services, the law office must remit use tax to the department at a rate equal to Iowa's entire use tax rate.

EXAMPLE B: A business in Davenport, Iowa, hires a painter from Rock Island, Illinois, to paint several file cabinets. The painter does the painting on site at the purchaser's office location. Because the file cabinets remain at the same location and the purchaser's potential first use of the cabinets is in Iowa, the transaction is sourced to the purchaser's office location in Davenport. Iowa sales tax is due.

223.3(6) *Example of sourcing rules for dry cleaning services.* The following example is intended to clarify when dry cleaning services are deemed "received."

EXAMPLE: Mr. Riley, a Council Bluffs, Iowa, resident, takes laundry to an Omaha, Nebraska, dry cleaner's store. After his clothing is dry-cleaned, Mr. Riley returns to the dry cleaner in Omaha to pick up the clothing. The dry cleaner returns the clothes to Mr. Riley at the dry cleaner's store. Mr. Riley regains possession of his dry-cleaned clothes at the store in Omaha, so the transaction is sourced to Nebraska. Mr. Riley must remit use tax to the department to the extent Iowa's use tax rate exceeds Nebraska's tax rate on dry-cleaning services. If Nebraska does not tax dry-cleaning services, then Mr. Riley must remit use tax to the department at a rate equal to Iowa's entire use tax rate.

223.3(7) *Example of sourcing rules for vehicle wash and wax services.* The following example is intended to clarify when vehicle wash and wax services are deemed "received."

EXAMPLE: Mr. Moyle lives in Sioux City, Iowa, but he drives his vehicle to a car wash in Dakota Dunes, South Dakota, for a vehicle wash and wax service. The car wash operator washes and waxes the vehicle in Dakota Dunes. When the car wash operator completes the vehicle wash and wax service, Mr. Moyle pays the car wash operator and drives back to Sioux City, Iowa. Since the owner regains possession of the car at the car wash, the transaction is sourced to South Dakota. Mr. Moyle must remit use tax to the department to the extent that Iowa's use tax rate exceeds South Dakota's tax rate on vehicle wash and wax services. If South Dakota does not tax vehicle wash and wax services, then Mr. Moyle must remit use tax to the department at a rate equal to Iowa's entire use tax rate.

223.3(8) *Examples of sourcing rules for animal grooming services.* The following examples are intended to clarify when animal grooming services are deemed "received."

EXAMPLE A: Ms. Decker of Lake Mills, Iowa, hires a mobile pet washing and grooming service based in Albert Lea, Minnesota, to come to her home and bathe and groom her dog Sascha. The grooming service is performed on Sascha at Ms. Decker's home in Lake Mills. Therefore, the pet washing service transaction is sourced to Ms. Decker's home in Iowa. Iowa sales tax is due.

EXAMPLE B: Mr. Marx who resides in Bettendorf, Iowa, takes his cat Fluffy to a Milan, Illinois, grooming shop. The cat groomer cuts and washes Fluffy's fur. Once Fluffy is groomed, Mr. Marx returns to the grooming shop, pays for the service, and drives Fluffy home to Bettendorf. Since Mr. Marx picks up Fluffy at the shop in Illinois, the first use of the grooming services is in Illinois, and the transaction is sourced to Illinois. Mr. Marx must remit use tax to the department to the extent Iowa's use tax rate exceeds Illinois's tax rate on animal grooming services. If Illinois does not tax animal grooming services, then Mr. Marx must remit use tax to the department at a rate equal to Iowa's entire use tax rate.

223.3(9) *Example of local option sales and service tax sourcing rules for camera repair services.* The following example is intended to clarify when camera repair services are deemed "received."

EXAMPLE: Mr. Pagano, a photographer in Promise City, Iowa, contacts Bob's Camera Shop, which is located in Appanoose County, Iowa, to arrange for one of his cameras to be repaired. Promise City has imposed local option sales and service tax. Bob's Camera Shop dispatches a repairperson to Mr. Pagano's studio in Promise City to repair the camera. Mr. Pagano receives the repair service in Promise City since he can potentially make first use of his repaired camera at that location. The repair service is sourced to Promise City even though the camera shop is located in Appanoose County. Local option sales and service tax imposed by Promise City and Iowa sales tax are due on the sales price of the camera repair service.

223.3(10) *Examples of local option sales and service tax sourcing rules for bicycle repair services.* The following examples are intended to clarify when bicycle repair services are deemed "received."

EXAMPLE A: Mr. Edwards, a resident of Slater, Iowa, contacts Bike-o-rama Repair Shop in Ankeny, Iowa, to arrange for his bicycle to be repaired. Slater has imposed local option sales and service tax; Ankeny has not. Mr. Edwards delivers his bicycle to Bike-o-rama and leaves it there to be repaired. Because he is a preferred customer, Bike-o-rama has one of its employees deliver Mr. Edwards' bicycle to his home in Slater when the bicycle repair service is completed. Mr. Edwards' potential first use of his bicycle is in Slater; therefore, the transaction is sourced to Slater. Local option sales and service tax is due even though Bike-o-rama is located in Ankeny where there is no local option sales and service tax. Iowa sales tax is also due.

EXAMPLE B: Same facts as in subrule 223.3(10), Example A, but Mr. Edwards picks up his repaired bicycle at Bike-o-rama in Ankeny. Because Mr. Edwards regains possession and can make potential first use of the repaired bicycle in Ankeny, the repair transaction is sourced to Ankeny, and no local option sales and service tax is due on the sales price of the repair. Iowa sales tax is due.

EXAMPLE C: Same facts as in subrule 223.3(10), Example A, but Bike-o-rama is located in Willow Glen, California, and Bike-o-rama ships Mr. Edwards' bike to his home in Slater, Iowa. Since the terms "receive" and "receipt" do not include possession by a shipping company on behalf of the purchaser, the transaction is sourced to Slater. Slater's local option sales and service tax is due even though Bike-o-rama is located in Willow Glen, California. Iowa sales tax is also due.

[ARC 0310C, IAB 9/5/12, effective 10/10/12]

701—223.4(423) Sourcing rules for personal care services.

223.4(1) Definition. "Personal care services" means services that are performed on the physical human body. Examples of personal care services governed by this rule include, but are not limited to:

- a. Barber and beauty services;
- b. Massage, excluding services provided by massage therapists licensed under Iowa Code chapter 152C;
- c. Reflexology;
- d. Reducing salons; and
- e. Tanning beds and salons.

223.4(2) Sourcing of personal care services. Except as otherwise provided in the agreement or the rules adopted by the governing board, a purchaser receives a personal care service within the meaning of rule 701—211.1(423) at the location where the services are performed, which is the same location where the services are received by the purchaser (or the purchaser's donee). The services will be received by the purchaser (or the purchaser's donee) either at the seller's location, pursuant to Iowa Code section 423.15(1) "a," or at the purchaser's (or the purchaser's donee) location, pursuant to Iowa Code section 423.15(1) "b."

223.4(3) Examples of sourcing of personal care services. The following examples are intended to clarify sourcing rules for personal care services.

EXAMPLE A: Mr. Fernandez, a resident of Illinois, goes to a barber shop to have his hair cut. The barber is located within Iowa. The barber is providing personal care services, and the sale of these services must be sourced to the location where the services are received (place of first use). Mr. Fernandez makes first use of the services in Iowa where his hair is cut. The sale is sourced to Iowa; Iowa sales tax is due.

EXAMPLE B: Ms. Jackson, a resident of Council Bluffs, Iowa, goes to a tanning salon in Omaha, Nebraska, and pays for use of a tanning bed. The tanning salon is providing personal care services, and the sale of these services must be sourced to the location of the tanning salon since this is where the services are received (place of first use). Since the tanning salon is located in Nebraska, the sale is sourced to Nebraska. If Nebraska taxes tanning salon services and that rate is lower than Iowa's use tax rate, Ms. Jackson is obliged to pay Iowa use tax to the department at a rate measured by the difference between Iowa's use tax rate and the tax rate imposed on tanning salon services in Nebraska. If Nebraska does not tax tanning salon services, then Ms. Jackson must remit use tax to the department at a rate equal to Iowa's entire use tax rate.

EXAMPLE C: Ms. Zastrow, a resident of Iowa, contacts a massage therapist (who is not licensed under Iowa Code chapter 152C) located in Nebraska for a therapeutic massage. Ms. Zastrow requests that the therapist perform the massage at Ms. Zastrow's residence in Iowa. The therapist travels to Ms. Zastrow's residence and performs the massage. The therapist is providing personal care services, and the sale of these services must be sourced to the location where the services are received (place of first use). Ms. Zastrow makes first use of the services in Iowa where the massage is performed. The sale is sourced to Iowa, and therefore Iowa sales tax is due.

[ARC 0310C, IAB 9/5/12, effective 10/10/12]

These rules are intended to implement Iowa Code sections 423.2, 423.15, and 423B.5.

[Filed ARC 0310C (Notice ARC 0199C, IAB 7/11/12), IAB 9/5/12, effective 10/10/12]

CHAPTER 224
TELECOMMUNICATION SERVICES

701—224.1(423) Taxable telecommunication service and ancillary service. The gross receipts from the sale of all telecommunication service and ancillary service are subject to the sales or use tax. This chapter applies to telecommunication service and ancillary service that are billed on or after November 23, 2011. For telecommunication service and ancillary service billed prior to November 23, 2011, refer to rule 701—18.20(422,423), Iowa Administrative Code.
[ARC 9814B, IAB 10/19/11, effective 11/23/11]

701—224.2(423) Definitions.

“800 service” means a telecommunication service that allows a caller to dial a toll-free number without incurring a charge for the call. The service is typically marketed under the name “800,” “855,” “866,” “877,” and “888” toll-free calling and any subsequent numbers designated by the Federal Communications Commission.

“900 service” means an inbound toll telecommunication service purchased by a subscriber that allows the subscriber’s customers to call in to the subscriber’s prerecorded announcement or live service. A 900 service does not include the charge for collection services provided by the seller of the telecommunication service to the subscriber or to services or products sold by the subscriber to the subscriber’s customer. The service is typically marketed under the name “900 service” and any subsequent numbers designated by the Federal Communications Commission.

“Air-to-ground radiotelephone service” means a radio service, as that term is defined in 47 CFR 22.99, in which common carriers are authorized to offer and provide radio telecommunication service for hire to subscribers in aircraft.

“Ancillary services” means services that are associated with or incidental to the provision of a telecommunication service. “Ancillary services” includes, but is not limited to, detailed telecommunication billing, directory assistance, vertical service, and voice mail services.

“Call-by-call basis” means any method of charging for telecommunication services in which the price is measured by individual calls.

“Communications channel” means a physical or virtual path of communications over which signals are transmitted between or among customer channel termination points.

“Conference bridging service” means an ancillary service that links two or more participants of an audio or video conference call and may include the provision of a telephone number. “Conference bridging service” does not include telecommunication services used to reach the conference bridge.

“Customer” means the person or entity that contracts with the seller of telecommunication services. If the end user of telecommunication services is not the contracting party, the end user of the telecommunication service is the customer of the telecommunication service. For purposes of sourcing sales of telecommunication service, the end user of the telecommunication service is the customer of the telecommunication service when the end user is not also the contracting party. “Customer” does not include a reseller of telecommunication service or for mobile telecommunication service of a serving carrier under an agreement to serve the customer outside the home service provider’s licensed service area.

“Customer channel termination point” means the location where the customer either inputs or receives the communications.

“Detailed telecommunication billing service” means an ancillary service of separately stating information pertaining to individual calls on a customer’s billing statement.

“Directory assistance” means an ancillary service of providing telephone number information and address information.

“End user” means the person who utilizes the telecommunication service. In the case of an entity, “end user” means the individual who utilizes the service on behalf of the entity.

“Fixed wireless service” means a telecommunication service that provides radio communication between fixed points.

“Gross receipts from the sale of telecommunication service” or *“gross receipts”* means all charges to any person which are necessary for the end user to secure the service, except those charges which are in the nature of a sale for resale (see subrule 224.4(9)). Such charges shall be taxable if the charges are necessary to secure telecommunication service in this state even though payment of the charge may also be necessary to secure other services.

“Home service provider” means the same as defined in Section 124(5) of Public Law 106-252, 4 U.S.C. § 124(5) (Mobile Telecommunications Sourcing Act). The home service provider is the facilities-based carrier or reseller with which the customer contracts for the provision of mobile telecommunication services.

“International” means a telecommunication service that originates or terminates in the United States and terminates or originates outside the United States, respectively. United States includes the District of Columbia or a U.S. territory or possession.

“Interstate” means a telecommunication service that originates in one United States state or a United States territory or possession and terminates in a different United States state or a United States territory or possession.

“In this state” means that telecommunication service is provided “in this state” only if both the points of origination and termination of the communication are within the borders of Iowa. Telecommunication service between any other points is “interstate” in nature and not subject to tax.

“Intrastate” means a telecommunication service that originates in one United States state or a United States territory or possession and terminates in the same United States state or a United States territory or possession.

“Mobile telecommunication service” means the same as that term is defined in Section 124(7) of Public Law 106-252, 4 U.S.C. § 124(7) (Mobile Telecommunications Sourcing Act) and is a radio communication service carried on between mobile stations or receivers and land stations and by mobile stations communicating among themselves. Refer also to Iowa Code section 423.2(9) as amended by 2011 Iowa Acts, Senate File 515, section 5.

“Mobile wireless service” means a telecommunication service that is transmitted, conveyed, or routed regardless of the technology used, whereby the origination or termination point or both of the transmission, conveyance, or routing are not fixed, including, by example only, telecommunication services that are provided by a commercial mobile radio service provider.

“Paging service” means a telecommunication service that provides transmission of coded radio signals for the purpose of activating specific pagers. This transmission may include messages and sounds.

“Pay telephone service” means a telecommunication service provided through any pay telephone. “Pay telephone service” also includes coin-operated telephone service paid for by inserting money into a telephone accepting direct deposits of money to operate.

“Place of primary use” means the street address representative of where the customer’s use of the telecommunication service primarily occurs, which must be the residential street address or the primary business street address of the customer. In the case of mobile telecommunication service, the place of primary use must be within the licensed service area of the home service provider.

“Postpaid calling service” means the telecommunication service obtained by making a payment on a call-by-call basis, either through use of a credit card or payment mechanism such as a bank card, travel card, credit card or debit card, or by charge made to a telephone number which is not associated with the origination or termination of the telecommunication service. A postpaid calling service includes a telecommunication service, except a prepaid wireless calling service that would be a prepaid calling service except it is not exclusively a telecommunication service.

“Prepaid calling service” means the right to access exclusively telecommunication services, which must be paid for in advance and which enable the origination of calls using an access number or authorization code, whether manually or electronically dialed, that are sold in predetermined units or dollars of which the number declines with use in a known amount.

“Prepaid wireless calling service” means a telecommunication service that provides the right to utilize mobile wireless service as well as other non-telecommunication services, including the download of digital products delivered electronically, content and ancillary services, which must be paid for in

advance and that is sold in predetermined units or dollars of which the number declines with use in a known amount.

“Private communication service” means a telecommunication service that entitles the customer to exclusive or priority use of a communications channel or group of channels between or among termination points, regardless of the manner in which such channel or channels are connected, and includes switching capacity, extension lines, stations, and any other associated services that are provided in connection with the use of such channel or channels.

“Residential telecommunication service” means telecommunication services or ancillary services provided to an individual for personal use at a residential address, including an individual dwelling unit, such as an apartment. In the case of institutions where individuals reside, such as schools or nursing homes, telecommunication services are considered residential if they are provided to and paid for by an individual resident rather than the institution.

“Service address” means:

1. The location of the telecommunication equipment to which a customer’s call is charged and from which the call originates or terminates, regardless of where the call is billed or paid.

2. If the location in numbered paragraph “1” is not known, “service address” means the origination point of the signal of the telecommunication service first identified by either the seller’s telecommunication system or in information received by the seller from its service provider, where the system used to transport such signals is not that of the seller.

3. If the locations in numbered paragraphs “1” and “2” are not known, the service address means the location of the customer’s place of primary use.

“Telecommunication service” means the electronic transmission, conveyance, or routing of voice, data, audio, video, or any other information or signals to a point, or between or among points. The term includes any transmission, conveyance, or routing in which computer processing applications are used to act on the form, code, or protocol of the content for purposes of transmission, conveyance, or routing without regard to whether such service is referred to as voice-over Internet protocol services or is classified by the Federal Communications Commission as enhanced or value-added. “Telecommunication service” does not include the following:

1. Data processing and information services that allow data to be generated, acquired, stored, processed, or retrieved and delivered by an electronic transmission to a purchaser where the purchaser’s primary purpose for the underlying transaction is the processed data or information;

2. Installation or maintenance of wiring or equipment on a customer’s premises;

3. Tangible personal property;

4. Advertising, including but not limited to directory advertising;

5. Billing and collection services provided to third parties;

6. Internet access service;

7. Radio and television audio and video programming services, regardless of the medium, including the furnishing of transmission, conveyance, or routing of the service by the programming service provider. Radio and television audio and video programming services shall include, but not be limited to, cable service as defined in 47 U.S.C. § 522(6) and audio and video programming services delivered by a commercial mobile radio service provider, as defined in 47 CFR 20.3;

8. Ancillary services;

9. Digital products delivered electronically, including but not limited to software, music, video, reading materials or ring tones.

“Value-added non-voice data service” means a service that otherwise meets the definition of telecommunication service in which computer processing applications are used to act on the form, content, code, or protocol of the information or data primarily for a purpose other than transmission, conveyance, or routing.

“Vertical service” means an ancillary service that is offered in connection with one or more telecommunication services, which offers advanced calling features that allow customers to identify callers and to manage multiple calls and call connections. Nonexclusive examples of vertical service include call forwarding, caller ID, three-way calling, and conference bridging services.

“Voice mail service” means an ancillary service that enables the customer to store, send, or receive recorded messages. Voice mail service does not include any vertical services that the customer may be required to have in order to utilize the voice mail service.

[ARC 9814B, IAB 10/19/11, effective 11/23/11]

701—224.3(423) Imposition of tax.

224.3(1) Taxable telecommunication service and ancillary service. The gross receipts from the sale of telecommunication service and ancillary service are subject to the sales or use tax. The following is a nonexclusive list of telecommunication services subject to the Iowa sales and use tax:

- a. Air-to-ground radio telephone service;
- b. Ancillary services except detailed communications billing service;
- c. Conference bridging service;
- d. Fixed wireless service;
- e. Mobile wireless service;
- f. Pay telephone service;
- g. Postpaid calling service;
- h. Prepaid calling service;
- i. Prepaid wireless calling service;
- j. Private communication service;
- k. Residential telecommunication service.

224.3(2) Other taxable services and circumstances. The following is a description of services and circumstances under which certain charges associated with telecommunication service are subject to tax:

a. *Long distance charges.* Charges imposed or approved by the utilities division of the department of commerce which are necessary to secure long distance service in this state, for example, “end user intrastate access charges,” are taxable. These charges are taxable whether they result from an expense incurred from operations or are imposed by the mandate of the utilities division and unrelated to any expense actually incurred in providing the service.

b. *Gross receipts from services performed by another company.* Gross receipts collected by a company (selling company) from the end users of telecommunication services and ancillary services performed in this state by another company (providing company) are considered to be the taxable gross receipts of the selling company. The situation is similar to a consignment sale of tangible personal property. Tax must be remitted by the selling company.

c. *Directory assistance.* Charges for directory assistance service rendered in this state are subject to tax.

d. *Electrical installation and repair.* The gross receipts from the installation or repair of any inside wire that provides electrical current that allows an electronic device to function are subject to tax. These gross receipts are from the enumerated service of electrical repair or installation. The gross receipts from “inside wire maintenance charges” for services performed under a service or warranty contract are also subject to tax. Depending upon the circumstances, these gross receipts are for the enumerated service of “electrical repair” or are incurred under an “optional service or warranty contract” for an enumerated service. In either event, the receipts are subject to tax.

e. *Electrical installation or repair: billing methodology.* The gross receipts for the repair or installation of inside wire or the repair or installation of any electronic device, including a telephone or telephone switching equipment, are subject to tax regardless of the method used to bill the customer for the service. These methods include but are not limited to:

- (1) A flat fee or a flat hourly charge that covers all costs including labor and materials;
- (2) A premises visit or trip charge;
- (3) A single charge covering and not distinguishing between charges for labor and materials;
- (4) A charge with labor and material segregated; or
- (5) A charge for labor only.

f. *Nonitemized taxes and charges.* Any federal taxes or charges that are not separately stated or billed are subject to Iowa sales tax.

g. Rental of tangible personal property. The gross receipts from the rental of any device for home or office use or to provide a telecommunication service to others are taxable as the rental of tangible personal property. The gross receipts from rental include rents, royalties, and copyright and license fees. Any periodic fee for maintenance of the device which is included in the gross receipts for the rental of the device is also subject to tax.

h. Sales of tangible personal property. The sale of any device, new or used, is subject to tax both when the device is in place on the customer's premises at the time of the sale and if the device is sold to the customer elsewhere. The sale of an entire inventory of devices may or may not be subject to tax, depending upon whether it qualifies for the casual sales exemption. See Iowa Code section 423.3. Other exemptions may be applicable as well.

i. Mandatory charges or fees. Any mandatory handling or other charges billed to a customer for sending the customer an electronic device by mail or by a delivery service are subject to tax. Charges for a mandatory service rendered in connection with the sale of tangible personal property are considered by the department to be a part of the gross receipts from the sale of the property itself and therefore subject to tax.

j. Deposits. Any portion of a deposit utilized by a company as payment for the sale of tangible personal property or a taxable service is subject to tax as part of gross receipts.

k. Municipal utilities. Sales of telecommunication service and ancillary service to any tax-levying body used by or in connection with the operation of any municipally owned utility engaged in selling gas, electricity or heat to the general public are subject to tax. These sales are an exception to the exemption for federal and state government. See subrule 224.4(5).

l. Fax. The service of sending or receiving any document commonly referred to as a "fax" from one point to another within this state is subject to sales tax.

EXAMPLE A. Klear Kopy Services is located in Des Moines, Iowa. Klear Kopy charges a customer \$2 to transmit a fax (via Klear Kopy's fax machine) to Dubuque, Iowa. The \$2 is taxable gross receipts. Midwest Telephone Company charges Klear Kopy \$500 per month for the intrastate communication service on Klear Kopy's dedicated fax line. The \$500 is also gross receipts from a taxable communication service.

EXAMPLE B. The XYZ Law Firm is located in Des Moines, Iowa. The firm owns a fax machine and uses the fax machine in the performance of its legal work to transmit and receive various documents. The firm does not perform faxing services but will, on billings for legal services to clients, separately state the amount of a billing which is attributable to expenses for faxing. For example, "bill to John Smith for August 1997, \$1,000 for legal services performed, fax expenses which are part of this billing—\$30." The \$30 is not gross receipts for the performance of any taxable service because the faxing service is only incidental to the performance of the nontaxable legal services.

[ARC 9814B, IAB 10/19/11, effective 11/23/11]

701—224.4(423) Exempt from the tax. This rule provides various specific circumstances involving nontaxable telecommunication service and ancillary service. The following is a nonexclusive list of services that are not subject to the Iowa sales and use tax:

224.4(1) Detailed communications billing service.

224.4(2) Internet access fees or charges.

224.4(3) Value-added non-voice data service.

224.4(4) Separately stated and separately billed charges. Fees and charges that are separately stated and billed are exempt from the sales and use tax. This exemption includes the following items when separately stated and billed:

a. Fees and charges for securing only interstate telecommunication services.

b. Federal taxes.

c. Fees and charges for only interstate directory assistance.

224.4(5) Government entities. Sales of telecommunication service and ancillary service to the United States government or its agencies or to the state of Iowa or its agencies are not subject to sales or use tax. This exemption includes sales made to all divisions, boards, commissions, agencies or

instrumentalities of federal, Iowa, county or municipal government. In order to be a sale to the United States government or to the state of Iowa, the government or agency involved must make the purchase of the services and pay the purchase price of the services directly to the vendor. Telecommunication service providers should obtain an exemption certificate from each agency for their records. An exception to this exemption is sales to any tax-levying body used by or in connection with the operation of any municipally owned utility engaged in selling gas, electricity or heat to the general public; such sales are subject to tax.

224.4(6) Private nonprofit educational institutions. Sales of telecommunication service and ancillary service to private, nonprofit educational institutions in this state for educational purposes are exempt from tax.

224.4(7) Enhanced 911 surcharge. An enhanced 911 emergency telephone service surcharge is a surcharge for a service which routes a 911 call to the appropriate public safety answering point and automatically displays a name, address, and telephone number of an incoming 911 call at that answering point. A surcharge for enhanced 911 emergency telephone service is not subject to sales tax if:

- a. The amount is no more than \$1 per month per telephone access line; and
- b. The surcharge is separately identified and separately billed.

224.4(8) Return of deposit. The return to the customer of any portion of a deposit amount paid by that customer to a company providing telecommunication service is not subject to tax.

224.4(9) Resale exemption. Services or facilities furnished by one telecommunication company to another commercial telecommunication company that the second telecommunication company then furnishes to its customers qualify for the resale exemption under Iowa Code section 423.3(2), including any carrier access charges.

224.4(10) On-line services. Any contracted on-line service is exempt from tax if the information is made available through a computer server. The exemption applies to all contracted on-line services, as long as they provide access to information through a computer server.

224.4(11) New construction. The repair or installation of inside wire or the repair or installation of any electronic device, including a telephone or telephone switching equipment, that is performed as part of or in connection with new construction, reconstruction, alteration, expansion or remodeling of a building or structure is exempt from Iowa tax. For more information about the exemptions for new construction, see 701—Chapter 219.

[ARC 9814B, IAB 10/19/11, effective 11/23/11]

701—224.5(423) Bundled transactions in telecommunication service.

224.5(1) A “bundled transaction” is the retail sale of two or more products where:

- a. The products are otherwise distinct and identifiable; and
- b. The products are sold for one nonitemized price.

A bundled transaction does not include the sale of any products for which the sales price varies or is negotiable based on the purchaser’s selection of the products included in the transaction.

224.5(2) In the case of a bundled transaction that includes telecommunication service, ancillary service, Internet access, or audio or video programming service, either separately or in combination:

a. If the price is attributable to products that are taxable and products that are nontaxable, the portion of the price attributable to the nontaxable products will be subject to tax unless the provider can identify by reasonable and verifiable standards the portion from the provider’s books and records that are kept in the regular course of business for other purposes, including, but not limited to, nontax purposes.

b. If the price is attributable to products that are subject to tax at different tax rates, the total price may be treated as attributable to the products subject to tax at the highest tax rate unless the provider can identify by reasonable and verifiable standards the portion of the price attributable to the products subject to tax at the lower rate from the provider’s books and records that are kept in the regular course of business for other purposes, including, but not limited to, nontax purposes.

224.5(3) The provisions of this rule apply unless otherwise provided by federal law.

[ARC 9814B, IAB 10/19/11, effective 11/23/11]

701—224.6(423) Sourcing telecommunication service.

224.6(1) The general sourcing principles found in Iowa Code section 423.15 apply to telecommunication services and ancillary services unless the service falls under one of the exceptions set forth in subrule 224.6(2).

224.6(2) Exceptions. The following telecommunication services and products are sourced as follows:

a. Mobile telecommunication service is sourced to the place of primary use, unless the service is prepaid wireless calling service.

b. The sale of prepaid calling service or prepaid wireless calling service is sourced as provided under Iowa Code section 423.15. However, in the case of prepaid wireless calling service, Iowa Code section 423.15(1) “e” shall include as an option the location associated with the mobile telephone number.

EXAMPLE 1: An Iowa seller sells a prepaid wireless service airtime card to a consumer at an Iowa retail location. The sale of the prepaid wireless service will be sourced to Iowa.

EXAMPLE 2: An Iowa resident purchases a prepaid wireless service airtime card at a Nebraska retail location. The sale of the prepaid wireless service will be sourced to Nebraska.

EXAMPLE 3: An Iowa consumer with an Iowa billing and mailing address purchases prepaid wireless service through a retailer’s Web site. No items are delivered. The sale would be sourced to the consumer’s Iowa billing address.

EXAMPLE 4: A seller based in California uses a Web site to sell prepaid wireless services to consumers in a number of states. A consumer with an Iowa billing address and a Nebraska mailing address purchases prepaid wireless service from the seller’s Web site. The consumer already owns a prepaid wireless phone; therefore, no item is delivered. Since there is no in-person transaction, and no item delivered, the sale would be sourced to the consumer’s billing address in Iowa.

EXAMPLE 5: A seller based in California uses a Web site to sell prepaid wireless services to consumers in a number of states. A consumer with an Iowa mailing address and a Florida billing address purchases a prepaid wireless phone and 100 minutes of prepaid wireless service from the California seller. The prepaid wireless phone is shipped to the Iowa mailing address. The sale would be sourced to Iowa.

EXAMPLE 6: A consumer who is currently living in Iowa to attend a local university orders prepaid wireless service from a California seller through the seller’s Web site. No items are delivered. The consumer uses a Nebraska billing address. The sale would be sourced to Nebraska.

c. A sale of a private telecommunication service is sourced as follows:

(1) Service for a separate charge related to a customer channel termination point is sourced to each level of jurisdiction in which the customer channel termination point is located.

(2) Service where all customer termination points are located entirely within one jurisdiction or levels of jurisdiction is sourced in the jurisdiction in which the customer channel termination points are located.

(3) Service for segments of a channel between two customer channel termination points located in different jurisdictions and which segments of channel are separately charged is sourced 50 percent in each level of jurisdiction in which the customer channel termination points are located.

(4) Service for segments of a channel located in more than one jurisdiction or levels of jurisdiction and which segments are not separately billed is sourced in each jurisdiction based on the percentage determined by dividing the number of customer channel termination points in the jurisdiction by the total number of customer channel termination points.

d. The sale of Internet access service is sourced to the customer’s place of primary use.

e. The sale of an ancillary service is sourced to the customer’s place of primary use.

f. A postpaid calling service is sourced to the origination point of the telecommunication signal as first identified by either:

(1) The seller’s telecommunication system; or

(2) Information received by the seller from its service provider, where the system used to transport the signals is not that of the seller.

g. The sale of telecommunication service sold on a call-by-call basis is sourced to:

- (1) Each level of taxing jurisdiction where the call originates and terminates in that jurisdiction; or
- (2) Each level of taxing jurisdiction where the call either originates or terminates and in which the service address is also located.

h. The sale of telecommunication service sold on a basis other than a call-by-call basis is sourced to the customer's place of primary use.

i. The sale of the following telecommunication services is sourced to each level of taxing jurisdiction as follows:

(1) A sale of mobile telecommunication service, other than prepaid calling service, is sourced to the customer's place of primary use as required by the federal Mobile Telecommunications Sourcing Act.

(2) A sale of postpaid calling service is sourced to the origination point of the telecommunication signal as first identified by either the seller's telecommunication system or information received by the seller from its service provider, where the system used to transport such signals is not that of the seller.

[ARC 9814B, IAB 10/19/11, effective 11/23/11; ARC 0527C, IAB 12/12/12, effective 1/16/13]

701—224.7(423) General billing issues. This rule is specifically applicable to companies and other persons providing telecommunication service and ancillary service in this state.

224.7(1) Retailers liable for collecting and remitting tax. Retailers that sell taxable telecommunication service and ancillary service are liable for collecting and remitting the state sales or use tax and any applicable local sales tax on the amounts of the sales.

224.7(2) Billing date and tax period. Companies that bill their subscribers for telecommunication service on a quarterly, semiannual, annual, or any other periodic basis must include the amount of those billings in their gross receipts. The date of the billing determines the period for which sales tax is remitted. For example, if the date of a billing is March 31, and the due date for payment of the bill without penalty is April 20, tax upon the gross receipts contained in the bill must be included in the sales tax return for the first quarter of the year. The same principle must be used to determine when tax will be included in payment of a sales tax deposit to the department.

224.7(3) Permitting business offices. All companies must have a permit for each business office that provides telecommunication service in this state. The companies must collect and remit tax upon the gross receipts from the operation of those offices.

224.7(4) Credit. A taxpayer subject to sales or use tax on telecommunication service and ancillary service who has paid any legally imposed sales or use tax on such service to another jurisdiction outside the state of Iowa is allowed a credit against the sales or use tax imposed by the state of Iowa equal to the sales or use tax paid to the other taxing jurisdiction(s).

224.7(5) Direct pay permit not applicable to telecommunication services. The department may issue a direct pay permit that allows the holder to purchase tangible personal property or taxable services without payment of the tax to the seller. However, a direct pay permit holder cannot use the direct pay permit for the purchase of telecommunication services and ancillary services. The seller must charge and collect the sales or use tax from the purchaser on the taxable sales of telecommunication services and ancillary services.

224.7(6) Guaranteed amounts for coin-operated telephones. If a minimum amount is guaranteed to a company from the operation of any coin-operated telephone, tax is computed on the greater of the minimum amount guaranteed or the actual taxable gross receipts collected.

[ARC 9814B, IAB 10/19/11, effective 11/23/11]

701—224.8(34A) Prepaid wireless E911 surcharge.

224.8(1) Definitions. The definitions in 701—224.2(423) apply to this rule. The following definitions are also applicable to this rule.

“Consumer” means a person who purchases prepaid wireless telecommunications service in a retail transaction.

“Department” means the department of revenue.

“E911” means enhanced 911 emergency communications service.

“Prepaid wireless E911 surcharge” means the surcharge that is required to be collected by a seller from a consumer in the amount established under this rule.

“Provider” means a person who provides prepaid wireless telecommunications service pursuant to a license issued by the Federal Communications Commission.

“Retail transaction” means the purchase of prepaid wireless telecommunications service from a seller for any purpose other than resale. If more than one separately priced item of prepaid wireless calling service is purchased by an end user, each item purchased shall be deemed to be a separate retail transaction.

Items of prepaid wireless calling service include, but are not limited to, prepaid wireless phones, prepaid wireless phone calling cards, rechargeable prepaid wireless phones, rechargeable prepaid wireless phone calling cards, and prepaid wireless service plans.

EXAMPLE 1: If a seller sells two prepaid wireless phone calling cards, two retail transactions have occurred.

EXAMPLE 2: If a seller sells additional minutes for a rechargeable prepaid wireless phone calling card that was purchased at an earlier date, a retail transaction has occurred.

EXAMPLE 3: If a seller sells three separate one-month service plans to a consumer during one sale, three retail transactions have occurred.

EXAMPLE 4: If the consumer has the ability to purchase additional minutes directly from a prepaid wireless phone, each time minutes are purchased, a retail transaction occurs.

“Seller” means a person that sells prepaid wireless telecommunications service to another person.

224.8(2) Registration. Each seller that sells prepaid wireless service must register according to the procedures established by the department. The department will make information regarding the procedures available to the public.

224.8(3) Collecting, filing, and remitting.

a. Each seller is responsible for collecting the applicable E911 surcharge from the consumer with respect to each retail transaction occurring in this state. A seller may determine whether the transaction occurs in this state by referring to the department rules on the sourcing of sales of prepaid wireless telecommunications service located in paragraph 224.6(2) *“b.”* See also Iowa Code sections 34A.7B(4), 423.20 and 423.15.

b. The surcharge must be separately itemized on the invoice, receipt or other similar document, or otherwise disclosed to the consumer.

c. The prepaid wireless E911 surcharge is the liability of the consumer and not of the seller or any provider, except that the seller shall be liable to remit all prepaid wireless E911 surcharges that the seller collects from consumers as provided in paragraph 224.8(3) *“a,”* including all such surcharges that the seller is deemed to collect where the amount of the surcharge has not been separately stated on an invoice, receipt, or similar document provided to the consumer by the seller.

d. The amount of the prepaid wireless E911 surcharge that is collected by a seller from a consumer, if such amount is separately stated on an invoice, receipt, or other similar document provided to the consumer by the seller, shall not be included in the base for measuring any tax, fee, other surcharge, or other charge that is imposed by this state, any political subdivision of this state, or any intergovernmental agency.

e. The seller must complete an E911 Surcharge Schedule and the surcharge portion of the Iowa Sales Tax and Surcharge Return or Iowa Retailer’s Use Tax and Surcharge Return and file the information with the department.

f. The schedule, return and the collected surcharge are due at the times provided by Iowa Code chapter 423 with respect to the sales and use tax.

g. The seller may deduct and retain 3 percent of prepaid wireless E911 surcharges that are collected by the seller from consumers.

h. The seller is not required to collect the surcharge if a minimal amount of prepaid wireless telecommunications service is sold in conjunction with a prepaid wireless device for a single, nonitemized price. A minimal amount of service is any service denominated as \$5 or less or ten minutes or less.

EXAMPLE: If a seller sells a prepaid wireless phone that comes with 10 minutes of service, and the price of the service is not itemized, the seller is not required to collect the surcharge. But if the seller sells a prepaid wireless phone with 15 minutes of service, the seller must collect the surcharge, regardless of whether the price of the service is itemized.

224.8(4) *Audit, appeal, and enforcement.*

a. The audit and appeal procedures applicable to sales and use tax under Iowa Code chapter 423 shall apply to the prepaid wireless E911 surcharge. See also Iowa Code sections 421.10 and 421.60.

b. Pursuant to the authority established in Iowa Code chapter 423, the department shall have the power to assess the seller for penalty and interest on any past due surcharge and exercise any other enforcement powers established in Iowa Code chapter 423. See also Iowa Code sections 421.7 and 421.27.

c. The seller shall maintain, and shall make available to the department for inspection for three years, its books and records in a manner that will permit the department to determine whether the seller has complied with or is complying with the provisions of Iowa Code section 34A.7B.

224.8(5) *Procedures for documenting that a sale is not a retail transaction.* The procedures for establishing that a sale of prepaid wireless telecommunications service is not a sale is similar to the procedure for documenting sale for resale transactions under Iowa Code chapter 423.

224.8(6) *Procedures for remitting the surcharge to the treasurer.* The department shall transfer all remitted prepaid wireless E911 surcharges to the treasurer of state for deposit in the E911 emergency communications fund created under Iowa Code section 34A.7A, subsection 2, within 30 days of receipt of the E911 surcharge from sellers. Prior to remitting the surcharges to the treasurer, the department shall deduct and retain an amount, not to exceed 2 percent of collected surcharges, to reimburse the department's direct costs of administering the collection and remittance of prepaid wireless E911 surcharges.

This rule is intended to implement Iowa Code section 34A.7B.
[ARC 0527C, IAB 12/12/12, effective 1/16/13]

701—224.9(423) State sales tax exemption for central office equipment and transmission equipment. Effective July 1, 2012, central office equipment and transmission equipment primarily used in the furnishing of telecommunications services on a commercial basis are exempt when used by the following providers: local exchange carriers and competitive local exchange service providers as defined in Iowa Code section 476.96; franchised cable television operators, mutual companies, municipal utilities, cooperatives, and companies furnishing communications services that are not subject to rate regulation as provided in Iowa Code chapter 476; long distance companies as defined in Iowa Code section 477.10; or for a commercial mobile radio service as defined in 47 C.F.R. §20.3. The exemption was phased in beginning in 2006 according to the schedule described in subrule 224.9(2).

224.9(1) *Definitions.*

“*Central office equipment*” means equipment utilized in the initiating, processing, amplifying, switching, or monitoring of telecommunications services including ancillary equipment and apparatus which support, regulate, control, repair, test, or enable such equipment to accomplish its function. Central office equipment includes:

1. Stored program control digital switches and their associated equipment used to switch or route communication signals with a system from the origination point to the appropriate destination.
2. Peripheral equipment used to support the transmission of communications over the network such as emergency power equipment, fault alarm equipment, multiplex equipment, digital cross connects, terminating equipment, fiber optic electronics, communication hardware equipment, and test equipment.
3. Circuit equipment which utilizes the message path to carry signaling information or which utilizes separate channels between switching offices to transmit signaling information independent of the subscribers' communication paths or transmission channels.

4. Radio equipment including radio-transmitters and receivers utilized to transmit communication signals through the air from one location to another. Radio equipment also includes repeaters, which are located every 20 to 30 miles; at these points, radio signals are received, amplified and retransmitted.

“*Transmission equipment*” means equipment utilized in the process of sending information from one location to another location. Transmission equipment includes ancillary equipment and apparatus which support, regulate, control, repair, test, or enable such equipment to accomplish its function.

224.9(2) *Schedule for phase-in of exemption.* This exemption was phased-in beginning in 2006 according to the following schedule:

a. If the sale or rental occurs on or after July 1, 2006, through June 30, 2007, one-seventh of the state tax on the sales price shall be refunded.

b. If the sale or rental occurs on or after July 1, 2007, through June 30, 2008, two-sevenths of the state tax on the sales price shall be refunded.

c. If the sale or rental occurs on or after July 1, 2008, through June 30, 2009, three-sevenths of the state tax on the sales price shall be refunded.

d. If the sale or rental occurs on or after July 1, 2009, through June 30, 2010, four-sevenths of the state tax on the sales price shall be refunded.

e. If the sale or rental occurs on or after July 1, 2010, through June 30, 2011, five-sevenths of the state tax on the sales price shall be refunded.

f. If the sale or rental occurs on or after July 1, 2011, through June 30, 2012, six-sevenths of the state tax on the sales price shall be refunded.

g. If the sale or rental occurs on or after July 1, 2012, the sales price is exempt and no payment of tax and subsequent refund are required.

224.9(3) *Refund claims.* For sales or rental occurring on or after July 1, 2006, through June 30, 2012, a refund of the tax paid as provided in subrule 224.9(2) must be applied for, not later than six months after the month in which the sale or rental occurred, in the manner and on the forms provided by the department. Refunds shall only be of the state tax collected. Refunds authorized shall accrue interest at the rate in effect under Iowa Code section 421.7 from the first day of the second calendar month following the date the refund claim is received by the department.

This rule is intended to implement Iowa Code section 423.3(47A).

[ARC 0527C, IAB 12/12/12, effective 1/16/13]

These rules are intended to implement Iowa Code chapter 423 as amended by 2011 Iowa Acts, Senate File 515.

[Filed ARC 9814B (Notice ARC 9675B, IAB 8/10/11), IAB 10/19/11, effective 11/23/11]

[Filed ARC 0527C (Notice ARC 0407C, IAB 10/17/12), IAB 12/12/12, effective 1/16/13]

CHAPTER 225
RESALE AND PROCESSING EXEMPTIONS PRIMARILY
OF BENEFIT TO RETAILERS

Rules in this chapter include cross references to provisions in 701—Chapters 15, 17, 18 and 26 that were applicable prior to July 1, 2004.

701—225.1(423) Paper or plastic plates, cups, and dishes, paper napkins, wooden or plastic spoons and forks, and straws. When paper or plastic cups, plates, and dishes, paper napkins, and wooden or plastic spoons, forks, and other utensils are sold with food or other items to a buyer, and the buyer uses or consumes the utensils, sales of those utensils to retailers shall be considered sales for resale. The sales price from the sale of such items by retailers to consumers or users shall be subject to tax.

When these articles are transferred in connection with a service or sold for free distribution by retailers apart from a retail sale, the transaction shall be deemed to be a retail sale to the retailer and shall be taxable.

Sales of reusable placemats to retailers that sell meals shall be subject to tax.

EXAMPLE 1. A retailer purchases napkins and disposable forks and knives for the retailer's restaurant. The retailer provides these items free of charge, apart from the retail sale of food at the retailer's restaurant. Sale of these items to the retailer is a retail sale and is subject to tax.

EXAMPLE 2. A retailer purchases napkins and disposable forks and knives for the retailer's restaurant. The retailer sells these items with tangible personal property to the retailer's customers. The sale of these items to the retailer is considered a sale for resale and is not subject to Iowa sales tax at the time of purchase.

This rule is intended to implement Iowa Code section 423.3(2).

701—225.2(423) A service purchased for resale. A service is purchased for resale when it is subcontracted by the person who is contracted to perform the service.

225.2(1) Services purchased for resale are purchased exempt from tax.

EXAMPLE 1. X is a printer and enters into a contract with Y to print 500 bulletins. X subcontracts the job to Z. Z prints the 500 bulletins for X. There is no tax on the contracts between X and Z since X is purchasing the printing service from Z for resale to Y.

EXAMPLE 2. B owns a used car lot. E purchases an automobile from B. As a condition of such sale, B agrees to make repairs to the automobile. However, B subcontracts such repair work to C. E has agreed to pay B for the repair services and for the sale price of the automobile. Under these circumstances, the repair services furnished by C to B constitute a sale of such services to B for resale to E, who is the consumer of these services.

EXAMPLE 3. B owns an auto repair shop and C brings an automobile in to have the air conditioner fixed. B is unable to fix the air conditioner so the auto is sent to G, who is an air-conditioning specialist. The sale of G's service to B is a sale for resale by B to C.

225.2(2) Services not purchased for resale. The tax on services must be collected at the time the service is complete even if the service is not purchased by the ultimate beneficiary.

EXAMPLE. A operates a test laboratory business. A agrees to provide testing services to B. In the course of conducting the tests, A rents equipment from C. In computing the fee which B has agreed to pay A for testing services, A will include A's costs, including the rental A paid to C in rendering the testing services. Under these circumstances, A furnished B with testing services, and not with the equipment rental services which C furnished to A. A is the consumer of the equipment rental services which are not resold to B, and B is the consumer of the testing services.

This rule is intended to implement Iowa Code section 423.3(2).

701—225.3(423) Services used in the repair or reconditioning of certain tangible personal property. Services are exempt from tax when used in the reconditioning or repairing of tangible

personal property of the type which is normally sold in the regular course of the retailer's business and which is held for sale by the retailer.

EXAMPLE 1. A owns a retail appliance store and contracts with B to repair a refrigerator that A is going to resell. A can purchase the repair service from B tax-free because A is regularly engaged in selling refrigerators and will offer the refrigerator for sale when it is repaired.

EXAMPLE 2. B, a used car dealer, owns a used car lot and contracts with C to repair a used car that B is going to sell. B can purchase the repair service from C tax-free because B is regularly engaged in selling used cars and will sell the used car after it is repaired.

EXAMPLE 3. C operates a retail farm implement dealership. C accepts a motorboat as part consideration for a piece of farm equipment. C then contracts with D to repair the motor on the boat. C does not normally sell motorboats in the regular course of C's business. Therefore, the service performed by D for C is subject to tax.

EXAMPLE 4. XYZ owns a retail radio and television store in Iowa and contracts with W to repair a television that XYZ is going to sell. XYZ can purchase television repair service tax-free from W because XYZ is regularly engaged in selling televisions subject to sales tax. However, in this instance XYZ sells the used television and delivers it into interstate commerce with the result that the Iowa sales tax is not collectible. Regardless of this fact, the exemption is applicable, and no Iowa tax is due for the television repair services performed.

This rule is intended to implement Iowa Code sections 423.1(50) and 423.1(51).

701—225.4(423) Tangible personal property purchased by a person engaged in the performance of a service.

225.4(1) In general.

a. Tangible personal property purchased by a person engaged in the performance of a service is purchased for resale and not subject to tax if (1) the provider and user of the service intend that a sale of the property will occur, and (2) the property is transferred to the user of the service in connection with the performance of the service in a form or quantity capable of a fixed or definite price value, and (3) the sale is evidenced by a separate charge for the identifiable piece or quantity of property.

b. Tangible personal property which is not sold in the manner set forth in "a" above is not purchased for resale and thus is subject to tax at the time of purchase by a person engaged in the performance of a service. Such tangible personal property is considered to be consumed by the purchaser who is engaged in the performance of a service, and the person performing the service shall pay tax upon the sale at the time of purchase.

EXAMPLE 1. An investment counselor purchases envelopes. These envelopes are used to send out monthly reports to the investment counselor's clients regarding their accounts. Tax is due at the time the investment counselor purchases the envelopes if the clients are not billed for these items. Each envelope is transferred to a client in a form or quantity which is capable of a fixed or definite price value. However, there must also be an actual sale to the client (customer) of an item of personal property in order that there be a "resale" of the item.

EXAMPLE 2. An automobile repair shop purchases solvents which are used in cleaning automobile parts and thus in performing its automobile repair service. Tax is due at the time the automobile repair shop purchases the solvents since the solvents are not sold to the customer and, in this case, the items are not transferred to a customer in a form or quantity which is capable of a fixed or definite price value. Thus, the solvents are deemed consumed by the purchaser engaged in the performance of the service.

EXAMPLE 3. A retailer purchases television picture tubes tax-free and makes a separate charge for the picture tube to the customer. Since the tube is transferred to the customer in a form or quantity capable of a fixed or definite price value, the retailer may purchase the picture tube exempt from tax for subsequent resale.

EXAMPLE 4. A beauty shop or barber shop purchases shampoo and other items to be used in the performance of its service. Tax is due at the time the beauty shop or barber shop purchases such items from its supplier because the customers of the beauty shop or barber shop are not separately billed for

the items and because the items are not transferred to the customer in a form or quantity capable of a fixed or definite price value. The items are consumed by the beauty shop or barber shop.

EXAMPLE 5. A car wash purchases water, electricity, or gas used in the washing of a car. The car wash would be the consumer of the water, electricity, or gas, and tax is due at the time of purchase. The items purchased by the car wash are not transferred to the customer in a form or quantity capable of a fixed or definite price value, and the customer is not billed for the items.

EXAMPLE 6. An accounting firm purchases plastic binders which are used to cover the reports issued to its customers. These binders would be subject to tax at the time of purchase by the firm where the customer of the firm is not billed for the item, because there is no sale to the customer.

EXAMPLE 7. A meat locker purchases materials such as wrapping paper and tape which it uses to wrap meat for customers who provide the locker with the meat. These materials would be subject to tax at the time of purchase by the meat locker because they are not sold to the customer in a form or quantity capable of a fixed or definite price value.

EXAMPLE 8. A jeweler purchases materials such as main springs and crystals to be used in the performance of a service. These items are purchased by the jeweler for resale when they are transferred to the customer in a form or quantity capable of a fixed or definite price value, and each item is actually sold to the customer as evidenced by a separate charge therefor.

EXAMPLE 9. A lawn care service applies fertilizer, herbicides, and pesticides to its customers' lawns. The following are examples of invoices to customers which are suitable to indicate a lawn care service's purchase of the fertilizer, herbicides, and pesticides for resale to those customers: "Chemicals...31 Gal....\$60"; "Fertilizer...50 lbs....\$100"; and "Materials applied to lawn...4 bushel...\$40". The following are examples of information placed upon an invoice which would not indicate a purchase for resale to the customers invoiced: "Fifty percent of the charge for this service is for materials placed on a lawn," or "Lawn chemicals...\$30" or "Fifty pounds of fertilizer was applied to this lawn."

225.4(2) *Purchases made by automobile body shops or garages with body shops.* Tangible personal property purchased by body shops can be purchased for resale provided both of the following conditions are met:

a. The property purchased for resale is actually transferred to the body shop's customer by becoming an ingredient or component part of the repair work. See Iowa Code section 423.3(2).

b. The property purchased for resale is itemized as a separate item on the invoice to the body shop's customer and is transferred to the customer in a form or quantity capable of a fixed or definite price value.

If either of the above two conditions is not met, there is no purchase for resale and the body shop is deemed the consumer of the item purchased.

When body shops purchase items which will be resold (see list of items in this rule) in the course of the repair activity, the vendors selling to the body shops are encouraged to accept a valid resale certificate at the time of purchase. Reference rule 701—15.3(422,423). Failure of the vendor to accept a valid resale certificate may subject that vendor to sales tax liability since the burden of proof would be on the vendor that a sale was made for resale. If the vendor cannot meet that burden, the vendor will be liable for the sales tax. Such burden is not met merely by a showing that the purchaser had obtained from the department an Iowa retail sales tax permit or retail use tax permit.

For insurance purposes, body shops are reimbursed by insurance companies for "materials" which such shops consume in rendering repair services. Some of the materials are transferred to the recipients of the repair services and some are not. Of those so transferred, such transfer is in irregular quantities and is not in a form or quantity capable of a fixed or definite price value. Therefore, body shops are generally deemed to be the consumers of materials and must pay tax on these items at the time of purchase. Nonexclusive examples of items most likely to be included in this category of "materials," whether actually transferred to customers of body shops or not, are as follows:

Abrasives

Battery water

Body filler or putty

Body lead

Bolts, nuts and washers
Brake fluid
Buffing pads
Chamois
Cleaning compounds
Degreasing compounds
Floor dry
Hydraulic jack oil
Lubricants
Masking tape
Paint
Polishes
Rags
Rivets and cotter pins
Sanding discs
Sandpaper
Scuff pads
Sealer and primer
Sheet metal
Solder
Solvents
Spark plug sand
Striping tape
Thinner
Upholstery tacks
Waxes
White sidewall cleaner

The following are nonexclusive examples of parts which can be purchased for resale since they are generally transferred to the body shop's customer during the course of the repair in a form or quantity capable of a fixed or definite price value and are generally itemized separately as parts.

Accessories
Batteries
Brackets
Bulbs
Bumpers
Cab corners
Chassis parts
Door guards
Door handles
Doors
Engine parts
Fenders
Floor mats
Grilles
Headlamps
Hoods
Hubcaps
Radiators
Rocker panels
Shock absorbers
Side molding
Spark plugs

Tires
Trim
Trunk lids
Wheels
Window glass
Windshield ribbon
Windshields

The following are nonexclusive examples of tools and supplies which are generally not transferred to the body shop's customer during the course of the repair and, therefore, could not be purchased for resale. The body shop is deemed the consumer of these items since they are not transferred to a customer. Therefore, the body shop must pay tax to the vendor at the time of purchase.

Air compressors and parts
Body frame straightening equipment
Brooms and mops
Buffers
Chisels
Drill bits
Drop cords
Equipment parts
Fire extinguisher fluids
Floor jacks
Hand soap
Hand tools
Office supplies
Paint brushes
Paint sprayers
Sanders
Signs
Spreaders for putty
Washing equipment and parts
Welding equipment and parts

Because of the nature of the body shop business and the formulas devised by the insurance industry to reimburse body shops for cost of "materials," it is possible for body shops, in their invoices to their customers, to separately set forth labor, resold parts, and materials. While the materials can be separately invoiced as one general item, there is no way to ascertain a definite and fixed price for each item of the materials listed in this rule and consumed by the body shops, and some of such individual materials are not even transferred by body shops to their customers. Therefore, the body shops are generally the "consumers" of "materials" and do not purchase them for resale. See *W. J. Sandberg Co. v. Iowa State Board of Assessments and Review*, 225 Iowa 103, 278 N.W. 643 (1938). Thus, body shops should pay tax to their suppliers on all materials purchased and consumed by body shops. If materials are purchased from non-Iowa suppliers that do not collect Iowa tax from body shops, such body shops should remit consumer use tax to the department of revenue on such materials.

Body shops must collect sales tax on the taxable service of repairing motor vehicles. See rule 701—221.62(423). However, due to the nature of the insurance formulas, it is possible for body shops to itemize that portion of their billing which would be for repair services and that portion relating to consumed "materials." It is also possible for body shops to itemize that portion of their charges for parts which they purchase for resale to their customers. Body shops do not and cannot resell the tools and supplies previously listed in this rule; their purchases of such items are taxable.

Therefore, as long as body shops separately itemize on their invoices to their customers the amounts for labor, parts, and for "materials," body shops should collect sales tax on the labor and the parts, but not on the materials as enumerated in this rule.

EXAMPLE. A body shop repairs a motor vehicle by replacing a fender and painting the vehicle. In doing the repair work, the body shop uses rags, sealer and primer, paint, solder, thinner, bolts, nuts and washers, masking tape, sandpaper, waxes, buffing pads, chamois, and polishes. In its invoice to the customer, the labor is separately listed at \$600, the part (fender) is separately listed at \$600, and the category of “materials” is separately listed for a lump sum of \$200, for a total billing of \$1,400. The Iowa sales tax computed by the body shop should be on \$1,200, which is the amount attributable to the labor and the parts. The materials consumed by the body shop were separately listed and would not be included in the tax base for the taxable “sales price,” as defined in Iowa Code section 423.1(47), which is taxable under Iowa Code section 423.2.

In this example, if the “materials” were not separately listed on the invoice, but had been included in either or both of the labor or parts charges by marking up such charges, the body shop would have to collect sales tax on the full charges for parts or labor even though tax was paid on materials by the body shop to its supplier at the time of purchase.

This rule is intended to implement Iowa Code sections 423.1(35) and 423.3(2).

701—225.5(423) Maintenance or repair of fabric or clothing. Sales of chemicals, solvents, sorbents, or reagents directly used and consumed in the maintenance or repair of fabric or clothing are exempt from tax. See 701—Chapter 211 for definitions of the terms “chemical,” “solvent,” “sorbent,” and “reagent.” This rule’s exemption is mainly applicable to dry-cleaning and laundry establishments; however, it is also applicable to soap or any chemical or solvent used to clean carpeting. The department presumes that a substance is “directly used” in the maintenance or repair of fabric or clothing if the substance comes in contact with the fabric or clothing during the maintenance or repair process. Substances which do not come into direct contact with fabric or clothing may, under appropriate circumstances, be directly used in the maintenance or repair of the fabric or clothing, but direct use will not be presumed.

The following are examples of substances directly used and consumed in the maintenance or repair of fabric or clothing: perchloroethylene (also known as “perch”) or petroleum solvents used in dry-cleaning machines and coming in direct contact with the clothing being dry-cleaned. Substances used to clean or filter the “perch” or petroleum solvents would also be exempt from tax, even though these substances do not come in direct contact with the clothing being cleaned. The sale of soap or detergents especially made for mixing with “perch” or petroleum solvents is exempt from tax. The sale of stain removers to dry cleaners is exempt from tax.

A commercial laundry’s purchase of detergents, bleaches, and fabric softeners is exempt from tax. A commercial laundry’s purchase of water, which is a solvent, is also exempt from tax if purchased for use in the cleaning of clothing.

The purchase of starch by laundries and “sizing” by dry cleaners is not exempt from tax.

This rule is intended to implement Iowa Code section 423.3(50).

701—225.6(423) The sales price from the leasing of all tangible personal property subject to tax. See 701—Chapter 211 for the definitions of the words “lease or rental” and “tangible personal property” which are applicable to this rule.

225.6(1) Past and present taxation of leases. Prior to July 1, 2004, the rental of tangible personal property was treated as a taxable service for the purposes of Iowa sales and use tax law; reference 2003 Iowa Code section 422.43(11) and 701—subrule 26.18(2). The “rental” of tangible personal property was not a “sale” of that property, and therefore a purchase for subsequent leasing or rental was not a purchase for resale. See *Cedar Valley Leasing, Inc. v. Iowa Department of Revenue*, 274 N.W.2d 357 (Iowa 1979).

On and after July 1, 2004, the rental of tangible personal property is treated as the sale of that property for the purposes of Iowa sales and use tax law because “leases” and “rentals” of tangible personal property are taxable retail “sales” of that property. The rental of tangible personal property is no longer listed as a taxable enumerated service. The resale exemption in favor of sales for resale of tangible personal property is now applicable to sales and leases of tangible personal property for subsequent rental or lease.

EXAMPLE A. Al's Rent All buys blowers, hand tools, ladders, plumbers' snakes, sanders, and tillers for subsequent short-term rental to various customers. Al's purchases of these items of equipment are purchases for resale and are exempt from tax as of July 1, 2004.

EXAMPLE B. In addition to its purchases of equipment for subsequent rental, Al's Rent All leases from its suppliers, long-term, items of heavier equipment such as backhoes, forklifts, manlifts, tractors, and trenchers, again for subsequent leasing to various customers. Since the leasing of tangible personal property is now a purchase of that property, Al's leasing for later sublease is a purchase of tangible personal property and is exempt from tax at the time of purchase as the purchase of tangible personal property for subsequent resale.

225.6(2) *Distinguishing leases and rentals of tangible personal property from the furnishing of nontaxable services.* In order to determine whether a particular fee is charged for the rental of tangible personal property or for the furnishing of a nontaxable service, the department looks at the substance, rather than the form, of the transaction. When the possession and use of tangible personal property by the recipient is merely incidental as compared to the nontaxable service performed, all of the sales price is derived from the furnishing of such nontaxable service and, unless a separate fee or charge is made for the possession and use of tangible personal property, no sales price is derived from the rental of tangible personal property. When the nontaxable service is merely incidental to the possession and use of the tangible personal property by the recipient, all of the sales price is derived from the furnishing of tangible personal property rental and, unless a separate fee or charge is made for the nontaxable service, no sales price is derived from the nontaxable service. When a tangible personal property rental agreement contains separate fee schedules for rent and for nontaxable service, only the sales price derived from the tangible personal property rental is subject to tax. This rule is not to be so construed as to be at variance with Iowa Code sections 423.2(8) and 423.3(70) concerning bundled service contracts and transportation services respectively.

225.6(3) *Rental of real property distinguished from rental of tangible personal property.* If a rental contract allows the renter exclusive possession or use of a defined area of real property and, incidental to that contract, tangible personal property is provided which allows the renter to utilize the real property, if there is no separate charge for rental of tangible personal property, the sales price is for the rental of real property and is not subject to tax, unless taxable room rental is involved; reference rule 701—18.40(422,423).

If a person rents tangible personal property and, incidental to the rental of the property, space is provided for the property's use, the sales price from the rental shall be subject to tax. It may at times be difficult to determine whether a particular transaction involves the rental of real property with an incidental use of tangible personal property or the rental of tangible personal property with an incidental use of real property.

225.6(4) *Rental of tangible personal property and rental of fixtures.* The rental of tangible personal property which shall, prior to its use by the renter under the rental contract, become a fixture shall not be subject to tax. Such a rental is the rental of real property rather than tangible personal property. In general, any tangible personal property which is connected to real property in a way that it cannot be removed without damage to itself or to the real property is a fixture. See *Equitable Life Assurance Society of the United States v. Chapman*, 282 N.W. 355 (Iowa 1983) and *Marty v. Champlin Refining Co.*, 36 N.W.2d 360 (Iowa 1949). The rental of a mobile home or manufactured housing, not sufficiently attached to realty to constitute a fixture, is room rental rather than tangible personal property rental and subject to tax on that basis; see *Broadway Mobile Home Sales Corp. v. State Tax Commission*, 413 N.Y.S.2d 231 (N.Y. 1979). Reference also rule 701—18.40(422,423).

225.6(5) *Rental of tangible personal property embodying intangible personal property rights—transactions taxable and exempt.* Under the law, the sales price from rental of tangible personal property includes royalties and copyright and license fees. The rental of all property which is a tangible medium of expression for the intangible rights of royalties and copyright and license fees is subject to tax. Thus the sales price from the rental of films, videodiscs, videocassettes, and any computer software (other than rental of custom programs, reference 701—paragraph 18.34(3) "a") which is the tangible means of expression of intangible property rights is subject to tax. The rental of such tangible property

shall be subject to tax whether the property is held for rental to the general public or for rental to one or a few persons. See *Boswell v. Paramount Television Sales, Inc.*, 282 So.2d 892 (Ala. 1973). Reference also rule 701—17.18(422,423) regarding the exemption from the requirements of this subrule for rental of films, videotapes and other media to lessees imposing a taxable charge for viewing or rental of the media or to lessees that broadcast the contents of these media for public viewing or listening.

225.6(6) Deposits and additional fees. Taxability of a deposit required by an owner of rental property as a condition of the rental depends upon the type of deposit required. A deposit subject to forfeiture for the lessee's failure to comply with the rental agreement is not subject to tax. This type of deposit is separate from the rental payments and therefore is not taxable as part of the rental. Such deposits may include those for reservation, late return of the rental property or damage to the rental property. Deposits not subject to forfeiture which represent part of the rental receipts are considered part of the taxable rental and are subject to tax. Such deposits may include a deposit of the first rental payment which is applied to the rental receipts.

When tangible personal property is rented for a flat fee per month, per year, or for other designated periods, plus an additional fee based on quantity and capacity of production or use, the entire charge is taxable.

225.6(7) Leasing of tangible personal property moving in interstate commerce.

a. On and after July 1, 2004, in the case of a lease or rental that requires recurring periodic payments, the first periodic payment is taxed to Iowa if the property was delivered to the lessee in Iowa. Periodic payments made subsequent to the first payment may be taxed only by the state in which the property is primarily located for the period covered by the payment. The primary property location shall be as indicated by an address for the property provided by the lessee that is available to the lessor from its records maintained in the ordinary course of business, when use of this address does not constitute bad faith. The property location shall not be altered by intermittent use at different locations, such as use of business property that accompanies employees on business trips and service calls.

b. Where a nonresident lessor leases tangible personal property to a resident or nonresident lessee and the lessee uses the property in Iowa, the nonresident lessor has the responsibility of collecting Iowa use tax on the lease payments if Iowa is the primary location of the property, provided the lessor maintains a place of business in Iowa as described in 2005 Iowa Code sections 423.1(43) and 423.14(2). Whether the lease agreement is executed in Iowa or not is irrelevant. *State Tax Commission v. General Trading Co.*, 322 U.S. 335, 64 S.Ct. 1028, 88 L.Ed 1309 (1944).

c. Where a lessee is the recipient of equipment rental services sourced to Iowa and no tax has been collected from such lessee by the lessor, the lessee should remit Iowa use tax to the department of revenue. In the event no tax is remitted, the department, in its discretion, may seek to collect the tax from the lessor or lessee. In the event that the lessee rents tangible personal property, and the lessor does not maintain a place of business in Iowa and does not collect use tax pursuant to 2005 Iowa Code section 423.14, such lessee shall remit tax on its rental payments to the department.

d. Where a resident lessor leases equipment to a nonresident lessee outside Iowa and the equipment is delivered to the lessee outside Iowa, the act of leasing is exempt from the Iowa sales tax on the rental payments. However, in the event the lessee brings the equipment into Iowa, uses it in Iowa, and Iowa becomes the primary location of the property, Iowa use tax applies to subsequent rental payments.

e. If a sales or use tax has already been paid to another state on the sales price of tangible personal property prior to the use of that property in Iowa, a tax credit against the Iowa use tax on the purchase price will be given. After the equipment is brought into Iowa, if a sales or use tax is properly payable and is paid to another state on the rental payments of equipment, for the same time the Iowa tax is imposed on such rentals, a tax credit against the Iowa use tax on such rental payments will be given.

This rule is intended to implement Iowa Code sections 423.1(22), 423.1(43), 423.1(45), 423.1(54), 423.2(1), and 423.15(2).

701—225.7(423) Certain inputs used in taxable vehicle wash and wax services. On or after May 25, 2012, sales of water, electricity, chemicals, solvents, sorbents, or reagents to a retailer to be used in providing a service that includes a vehicle wash and wax that is subject to Iowa Code section 423.2(6)

are exempt from tax. This rule applies to bills received or sales occurring, as the case may be, on or after May 25, 2012.

225.7(1) Definitions. For the purposes of this rule, the following definitions apply:

“Chemical” means a substance which is primarily used for producing a chemical effect. A chemical effect results from a chemical process wherein the number and kind of atoms in a molecule are changed in form (e.g., where oxygen and hydrogen are combined to make water). A chemical process is distinct from a physical process wherein only the state of matter changes (e.g., where water is frozen into ice or heated into steam).

“Reagent” means a substance used for various purposes (i.e., in detecting, examining, or measuring other substances; in preparing materials; in developing photographs) because it takes part in one or more chemical reactions or biological processes. A reagent is also a substance used to convert one substance into another by means of the reaction that it causes. To be a reagent for purpose of the exemption, a substance must be primarily used as a reagent.

“Retailer” or *“supplier”* means and includes every person engaged in the business of selling tangible personal property or taxable services at retail or the furnishing of gas, electricity, water, pay television, or communication service, and tickets or admissions to places of amusement and athletic events or operating amusement devices or other forms of commercial amusement from which revenues are derived. However, when in the opinion of the director it is necessary for the efficient administration of this rule to regard any salespersons, representatives, truckers, peddlers, or canvassers as agents of the dealers, distributors, supervisors, employers, or persons under whom the salespersons, representatives, truckers, peddlers, or canvassers operate or from whom they obtain tangible personal property sold by them irrespective of whether or not they are making sales on their own behalf or on behalf of such dealers, distributors, supervisors, employers, or persons, the director may so regard them, and may regard such dealers, distributors, supervisors, employers, or persons as retailers for the purposes of this rule. *“Retailer”* includes a seller obligated to collect sales or use tax.

“Secondary vehicle wash and wax facility” means a vehicle wash and wax facility whose primary purpose is to sell tangible personal property or services other than vehicle wash and wax services, but which also provides vehicle wash and wax services that are taxable under Iowa Code section 423.2(6). Examples of *“secondary vehicle wash and wax facilities”* include, but are not limited to, vehicle dealerships, convenience stores, service stations, and wholesale and retail fuel marketing locations that provide taxable vehicle wash and wax services in addition to their primary business purpose. A facility that provides vehicle wash and wax services that also sells tangible personal property or other services is presumed to be a *“secondary vehicle wash and wax facility”* unless it can prove otherwise.

“Solvent” means a substance in which another substance can be dissolved and which is primarily used for that purpose.

“Sorbent” means a solid material, often in a powder or granular form, which acts to retain another substance, usually on the sorbent’s surface, thereby removing the other substance from the gas or liquid phase. The sorbent and the second material bond together at the molecular or atomic scale via physiochemical interactions. A substance is not a sorbent based on an ability to absorb heat or thermal energy.

“Stand-alone vehicle wash and wax facility” means a vehicle wash and wax facility whose primary purpose is to provide vehicle wash and wax services that are taxable under Iowa Code section 423.2(6). A vehicle wash and wax facility is considered a *“stand-alone vehicle wash and wax facility”* although it sells a de minimis amount of products and services related to vehicle wash and wax services. Nonexclusive examples of products and services related to vehicle wash and wax services include coin-operated vacuum stations and air fresheners and vehicle wipes which are sold out of vending machines.

“Vehicle” means any self-propelled motor vehicle designed primarily for carrying passengers (nine or fewer) excluding motorcycles and motorized bicycles; any pickup truck designed to carry both passengers and cargo; or any vehicle which is commonly on a highway and propelled by any power other than muscular power. Nonexclusive examples of a vehicle are motorcycles, motorized bicycles, pickup trucks, tractors, and trailers.

“*Vehicle wash and wax facility*” means any retailer that provides vehicle wash and wax services.

“*Vehicle wash and wax services*” or “*vehicle wash and wax*” means washing and waxing services performed inside or outside of the vehicle or both whether the services are performed by hand, machine, or coin-operated devices.

“*Water*” means water directly consumed or used in providing the taxable vehicle wash and wax service. “*Water*” does not include, for example, charges or fees for storm water, sanitary sewer, or solid waste services as these are not fees for water directly used or consumed in providing the taxable vehicle wash and wax service.

225.7(2) *Purchases made by a stand-alone vehicle wash and wax facility.* Purchases of water, electricity, chemicals, solvents, sorbents, or reagents by a stand-alone vehicle wash and wax facility are presumed to be 100 percent exempt from sales tax. The stand-alone vehicle wash and wax facility is not required to provide the suppliers of such items with an exemption certificate. See 701—paragraph 15.3(2) “g.”

225.7(3) *Purchases made by a secondary vehicle wash and wax facility.*

a. *Sales price of electricity and water.* The exemption for the sales price of electricity and water purchased by secondary vehicle wash and wax facilities applies only to the sales price from the sale of electricity and water directly consumed or used in providing vehicle wash and wax services, as distinguished from electricity and water used and consumed for other purposes not related to vehicle wash and wax services (e.g., electricity to operate office equipment or lighting; water used for cleaning the inside of a gas station or for irrigation).

(1) Separately metered electricity and water. Ideally, a secondary vehicle wash and wax facility will have separate meters to measure its nonexempt electricity and water usage and its exempt electricity and water used for providing taxable vehicle wash and wax services. A secondary vehicle wash and wax facility that separately meters its exempt and nonexempt electricity and water usage and does not use the exempt electricity and water for any other purpose than providing a taxable vehicle wash and wax service does not have to file an exemption certificate with the suppliers. See 701—paragraph 15.3(2) “g.” The supplier should not charge tax on the charges associated with the meters that measure electricity and water used solely for providing the taxable vehicle wash and wax services.

However, if water or electricity which is measured by the meter which separately measures the vehicle wash and wax facility is used for both taxable vehicle wash and wax services and nonexempt purposes (e.g., consumed in performance of its business operations), the secondary vehicle wash and wax facility must allocate the use of the electricity or water according to exempt and nonexempt use if an exemption for nontaxable use is to be claimed. To obtain the exemption for electricity or water under this rule, a secondary vehicle wash and wax facility that has both exempt and nonexempt electricity or water usage measured by the same meter must request the exemption by providing an exemption certificate to the electricity or water supplier.

The exemption certificate shall indicate what percentage of the electricity or water is used for taxable vehicle wash and wax services and is therefore exempt. The exemption certificate shall be in writing and detail how the percentages of exempt and nonexempt usage were developed. The rationale provided for the percentage of exempt water and electricity must be reasonable after the nature of the secondary vehicle wash and wax service facility’s primary purpose and all other facts and circumstances are considered. A secondary vehicle wash and wax facility that cannot, or does not want to, determine the percentage of exempt electricity or water usage may forego the exemption. The exemption certificate is valid for three years, but the secondary vehicle wash and wax facility must amend its exemption certificate to reflect any changes that would affect the exemption amount (e.g., summer month water usage compared to winter month water usage).

(2) Exempt and nonexempt usage measured by the same meter. When electricity and water are purchased for vehicle wash and wax services as well as for taxable uses, and the use of the electricity or water is recorded on a single meter, a secondary vehicle wash and wax facility must allocate the use of the electricity or water according to exempt and nonexempt use if an exemption for nontaxable use is to be claimed. To obtain the exemption for electricity or water under this subparagraph, a secondary vehicle wash and wax facility that has both exempt and nonexempt electricity or water usage measured

by the same meter must request the exemption by providing an exemption certificate to the electricity or water supplier.

The exemption certificate must indicate what percentage of the electricity or water is used for taxable vehicle wash and wax services and is therefore exempt. The exemption certificate shall be in writing and detail how the percentages of exempt and nonexempt usage were developed. The rationale provided for the percentages of exempt water and electricity must be reasonable after the nature of the secondary vehicle wash and wax service provider's primary purpose and all other facts and circumstances are considered. A secondary vehicle wash and wax facility that cannot, or does not want to, determine the percentages of exempt electricity and water usage may either forego the exemption or install a separate meter. The exemption certificate is valid for three years, but the secondary vehicle wash and wax facility must amend its exemption certificate to reflect any changes that would affect the exemption amount (e.g., summer month water usage compared to winter month water usage).

Exemption statutes are strictly construed against the taxpayer in favor of taxation (See *Dial Corp. v. Iowa Dep't of Revenue*, 634 N.W.2d 643, 646 (Iowa 2001)). The secondary vehicle wash and wax facility has the burden of proof regarding the exempt percentages (See *id.* and Iowa Code section 421.60(6)) and is liable for any mistakes or misrepresentations made regarding the computation or for failure to notify the electricity or water supplier in writing of the percentage of exempt usage, if required.

(3) Credit. A supplier of electricity or water that sells electricity or water to vehicle wash and wax facilities may bill customers for sales tax even if the facility qualifies for the exemption from sales tax under this rule if the supplier cannot adjust its billing process in time to accommodate this exemption. Subsequently, the electricity or water supplier shall provide a credit for tax collected from a vehicle wash and wax facility, and the credit is to appear on the first possible billing date after May 25, 2012.

b. Sales price of chemicals, solvents, sorbents, or reagents. The sales price of chemicals, solvents, sorbents, or reagents sold to a secondary vehicle wash and wax facility to be used in providing a taxable vehicle wash and wax service is presumed to be 100 percent exempt from sales tax if the secondary vehicle wash and wax facility's primary business does not consume or sell the same chemicals, solvents, sorbents, or reagents that are used in providing taxable vehicle wash and wax services. If the secondary vehicle wash and wax facility's primary business does not use or sell the same products used in providing the taxable vehicle wash and wax service, the facility does not have to provide the retailer with an exemption certificate. However, if the secondary vehicle wash and wax facility may consume the chemicals, solvents, sorbents, or reagents for any purpose other than providing taxable vehicle wash and wax services, the secondary vehicle wash and wax facility shall either:

(1) Purchase such items without tax liability if the majority of the chemicals, solvents, sorbents, or reagents are used in performing the vehicle wash and wax service and remit the tax to the department at the time such items are consumed in the operation of the primary business. The secondary vehicle wash and wax facility shall provide to the retailer an exemption certificate which indicates that not all items will be used in providing a taxable vehicle wash and wax service and the tax on such items will be remitted at a later date; or

(2) Pay tax to retailers at the time of purchase if the majority of the chemicals, solvents, sorbents, or reagents will be consumed in the operation of the primary business and deduct the original cost of any such items subsequently used in the vehicle wash and wax service when reporting tax on the facility's returns.

EXAMPLE A: An automobile dealership offers a taxable drive-through vehicle wash and wax service in addition to its primary business purpose of selling vehicles. The automobile dealership is a "secondary vehicle wash and wax facility" because the taxable vehicle wash and wax service is offered secondarily to its primary purpose of selling and servicing vehicles. In addition to providing vehicle wash and wax services to the general public (a taxable vehicle wash and wax service), the automobile dealership uses its vehicle wash and wax facility to wash and wax its inventory. Using the vehicle wash and wax facility to wash or wax inventory is not a taxable vehicle wash and wax service because the vehicle wash and wax service is not sold to customers; the service is "consumed" in performance of the automobile dealership's business operations. See 701—paragraph 18.3(1)"c."

The automobile dealership has electricity and water meters that each separately measure the electricity and water used and consumed in using the vehicle wash and wax facility. Although the automobile dealership separately meters electricity and water, the separate meters do not measure only taxable vehicle wash and wax services. Therefore, to claim the exemption, the automobile dealership shall provide the electricity and water suppliers with an exemption certificate that states the percentages of water and electricity used in providing taxable vehicle wash and wax services. The electricity and water suppliers shall separately state and bill for the taxable and exempt amounts.

The automobile dealership also uses some of the chemicals, solvents, sorbents, or reagents while washing and waxing its inventory, so the automobile dealership may either (1) purchase such items without tax liability if the majority of the chemicals, solvents, sorbents, or reagents are used in performing the vehicle wash and wax service and remit the tax at the time such items are consumed in the operation of the primary business, or (2) pay tax to retailers at the time of purchase if the majority of the chemicals, solvents, sorbents, or reagents will be consumed in the operation of the primary business and deduct the original cost of any such items subsequently used in the vehicle wash and wax service when reporting tax on the dealership's returns.

The exemption is available for the quantity of items used in providing the taxable vehicle wash and wax services even though the automobile dealership does not separately itemize on its receipts the amounts of electricity, water, chemicals, solvents, sorbents, or reagents used in providing the taxable vehicle wash and wax services.

EXAMPLE B: A gas station that also sells vehicle wash and wax services does not separately meter the electricity or water used and consumed in providing the taxable vehicle wash and wax services. With the exception of providing vehicle wash and wax services, the gas station does not provide any other additional services. The gas station wants to claim the exemption. To obtain the exemption for electricity or water under this rule, the gas station shall calculate, and has the burden of proving, the amount of exempt electricity or water it uses in providing taxable vehicle wash and wax services. The automobile dealership shall furnish to the electricity or water supplier an exemption certificate that indicates what percentage of the electricity or water is exempt.

Additionally, because the gas station only sells gasoline and taxable vehicle wash and wax services, it is unlikely that the gas station will consume the chemicals, solvents, sorbents, or reagents for any purpose other than providing taxable vehicle wash and wax services. Therefore, the sales price of the chemicals, solvents, sorbents, or reagents that the gas station purchased for use in providing taxable vehicle wash and wax services is 100 percent exempt from sales tax. The gas station does not have to provide the retailers of the chemicals, solvents, sorbents, or reagents with an exemption certificate.

EXAMPLE C: Same facts as Example B, except the gas station does not believe it is feasible to accurately determine the amount of electricity or water usage that can be attributed to the vehicle wash and wax facility. The gas station also does not believe it is economically beneficial to install separate meters to measure the usage of electricity or water for the sole purpose of claiming the exemption. Therefore, the gas station does not claim the exemption and pays sales tax on the full sales price of water or electricity.

This rule is intended to implement 2011 Iowa Code Supplement section 423.3 as amended by 2012 Iowa Acts, Senate File 2342, section 13.

CHAPTER 226
AGRICULTURAL RULES

701—226.1(423) Sale or rental of farm machinery and equipment and items used in agricultural production that are attached to a self-propelled implement of husbandry. The sales price from the sale or rental of farm machinery and equipment directly and primarily used in production of agricultural products and certain items used in agricultural production that are attached to or towed by a self-propelled implement of husbandry is exempt from sales and use tax.

226.1(1) Farm machinery and equipment.

a. Exempt. Under this rule, to be eligible for the exemption from the tax, the farm machinery or equipment must be directly and primarily used in production of agricultural products and must also be one of the following:

- (1) A self-propelled implement; or
- (2) An implement customarily drawn or attached to a self-propelled implement; or
- (3) A grain dryer; or
- (4) An auxiliary attachment which improves the performance, safety, operation, or efficiency of a qualifying implement or grain dryer; or
- (5) A replacement part for any item described in subparagraph (1), (2), (3), or (4).

b. Taxable. A vehicle subject to registration as defined in Iowa Code section 423.1, an implement customarily drawn by or attached to a vehicle subject to registration, an auxiliary attachment for a vehicle subject to registration, or any replacement part for a vehicle, implement, or auxiliary attachment for a vehicle subject to registration is not eligible for the exemption allowed under this rule.

226.1(2) Attachments to self-propelled implements of husbandry.

a. Exempt. Exempt from the tax under this rule are the following items if, and only if, they are used in agricultural production:

- (1) A snow blower that is to be attached to a self-propelled implement of husbandry; or
- (2) A rear-mounted or front-mounted blade that is to be attached to or towed by a self-propelled implement of husbandry; or
- (3) A rotary cutter that is to be attached to a self-propelled implement of husbandry.

b. Used in agricultural production. Under this subrule, the items must be used in agricultural production, and not “directly and primarily” used in production of agricultural products as is required under subrule 226.1(1).

EXAMPLE: Farmer Jones purchases a front-mounted blade that will be attached to a self-propelled implement of husbandry (e.g., farming tractor). Farmer Jones primarily uses the blade to prepare previously uncultivated land—a use that is not for agricultural production. See subrule 226.1(3). However, Farmer Jones sporadically uses the front-mounted blade for agricultural production. Even though Farmer Jones does not directly and primarily use the front-mounted blade in agricultural production, the front-mounted blade is exempt from sales or use tax because the blade is occasionally used in agricultural production and it is attached to a self-propelled implement of husbandry.

226.1(3) Definitions and specific provisions. For the purposes of this rule, the following definitions and provisions apply.

a. Production of agricultural products. The term “production of agricultural products” means the same as the term “agricultural production,” which is defined in rule 701—211.1(423) to mean a farming operation undertaken for profit by the raising of crops or livestock. Nonexclusive examples of items not included within the meaning of the term “agricultural production” are the clearing or preparation of previously uncultivated land, the creation of farm ponds, and the erection of machine sheds, confinement facilities, storage bins, or other farm buildings. See *Trullinger v. Fremont County*, 223 Iowa 677, 273 N.W. 124 (1937). Machinery and equipment used for these purposes would be used for activities which are preparatory to, but not a part of, the production of agricultural products and, therefore, are not exempt.

b. Farm machinery and equipment. The term “farm machinery and equipment” means machinery and equipment specifically designed for use in the production of agricultural products and machinery

and equipment that are not specifically designed for use in the production of agricultural products but are directly and primarily used for that purpose.

EXAMPLE: Farmer Jones raises livestock, and his farming operation requires that fences be repaired to confine the livestock. Farmer Jones purchases a posthole digger that is customarily attached to a tractor and uses the digger to repair the fences used to confine the livestock. The posthole digger is not specifically designed for use in the production of agricultural products but is directly and primarily used in the production of agricultural products. Therefore, the exemption would apply.

c. Self-propelled implement. The term “self-propelled implement” means an implement which is capable of movement from one place to another under its own power. An implement is not self-propelled merely because it has moving parts. The term “self-propelled implement” includes, but is not limited to, the following items: skid loaders and tractors. The term also includes, but is not limited to, the following machinery if capable of movement under its own power: combines, corn pickers, fertilizer spreaders, hay conditioners and windrowers, sprayers, and bean buggies.

d. Implements customarily drawn or attached to self-propelled implements. The following is a nonexclusive, representative list of implements customarily drawn or attached to self-propelled implements: augers, balers, blowers, combines, conveyers, cultivators, disks, drags, dryers (portable), farm wagons, feeder wagons, fertilizer spreaders, front- and rear-end loaders, harrows, hay loaders, hay mowers, hay rakes, husking machines, manure spreaders, planters, plows, rotary hoes, sprayers and tanks, and tillage equipment.

e. Directly used in agricultural production.

(1) Property is “directly used” only if it is used to initiate, sustain, or terminate an exempt activity. In determining whether any property is directly used, consideration should be given to the following factors:

1. The physical proximity of the property to other property clearly exempt as directly used in agricultural production. The closer the property is to exempt property, the more likely it is that the property is directly used in agricultural production.

2. The chronological proximity of the use of the property in question to the use of property clearly exempt as directly used in agricultural production. The closer the proximity of the property’s use within the production process to the use of exempt property, the more likely the use is direct rather than remote.

3. The active causal relationship between the use of the property in question and agricultural production. The fewer intervening causes between the use of the property and the production of the product, the more likely it is that the property is directly used in agricultural production.

(2) The fact that particular machinery or equipment is essential to the production of agricultural products because its use is required either by law or practical necessity does not, of itself, mean that the machinery or equipment is directly used in the production of agricultural products. Machinery or equipment that comes into actual physical contact with the soil or crops during the operations of planting, cultivating, harvesting, and soil preparation will be presumed to be machinery or equipment used in agricultural production.

f. Primarily used in agricultural production. Property is “primarily used” in agricultural production based on the total time it is used in agricultural production in comparison to the time it is used for other purposes. Any property used in agricultural production more than 50 percent of its total use time is eligible for exemption.

g. Beginning and end of agricultural production. Agricultural production begins with the cultivation of land previously cleared for the planting of crops or begins with the purchase or breeding of livestock or domesticated fowl. Agricultural production ceases when an agricultural product has been transported to the point where it will be sold by the producer or processed for further use.

EXAMPLE: Farmer Brown uses a tractor and wagon to haul harvested corn from a field to a grain dryer located on the farm. After the corn is dried, the same tractor and wagon are used to move the grain to a storage bin, also located on the farm. Later, the same tractor and wagon are used to deliver the corn from the farm to the local elevator where the corn is sold. After Farmer Brown deposits the corn there, the local elevator uses its own tractor and wagon to move the corn to a place of relatively permanent storage. Farmer Brown has used the tractor and wagon in the production of agricultural products, and

the exemption would apply to Farmer Brown's tractor and wagon. However, the elevator has not used its tractor and wagon in agricultural production; thus, the exemption would not be allowed for the elevator's tractor and wagon.

h. Grain dryer. The term "grain dryer" includes the heater and the blower necessary to force the warmed air into a grain storage bin. The term "grain dryer" does not include equipment, such as augers and spreaders, used in grain storage or movement, nor does it include any other equipment, such as specialized flooring, that is not a grain dryer. Equipment that is not a grain dryer but is used in grain drying may be exempt if the equipment is a self-propelled implement or customarily drawn or attached to a self-propelled implement and is directly and primarily used in agricultural production.

i. Replacement parts. The term "replacement parts" means any farm machinery or equipment which is substituted for another part that has broken, worn out or has become obsolete or otherwise unable to perform its intended function. Replacement parts are those parts which materially add to the value of farm machinery or equipment, appreciably prolong its life or keep it in its ordinarily efficient operating condition. Excluded from the meaning of the term "replacement parts" are supplies and computer software. Sales of supplies and computer software are taxable. Nonexclusive examples of supplies include: lubricants, oils, greases, and coolants.

Tangible personal property which has an expected useful life of 12 months or more and is used in the operation of farm machinery or equipment is rebuttably presumed to be a replacement part. Tangible personal property which is used in the same manner but has an expected useful life of less than 12 months is rebuttably presumed to be a supply.

(1) For periods prior to July 1, 2008, the sale or lease of a replacement part is exempt from tax if the replacement part is essential to any repair or reconstruction necessary to the exempt piece of farm machinery or equipment used in the production of agricultural products. The term "replacement parts" does not include attachments and accessories which are not essential to the operation of the farm machinery or equipment. Nonexclusive examples of attachments or accessories that are not essential include: cigarette lighters, radios, portable global positioning devices, and add-on air-conditioning units.

(2) For periods beginning on and after July 1, 2008, the sale or lease of a replacement part is exempt from tax if the replacement part is used in any repair or reconstruction of the exempt piece of farm machinery or equipment used in the production of agricultural products. Nonexclusive examples of replacement parts to machinery and equipment which would be exempt include: air-conditioning parts, computer equipment parts, fire equipment parts, glass parts, mirrors, headlights, communication systems, and global positioning equipment parts.

j. Implement of husbandry.

(1) The term "implement of husbandry" means any tool, equipment, or machinery necessary to the carrying on of the business of agricultural production and without which that could not be done. To be an implement of husbandry, the following must both be true:

1. The tool, equipment, or machine must be necessary to the carrying on of the business of agricultural production; and

2. Agricultural production must be impossible without the use of the tool, equipment, or machine.

(2) Whether a given item is an implement of husbandry depends on the facts of each particular case (*Hester v. State*, 108 So.2d 385, 388 (1959)), and in each particular case the person claiming the exemption has the burden of proving that the person is entitled to the exemption. *Dial Corp. v. Iowa Dep't of Revenue*, 634 N.W.2d 643, 646 (Iowa 2001).

k. Snow blower. "Snow blower" as used in this rule means an attachment that has the primary purpose of snow removal by the throwing of snow and that is ordinarily thought of as a snow blower.

l. Rear-mounted or front-mounted blade. "Rear-mounted or front-mounted blade" as used in this rule means a stationary attachment that has a primary purpose of pushing or leveling, for example, sand, dirt, snow, gravel, or manure. The term "rear-mounted or front-mounted blade" does not include mounted buckets or loaders that have a primary purpose of loading or digging.

m. Rotary cutter. "Rotary cutter" as used in this rule means an attachment used for mowing of grassy areas, pastures, and brush, but does not include attachments often referred to as "finishing mowers" and "mid-mount mowers."

226.1(4) *Taxable and nontaxable transactions.* The following are nonexclusive examples of sales and leases of and services for farm machinery or equipment subject to or exempt from tax. Taxable services performed on farm machinery or equipment are subject to tax even when the replacement parts are exempt.

a. A lessor's purchase of farm machinery or equipment is not subject to tax if the machinery or equipment is leased to a lessee who uses it directly and primarily in the production of agricultural products and if the lessee's use of the machinery or equipment is otherwise exempt. To claim exemption from tax, the lessor does not need to make an exempt use of the machinery or equipment as long as the lessee uses the machinery or equipment for an exempt purpose. On and after July 1, 2004, the lease of tangible personal property is treated as the sale of that property for the purposes of Iowa sales and use tax law because leases of tangible personal property are taxable retail sales of that property.

b. A lessor's purchase of a snow blower, rear-mounted or front-mounted blade, or rotary cutter is not subject to tax if such item is leased to a lessee who uses the item in agricultural production and the item will be attached to an implement of husbandry.

c. The owner or lessee of farm machinery or equipment need not be a farmer as long as the machinery or equipment is directly and primarily used in the production of agricultural products and the owner or lessee and the machinery or equipment meet the other requirements of this rule. For example, a person who purchases an airplane designed for use in agricultural aerial spraying and who uses the airplane directly and primarily for agricultural production is entitled to the benefits provided under this rule even though that person is not the owner or occupant of the land where the airplane is used.

d. The owner or lessee of a snow blower, rear-mounted or front-mounted blade, or rotary cutter need not be a farmer as long as the snow blower, rear-mounted or front-mounted blade, or rotary cutter is used in agricultural production and the snow blower, rear-mounted or front-mounted blade, or rotary cutter is attached to an implement of husbandry.

e. The sale or lease, within Iowa, of any farm machinery, equipment, or replacement part for direct and primary use in agricultural production outside of Iowa is a transaction eligible for the exemption if the transaction is otherwise qualified for an exemption under this rule.

f. The sale or lease, within Iowa, of any snow blower, rear-mounted or front-mounted blade, or rotary cutter which is used, outside of Iowa, in agricultural production while attached to an implement of husbandry is a transaction eligible for the exemption, if the transaction is otherwise qualified for an exemption under this rule.

226.1(5) *Auxiliary attachments.* The following is a nonexclusive list of auxiliary attachments for which the sale or use in Iowa is exempt from tax: auxiliary hydraulic valves, cabs, coil tine harrows, corn head pickup reels, dry till shanks, dual tires, extension shanks, fenders, fertilizer attachments and openers, fold kits, grain bin extensions, herbicide and insecticide attachments, kit wraps, no-till coulters, quick couplers, rear-wheel assists, rock boxes, rollover protection systems, rotary shields, stalk choppers, step extensions, trash whips, upper beaters, silage bags, and weights.

This rule is intended to implement Iowa Code subsections 423.3(8) and 423.3(11).
[ARC 7870B, IAB 6/17/09, effective 7/22/09; ARC 0466C, IAB 11/28/12, effective 1/2/13]

701—226.2(423) *Packaging material used in agricultural production.* The sales price from the sale of property which is a container, label, carton, pallet, packing case, wrapping, baling wire, twine, bag, bottle, shipping case, or other similar article or receptacle sold for use in agricultural, livestock, or dairy production is exempt from sales tax.

This rule is intended to implement Iowa Code subsection 423.3(15).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.3(423) *Irrigation equipment used in agricultural production.* The sales price from the sale or rental of irrigation equipment used in agricultural production is exempt from tax. The term "irrigation equipment" includes, but is not limited to, circle irrigation systems and trickle irrigation systems, whether installed aboveground or belowground, as long as the equipment is sold or rented by a contractor or

farmer and the equipment is directly and primarily used in agricultural production. The term “agricultural production” is defined in rule 701—211.1(423).

This rule is intended to implement Iowa Code subsections 423.3(12) and 423.3(13).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.4(423) Sale of a draft horse. The sales price from the sale of draft horses, when they are purchased for use and used as draft horses, is not subject to tax. Draft horses are horses that pull loads, including loads in shows, or transport persons or property. For purposes of this rule, horses commonly known as Clydesdales, Belgians, Shires, and Percherons are draft horses. However, upon proper showing by the person or entity claiming exemption, the sales price exemption will be granted by the director for other breeds. However, the burden of proof lies with the person or entity claiming exemption.

This rule is intended to implement Iowa Code subsection 423.3(14).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.5(423) Veterinary services. Veterinary services are not subject to sales tax. Purchases of food, drugs, medicines, bandages, dressings, serums, tonics, and the like which are used in treating livestock raised as part of agricultural production are exempt from tax. Where these same items are used in treating animals maintained as pets or for hobby purposes, sales tax is due. Purchases of equipment and tools used in the veterinary practice are subject to tax. Rule 701—226.17(423) explains the exemption for machinery or equipment used in livestock or dairy production which may be applicable to veterinarians, but should only be claimed with caution. A veterinarian must charge sales tax on any sales of tangible property or enumerated services, such as pet grooming, that are not part of professional veterinarian services.

This rule is intended to implement Iowa Code subsection 423.3(5).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.6(423) Commercial fertilizer and agricultural limestone. Sales of commercial fertilizer and agricultural limestone are exempt from tax only if the purchaser intends to use the fertilizer or limestone for the health promotion of plants produced for market as part of agricultural production. See rule 701—211.1(423) for definitions of “agricultural production” and “plants.” Plant hormones are considered to be commercial fertilizer. Sales of commercial fertilizer or agricultural limestone used for other purposes are subject to sales tax. Examples of taxable use include, but are not limited to: commercial fertilizer sold for application on a lawn, golf course, or cemetery.

This rule is intended to implement Iowa Code subsections 423.3(4) and 423.3(5).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.7(423) Sales of breeding livestock. The sale of agricultural livestock is exempt from tax only if at the time of purchase the purchaser intends to use the livestock primarily for breeding. The sale of agricultural livestock which is capable of breeding, but will not be used for breeding or primarily for breeding, is not exempt from tax. However, sales of most nonbreeding agricultural livestock to farmers would be a sale for resale and exempt from tax. See rule 701—211.1(423) for a definition of “livestock.”

EXAMPLE 1: A breeding service purchases a prize bull from a farmer. At the time of sale, the intent of the purchaser is to use the bull for breeding other cattle. The sale of the bull is exempt from tax even though three years later the breeding service sells the bull to a meat packer.

EXAMPLE 2: A farmer purchases dairy cows. To ensure production of milk over a sustained period of time, dairy cows must be bred to produce calves. If a farmer purchases dairy cows for the primary purpose of using them to produce milk and incidentally breeds them to ensure that this milk will be produced, the sale of the dairy cows to the farmer is not exempt from tax. If the farmer purchases the dairy cows for the primary purpose of using them to produce calves and, incidental to that purpose, at times sells the milk which the cows produce, the sale of the dairy cows to the farmer is exempt from tax.

This rule is intended to implement Iowa Code subsection 423.3(3).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.8(423) Domesticated fowl. The purchase of any domesticated fowl for the purpose of providing eggs or meat is exempt from tax, whether purchased by a person engaged in agricultural production or not. See rule 701—211.1(423) for a definition of the term “domesticated fowl.”

This rule is intended to implement Iowa Code subsection 423.3(3).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.9(423) Agricultural health promotion items.

226.9(1) Definitions. For purposes of this rule, the following definitions apply:

“*Adjuvant*” means any substance which is added to a herbicide, a pesticide, or an insecticide to increase its potency.

“*Agricultural production*” means the same as defined in rule 701—211.1(423).

“*Food*” includes vitamins, minerals, other nutritional food supplements, and hormones sold to promote the growth of livestock.

“*Herbicide*” means any substance intended to prevent, destroy, or retard the growth of plants including fungi. The term shall include preemergence, postemergence, lay-by, pasture, defoliant, and desiccant herbicides and fungicides.

“*Insecticide*” means any substance used to kill insects. Any substance used merely to repel insects is not an insecticide. Mechanical devices which are used to kill insects are not insecticides.

“*Livestock*” means the same as defined in rule 701—211.1(423). For the purposes of this rule, “livestock” includes domesticated fowl.

“*Medication*” includes antibiotics or other similar drugs administered to livestock.

“*Pesticide*” means any substance which is used to kill rodents or smaller vermin, other than insects, such as nematodes, spiders, or bacteria. For the purposes of this rule, a disinfectant is a pesticide. Excluded from the term “pesticide” is any substance which merely repels pests or any device, such as a rat trap, which kills pests by mechanical action.

“*Plants*” means the same as defined in rule 701—211.1(423).

“*Surfactant*” means a substance which is active on a surface.

226.9(2) Sales of agricultural health promotion items and adjuvants. Sales of herbicides, pesticides, insecticides, food, and medication which are to be used in disease, weed, or insect control or health promotion of plants or livestock produced as part of agricultural production for market are exempt from tax. Sales of adjuvants, surfactants, and other products which enhance the effects of herbicides, pesticides, or insecticides used in disease, weed, or insect control or health promotion of plants or livestock produced as part of agricultural production for market are also exempt from tax. Sales of herbicides, pesticides, insecticides, food, medication, and products to any person not engaged in agricultural production for market are exempt if the property sold will be used for an exempt purpose, e.g., in disease control or on the behalf of another person engaged in agricultural production for market.

This rule is intended to implement Iowa Code subsections 423.3(5) and 423.3(16).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.10(423) Drainage tile. The sale or installation of drainage tile which is to be used in disease control or weed control or in health promotion of plants or livestock produced as part of agricultural production for market is exempt from tax. In all other cases, drainage tile will be considered a building material and subject to tax under the provisions of Iowa Code section 423.2. Sales of the following materials associated with the installation of agricultural drainage tile are also exempt from tax: tile intakes, outlet pipes and outlet guards, aluminum and gabion structures, erosion control fabric, water control structures, and tile fittings.

This rule is intended to implement Iowa Code section 423.3.
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.11(423) Materials used for seed inoculations. Materials used for seed inoculations are exempt from sales tax. All forms of inoculation, whether for promotion of better growth and healthier

plants or for the prevention or cure of plant mildew or disease of seeds and bulbs, are intended for the same general purpose and are therefore exempt.

This rule is intended to implement Iowa Code section 423.3.
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.12(423) Fuel used in agricultural production.

226.12(1) Definitions. For purposes of this rule, the following definitions apply:

“*Aquaculture*” means the cultivation of aquatic animals and plants, including fish, shellfish, and seaweed, in natural or controlled marine or freshwater environments.

“*Fuel*” includes electricity.

“*Implement of husbandry*” means the same as defined in rule 701—211.1(423).

“*Livestock*” means the same as defined in rule 701—211.1(423) and includes domesticated fowl.

“*Plants*” means flowering, ornamental, or vegetable plants intended for sale in the ordinary course of business. The term does not include trees, shrubs, other woody perennials, or fungi.

226.12(2) Exemptions.

a. *Fuel used for livestock buildings.* The sale of fuel used to provide heating or cooling for livestock buildings is exempt from tax.

b. *Fuel used for plant production buildings.*

(1) Sales of fuel for heating or cooling greenhouses, buildings, or parts of buildings used for the production of flowering, ornamental, or vegetable plants intended for sale in the ordinary course of business are exempt from tax. See subparagraph (3) for the formula for calculating exempt use if a building is only partially used for growing plants.

(2) Fuel used in a plant production building for purposes other than heating or cooling (e.g., lighting) or for purposes other than direct use in plant production (e.g., heating or cooling office space) is not eligible for this exemption. Examples of nonexempt purposes for which a portion of a greenhouse might be used include, but are not limited to, portions used for office space, loading docks, storage of property other than plants, housing of heating and cooling equipment, and packaging plants for shipment.

(3) Calculating proportional exemption. It may be possible to calculate the amount of total fuel used in plant production by dividing the number of square feet of the greenhouse heated or cooled and used for raising plants by the number of square feet heated or cooled in the entire greenhouse. It may be necessary to alter this formula (by the use of separate metering, for example) if a greenhouse has a walk-in cooler and the cooler is used directly in plant production. See 701—subrule 15.3(3) regarding fuel exemption certificates and subrule 226.18(12) regarding seller’s and purchaser’s liability for sales tax.

EXAMPLE 1: Bill Brown’s herb farming operation has a separate greenhouse used to grow his herbs. All other aspects of his farm operations are conducted in other facilities. Because the greenhouse is used exclusively for raising plants, Bill Brown is able to claim exemption from sales tax on the cost of fuel used to heat and cool the greenhouse.

EXAMPLE 2: Martha Green’s greenhouse has a separate meter to track the electricity used only for heating or cooling. Her greenhouse is used partially for growing plants and partially for a nonexempt purpose. Martha Green is able to claim a proportional exemption from sales tax on the cost of fuel used to heat and cool her growing plants. Martha Green calculates her exempt amount by dividing the number of heated or cooled square feet of her greenhouse that are used for raising plants by the total number of square feet heated or cooled in the entire greenhouse.

Total square footage used for raising plants	=	800
Total square footage	=	1,000
TOTAL:	$800 \div 1,000$	= .80 or 80%

Thus, 80 percent of the cost of the fuel used to heat and cool Martha Green’s greenhouse is exempt from sales tax.

c. Sales of fuel used for aquaculture. Sales of fuel used in the raising of agricultural products by aquaculture are exempt from tax.

d. Sales of fuel, gas, electricity, water, and heat consumed in implements of husbandry. The sale of fuel used in any implement of husbandry, whether self-propelled or not, is exempt from tax if the fuel is consumed while the implement is engaged in agricultural production. For example, the sale of fuel used not only in tractors or combines, but also used in implements which cannot move under their own power, is exempt from tax. The sale of fuel used in milk coolers and milking machines, grain dryers, and stationary irrigation equipment and in implements used to handle feed, grain, and hay and to provide water for livestock is exempt from tax even though these implements of husbandry would not ordinarily be considered self-propelled.

226.12(3) Partial use. If a building is used partially for an exempt agricultural purpose and partially for a nonexempt purpose, a proportional exemption from sales tax may be claimed based upon a percentage obtained by dividing the number of square feet of the building heated or cooled and used for an exempt agricultural purpose by the number of square feet heated or cooled in the entire building.

This rule is intended to implement Iowa Code subsection 423.3(6).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.13(423) Water used in agricultural production. Water sold to farmers who are purchasing water for household use, sanitation, swimming pools, or other personal use is subject to sales tax. Water sold to farmers and others and used directly as drinking water for livestock production (including the production of domesticated fowl) is exempt from sales tax. When water is used for exempt purposes, as in livestock production, as well as for taxable purposes, the water may, when practical, be separately metered and separately billed to clearly distinguish the water consumed for exempt purposes from taxable purposes. When it is impractical to separately meter exempt water from taxable water, the purchaser may furnish to the seller a statement enabling the seller to determine the percentage of water subject to exemption. In the absence of proof to the contrary, the retailer of the water shall bill and collect tax on the first 5,000 gallons of water per month. The first 5,000 gallons of water per month will be considered to be for nonexempt use, and the balance will be considered to be used as part of agricultural production.

This rule is intended to implement Iowa Code subsection 423.3(5).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.14(423) Bedding for agricultural livestock or fowl. The sales price from the sale of woodchips, sawdust, hay, straw, paper, or any other materials used for bedding in the production of agricultural livestock (including domesticated fowl) is exempt from tax. See rule 701—211.1(423) for definitions applicable to this rule.

This rule is intended to implement Iowa Code subsection 423.3(9).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.15(423) Sales by farmers. The sale of grain, livestock, or any other farm or garden product by the producer thereof ordinarily constitutes a sale for resale, processing, or human consumption, and is not subject to tax. Farmers selling tangible personal property not otherwise exempt to ultimate consumers or users shall hold a permit and collect and remit sales tax on the sales price from their sales.

This rule is intended to implement Iowa Code subsections 423.3(2), 423.3(51), and 423.3(57).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.16(423) Sales of livestock (including domesticated fowl) feeds. Tax shall not apply to the sale of feed for any form of animal life when the product of the animals constitutes food for human consumption. Tax shall apply on feed sold for consumption by pets. Antibiotics that are administered as an additive to feed or drinking water and vitamins and minerals that are sold for livestock (including domesticated fowl) are exempt from tax.

This rule is intended to implement Iowa Code subsection 423.3(16).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.17(423) Farm machinery, equipment, and replacement parts used in livestock or dairy production.

226.17(1) Sales or rentals of farm machinery, equipment, and replacement parts used in livestock or dairy production are exempt from sales and use tax.

226.17(2) Definitions and special provisions. For purposes of this rule, the following definitions and special provisions apply.

a. Machinery. The term “machinery” means major mechanical machines, or major components thereof, which contribute directly and primarily to the livestock or dairy production process. Usually, a machine is a large object with moving parts which performs work through the expenditure of energy, either mechanical (e.g., gasoline or other fuel) or electrical.

b. Equipment. The term “equipment” means tangible personal property (other than a machine) that is directly and primarily used in livestock or dairy production. Equipment may be characterized as property which performs a specialized function and which has no moving parts, or if the equipment does possess moving parts, its source of power is external to it. The following nonexclusive examples differentiate between machinery and equipment:

EXAMPLE 1: An auger places feed into a cattle feeder. The auger is a piece of machinery; the cattle feeder is a piece of equipment.

EXAMPLE 2: An electric pump is used to pump milk into a bulk milk tank. The electric pump is a piece of machinery; the bulk milk tank is equipment.

c. Property used in livestock or dairy production which is neither equipment nor machinery.

(1) Real property. The ground or the earth is not machinery or equipment. A building is not machinery or equipment. See *Cloverleaf Cold Storage Co. v. Dep’t of Revenue and Fin.*, 2002 WL 31769009 (Iowa Dept. Insp. App. July 26, 2002). Therefore, tangible personal property which is sold for incorporation into the ground or a building in such a manner that the property will become a part of the ground or the building is taxable except for machinery and equipment. Generally, property incorporated into the ground or a building has become a part of the ground or the building if its removal would substantially damage the property, ground, or building or would substantially diminish the value of the property, ground, or building. Fence posts embedded in concrete, electrical wiring, light fixtures, fuse boxes, and switches are examples of property sold for incorporation into the ground or a building, respectively. For the purpose of the following example, assume that property is being sold to a contractor rather than a person engaged in livestock or dairy production. If the property is sold to a contractor, the retailer would be required to consider the property building material and charge the contractor sales tax upon the purchase price of the building material. If the property is building material, sale of the property is not exempt from Iowa sales tax. Rule 701—219.3(423) contains a characterization of building material and a list of specific examples of building material.

(2) Supplies. Supplies are neither machinery nor equipment. Tangible personal property is a farm supply if it is used up or destroyed by virtue of its use in livestock or dairy production or, because of its nature, can only be used once in livestock or dairy production. A light bulb is an example of a farm supply which is not machinery or equipment. See subrule 226.19(4) for examples of farm supplies which could be mistaken for equipment and are not exempt from tax on other grounds.

d. Hand tools. The term “hand tools” means tools which can be held in the hand or hands and which are powered by human effort. Hand tools specifically designed for use in livestock or dairy production are exempt from tax as equipment. Mechanical devices that are held in the hand and driven by electricity from some source other than human muscle power are, if they meet all other qualifications, exempt from tax as farm machinery.

e. “Directly used” in livestock or dairy production. To determine if machinery or equipment is “directly used” in livestock or dairy production, one must first ensure that the machinery or equipment is used during livestock or dairy production and not before that process has begun or after it has ended. See paragraph “g” of this subrule for an explanation of when livestock or dairy production begins and ends.

(1) Definition. If the machinery or equipment is used in livestock or dairy production, “directly used” means the use is an integral and essential part of production as distinguished from use that is

incidental or merely convenient to production or use that is remote from production. Machinery or equipment may be necessary to livestock or dairy production, but its use is so remote from production that it is not directly used in that production.

(2) Determination. In determining whether machinery or equipment is directly used, consideration should be given to the following factors:

1. The physical proximity of the machinery or equipment to other machinery or equipment clearly exempt as directly used in livestock or dairy production. The closer the machinery or equipment is to exempt machinery or equipment, the more likely it is that the machinery or equipment is directly used in livestock or dairy production.

2. The chronological proximity of the use of machinery or equipment in question to the use of machinery clearly exempt as directly used in livestock or dairy production. The closer the proximity of the machinery's or equipment's use within the production process to the use of exempt machinery or equipment, the more likely the use is direct rather than remote.

3. The active causal relationship between the use of the machinery or equipment in question and livestock or dairy production. The fewer intervening causes between the use of the machinery or equipment and the production of the product, the more likely it is that the machinery or equipment is directly used in production.

f. "Primarily used" in livestock or dairy production. Machinery or equipment is "primarily used" in livestock or dairy production based on the total time it is used in livestock or dairy production in comparison to the time it is used for other purposes. Any unit of machinery or equipment directly used in livestock or dairy production more than 50 percent of its total use time is eligible for exemption.

g. Beginning and end of livestock or dairy production. Livestock or dairy production begins with the purchase or breeding of livestock or dairy animals. Livestock or dairy production ceases when an animal or the product of an animal's body (e.g., wool) has been transported to the point where it will be sold by the farmer or processed.

h. Machinery and equipment design. Farm machinery and equipment used in livestock or dairy production is eligible for exemption if specifically designed for use in livestock or dairy production. Farm machinery and equipment which are not specifically designed for use in livestock or dairy production, but are directly and primarily used in livestock or dairy production, are eligible for exemption with the exception of common or ordinary hand tools.

EXAMPLE: Farmer Jones raises livestock and must use fans to cool the animals. Farmer Jones buys electric fans designed for use in a residence, but uses them directly and primarily to cool the livestock. The fans' use would be considered exempt.

i. Replacement parts. The term "replacement parts" means the same as defined in subrule 226.1(2), paragraph "i."

226.17(3) Examples of machinery and equipment directly used in livestock or dairy production.

a. Machinery and equipment used to transport or limit the movement of livestock or dairy animals (e.g., electric fence equipment, portable fencing, head gates, and loading chutes) are directly used in livestock or dairy production.

b. Machinery and equipment used in the conception, birth, feeding, and watering of livestock or dairy animals (e.g., artificial insemination equipment, portable farrowing pens, feed carts, and automatic watering equipment) are directly used in livestock or dairy production.

c. Machinery and equipment used to maintain healthful or sanitary conditions in the immediate area where livestock are kept (e.g., manure gutter cleaners, automatic cattle oilers, fans, and heaters if not real property) are directly used in livestock or dairy production.

d. Machinery and equipment used to test or inspect livestock during production are directly used in livestock or dairy production.

226.17(4) Taxable examples. The following are nonexclusive examples of machinery or equipment which would not be directly used in livestock or dairy production.

a. Machinery or equipment used to assemble, maintain, or repair other machinery or equipment directly used in livestock or dairy production (e.g., welders, paint sprayers, and lubricators).

b. Machinery or equipment used in farm management, administration, advertising, or selling (e.g., a computer used for record keeping, calculator, office safe, telephone, books, and farm magazines).

c. Machinery or equipment used in the exhibit of livestock or dairy animals (e.g., blankets, halters, prods, leads, and harnesses).

d. Machinery or equipment used in safety or fire prevention, even though the machinery or equipment is required by law.

e. Machinery or equipment for employee or personal use. Machinery or equipment used for the personal comfort, convenience, or use by a farmer, the farmer's family or employees, or persons associated with the farmer is not exempt from tax. Examples of such machinery and equipment include the following: beds, mattresses, blankets, tableware, stoves, refrigerators, and other equipment used in conjunction with the operation of a farm home, or other facilities for farm employees.

f. Machinery or equipment used for heating, cooling, ventilation, and lighting of farm buildings generally.

g. Vehicles subject to registration.

226.17(5) The sales price, not including services, of the following machinery or equipment is exempt from tax regardless of whether the machinery or equipment remains tangible personal property after installation or is incorporated into the realty: auxiliary attachments which improve the performance, safety, operation, or efficiency of the machinery and equipment, including auger systems, curtains and curtain systems, drip systems, fan and fan systems, shutters, inlets, shutter or inlet systems, refrigerators, and replacement parts if all of the following conditions are met:

a. The implement, machinery, or equipment is directly and primarily used in livestock or dairy production.

b. The implement is not a self-propelled implement or implement customarily drawn or attached to self-propelled implements.

c. The replacement part is used in a repair or reconstruction of the exempt piece of farm machinery or equipment used in the production of agricultural products.

226.17(6) Auxiliary attachments exemption. Sales of auxiliary attachments which improve the performance, safety, operation, or efficiency of exempt machinery or equipment are exempt from tax. Sales of replacement parts for these auxiliary attachments are also exempt.

226.17(7) Seller's and purchaser's liability for sales tax. The seller shall be relieved of sales tax liability if the seller takes from the purchaser an exemption certificate stating that the purchase is of machinery and equipment meeting the requirements of this rule. The exemption certificate must be fully completed. If items purchased tax-free pursuant to an exemption certificate are used or disposed of by the purchaser in a nonexempt manner, the purchaser is solely and directly liable for sales tax and shall remit the tax to the department.

This rule is intended to implement Iowa Code subsections 423.3(11) and 423.3(15).
[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.18(423) Machinery, equipment, and replacement parts used in the production of flowering, ornamental, and vegetable plants.

226.18(1) The sales or rentals of machinery, equipment, and replacement parts used in the production of flowering, ornamental, and vegetable plants are exempt from sales and use tax. The production of flowering, ornamental, or vegetable plants by a grower in a commercial greenhouse or at another location is considered to be a part of agricultural production and exempt from sales tax. The term "plants" does not include trees, shrubs, other woody perennials, or fungi.

226.18(2) Definitions and special provisions. For purposes of this rule, the following definitions and special provisions apply.

a. Machinery. The term "machinery" means major mechanical machines, or major components thereof, which contribute directly and primarily to the flowering, ornamental, or vegetable plant production process. Usually, a machine is a large object with moving parts which performs work through the expenditure of energy, either mechanical (e.g., gasoline or other fuel) or electrical.

b. Equipment. The term “equipment” means tangible personal property (other than a machine) that is directly and primarily used in the flowering, ornamental, or vegetable plant production process. Equipment may be characterized as property which performs a specialized function which, of itself, has no moving parts, or if the equipment does possess moving parts, its source of power is external to it.

c. Plants. The term “plants” means flowering, ornamental, or vegetable plants intended for sale in the ordinary course of business. The term does not include trees, shrubs, other woody perennials, or fungi.

d. Property used in the flowering, ornamental, or vegetable plant production process which is neither equipment nor machinery.

(1) Real property. The ground or the earth is not machinery or equipment. A building is not machinery or equipment. See *Cloverleaf Cold Storage Co. v. Dep’t of Revenue and Fin.*, 2002 WL 31769009 (Iowa Dept. Insp. App. July 26, 2002). Therefore, tangible personal property which is sold for incorporation into the ground or a building in such a manner that the property will become a part of the ground or the building is taxable except for machinery and equipment. Generally, property incorporated into the ground or a building has become a part of the ground or the building if its removal would substantially damage the property, ground, or building or would substantially diminish the value of the property, ground, or building. Fence posts embedded in concrete, electrical wiring, light fixtures, fuse boxes, and switches are examples of property sold for incorporation into the ground or a building, respectively. For the purpose of this example, assume that the property is being sold to a contractor rather than a person engaged in the flowering, ornamental, or vegetable plant production process. If the property is sold to a contractor, the retailer would be required to consider the property building material and charge the contractor sales tax upon the purchase price of this building material. If the property is building material, sale of the property is not exempt from Iowa sales tax. Rule 701—219.3(423) contains a characterization of building material and a list of specific examples of building material.

(2) Supplies. Supplies are neither machinery nor equipment. Tangible personal property is a supply if it is used up or destroyed by virtue of its use in the flowering, ornamental, or vegetable plant production process or, because of its nature, can only be used once in the flowering, ornamental, or vegetable plant production process. A light bulb is an example of a supply which is not machinery or equipment. See subrule 226.19(4) for examples of supplies which could be mistaken for equipment and are not exempt from tax on other grounds.

e. Hand tools. The term “hand tools” means tools which can be held in the hand or hands and which are powered by human effort. Hand tools specifically designed for use in the flowering, ornamental, or vegetable plant production process are exempt from tax as equipment. Mechanical devices that are held in the hand and driven by electricity from some source other than human muscle power are, if they meet all other qualifications, exempt from tax.

f. “Directly used” in the flowering, ornamental, or vegetable plant production process. To determine if machinery or equipment is “directly used” in the flowering, ornamental, or vegetable plant production process, one must first ensure that the machinery or equipment is used during the flowering, ornamental, or vegetable plant production process and not before that process has begun or after it has ended. See paragraph “h” of this subrule for an explanation as to when the flowering, ornamental, or vegetable plant production process begins and ends.

(1) Definition. If the machinery or equipment is used in the flowering, ornamental, or vegetable plant production process, “directly used” means the use is an integral and essential part of production as distinguished from use that is incidental or merely convenient to production or use that is remote from production. Machinery or equipment may be necessary to the flowering, ornamental, or vegetable plant production process, but its use is so remote from production that it is not directly used in that production.

(2) Determination. In determining whether machinery or equipment is directly used, consideration should be given to the following factors:

1. The physical proximity of the machinery or equipment to other machinery or equipment clearly exempt as directly used in the flowering, ornamental, or vegetable plant production process. The closer the machinery or equipment is to exempt machinery or equipment, the more likely it is that the machinery or equipment is directly used in the flowering, ornamental, or vegetable plant production process.

2. The chronological proximity of the use of machinery or equipment in question to the use of machinery clearly exempt as directly used in the flowering, ornamental, or vegetable plant production process. The closer the proximity of the machinery's or equipment's use within the production process is to the use of exempt machinery or equipment, the more likely the use is direct rather than remote.

3. The active causal relationship between the use of the machinery or equipment in question and the flowering, ornamental, or vegetable plant production process. The fewer intervening causes between the use of the machinery or equipment and the production of the product, the more likely it is that the machinery or equipment is directly used in production.

g. "Primarily used" in flowering, ornamental, or vegetable plant production. Machinery or equipment is "primarily used" in flowering, ornamental, or vegetable plant production based upon the total time it is used in flowering, ornamental, or vegetable plant production in comparison to the time it is used for other purposes. Any unit of machinery or equipment directly used in flowering, ornamental, or vegetable plant production more than 50 percent of its total use time is eligible for exemption.

h. Beginning and end of flowering, ornamental, or vegetable plant production. Flowering, ornamental, or vegetable plant production begins with the purchase of seeds or starter plants. Flowering, ornamental, or vegetable plant production ceases when a plant has grown to the size or weight at which it will be prepared for shipment to the destination where it will be marketed.

i. Machinery and equipment design. Machinery and equipment used in flowering, ornamental, or vegetable plant production are eligible for exemption if they were specifically designed for use in flowering, ornamental, or vegetable plant production. Machinery and equipment which are not specifically designed for use in flowering, ornamental, or vegetable plant production, but are directly and primarily used in flowering, ornamental, or vegetable plant production, are eligible for exemption with the exception of common or ordinary hand tools.

EXAMPLE: Bob Jones raises tulips and must use a thermometer to monitor the temperature in his greenhouse. Bob Jones buys a thermometer designed for use in a residence, but uses it directly and primarily to monitor the temperature in his greenhouse. The thermometer's use would be considered exempt.

j. Replacement parts. The term "replacement parts" means the same as defined in subrule 226.1(2), paragraph "i."

226.18(3) Examples of machinery and equipment directly used in flowering, ornamental, or vegetable plant production can be found in subrule 226.19(3).

226.18(4) Taxable examples. The following are nonexclusive examples of machinery or equipment which would not be directly used in flowering, ornamental, or vegetable plant production.

a. Machinery or equipment used to assemble, maintain, or repair other machinery or equipment directly used in flowering, ornamental, or vegetable plant production.

b. Machinery or equipment used in the growing operation's management, administration, advertising, or selling (e.g., calculators, office safes, telephones, books, and plant magazines).

c. Machinery or equipment used in the exhibit of flowering, ornamental, or vegetable plants.

d. Machinery or equipment used in safety or fire prevention, even though the machinery or equipment is required by law.

e. Machinery or equipment for employee or personal use. Machinery or equipment used for the personal comfort, convenience, or use by a grower, the grower's family or employees, or persons associated with the grower is not exempt from tax. Examples of such machinery and equipment include the following: beds, mattresses, blankets, tableware, stoves, refrigerators, and other equipment used in conjunction with the operation of a grower's home, or other facilities for the grower's employees.

f. Machinery or equipment used for heating, cooling, ventilation, and lighting of office, retail, or display buildings where production does not occur.

g. Vehicles subject to registration.

226.18(5) Packing material used in flowering, ornamental, or vegetable plant production. The sales price for the sale of property which is a container, label, carton, pallet, packing case, wrapping, baling wire, twine, bag, bottle, shipping case, or other similar article or receptacle sold for use in the production of flowering, ornamental, or vegetable plants in commercial greenhouses or other places which sell such

items in the ordinary course of business is not subject to sales tax. Containers and packaging materials include but are not limited to boxes, trays, labels, sleeves, tape, and staples.

226.18(6) Sales of self-propelled implements. Sales of self-propelled implements or implements customarily drawn or attached to self-propelled implements and replacement parts for the same are exempt from tax if the implements are used directly and primarily in the production of plants in commercial greenhouses or elsewhere. Exempt implements include, but are not limited to, forklifts used to transport pallets of plants, wagons containing sterilized soil, and tractors used to pull these items.

226.18(7) Sales of machinery and equipment used in plant production which are not self-propelled or attached to self-propelled machinery and equipment are exempt from tax. Rule 701—226.19(423) includes nonexclusive examples of machinery and equipment which are not self-propelled or attached to self-propelled machinery and equipment and which are directly and primarily used in plant production.

226.18(8) Fuel used in plant production. See subrule 226.12(2), paragraph “b.”

226.18(9) Sales of water used in the production of plants are exempt from tax. If water is not separately metered, the plants’ grower must determine by use of a percentage the portion of water used for a taxable purpose and the portion used for an exempt purpose. Nonexclusive examples of taxable usage include rest rooms, sanitation, lawns, and vehicle wash.

226.18(10) Agricultural health promotion items. Sales to a commercial greenhouse of fertilizer, limestone, herbicides, pesticides, insecticides, plant food, and medication for use in disease, weed, and insect control or in other health promotion of flowering, ornamental, or vegetable plants are exempt from tax. For the purposes of this rule, a virus, bacteria, fungus, or insect which is purchased for use in killing insects or other pests is an insecticide or pesticide. Refer to rule 701—226.9(423) for more information regarding these exemptions.

226.18(11) Miscellaneous exempt and taxable plant sales.

a. Sales of pots, soil, seeds, bulbs, and starter plants for use in plant production are not the sale of machinery or equipment, but can be sales for resale and exempt from tax if the pots and soil are sold with the final product or become the finished product.

b. Sales of portable buildings which will be used to display plants for retail sales are taxable.

c. Sales of whitewash which will be painted on greenhouses to control the amount of sunlight entering those greenhouses are taxable sales of a supply rather than exempt sales of equipment.

226.18(12) Seller’s and purchaser’s liability for sales tax. The seller shall be relieved of sales tax liability if the seller receives from the purchaser an exemption certificate stating that the purchase is of machinery and equipment meeting the requirements of this rule. The exemption certificate must be fully completed. If items purchased tax-free pursuant to an exemption certificate are used or disposed of by the purchaser in a nonexempt manner, the purchaser is solely and directly liable for the sales tax and shall remit the tax to the department.

This rule is intended to implement Iowa Code subsections 423.3(11) and 423.3(15).

[ARC 7870B, IAB 6/17/09, effective 7/22/09]

701—226.19(423) Nonexclusive lists. The following tables list items that are taxable or exempt.

226.19(1) Exempt for agricultural production.

adjuvants	irrigation equipment
alternators and generators*	kill cones
augers*	limestone, agricultural
balers	manure spreaders
bale transportation equipment	mowers, hay
baling wire and binding twine	oil filters
batteries for exempt machinery	oil pumps
blowers, grain dryer	packing materials
brush hogs*	pesticides

combines, cornheads, platforms	pickers
conveyors, temporary or portable*	plants (seeds)
corn pickers	planters
crawlers, tractor	plows
cultipackers	piston rings
cultivators	pruning and picking equipment*
discs	replacement parts
draft horses	rock pickers
drags	rollers*
drainage pipe and tile	rotary blade mowers; not lawn mowers
dusters*	rotary hoes
ensilage cutters	seeders
ensilage forks and trucks (a pickup does not qualify)	seed cleaners*
farm wagons and accessories	seed planters
fertilizer, agricultural	seeds
fertilizer spreaders	self-propelled implements
filters	shellers*
forage harvesters, boxes	silo blowers, unloaders*
fuel for grain drying or other agricultural production	sowers
gaskets	spark plugs for exempt machinery
grain augers, portable*	sprayers*
grain drills	spreaders
grain dryer, heater and blower only	sprinklers
grain planters	subsoilers
harrows	surfactants
hay conditioners	tillers
hay hooks	tires for exempt machinery
hay loaders	tractor chains
herbicides	tractors, farm
implements customarily drawn or attached to a self-propelled implement	tractor weights
insecticides	vegetable harvesters
	weeders*

*Exempt if drawn or attached to a self-propelled farm implement and directly and primarily used in agricultural production or, if portable, used directly and primarily in agricultural production.

226.19(2) *Exempt for dairy and livestock production.*

adjuvants	heaters, portable
alternators and generators ¹	hog feeders, portable
artificial insemination equipment	hog ringers ³
auger systems	hoof trimmers, portable ³
automatic feeding systems, portable	hypodermic syringes and needles, nondisposable
batteries for exempt machinery	implements customarily drawn or attached to a self-propelled implement
barn ventilators	incubators, portable
bedding materials ²	inlets and inlet systems
breeding stock, agricultural	inoculation materials
bulk feeding tanks, portable	insecticides
bulk milk coolers and tanks, portable	kill cones
calf weaners and feeders, portable	livestock feeding, watering and handling equipment, portable
cattle feeders, portable	loading chutes, portable
chain and rope hoists, portable ¹	manure brooms, portable ³
chicken pickers, plucking equipment	manure handling equipment, includes front-end and rear-end loaders, portable ³
chick guards	manure scoops, portable ¹
clipping machines, portable ³	medications
conveyors, temporary or portable ¹	milk coolers, portable
cow stalls, portable	milking equipment, includes cans, etc. ³
cow ties, portable	milking machines
cow watering and feeding bowls, portable	milk strainers and strainer disks, if not disposable
crawlers, tractor	milk tanks, portable
currying and oiling machines, portable	pesticides
curtains and curtain systems	poultry feeders, portable
dehorner	poultry founts, portable
domestic fowl	poultry litters, portable
draft horses	poultry nests, portable
drip systems	refrigerators
electric fence equipment, portable	replacement parts
fans and fan systems	sawdust ²
farm wagons and accessories	self-propelled implements
farrowing houses, crates, stalls, portable	shutters and shutter systems
feed	space heaters, portable
feed bins, portable	specialized flooring, portable
feed carts, portable	sprayers ¹
feed elevators, portable	squeeze chutes, stalls, portable
feed grinders, portable	stanchions, portable
feed scoops ³	surfactants
feed tanks, portable	tires for exempt machinery
feeder chutes, portable	thermometers ³

feeders, portable	tractor chains
fence and fencing supplies, temporary or portable	tractors, farm
foggers	tractor weights
fuel to heat or cool livestock buildings	vacuum coolers
gaskets	ventilators
gates, portable	water filters, heaters, pumps, softeners, portable
gestation stalls, portable	waterers/watering tanks, portable
grooming equipment, portable ³	weaners
head gates, portable	wood chips ²

¹Exempt if drawn or attached to a self-propelled farm implement and directly and primarily used in dairy or livestock production or, if portable, used directly and primarily in dairy or livestock production.

²Exempt when used as livestock and poultry bedding.

³Designed for farm use.

226.19(3) *Exempt for flowering, ornamental, or vegetable plant production.*

air-conditioning pads	greenhouse monorail systems*
airflow control tubes	greenhouse thermometers
atmospheric CO ₂ control and monitoring equipment	handcarts used to move plants
backup generators	lighting which provides artificial sunlight
bins holding sterilized soil	overhead heating, lighting, and watering systems*
control panels for heating and cooling systems*	overhead tracks for holding potted plants*
coolers used to chill plants*	plant tables*
cooling walls* or membranes	plant watering systems*
equipment used to control water levels for subirrigation	portable buildings used to grow plants*
fans used for cooling and ventilating*	seeding and transplanting machines
floor mesh for controlling weeds	soil pot and soil flat filling machines
germination chambers	steam generators for soil sterilization*
greenhouse boilers*	warning devices which monitor excess heat or cold
greenhouse netting or mesh when used for light and heat control	watering booms

*Exempt if not real property. "Real property" is defined in Iowa Code subsection 4.1(13) as "lands, tenements, hereditaments, and all rights thereto and interests therein, equitable as well as legal." See 701—Chapter 219.

226.19(4) *Taxable even if used in agricultural production.*

additives	lubricants and fluids
air compressors	lumber*
air conditioners, unless a replacement part for exempt machinery	marking chalk
air tanks	mops
antifreeze	motor oils
axes	nails
barn cleaner, permanent	office supplies
baskets	oxygen

belt dressing	packing room supplies
bins, permanent	paint and paint sprayers
brooms	pliers
buckets	posthole diggers, hand tool
building materials* and supplies	poultry brooders, permanent
burlap cleaners	poultry feeders, permanent
cattle feeders, permanent	poultry nests, permanent
cement	pruning tools
chain saws	pumps for household or lawn use
cleaning brushes	radios, unless a replacement part for exempt machinery
cleansing agents and materials	refrigerators for home use
computers (including laptop), for personal use	repair tools
computer software	road maintenance equipment
construction tools	road scraper
concrete	roofing
conveyors, permanent	sanders
cow ties, permanent	scrapers
ear tags	screwdrivers
fence, posts, wire, permanent	shingles
field toilets	shovels
fire prevention equipment	silos
freon	snow fence unless portable and used directly in dairy and livestock production
fuel additives	snow plows and snow equipment
fuel tanks and pumps	space heaters, permanent
garden hoses and rakes	specialized flooring, permanent
glass	sprinklers, permanent
grain bins and tanks, permanent*	stalls, permanent
grease	staples
grease guns	stanchions, permanent
hammers	storage tanks
hog rings	tarps
hydraulic fluids	tiling machinery and equipment
hypodermic syringes, disposable	tractors, garden
lamps	welders
lanterns	wheel barrows
light bulbs (for household use)	wrenches

*The buyer of building materials is responsible for paying sales tax or use tax on those materials, including materials to construct grain bins. The buyer is the person who pays the vendor.

This rule is intended to implement Iowa Code subsections 423.3(6), 423.3(8) and 423.3(11).

CHAPTERS 227 to 229
Reserved

CHAPTER 230
EXEMPTIONS PRIMARILY BENEFITING MANUFACTURERS AND
OTHER PERSONS ENGAGED IN PROCESSING

Rules in this chapter include cross references to provisions in 701—Chapters 15, 18 and 26 that were applicable prior to July 1, 2004.

701—230.1 Reserved.

701—230.2(423) Carbon dioxide in a liquid, solid, or gaseous form, electricity, steam, and taxable services used in processing. An expanded definition of “processing” is allowed to manufacturers of food products for human consumption using carbon dioxide in a liquid, solid, or gaseous form, electricity, steam, and taxable services. For the purposes of this rule, the rental or leasing of tangible personal property is treated as the furnishing of a taxable service and not as the sale of tangible personal property.

230.2(1) “Manufacturer” characterized. A manufacturer is a person or entity different from a merchant, dealer, or retailer. See *Commonwealth v. Thackara Mfg. Co.*, 27 A. 13 (Pa. 1893). In order for a business to be a manufacturer, the principal business of that business must be manufacturing. See *Associated General Contractors v. State Tax Commission*, 123 N.W.2d 922 (Iowa 1963). Another distinction is that a merchant or retailer sells in order to earn a profit and a manufacturer sells to take profits already earned from prior activity. See *State v. Coastal Petrol Inc.*, 198 So. 610 (Ala. 1940). A person primarily engaged in selling tangible personal property in order to earn a profit and only incidentally engaged in creating products suitable for use from raw materials is not a manufacturer. A retail grocery store, incidentally and not primarily engaged in manufacturing activities such as meat cutting or production and packaging of baked goods, is not a “manufacturer of food products for human consumption” and is not entitled to claim the special processing exemption allowed to those manufacturers. Retail food stores, restaurants, and other persons incidentally engaged in food manufacturing activities can, however, continue to claim on their incidental processing activities the processing exemption allowed to persons who are not manufacturers of food products for human consumption. See rule 701—230.3(423).

230.2(2) The following activities constitute processing when performed by a manufacturer to create food products for human consumption. Any carbon dioxide in a liquid, solid, or gaseous form, electricity, steam, or other taxable services primarily used in the performance of these activities is exempt from tax.

a. Treatment of material that changes its form, context, or condition in order to produce a marketable food product for human consumption. “Special treatment” of the material to change its form, context, or condition is not necessary to lawfully claim the exemption. Examples of “treatment” which would not be “special” are the following: the washing, sorting and grading of fruits or vegetables; the washing, sorting, and grading of eggs; and the mixing or agitation of liquids. By way of contrast, sterilization would be “special treatment.”

b. Maintenance of the quality or integrity of the food product and the maintenance or the changing of temperature levels necessary to avoid spoilage or to hold the food in marketable condition. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or other taxable service used in freezers, heaters, coolers, refrigerators, or evaporators used in cooling or heating which holds the food product at a temperature necessary to maintain quality or integrity or to avoid spoilage of the food or to hold the food product in marketable condition is exempt from tax. It is not necessary that the taxable service be used to raise or lower the temperature of the food. Also, processing of food products for human consumption does not cease when the food product is in marketable form. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used to maintain or to change a temperature necessary to keep the product marketable is exempt from tax.

c. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or other taxable service primarily used in the maintenance of environmental conditions necessary for the safe or efficient use of machinery or material used to produce the food product is exempt from tax. For example, electricity used to air-condition a room in which meat is stored is exempt from tax if the purpose of the air conditioning is

to maintain the meat in a condition in which it is easy to slice rather than for the comfort of the employees who work in the room.

d. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service primarily used in sanitation and quality control activities is exempt from tax. Nonexclusive examples exempt from tax include taxable services used in pH meters, microbiology counters and incubators used to test the purity or sanitary nature of a food product. For example, electricity used in egg-candling lights would be exempt from tax. Also, electricity, steam, or any taxable service used to power equipment which cleans and sterilizes food production equipment would be exempt from tax. Electricity used to power refrigerators used to store food samples for testing would be exempt from tax. Finally, electricity used to power “bug lights” or other insect-killing equipment used in areas where food products are manufactured or stored would be exempt from tax.

e. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used in the formation of packaging for marketable food products for human consumption is exempt from tax. For example, electricity used in plastic bottle-forming machines by a food manufacturer is exempt from tax if the plastic bottles will be used to hold a marketable food product, such as milk. Any electricity, steam, or other taxable service used in the heating, compounding, liquefying and forming of plastic pellets into these plastic bottles is exempt.

f. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used in placement of the food product into shipping containers is exempt from tax. For example, electricity used by a food manufacturer to place food products into packing cases, pallets, crates, shipping cases, or other similar receptacles is exempt.

g. Any carbon dioxide in liquid, solid, or gaseous form, electricity, steam, or taxable service used to move material which will become a marketable food product or used to move the marketable food product itself until shipment from the building of manufacture is exempt from tax. This includes, but is not limited to, taxable services used in pumps, conveyors, forklifts, and freight elevators moving the material or food product and taxable services used in door openers which open doors for forklifts or other devices moving the material or product. Any loading dock which is attached to a building of manufacture is a part of that building. Any electricity, steam, or taxable service used to move any food products to a loading dock is exempt from tax. If a food product is carried outside its building of manufacture by any conveyor belt system, electricity used by any portion of the system located outside the building is taxable.

This rule is intended to implement 2005 Iowa Code Supplement subsection 423.3(49).

701—230.3(423) Services used in processing. Electricity, steam, or any taxable service is used in processing only if the service is used in any operation which subjects raw material to some special treatment which changes, by artificial or natural means, the form, context, or condition of the raw material and results in a change of the raw material into marketable tangible personal property intended to be sold ultimately at retail. The following are nonexclusive examples of what would and would not be considered electricity, steam, or taxable services used in processing:

230.3(1) The sales price from the sale of electricity or steam consumed as power or used in the actual processing of tangible personal property intended to be sold ultimately at retail would be exempt from tax. The sales price is to be distinguished from that of electricity or steam consumed for the purpose of lighting, ventilating, or heating manufacturing plants, warehouses, or offices. The latter sales price would be taxable.

230.3(2) The sales price from electricity used in the freezing of tangible personal property, ultimately to be sold at retail, to make the property marketable would be exempt from sales tax. See *Fischer Artificial Ice & Cold Storage Co. v. Iowa State Tax Commission*, 81 N.W.2d 437 (Iowa 1957).

230.3(3) Electricity used merely in the refrigeration or the holding of tangible personal property for the purpose of preventing spoilage or to preserve the property in its present state would not be “used in processing” and, therefore, its sales price would be subject to tax. See *Fischer Artificial Ice, supra*.

Measurement of taxable and nontaxable use of electricity and steam. The exemption provided in the case of electricity or steam applies only upon the sales price from the sale of electricity or steam when

the energy is consumed as power or is used in the processing of food products or other tangible personal property intended to be sold ultimately at retail, as distinguished from electricity or steam which is consumed for taxable purposes. When practical, electricity or steam consumed as power or used directly in processing must be separately metered and separately billed by the supplier thereof to clearly distinguish energy so consumed from electricity or steam which is consumed for purposes or under conditions in which the exemption would not apply. If it is impractical to separately meter electricity or steam which is exempt from that electricity or steam upon which tax will apply, the purchaser must furnish an exemption certificate to the supplier with respect to what percentage of electricity or steam in the case of each purchaser is subject to the exemption. Reference 701—subrule 15.3(2). The exemption certificate must be supported by a study showing how the percentage was developed. When a certificate and study are accepted by the supplier as a basis for determining exemption, any changes in the processing method, changes in equipment or alterations in plant size or capacity affecting the percentage of exemption will necessitate the filing of a new and revised statement by the purchaser. When the electric or steam energy is separately metered, enabling the supplier to accurately apply the exemption in the case of processing energy, the purchaser need only file an exemption certificate since the supplier, under such conditions, will separately record and compute the consumption of energy which is exempt from tax apart from that energy which is subject to tax.

This rule is intended to implement Iowa Code section 423.3(49).

701—230.4(423) Chemicals, solvents, sorbents, or reagents used in processing. Chemicals, solvents, sorbents, and reagents directly used and consumed, dissipated, or depleted in processing tangible personal property intended to be sold ultimately at retail shall be exempt from sales and use tax. For the purpose of this processing exemption rule, free newspapers and shoppers' guides are considered to be retail sales. See 701—Chapter 211 for definition of the words "chemicals," "solvents," "sorbents," and "reagents."

For the purpose of this rule, a catalyst is considered to be a chemical, solvent, sorbent, or reagent. A catalyst is a substance which promotes or initiates a chemical reaction and, as such, is exempt from tax if consumed, dissipated, or depleted during processing of tangible personal property intended to be ultimately sold at retail.

To qualify for this exemption, all of the following conditions must be met:

1. The item must be a chemical, solvent, sorbent, or reagent.
2. The chemical, solvent, sorbent, or reagent must be directly used and consumed, dissipated, or depleted during processing as defined in referenced rule 701—18.29(422,423).
3. The processing must be performed on tangible personal property intended to be sold ultimately at retail.
4. The chemical, solvent, sorbent, or reagent need not become an integral or component part of the processed tangible personal property.

This rule is intended to implement Iowa Code section 423.3(50).

701—230.5(423) Exempt sales of gases used in the manufacturing process. Sales of argon and other similar gases to be used in the manufacturing process are exempt from tax. For the purposes of this rule, only inert gases are gases that are similar to argon. An "inert gas" is any gas that is normally chemically inactive. It will not support combustion and cannot be used as either a fuel or as an oxidizer. Argon, helium, neon, krypton, radon, and xenon are inert gases. Oxygen, hydrogen, and methane are nonexclusive examples of gases that are not inert. These sales are exempt only if the gas is purchased by a "manufacturer," for use in "processing," as those terms are defined in subrules 230.15(3) and 230.15(4).

This rule is intended to implement Iowa Code section 423.3(51).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.6(423) Sale of electricity to water companies. The sales price from the sale of electricity to water companies assessed for property tax pursuant to Iowa Code sections 428.24, 428.26, and 428.28, which is used solely for the purpose of pumping water from a river or well is exempt from sales tax. For

the purposes of this rule, “river” means a natural body of water or waterway that is commonly known as a river. “Well,” for the purposes of this rule, means an issue of water from the earth; a mineral spring; a pit or hole sunk into the earth to reach a water supply; a shaft or hole sunk to obtain oil, water, gas, etc.; or a shaft or excavation in the earth, in mining, from which run branches. *Pacific Gas and Electric Company v. Hufford*, 319 P.2d 1033, 1040 (Calif. 1957), citing Webster’s New International Dictionary, 2nd ed., unabridged.

This rule is intended to implement Iowa Code section 423.3(52).

701—230.7(423) Wind energy conversion property. The sales price from the sale of property used to convert wind energy to electrical energy or the sales price from the sale of materials used to manufacture, install, or construct property used to convert wind energy to electrical energy is exempt from tax.

For the purposes of this rule, “property used to convert wind energy to electrical energy” means any device which converts wind energy to usable electrical energy including, but not limited to, wind chargers, windmills, wind turbines, pad mount transformers, substations, power lines, and tower equipment.

This rule is intended to implement Iowa Code section 423.3(53).

701—230.8(423) Exempt sales or rentals of core making and mold making equipment, and sand handling equipment. This rule is applicable to the period beginning on or after July 1, 2004.

230.8(1) Exempt sales and rentals of machinery and equipment. The sales price from sales or rentals of core making, mold making, and sand handling machinery and equipment directly and primarily used by a foundry in the mold making process is exempt from tax. For the purposes of this rule, a “foundry” is an establishment where metal, but not plastic, is melted and poured into molds. A nonexclusive list of equipment which may be exempt under this rule includes sand storage tanks, conveyers, patterns, muller controllers, and sand mixers. A nonexclusive list of items which would not be exempted by this rule includes sand and other materials (as opposed to equipment) used to build molds or cores, and supplies. Services used in the mold making process are not exempted from tax by this rule. For the purposes of this rule, core making, mold making, and sand handling equipment also include replacement parts necessary for the operation of the equipment which is used directly and primarily by a foundry in the mold making process. Reference 701—subrule 18.58(1) for definitions of “directly used,” “equipment,” “machinery,” “replacement part” and “supplies.”

230.8(2) Exempt sales of fuel and electricity. The sales price from sales of fuel used in creating heat, power, or steam for, or used for generating electric current for, or electric current sold for use in machinery or equipment the sale or rental of which is exempt under subrule 230.8(1) is exempt from tax.

230.8(3) Exempt design and installation services. The sales price from furnishing design and installation services, including electrical and electronic installation, of machinery and equipment the sale or rental of which is exempt under subrule 230.8(1) is exempt from tax. Reference rule 701—26.16(422) for characterizations of the words “installation” and “electronic installation.”

This rule is intended to implement Iowa Code section 423.3(82).

701—230.9(423) Chemical compounds used to treat water. Chemical compounds placed in water which is ultimately sold at retail should be purchased exempt from the tax. The chemical compounds become an integral part of property sold at retail. Chemical compounds placed in water which is directly used in processing are exempt from the tax, even if the water is consumed by the processor and not sold at retail.

Chemical compounds which are used to treat water that is not sold at retail or which are not used directly in processing shall be subject to tax. An example would be chlorine or other chemicals used to treat water for a swimming pool.

Special boiler compounds used by processors when live steam is injected into the mash or substance, whereby the steam liquefies and becomes an integral part of the product intended to be sold at retail and also becomes a part of the finished product, shall be exempt from tax.

This rule is intended to implement Iowa Code section 423.3(50).

701—230.10(423) Exclusive web search portal business and its exemption. Effective on or after July 1, 2007, a business that qualifies as a web search portal business that has a physical location in Iowa and that meets specific criteria may obtain an exemption from sales and use tax on specific purchases that are used in the operation and maintenance of the web search portal business. This exemption from sales and use tax also applies to the affiliates of a qualifying web search portal business.

230.10(1) Definitions. For the purpose of this exemption, the following definitions apply:

a. “Affiliate” means an entity that directly or indirectly controls, is controlled with or by, or is under common control with another entity.

b. “Control” means any of the following:

(1) In the case of a United States corporation, the ownership, directly or indirectly, of 50 percent or more of the voting power to elect directors.

(2) In the case of a foreign corporation, if the voting power to elect the directors is less than 50 percent, the maximum amount allowed by applicable law.

(3) In the case of an entity other than a corporation, 50 percent or more ownership interest in the entity, or the power to direct the management of the entity.

c. “Web search portal business” means an entity among whose primary businesses is to provide a search portal to organize information; to access, search, and navigate the internet, including research and development to support capabilities to organize information; and to provide internet access, navigation, and search functionalities.

230.10(2) Criteria to claim exemption. The following govern whether a business qualifies for an exemption from sales and use tax on purchases made or leases executed by a web search portal business:

a. All of the following requirements must be met by a web search portal business for the purpose of this exemption:

(1) The business of the purchaser or lessee shall be as a provider of a web search portal.

(2) The web search portal business shall have a physical location in Iowa that is used for the operations and maintenance of the web search portal site on the internet, including but not limited to research and development to support capabilities to organize information and to provide internet access, navigation, and search.

(3) The web search portal business shall make a minimum investment in an Iowa physical location of \$200 million within the first six years of operation in Iowa beginning with the date the web search portal business initiates site preparation activities. The minimum investment includes the initial investment, including land and subsequent acquisition of additional adjacent land and subsequent investment at the Iowa location.

(4) The web search portal business shall purchase, option, or lease Iowa land not later than December 31, 2008, for any initial investment. However, the December 31, 2008, date shall not affect the future purchases of adjacent land and additional investment in the initial or adjacent land to qualify as part of the minimum investment for purposes of this exemption.

b. Aggregation to meet requirements. A web search portal business that is seeking an exemption from sales and use tax under this exemption may meet the requirements found in subparagraphs 230.10(2)“a”(1) to (4) above, by aggregating various Iowa investments and other requirements with its business affiliates.

c. Failure to meet investment qualifications. If a web search portal business claiming exemption from sales and use tax under this exemption fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the web search portal business, the web search portal business will lose the right to claim this exemption from sales and use tax. Immediately following the loss of the right to claim this exemption from sales and use tax, the web search portal business is required to pay all sales or use taxes that would have been due on the purchase or rental of all purchases previously claimed exempt from sales and use tax, plus any and all applicable statutory penalty and interest due on the tax.

230.10(3) Exempt purchases. Sales and leases of the following are exempt from sales and use tax when sold or leased to a qualifying web search portal business:

- a. Computers and equipment that are necessary for the maintenance and operation of the web search portal business;
- b. All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the web search portal;
- c. All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “b” above;
- d. All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the web search portal;
- e. All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the web search portal. This equipment includes, but is not limited to, exterior dedicated business-owned power substations, backup power generation systems, battery systems, and related infrastructure;
- f. All equipment used in the racking system, including cabling and trays;
- g. Fuel purchased by the web search portal business that is used in the backup power generation system and in all items listed in paragraphs “a” to “f.” This provision includes the fuel used in backup generators that may be located outside of the building that are used if power is interrupted to ensure the web search portal continues operation; and
- h. Electricity purchased for use in operating the web search portal.

230.10(4) Limitation of exemption. The purchases or leases of the items listed in subrule 230.10(3) are only exempt if the items being purchased or leased are being used in the operation or maintenance of the web search portal business. Such purchases or leases will not be exempt from sales or use tax if the item is to be used in the business for another purpose not related to operations or maintenance. Examples of items included in this limitation include but are not limited to:

- a. Electricity not used for operation or maintenance, such as in the office or employee break room;
- b. Tangible personal property used in areas of the web search portal facility that is not used for operation or maintenance, such as cleaning equipment and supplies;
- c. Building materials that become part of real property, such as concrete, steel or roofing; and
- d. Tangible personal property that becomes part of real property, such as a dishwasher.

230.10(5) Initial date of exemption. The exemption from sales and use tax begins on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying web search portal business.

This rule is intended to implement 2007 Iowa Code Supplement section 423.3(92).

701—230.11(423) Web search portal business and its exemption. Effective on or after July 1, 2008, a business that qualifies as a web search portal business that has a physical location in Iowa and that meets specific criteria may obtain an exemption from sales and use tax on specific purchases that are used in the operation and maintenance of the web search portal business. This exemption from sales and use tax also applies to the affiliates of a qualifying web search portal business.

230.11(1) Definitions. For the purpose of this exemption, the following definitions apply:

“*Affiliate*” means an entity that directly or indirectly controls, is controlled with or by, or is under common control with another entity.

“*Control*” means any of the following:

1. In the case of a United States corporation, the ownership, directly or indirectly, of 50 percent or more of the voting power to elect directors.
2. In the case of a foreign corporation, if the voting power to elect the directors is less than 50 percent, the maximum amount allowed by applicable law.
3. In the case of an entity other than a corporation, 50 percent or more ownership interest in the entity, or the power to direct the management of the entity.

“*Web search portal business*” means an entity whose business among other businesses is to provide a search portal to organize information; to access, search, and navigate the Internet, including research and development to support capabilities to organize information; or to provide Internet access, navigation, or search functionalities.

230.11(2) Criteria to claim exemption. The following governs whether a business qualifies for an exemption from sales and use tax on purchases made or leases executed by a web search portal business:

a. Requirements. All of the following requirements must be met by a web search portal business for the purpose of this exemption:

(1) The business, among other businesses, of the purchaser or lessee shall be as a provider of a web search portal.

(2) The web search portal business shall have a physical location in Iowa that is used for the operations and maintenance of the web search portal site on the Internet, including but not limited to research and development to support capabilities to organize information and to provide Internet access, navigation, and search functionality.

(3) The web search portal business shall make a minimum investment in an Iowa physical location of \$200 million within the first six years of operation in Iowa beginning with the date the web search portal business initiates site preparation activities. The minimum investment includes the initial investment, including land and subsequent acquisition of additional adjacent land and subsequent investment at the Iowa location.

(4) The web search portal business shall purchase, option, or lease Iowa land not later than December 31, 2008, for any initial investment. However, the December 31, 2008, date shall not affect the future purchases of adjacent land and additional investment in the initial or adjacent land to qualify as part of the minimum investment for purposes of this exemption.

b. Aggregation to meet requirements. A web search portal business that is seeking an exemption from sales and use tax under this exemption may meet the requirements found in subparagraphs 230.11(2)“a”(1) to (4) by aggregating various Iowa investments and other requirements with its business affiliates.

c. Failure to meet investment qualifications. If a web search portal business claiming exemption from sales and use tax under this exemption fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the web search portal business, the web search portal business will lose the right to claim this exemption from sales and use tax. Immediately following the loss of the right to claim this exemption from sales and use tax, the web search portal business is required to pay all sales or use taxes that would have been due on the purchase or rental of all purchases previously claimed exempt from sales and use tax, plus any and all applicable statutory penalty and interest due on the tax.

230.11(3) Exempt purchases. Sales and leases of the following are exempt from sales and use tax when sold or leased to a qualifying web search portal business:

a. Computers and equipment that are necessary for the maintenance and operation of the web search portal business;

b. All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the web search portal business;

c. All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “b”;

d. All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the web search portal business;

e. All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the web search portal business. This equipment includes, but is not limited to, exterior dedicated business-owned power substations; and back-up power generation systems, battery systems, and related infrastructure;

f. All equipment used in the racking system, including cabling and trays;

g. Fuel purchased by the web search portal business that is used in the back-up power generation system and in all items listed in paragraphs “a” to “f.” This includes the fuel used in the back-up generators that may be located outside the building and that are used if power is interrupted to ensure the web search portal business continues operation; and

h. Electricity purchased for use in operating the web search portal business.

230.11(4) *Limitation of exemption.* The purchase or lease of the items listed in subrule 230.11(3) is only exempt if the items being purchased or leased are being used in the operation or maintenance of the web search portal business. Such purchases or leases will not be exempt from sales or use tax if the item is to be used in the business for another purpose. For example, the purchase of electricity for use in the office portion of the web search portal facility would not be exempt. The purchase of building materials that become real property would not be exempt. For example, the purchase of a dishwasher that will be built into a kitchen area in the break room for employees would not be exempt from tax. The purchase of a dishwasher is the purchase of tangible personal property. However, upon installation, the dishwasher becomes part of the building and realty and is not exempt from Iowa sales or use tax.

230.11(5) *Initial date of exemption.* The exemption from sales and use tax begins on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying web search portal business.

This rule is intended to implement Iowa Code section 423.3 as amended by 2008 Iowa Acts, House File 2233, section 1.

701—230.12(423) Large data center business exemption. Effective on or after July 1, 2009, a data center business that has a physical location in Iowa and that meets specific criteria may obtain an exemption from sales and use tax on specific purchases that are used in the operation and maintenance of the data center business.

230.12(1) *Definitions.* For the purpose of this rule, the following definitions apply:

“*Data center*” means a building rehabilitated or constructed to house a group of networked server computers in one physical location in order to centralize the storage, management, and dissemination of data and information pertaining to a particular business, taxonomy, or body of knowledge.

“*Data center business*” means an entity whose business, among other businesses, is to operate a data center.

230.12(2) *Criteria to claim exemption.* The following govern whether a business qualifies for an exemption from sales and use tax on purchases made or leases executed by a data center business:

a. Requirements. All of the following requirements must be met by a data center business for the purpose of this exemption:

(1) The business, among other businesses, of the purchaser or lessee shall be as a provider of a data center.

(2) The data center business shall have a physical location in Iowa that is, in the aggregate, at least 5,000 square feet in size used for the operation and maintenance of the data center.

1. A data center facility includes, but is not limited to, the centralization, storage, management and dissemination of data and information.

2. The physical location shall include the mechanical and electrical systems, redundant or backup power supplies, redundant data communications connections, environmental controls, and fire suppression systems for the data center business. The data center business’s physical location may also include a restricted access area employing advanced physical security measures such as video surveillance systems and card-based security or biometric security access systems.

(3) The data center business shall make a minimum investment in an Iowa physical location of \$200 million within the first six years of operation in Iowa beginning with the date the data center business initiates site preparation activities. The minimum investment includes the initial investment, including land and subsequent acquisition of additional adjacent land and subsequent investment at the Iowa location.

(4) The data center business shall comply with the applicable sustainable design and construction standards in Iowa Administrative Code 661—Chapter 310 as established by the state building code commissioner pursuant to Iowa Code section 103A.8B.

b. Failure to meet investment qualifications. If a data center business claiming exemption from sales and use tax under this exemption fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the data center business, the data center business will lose the right to claim this exemption

from sales and use tax. Immediately following the loss of the right to claim this exemption from sales and use tax, the data center business is required to pay all sales and use taxes that would have been due on the purchase or rental of all purchases previously claimed exempt from sales and use tax, plus any and all applicable statutory penalty and interest due on the tax.

230.12(3) Exempt purchases. Sales and leases of the following are exempt from sales and use tax when sold or leased to a qualifying data center business:

a. Computers and equipment that are necessary for the maintenance and operation of the data center business;

b. All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the data center business;

c. All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “*b*”;

d. All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the data center business;

e. All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the data center business. This equipment includes, but is not limited to, exterior dedicated business-owned power substations and backup power generation systems, battery systems, and related infrastructure;

f. All equipment used in the racking system, including cabling and trays;

g. Fuel purchased by the data center business that is used in the backup power generation system and in all items listed in paragraphs “*a*” to “*f*.” This includes the fuel used in the backup generators that may be located outside the building and that are used if power is interrupted to ensure the data center business continues operation; and

h. Electricity purchased for use in operating the data center business.

230.12(4) Limitation of exemption. The purchase or lease of the items listed in subrule 230.12(3) is only exempt if the items being purchased or leased are being used in the operation or maintenance of the data center business. Such purchases or leases will not be exempt from sales or use tax if the item is to be used in the business for another purpose. For example:

a. The purchase of electricity for use in the office portion of the data center business facility would not be exempt.

b. The purchase of building materials that become real property would not be exempt. For example, the purchase of a dishwasher that will be built into a kitchen area in the break room for employees would not be exempt from tax. Although the purchase of a dishwasher is the purchase of tangible personal property, upon installation, the dishwasher becomes part of the building and realty and, therefore, is not exempt from Iowa sales and use tax.

230.12(5) Initial date of exemption. The exemption from sales and use tax begins on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying data center business.

This rule is intended to implement Iowa Code section 423.3 as amended by 2009 Iowa Acts, Senate File 478, sections 197 through 202.

[ARC 8602B, IAB 3/10/10, effective 4/14/10]

701—230.13(423) Data center business sales and use tax refunds. Effective on or after July 1, 2009, data center businesses in Iowa meeting certain criteria may make an annual application to the department for a refund of 50 percent of the sales and use tax paid on the sales price of certain computers, equipment, fuel, and electricity used in the operation of the data center business.

230.13(1) Definitions. For the purpose of this rule, the following definitions apply:

“*Data center*” means a building rehabilitated or constructed to house a group of networked server computers in one physical location in order to centralize the storage, management, and dissemination of data and information pertaining to a particular business, taxonomy, or body of knowledge.

“*Data center business*” means an entity whose business, among other businesses, is to operate a data center.

“*Refund year*” means the year beginning with the date of initial site preparation of the data center facility.

“*Rehabilitation*” means a process of substantial repair, remodeling, or alteration, which may include but is not limited to upgrading mechanical systems, plumbing, roofing, wiring, windows, and heating and cooling systems, and performing significant interior or exterior structural modification. Although they may be included as part of an overall rehabilitation project, singular actions such as the installation of a new information system or cosmetic changes to the interior or exterior appearance of a building do not, in and of themselves, constitute a rehabilitated building.

230.13(2) Basis and criteria for refunds. The amount, type, and length of refunds available to data center businesses depend upon the dollar amount of investment made, the type of construction undertaken, and the size in square feet of the facility.

a. Investment of \$136 million to \$200 million. Data center businesses which make investments in an Iowa facility of \$136 million to \$200 million in the first six years of operations and which facility contains at least 5,000 square feet are eligible for a refund of 50 percent of the sales and use tax paid on qualifying computers and equipment, backup fuel, and electricity for the first seven years of operation.

b. Investment of \$10 million to \$136 million—new construction. Data center businesses which make investments of \$10 million to \$136 million in the first six years of operations in the new construction of an Iowa facility that is at least 5,000 square feet are eligible for a refund of 50 percent of the sales and use tax paid on qualifying computers and equipment, backup fuel, and electricity for the first ten years of operation.

c. Investment of \$5 million to \$136 million—rehabilitation. Data center businesses which make investments of \$5 million to \$136 million in the first six years of operations in the rehabilitation of an Iowa facility that is at least 5,000 square feet are eligible for a refund of 50 percent of the sales and use tax paid on qualifying computers and equipment, backup fuel, and electricity for the first ten years of operation.

d. Investment of \$1 million to \$10 million—new construction. Data center businesses which make investments of \$1 million to \$10 million in the first three years of operations in the new construction of an Iowa facility of any size are eligible for a refund of 50 percent of the sales and use tax paid on fuel and electricity for the first five years of operation.

e. Investment of \$1 million to \$5 million—rehabilitation. Data center businesses which make investments of \$1 million to \$5 million in the first three years of operations in the rehabilitation of an Iowa facility of any size are eligible for a refund of 50 percent of the sales and use tax paid on fuel and electricity for the first five years of operation.

230.13(3) Purchases eligible for refunds. Sales and leases of the following are eligible for a refund of 50 percent of the sales and use tax paid when sold or leased to a qualifying data center business:

a. Computers and equipment that are necessary for the maintenance and operation of the data center business;

b. All equipment used for the operation and maintenance of the cooling system for the computers and equipment used in the operation of the data center business;

c. All equipment used for the operation and maintenance of the cooling towers for the cooling system referenced in paragraph “*b*”;

d. All equipment used for the operation and maintenance of the temperature control infrastructure for the computers and equipment used in the operation of the data center business;

e. All equipment used for the operation and maintenance of the power infrastructure that is used for the transformation, distribution, or management of electricity used for the operation and maintenance of the data center business. This equipment includes, but is not limited to, exterior dedicated business-owned power substations and backup power generation systems, battery systems, and related infrastructure;

f. All equipment used in the racking system, including cabling and trays;

g. Fuel purchased by the data center business that is used in the backup power generation system and in all items listed in paragraphs “a” to “f.” This includes the fuel used in the backup generators that may be located outside the building and that are used if power is interrupted to ensure the data center business continues operation; and

h. Electricity purchased for use in operating the data center business.

230.13(4) Sustainable design standards. In order to claim the refunds detailed in subrule 230.13(3), paragraphs “a” through “h,” data center businesses must comply with the sustainable design and construction standards as required by Iowa Administrative Code 661—Chapter 310 as established by the state building code commissioner pursuant to Iowa Code section 103A.8B.

230.13(5) Failure to meet investment qualifications. If a data center business claiming a refund of sales and use tax under this rule fails to meet at least 80 percent of the minimum investment amount required within the first six years of operation beginning with the initiation of the site preparation activities by the data center business, the data center business will lose the right to claim the refund of sales and use tax. Immediately following the loss of the right to claim the refund of sales and use tax, the data center business is required to return the refund of sales and use tax paid on qualifying computers, equipment, fuel, and electricity, plus any and all applicable statutory penalty and interest due on the tax.

230.13(6) Limitation of refunds.

a. *Use in operation or maintenance.* The purchase or lease of the items listed in subrule 230.13(3) is only eligible for a refund of sales and use tax if the items being purchased or leased are being used in the operation or maintenance of the data center business. Such purchases or leases will not be eligible for a refund of sales and use tax if the item is to be used in the business for another purpose. For example:

(1) The purchase of electricity for use in the office portion of the data center business facility would not be eligible for a refund.

(2) The purchase of building materials that become real property would not be eligible for a refund. For example, the purchase of a dishwasher that will be built into a kitchen area in the break room for employees would not be eligible for a refund of tax. Although the purchase of a dishwasher is the purchase of tangible personal property, upon installation, the dishwasher becomes part of the building and realty and, therefore, is not eligible for a refund of Iowa sales and use tax.

b. *State sales tax only.* Refunds issued under this rule may not exceed 5 percent of the sales price of computers and equipment listed in subrule 230.13(3) and the fuel used to create heat, power and steam for processing or generating electrical current or from the sales price of electricity consumed by computers, machinery, or other equipment for operation of the data center business facility. The refund will not include any local option sales and services taxes.

c. *Qualifying dates for fuel and electricity refund.* To qualify for the 50 percent refund, the following must be on or after the first day of the first month through the last day of the last month of the refund year:

(1) The dates of the utility billing or meter reading cycle for the sale or furnishing of metered gas and electricity;

(2) The dates of the sale or furnishing of fuel for purposes of commercial energy; and

(3) The delivery of the fuel used for purposes of commercial energy.

230.13(7) Form and filing requirements.

a. *Form.* The owner of a data center business seeking a refund of sales and use tax imposed upon the sale or lease of any qualifying computers, equipment, fuel, and electricity must complete and file with the department Form IA 843, Claim for Refund. All of the information on the Claim for Refund must be completed.

b. *Due date.* The refund request form must be filed with the department no later than one year after the purchase of the qualifying computers, equipment, fuel, or electricity and within three months after the end of the refund year. The refund for sales and use tax begins with purchases made on and after July 1, 2009, or on and after the date of the initial investment in or the initiation of site preparation activities for the facility that will contain the qualifying data center business.

c. *Date required.* The refund request must include detailed schedules of the items being claimed including dates of purchase of tangible personal property, amount of purchase, and tax paid. The purchase of fuel and electricity must be computed and documented separately from other purchases.

d. *Affidavit.* In addition to completing and filing Form IA 843, Claim for Refund, the owner of a data center business seeking a refund as specified in this rule must also complete and file with the department an affidavit certifying that qualifications for the refund have been met. The affidavit must be filed prior to any refund request and must be approved by the department before a refund claim can be filed. The following format must be used for the affidavit:

Iowa Department of Revenue
Sales Tax Refund Affidavit

NAME OF AFFIANT	}	AFFIDAVIT FOR
ADDRESS OF AFFIANT		DATA CENTER BUSINESS

The undersigned duly swears that the named data center business complies with criteria to be entitled to refund of sales tax as required in Iowa Code section 423.4 as follows:

1. The facility is a data center business as defined by Iowa Code section 423.4(8) or 423.4(9);
2. The data center business facility will be a minimum of 5,000 square feet, as applicable, located upon Iowa land; and located at _____; with total square footage of _____;
3. The data center business will make an investment of (check only one):
 - ? \$136 million to \$200 million within the first six years of operation (refund available for first seven years).
 - ? \$10 million to \$136 million for new construction within the first six years of operation (refund available for first ten years).
 - ? \$5 million to \$136 million for rehabilitation of an existing facility within the first six years of operation (refund available for first ten years).
 - ? \$1 million to \$10 million for new construction within the first three years of operation (refund of tax paid on fuel and electricity only; refund available for first five years).
 - ? \$1 million to \$5 million for rehabilitation of an existing facility within the first three years of operation (refund of tax paid on fuel and electricity only; refund available for first five years).
4. The data center business facility will be constructed in accordance with the sustainable design and construction standards as required by Iowa Administrative Code 661—Chapter 310 and established by the building code commissioner pursuant to Iowa Code section 103A.8B;
5. Construction of the data center business facility was commenced on or after July 1, 2009; and the date of the initial site preparation or building rehabilitation was _____; and
6. Purchases of qualifying computers, equipment, fuel or electricity were made on or after July 1, 2009.

The undersigned duly swears that he or she is the owner of the qualifying data center business or that the undersigned is the authorized representative of the qualifying data center business and has the authority to sign this document. The undersigned swears that he or she has personal knowledge regarding the facts contained in this affidavit and that the statements set forth in this affidavit are true and accurate and that the qualifying data center business has met all of the requirements as contained herein.

Name of Affiant

701—230.14(423) Exemption for the sale of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment used for certain manufacturing purposes if the sale occurs as part of a contract entered into on or after July 1, 2016. Rules 701—230.14(423) to 701—230.20(423) exempt the sales price of computers, machinery, and equipment used in an exempt manufacturing purpose. Rule 701—230.21(423) exempts the purchase of fuel used in such machinery and equipment. Rule 701—230.22(423) exempts the service of designing or installing such machinery and equipment. Rules 701—230.14(423) to 701—230.22(423) apply to sales of such products occurring as part of a contract entered into on or after July 1, 2016. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423). A sale occurs as part of a contract entered into prior to July 1, 2016, if the purchaser enters into a contract with a retailer to purchase the product and the contract date is prior to July 1, 2016, or if the purchaser enters into a contract with a contractor, subcontractor, or builder to construct or assemble the property and the contract date is prior to July 1, 2016.

230.14(1) Generally. The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax if the property is any of the following:

- a. Directly and primarily used in processing by a manufacturer (see rule 701—230.15(423)).
- b. Directly and primarily used to maintain the integrity of the product or to maintain unique environmental conditions required for either the product or the computers, machinery, and equipment used in processing by a manufacturer, including test equipment used to control quality and specifications of the product (see rule 701—230.16(423)).
- c. Directly and primarily used in research and development of new products or processes of processing (see rule 701—230.17(423)).
- d. Computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise (see rule 701—230.18(423)).
- e. Directly and primarily used in recycling or reprocessing of waste products (see rule 701—230.19(423)).
- f. Pollution-control equipment used by a manufacturer, including but not limited to that required or certified by an agency of this state or of the United States government (see rule 701—230.20(423)).
- g. Fuel used in creating heat, power, steam, or for generating electrical current, or from the sale of electricity, consumed by computers, machinery, or equipment used in an exempt manner described in paragraph “a,” “b,” “c,” “e,” or “f” (see rule 701—230.21(423)).

230.14(2) Computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment.

a. *Computers.* A “computer” is an electronic device that accepts information in digital or similar form and manipulates the information for a result based on a sequence of instructions. A computer includes all devices fastened to it by means of signal cables or any communication medium that serves the function of a signal cable. Nonexclusive examples of devices fastened by a signal cable or other communication medium are terminals, printers, display units, card readers, tape readers, document sorters, optical readers, and card or tape punchers. A computer also includes any operating system or executive program, but not application software, purchased as part of the sale of the computer for which the operating system or executive program operates. For purposes of this paragraph, “operating system or executive program” means computer software that is fundamental and necessary to the functioning of a computer. The operating system or executive program controls the operation of a computer by managing the allocation of all system resources, including the central processing unit, main and secondary storage, input/output devices, and the processing of programs. This is in contrast to application software, which is a collection of one or more programs used to develop and implement the specific applications that the computer is to perform and which calls upon the services of the operating system or executive program. Application software, or an operating system or executive program priced separately or sold at a later time from the computer for which the operating system or executive program operates, may be taxable as “prewritten computer software.” See rule 701—211.1(423).

b. Machinery. “Machinery” is any mechanical, electrical, or electronic device designed and used to perform some function and to produce a certain effect or result. Machinery also includes all devices used or required to control, regulate, or operate a piece of machinery, provided such devices are directly connected with or are an integral part of the machinery and are used primarily for control, regulation, or operation of machinery. Jigs, dies, tools, and other devices necessary to the operation of or used in conjunction with the operation of what would be ordinarily thought of as machinery are also considered to be machinery. All property that is in the nature of machinery (other than structural components of a building or other inherently permanent structure) is considered tangible personal property even if located outside of a building. A structure that is essentially machinery remains tangible personal property for purposes of this paragraph. For more information on distinguishing machinery from buildings and other constructed realty, see subparagraph 230.14(2)“f”(1).

c. Equipment. In general usage, “equipment” refers to devices or tools used to produce a final product or achieve a given result. Equipment includes supplies that do not qualify as “replacement parts,” such as drill bits, grinding wheels, punches, taps, reamers, saw blades, lubricants, coolants, sanding discs, sanding belts, and air filters. All property that is in the nature of equipment (other than structural components of a building or other inherently permanent structure) is considered tangible personal property even if located outside of a building. A structure that is essentially equipment may remain tangible personal property for purposes of this paragraph. For more information on distinguishing equipment from buildings and other constructed realty, see subparagraph 230.14(2)“f”(1).

d. Replacement parts. “Replacement part” means tangible personal property other than computers, machinery, or equipment, regardless of the cost or useful life of such tangible personal property. A replacement part can be separated from the computer, machinery, or equipment. A “replacement part” is a part or component of a computer, machinery, or equipment that came with the original item purchased or has been added over time to improve or restore the computer, machinery, or equipment.

e. Materials used to construct or self-construct computers, machinery, and equipment. “Materials used to construct or self-construct computers, machinery, and equipment” means tangible personal property that is incorporated into a computer, machinery, or equipment when the computer, machinery, or equipment is constructed or assembled. Materials used to construct a structure that is essentially machinery or equipment are exempt from sales and use tax so long as the machinery or equipment is used in an exempt manner under rules 701—230.14(423) to 701—230.20(423).

f. Exclusions. Sales of the following property, or materials used to construct or self-construct the following property, are not exempt under rules 701—230.14(423) to 701—230.20(423) regardless of how the property is used.

(1) Constructed realty.

1. Generally. Iowa Code section 423.2(1)“b” and “c” imposes sales and use tax upon building materials, supplies, and equipment used for the erection of buildings or other realty. However, Iowa Code section 423.3(47) exempts from sales and use tax certain computers, machinery, and equipment as well as items used to construct or self-construct certain computers, machinery, and equipment. Determining whether constructed items are realty or exempt computers, machinery, or equipment under Iowa Code section 423.3(47) ultimately depends on the use of the items. In general, exempt computers, machinery, and equipment under Iowa Code section 423.3(47) are tangible personal property when purchased, and they remain tangible personal property after installation. Materials used to construct realty remain taxable when purchased by the contractor, subcontractor, or builder under Iowa Code section 423.2(1)“b” and “c.” For more information about sales and use tax on construction activities, see 701—Chapter 219.

2. Distinguishing constructed realty from tangible personal property. For purposes of rules 701—230.14(423) to 701—230.22(423), an item remains tangible personal property after installation if all of the following apply:

- The item can be removed without causing material damage or injury to the item or to the building that houses it or the real property upon which it is located;
- The item does not bear the weight of a building or other realty;

- The item does not in any other manner constitute an integral part of a building or other realty; and

- The item is used in an exempt manner under rules 701—230.14(423) to 701—230.20(423).

3. Buildings. Buildings are constructed realty. A “building” is any structure or edifice enclosing a space within its walls, and usually covered by a roof, the purpose of which is, for example, to provide shelter or housing for machinery or equipment or to provide working, office, parking, display, or sales space. Materials used to construct a building or any other realty are not exempt under rules 701—230.14(423) to 701—230.20(423), even if the realty is specially designed to house exempt computers, machinery, or equipment.

4. Examples.

- Property that, under normal conditions, remains tangible personal property after installation for purposes of rules 701—230.14(423) to 701—230.22(423) includes, but is not limited to:

- Storage tanks that rest upon a foundation and are secured with bolts.

- Industrial piping systems directly and primarily used in processing.

- Cooling towers directly and primarily used in processing.

- Structural steel, if exposed and used to support other computers, machinery, or equipment.

- Property that, under normal conditions, becomes constructed realty after installation for purposes of rules 701—230.14(423) to 701—230.22(423) includes, but is not limited to:

- Underground storage tanks constructed on site.

- Foundations made of concrete or other materials, regardless of whether they are used exclusively as platforms for machinery and equipment.

- Cooling towers primarily used to cool a building or other constructed realty.

- Structural steel, if used to construct a building or other constructed realty.

(2) Land.

(3) Intangible property.

(4) Hand tools. “Hand tool” means a tool that can be held in the hand or hands and is powered by human effort.

(5) Point-of-sale equipment and computers. “Point-of-sale equipment and computers” means input, output, and processing equipment used to consummate a sale and to record or process information pertaining to a sale transaction at the time the sale takes place and is located at the counter, desk, or other specific point where the transaction occurs.

(6) Certain centrally assessed industrial machinery, equipment, and computers. Property that is centrally assessed by the department of revenue under Iowa Code sections 428.24 to 428.29 or chapters 433, 434, 437, 437A, 437B, and 438 does not qualify for exemption under rules 701—230.14(423) to 701—230.20(423). Property used but not owned by persons whose property is defined by such provisions of the Iowa Code, which would be assessed by the department of revenue if the persons owned the property, also does not qualify for exemption under rules 701—230.14(423) to 701—230.20(423).

(7) Vehicles subject to registration. The general sales and use tax does not apply to vehicles subject to registration under Iowa Code chapter 321. Instead, such vehicles are subject to the fee for new registration under Iowa Code section 321.105A. Vehicles subject to registration are not exempt from the fee for new registration under rules 701—230.14(423) to 701—230.20(423), unless the vehicle is directly and primarily used in recycling or reprocessing of waste products (see rule 701—230.19(423)).

g. Examples. When used for an exempt purpose under rules 701—230.14(423) to 701—230.20(423), the following items may be exempt computers, machinery, or equipment. This list is not all-inclusive.

(1) Coolers, including coolers that do not change the nature of materials stored in them.

(2) Equipment that eliminates bacteria.

(3) Palletizers.

(4) Storage bins.

(5) Property used to transport raw, semifinished, or finished goods.

(6) Vehicle-mounted cement mixers.

(7) Self-constructed machinery and equipment.

- (8) Packaging and bagging equipment, including conveyer systems.
- (9) Equipment that maintains an environment necessary to preserve a product's integrity.
- (10) Equipment that maintains a product's integrity directly.
- (11) Quality control equipment.

230.14(3) *Leased and rented property.* The exemptions under rules 701—230.14(423) to 701—230.22(423) apply to property regardless of how it is sold, including leased or rented property. The lease of computers, machinery, or equipment may be exempt from sales and use tax if the lessee uses the property in an exempt manner under rules 701—230.14(423) to 701—230.20(423). Additionally, a lessor's purchase of computers, machinery, or equipment for lease may be an exempt sale for resale under Iowa Code section 423.3(2).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.15(423) Exemption for the sale of property directly and primarily used in processing by a manufacturer if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used in processing by a manufacturer. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

230.15(1) *Required elements.* To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, or equipment (see subrule 230.14(2));
- b. Directly used (see subrule 230.15(2));
- c. Primarily used (see subrule 230.15(2));
- d. Used in processing (see subrule 230.15(3)); and
- e. Used by a manufacturer (see subrule 230.15(4)).

230.15(2) *Directly and primarily used.*

a. *Directly used.*

(1) Generally. Property is “directly used” only if it is used to initiate, sustain, or terminate an exempt activity. In determining whether any property is “directly used,” consideration should be given to the following factors:

- 1. The physical proximity of the property to the exempt activity;
- 2. The temporal proximity of the use of the property to the use of other property that is directly used in the exempt activity; and
- 3. The active causal relationship between the use of the property and the exempt activity. The fact that a particular piece of property may be essential to the conduct of the activity because its use is required either by law or practical necessity does not, of itself, mean that the property is directly used.

(2) Examples. The following property typically is not directly used in an exempt manner:

- 1. Property used exclusively for the comfort of workers, such as air cooling, air conditioning, or ventilation systems.
- 2. Property used in support operations, such as a machine shop, where production machinery is assembled, maintained, or repaired.
- 3. Property used by administrative, accounting, or personnel departments.
- 4. Property used by security, fire prevention, first aid, or hospital stations.
- 5. Property used in communications or safety.

b. *Primarily used.* The primary use of property is the activity or activities for which the property is used more than half of the time.

230.15(3) *Processing.*

a. *Generally.* “Processing” means a series of operations in which materials are manufactured, refined, purified, created, combined, transformed, or stored by a manufacturer, ultimately into tangible personal property. Processing encompasses all activities commencing with the receipt or producing of raw materials by the manufacturer and ending at the point products are delivered for shipment or

transferred from the manufacturer. Processing includes, but is not limited to, refinement or purification of materials; treatment of materials to change their form, context, or condition; maintenance of the quality or integrity of materials, components, or products; maintenance of environmental conditions necessary for materials, components, or products; quality control activities; construction of packaging and shipping devices; placement into shipping containers or any type of shipping device or medium; and the movement of materials, components, or products until shipment from the processor. "Receipt or producing of raw materials" means activities performed upon tangible personal property only. With respect to raw materials produced from or upon real estate, "production of raw materials" is deemed to occur immediately following the severance of the raw materials from the real estate.

b. The beginning of processing. Processing begins with a processor's receipt or production of raw material. Thus, when a processor produces its own raw material, it is engaged in processing. Processing also begins when a supplier transfers possession of raw materials to a processor.

c. The completion of processing. Processing ends when the finished product is transferred from the processor or delivered for shipment by the processor. Therefore, a processor's packaging, storage, and transport of a finished product after the product is in the form in which it will be sold at retail are part of the processing of the product.

d. Examples of the beginning, intervening steps, and the ending of processing. Of the following, Examples A and B illustrate when processing begins under various circumstances; Example C demonstrates the middle stages of processing; and Example D demonstrates when the end of processing takes place.

EXAMPLE A: Company A manufactures fine furniture. Company A owns a grove of walnut trees that it uses as raw material. Company A's employees cut the trees, transport the logs to Company A's facility, store the logs in a warehouse to begin the curing process, and eventually take the logs to Company A's sawmill. The walnut trees are real property while they are growing. Thus, no "production of raw materials" has occurred with regard to the trees until they have been severed from the soil and transformed into logs. Processing of the logs begins when they are placed on vehicles for transport to Company A's factory. However, if the transport vehicles are "vehicles subject to registration," they are not exempt from the fee for new registration under this rule (see subparagraph 230.14(2) "f"(7)).

EXAMPLE B: Company A from the previous example also buys mahogany logs from a supplier in Honduras. Company A uses its equipment to offload the logs from railroad cars at its facility. Company A then stores and saws the logs as previously described in Example A. Processing begins when Company A offloads the logs from the railroad cars.

EXAMPLE C: Company C is a microbrewery. It uses a variety of kettles, vats, tanks, tubs, and other containers to mix, cook, ferment, settle, age, and store the beer it brews. Company C also uses a variety of pipes and pumps to move the beer among the various containers involved in the activity of brewing. All stages of this brewing are part of processing, including fermentation or aging (the transformation of the raw materials from one state to another) as well as the storage of hops in a bin and the storage of beer prior to bottling (the holding of materials in an existing state). Any movement of the product between containers is also a part of processing.

EXAMPLE D: After the brewing process is complete, Company C places its beer in various containers, stores the beer, and moves the beer to Company C's customers by a common carrier that picks up the beer at Company C's facility. Company C's activities of placing the beer into bottles, cans, and kegs, storing it after packaging, and moving the beer by use of a forklift to the common carrier's pickup site are part of processing.

230.15(4) Manufacturer.

a. Generally. "Manufacturer" means a person that purchases, receives, or holds personal property of any description for the purpose of adding to its value by a process of manufacturing, refining, purifying, or combining of different materials, or by the packing of meats, with a view to selling the property for gain or profit, but also includes contract manufacturers. A "contract manufacturer" is a manufacturer that otherwise falls within the definition of manufacturer, except that a contract manufacturer does not sell the tangible personal property the contract manufacturer processes on behalf of other manufacturers. A business engaged in activities subsequent to the extractive process of quarrying or mining, such as

crushing, washing, sizing, or blending of aggregate materials, is a manufacturer with respect to these activities. A person does not need to be primarily engaged in an activity listed in this subrule in order to qualify as a manufacturer for purposes of this rule.

b. Nonexclusive examples. Those who are in the business of printing, newspaper publication, bookbinding, lumber milling, and production of drugs and agricultural supplies are illustrative, nonexclusive examples of manufacturers. Construction contracting; repairing of tangible personal property (such as automobile engines); provision of health care; farming; transportation for hire; and the activities of restaurateurs, hospitals, medical doctors, and those who merely process data are illustrative, nonexclusive examples of businesses that ordinarily are not manufacturers.

EXAMPLE A: Company A owns and operates a gravel pit. Company A sells the gravel extracted from the pit to others who use the gravel for surfacing roads and as an ingredient in concrete manufacture. Company A removes overlay and raw gravel from the pit and then transports the gravel to a plant where washing and sizing of the gravel take place. Company A is a manufacturer, but only with respect to those activities that occur after it extracts the gravel from the ground.

EXAMPLE B: Company B owns a manufacturing plant. Company B also owns a machine shop where it uses a metal press machine to fabricate patterns. All of these patterns are used in Company B's manufacturing plant as part of processing, and the metal press machine is used solely to fabricate these patterns. The sales price of the metal press machine is not exempt from sales and use tax under this rule because Company B does not use the metal press machine to manufacture a product for sale at a gain or profit. However, the computers, machinery, and equipment in Company B's manufacturing plant may be exempt if they are directly and primarily used in processing.

This rule is intended to implement Iowa Code section 423.3(47) "a"(1).
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.16(423) Exemption for the sale of property directly and primarily used by a manufacturer to maintain integrity or unique environmental conditions if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used to maintain the integrity of the product or to maintain unique environmental conditions required for either the product or the computers, machinery, and equipment used in processing by a manufacturer, including test equipment used to control quality and specifications of the product. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

230.16(1) Required elements. To qualify for exemption under this rule, the purchaser must prove the property is:

- a.* Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, and equipment (see subrule 230.14(2));
- b.* Directly used (see subrule 230.15(2));
- c.* Primarily used (see subrule 230.15(2));
- d.* Used by a manufacturer (see subrule 230.15(4)); and
- e.* Used to maintain:
 - (1) A manufactured product's integrity;
 - (2) Unique environmental conditions required for a manufactured product; or
 - (3) Unique environmental conditions required for other computers, machinery, or equipment directly and primarily used in processing by a manufacturer.

230.16(2) Example of property directly and primarily used to maintain integrity or unique environmental conditions. A manufacturer purchases a cooling tower to directly and primarily maintain the proper temperature of its machinery and equipment. The manufacturer uses such machinery and equipment directly and primarily in processing. Because the cooling tower maintains the environmental conditions necessary for machinery and equipment that is directly and primarily used in processing,

the cooling tower and materials used to construct or self-construct the cooling tower are exempt from sales and use tax under this rule.

This rule is intended to implement Iowa Code section 423.3(47) “a”(2).
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.17(423) Exemption for the sale of property directly and primarily used in research and development of new products or processes of processing if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used in research and development of new products or processes of processing. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

230.17(1) Required elements. To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, and equipment (see subrule 230.14(2));
- b. Directly used (see subrules 230.15(2) and 230.17(3));
- c. Primarily used (see subrule 230.15(2)); and
- d. Used in research and development (see subrule 230.17(2)) of:
 - (1) New products; or
 - (2) Processes of processing.

230.17(2) “Research and development” means experimental or laboratory activity that has as its ultimate goal the development of new products or processes of processing.

230.17(3) Property is used “directly” in research and development only if it is used in actual experimental or laboratory activity that qualifies as research and development under this rule.

230.17(4) Example of property directly and primarily used in research and development of new products or processes of processing. A hybrid seed producer maintains a research and development laboratory for use in developing new varieties of corn seed. The hybrid seed producer purchases the following items for use in its research and development laboratory: a laboratory computer for processing data related to the genetic structure of various corn plants, an electron microscope for examining the structure of corn plant genes, a steam cleaner for cleaning rugs in the laboratory offices, and a desktop computer for use by the laboratory receptionist. The laboratory computer and the microscope are “directly” used in the research in which the laboratory is engaged; the steam cleaner and the receptionist’s computer are not directly used in research. Therefore, the sales prices of the laboratory computer and the microscope are exempt from sales and use tax. The sales prices of the steam cleaner and the receptionist’s computer are not exempt from tax under this rule.

This rule is intended to implement Iowa Code section 423.3(47) “a”(3).
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.18(423) Exemption for the sale of computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price of computers is exempt from sales tax when the computers are used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

230.18(1) Required elements. To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers (see paragraph 230.14(2) “a”);
- b. Used in processing or storage of data or information (see subrule 230.18(2)); and
- c. Used by:
 - (1) An insurance company (see subrule 230.18(3));
 - (2) A financial institution (see subrule 230.18(3)); or
 - (3) A commercial enterprise (see subrule 230.18(3)).

230.18(2) *Processing or storage of data or information.* All computers store and process information. However, only if the “final output” for a user or consumer is stored or processed data will the computer be eligible for exemption from tax under this rule.

230.18(3) *Insurance company, financial institution, or commercial enterprise.*

a. Insurance company. An insurance company is an insurer organized or operating under Iowa Code chapter 508, 514, 515, 518, 518A, 519, or 520 or an insurer authorized to do business in Iowa as an insurer or as a licensed insurance producer under Iowa Code chapter 522B. Excluded from the definition of “insurance company” are benevolent associations governed by Iowa Code chapter 512A, fraternal benefit societies governed by Iowa Code chapter 512B, and health maintenance organizations governed by Iowa Code chapter 514B. This list of exclusions is not intended to be exclusive.

b. Financial institution. A financial institution is any bank incorporated under the provisions of any state or federal law, any savings and loan association incorporated under the provisions of federal law, any credit union organized under the provisions of any state or federal law, any corporation licensed as an industrial loan company under Iowa Code chapter 536A, and any affiliate of a bank, savings and loan association, credit union, or industrial loan company.

c. Commercial enterprise. A commercial enterprise is a business or manufacturer conducted for profit, other than an insurance company or financial institution. “Commercial enterprise” includes centers for data processing services to insurance companies, financial institutions, businesses, and manufacturers, but excludes professions and occupations as well as nonprofit organizations. A hospital that is a not-for-profit organization is not a commercial enterprise. The term “profession” means a vocation or employment requiring specialized knowledge and often long and intensive academic preparation. The term “occupation” means the principal business of an individual, such as the business of farming. A professional entity that carries on any profession or occupation, such as an accounting firm, is not a commercial enterprise.

230.18(4) *Examples of computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise.* A health insurance company has four computers. Computer A is used to monitor the temperature within the insurance company’s building. Computer A transmits messages to the building’s heating and cooling systems, which tell the systems when to raise or lower the level of heating or air conditioning. Computer B is used to store patient records and to recall those records on demand. Computer C is used to tabulate statistics regarding the amount of premiums paid in and the amount of benefits paid out for various classes of insured. Computer D is used to train the insurance company’s employees to perform various additional tasks or to better perform work the employees can already do. Computer D uses various canned programs to accomplish this function. The final output of Computer A is neither stored nor processed information. Therefore, Computer A does not meet the definition of an exempt computer. The final output of Computer B is stored information. The final output of Computer C is processed information. The final output of Computer D is processed information consisting of the training exercises appearing on the computer monitor. The sales prices of Computers B, C, and D are exempt from sales and use tax as computers used in processing or storage of data or information by an insurance company.

This rule is intended to implement Iowa Code section 423.3(47) “a”(4).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.19(423) Exemption for the sale of property directly and primarily used in recycling or reprocessing of waste products if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price of computers, machinery, and equipment, including replacement parts, and materials used to construct or self-construct computers, machinery, and equipment is exempt from sales and use tax when the property is directly and primarily used in recycling or reprocessing of waste products. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

230.19(1) Required elements. To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Computers, machinery, or equipment, including replacement parts, or materials used to construct or self-construct computers, machinery, and equipment (see subrule 230.14(2));
- b. Directly used (see subrule 230.15(2));
- c. Primarily used (see subrule 230.15(2)); and
- d. Used in:
 - (1) Recycling of waste products (see subrule 230.19(2)); or
 - (2) Reprocessing of waste products (see subrule 230.19(2)).

230.19(2) *Recycling and reprocessing.*

a. “Recycling” is any process by which waste or materials that would otherwise become waste are collected, separated, or processed and revised or returned for use in the form of raw materials or products. Recycling includes, but is not limited to, the composting of yard waste that has been previously separated from other waste. Recycling does not include any form of energy recovery.

b. “Reprocessing” is not a subcategory of processing. Reprocessing of waste products is an activity separate and independent from the processing of tangible personal property.

c. Recycling or reprocessing generally begins when the waste products are collected or separated. Recycling or reprocessing generally ends when waste products are in the form of raw material or another non-waste product. Activities that occur between these two points and are an integral part of recycling or processing qualify as recycling or reprocessing.

230.19(3) *Examples.*

a. Computers, machinery, and equipment that may be exempt from sales and use tax under this rule include, but are not limited to, compactors, balers, crushers, grinders, cutters, and shears if directly and primarily used in recycling or reprocessing.

b. End loaders, forklifts, trucks, conveyor systems, and other moving devices directly and primarily used in the movement of waste products during recycling or reprocessing may be exempt from sales and use tax under this rule.

c. A bin or other container used to store waste products before collection for recycling or reprocessing is not directly and primarily used in recycling or reprocessing, and its sales price is not exempt from sales and use tax under this rule.

d. A vehicle used directly and primarily for collecting waste products for recycling or reprocessing could be a vehicle used for an exempt purpose under this rule, and such a vehicle could be exempt from the fee for new registration. Thus, a garbage truck could qualify for this exemption if the truck is directly and primarily used in recycling; however, a garbage truck primarily used to haul garbage to a landfill does not qualify for exemption under this rule.

EXAMPLE A: Company A recycles household waste. Company A uses several machines in its facility to separate waste products into recyclable and nonrecyclable materials and to further separate the recyclable materials into paper, plastic, or glass. The sales prices of all separating machines are exempt from sales and use tax as machines directly and primarily used in recycling of waste products.

EXAMPLE B: Company B uses grinding machines to convert logs, stumps, pallets, crates, and other waste wood into wood chips. Company B then uses its trucks to deliver the wood chips to local purchasers. The sales prices of the grinding machines are exempt from sales and use tax as machines directly and primarily used in recycling or reprocessing of waste products. The trucks used to transport the wood chips are not used in recycling or reprocessing because the wood chips are in their final form when loaded onto the trucks.

This rule is intended to implement Iowa Code section 423.3(47) “a”(5).

[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.20(423) Exemption for the sale of pollution control equipment used by a manufacturer if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price of pollution control equipment, including but not limited to equipment required or certified by an agency of Iowa or of the United States government, is exempt from sales and use tax when the property is used by a manufacturer. For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

230.20(1) Required elements. To qualify for exemption under this rule, the purchaser must prove the property is:

- a. Pollution control equipment (See subrule 230.20(2)); and
- b. Used by a manufacturer (See subrule 230.15(4)).

230.20(2) “Pollution control equipment” is any disposal system or apparatus used or placed in operation primarily for the purpose of reducing, controlling, or eliminating air or water pollution. Pollution control equipment does not include any apparatus used to eliminate noise pollution. Liquid, solid, and gaseous wastes are included within the meaning of the word “pollution.” Pollution control equipment specifically includes, but is not limited to, any equipment the use of which is required or certified by an agency of this state or of the United States government. Wastewater treatment equipment, dust mitigation systems, and scrubbers used in smokestacks are examples of pollution control equipment. However, pollution control equipment does not include any equipment used only for worker safety, such as a gas mask.

EXAMPLE: A manufacturer constructs a wastewater treatment facility to treat wastewater from its manufacturing facility. The wastewater treatment facility uses aboveground piping and other equipment to divert wastewater from the local water treatment plant. The facility then converts wastewater into a biogas, which the manufacturer uses as an energy source in its manufacturing facility. The equipment used for the wastewater treatment facility is pollution control equipment used by a manufacturer. The sales price of the equipment is exempt from sales and use tax.

This rule is intended to implement Iowa Code section 423.3(47) “a”(6).
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.21(423) Exemption for the sale of fuel or electricity used in exempt property if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price of fuel or electricity consumed by property that is exempt from sales and use tax under rule 701—230.14(423), 701—230.15(423), 701—230.16(423), 701—230.17(423), 701—230.19(423), or 701—230.20(423) is also exempt from sales and use tax. The sales price of electricity or other fuel consumed by computers used in processing or storage of data or information by an insurance company, financial institution, or commercial enterprise remains subject to tax even if such computers are exempt under rule 701—230.18(423). For sales occurring as part of a contract entered into prior to July 1, 2016, see rule 701—18.58(422,423).

EXAMPLE: A manufacturer operates a power plant. The manufacturer uses energy from the power plant to operate machinery and equipment used directly and primarily in processing at its manufacturing facility. The fuel consumed in the manufacturer’s power plant is exempt from sales and use tax.

This rule is intended to implement Iowa Code section 423.3(47) “b.”
[ARC 2349C, IAB 1/6/16, effective 2/10/16]

701—230.22(423) Exemption for the sale of services for designing or installing new industrial machinery or equipment if the sale occurs as part of a contract entered into on or after July 1, 2016. The sales price from the services of designing or installing new industrial machinery or equipment is exempt from sales and use tax. The enumerated services of electrical or electronic installation are included in this exemption.

230.22(1) Required elements. To qualify for the exemption, the purchaser must prove the service is:

- a. A design or installation service (see subrule 230.22(2));
- b. Of new (see subrule 230.22(3)); and
- c. Industrial machinery or equipment (see subrule 230.22(4)).

230.22(2) Design or installation services include electrical and electronic installation. “Design or installation” services do not include any repair service.

230.22(3) “New” means never having been used or consumed by anyone. The exemption does not apply to design or installation services on reconstructed, rebuilt, repaired, or previously owned machinery or equipment.

230.22(4) Industrial machinery or equipment.

a. Generally. “Industrial machinery or equipment” means machinery or equipment, as defined in subrule 230.14(2). The sale of industrial machinery or equipment must also qualify for exemption under any of the following:

(1) Property used directly and primarily in processing by a manufacturer (see rule 701—230.15(423)).

(2) Property used directly and primarily by a manufacturer to maintain the integrity of the manufacturer’s product or to maintain unique environmental conditions for computers, machinery, or equipment (see rule 701—230.16(423)).

(3) Property used directly and primarily in research and development of new products or processes of processing (see rule 701—230.17(423)).

(4) Property used directly and primarily in recycling or reprocessing of waste products (see rule 701—230.19(423)).

(5) Pollution control equipment used by a manufacturer (see rule 701—230.20(423)).

b. Exclusions. The following property is not industrial machinery or equipment regardless of how the purchaser uses it:

(1) Computers (see paragraph 230.14(2) “a”).

(2) Supplies, including but not limited to drill bits, grinding wheels, punches, taps, reamers, saw blades, lubricants, coolants, sanding discs, sanding belts, and air filters.

(3) Replacement parts (see paragraph 230.14(2) “d”).

230.22(5) Billing. The sales price for designing or installing new industrial machinery or equipment must be separately identified, charged separately, and reasonable in amount for the exemption to apply. The exemption applies to new industrial machinery or equipment regardless of how it is purchased, including leased or rented machinery or equipment.

EXAMPLE: Dealer sells and installs two new machines for Manufacturer. Manufacturer uses one machine on its production floor, where it is directly and primarily used in processing. Manufacturer uses the other machine in its machine shop, where it is not directly and primarily used in processing. Dealer gives an invoice to Manufacturer that separately itemizes the sales prices for each machine and each installation. The machine used on the production floor is new industrial machinery or equipment, and the sales prices of the machine and its installation are exempt from sales and use tax. The machine used in the machine shop is not new industrial machinery or equipment, and the sales prices of the machine and its installation are taxable.

This rule is intended to implement Iowa Code section 423.3(48).

[Filed ARC 2349C (Amended Notice ARC 2239C, IAB 11/11/15; Notice ARC 2178C, IAB 9/30/15), IAB 1/6/16, effective 2/10/16]

CHAPTER 231
EXEMPTIONS PRIMARILY OF BENEFIT TO CONSUMERS

Rules in this chapter include cross references to provisions in 701—Chapters 15 to 20, 21, 26, 30, 32 and 33 that were applicable prior to July 1, 2004.

701—231.1(423) Newspapers, free newspapers and shoppers' guides.

231.1(1) *In general.* The sales price from the sales of newspapers, free newspapers, and shoppers' guides is exempt from tax. The sales price from the sales of magazines, newsletters, and other periodicals which are not newspapers is taxable. Cases decided by the United States Supreme Court and the Supreme Court of Iowa prohibit exempting from taxation the sale of any periodical if that exemption from taxation is based solely upon the contents of that periodical. See *Arkansas Writers' Project, Inc. v. Ragland*, 481 U.S. 221, 107 S.Ct. 1722, 95 L.Ed.2d 209 (1987) and *Hearst v. Iowa Department of Revenue & Finance*, 461 N.W.2d 295 (Iowa 1990).

231.1(2) *General characteristics of a newspaper.* "Newspaper" is a term with a common definition. A "newspaper" is a periodical, published at short, stated, and regular intervals, usually daily or weekly. It is printed on newsprint with news ink. The format of a newspaper is that of sheets folded loosely together without stapling. A newspaper is admitted to the U.S. mails as second-class material. Other frequent characteristics of newspapers are the following:

- a. Newspapers usually contain photographs.
- b. Information printed on newspapers is usually contained in columns on the newspaper pages.
- c. The larger the cross section of the population which reads a periodical in the area where the periodical circulates, the more likely it is that the department will consider that periodical to be a "newspaper."

231.1(3) *Characteristics of newspaper publishing companies.* Often, companies publishing larger newspapers will subscribe to various syndicates or wire services. A larger newspaper will employ a general editor and a number of subordinate editors as well, for example, sports and lifestyle editors; business, local, agricultural, national, and world news editors; and editorial page editors. A larger newspaper will also employ a variety of reporters and staff writers. Smaller newspapers may or may not have these characteristics or may consolidate these functions.

231.1(4) *Characteristics which distinguish a newsletter from a newspaper.* A "newsletter" is generally distributed to members or employees of a single organization and not usually to a large cross section of the general public. It is often published at irregular intervals by a volunteer, rather than by a paid individual who usually publishes a newspaper. A newsletter is often printed on sheets which are held together at one point only by a staple, rather than folded together.

This rule is intended to implement 2005 Iowa Code subsection 423.3(54).

701—231.2(423) Motor fuel, special fuel, aviation fuels and gasoline.

231.2(1) *In general.* The sales price from the sale of motor fuel, including ethanol, and special fuel is exempt from sales tax under 2005 Iowa Code section 423.3(55) if (a) the fuel is consumed for highway use, in watercraft, or in aircraft, (b) the Iowa fuel tax has been imposed and paid, and (c) no refund or credit of fuel tax has been made or will be allowed. The sales price from the sale of special fuel for diesel engines used in commercial watercraft on rivers bordering Iowa is exempt from sales tax, even though no fuel tax has been imposed and paid, providing the seller delivers the fuel to the owner's watercraft while it is afloat.

231.2(2) *Refunds or credits of motor fuel and special fuel.* Claims for refund or credit of fuel taxes under the provisions of Iowa Code chapter 452A must be reduced by any sales or use tax owing the state unless a sales tax exemption is applicable. Generally, refund claims or credits are allowed where fuel is purchased tax-paid and used for purposes other than to propel a motor vehicle or used in watercraft.

231.2(3) *Refunds of tax on fuel purchased in Iowa and consumed outside of Iowa.* Even though fuel is purchased in Iowa, fuel tax is paid in Iowa, and the fuel tax is subject to refund under the provisions of division III of Iowa Code chapter 452A relating to interstate motor vehicle operations, the refund of

the fuel tax does not subject the purchase of the fuel to sales tax. Subjecting the purchase of the fuel to sales tax has the effect of imposing sales tax when fuel is consumed in interstate commerce while fuel consumed on Iowa highways in intrastate commerce is exempt from sales tax pursuant to 2005 Iowa Code subsection 423.3(55). The effect for sales tax purposes is to impose a greater tax burden on non-Iowa highway fuel consumption than Iowa highway fuel consumption, thereby discriminating against interstate commerce. In addition, the effect of imposing sales tax on interstate excess purchases where intrastate highway use is not subject to the tax constitutes an export duty for purchasing fuel in Iowa and exporting it for use in another state. Such effects are in violation of the commerce clause of the United States Constitution. *Boston Stock Exchange v. State Tax Commission*, 1977, 429 U.S. 319, 97 S.Ct. 599, 50 L.Ed.2d 514 and *Coe v. Errol*, 1886, 116 U.S. 517, 6 S.Ct. 475, 29 L.Ed. 715.

231.2(4) Tax base. The basis for computing the Iowa sales tax will be the retail sales price of the fuel less any Iowa fuel tax included in such price. Federal excise tax should not be removed from the sales price in determining the proper sales tax due. *W. M. Gurley v. Army Rhoden* supra. Also reference rule 701—15.12(422,423).

This rule is intended to implement Iowa Code subsection 423.3(55).

701—231.3(423) Sales of food and food ingredients. On and after July 1, 2004, the sales price from all sales of food and food ingredients is exempt from tax. For the purposes of this rule, “food and food ingredients” means substances, whether in liquid, concentrated, solid, frozen, dried, or dehydrated form, that are sold for ingestion or chewing by humans and are consumed for their taste or nutritional value.

231.3(1) Most substances can easily be classified either as food, food ingredients, or nonfood items. There are, however, certain substances that are not readily distinguishable as food or nonfood and may present problems in judgment. The following guidelines apply to some of the more unique categories of eligible foods and food ingredients and ineligible nonfood items about which questions may arise. The guidelines and their lists are not to be considered all-inclusive:

a. Foods eligible for purchase with food coupons. Sales of almost all substances which may be purchased with food coupons issued by the United States Department of Agriculture under the regulations in effect on July 1, 1974, remain exempt from tax on and after July 1, 2004. However, since the exemption no longer depends on ability to be purchased with food stamps (reference 701—subrule 20.1(1)), sales of certain substances which can be purchased with food stamps but are neither food nor food ingredients are taxable on and after July 1, 2004.

These taxable sales include garden seeds and plants sold for use in gardens to produce food for human consumption. Seeds and plants eligible for purchase with food coupons include vegetable seeds and food-producing plants such as tomato and green pepper plants and fruit trees, food-producing roots, bushes, and bulbs (e.g., asparagus roots and onion sets) and seeds and plants used to produce spices for use in cooking foods. Sales of all these substances are taxable. Sales of chewing gum are taxable as sales of “candy” on and after July 1, 2004.

b. Distilled water and ice. These substances, although having some nonfood uses, are largely used as food or as ingredients in food for human consumption. Unless these substances are specifically labeled for nonfood use or the recipient indicates that they will be used for some purpose other than as food for human consumption or as ingredients in food for human consumption, their sales are exempt from tax.

c. Specialty foods. This category of eligible foods includes special dietary foods (e.g., diabetic and dietetic), enriched or fortified foods, infant formulas, and certain foods commonly referred to as health food items. These substances are food products which are substituted for more commonly used food items in the diet, and thus they are purchased for ingestion by humans and are consumed for their taste or nutritional value. Examples of items in this category of eligible foods are Metrecal, Enfamil, Sustegen, wheat germ, brewer’s yeast, sunflower seeds which are packaged for human consumption, and rose hips powder which is used for preparing tea. It is not possible to formulate a comprehensive list of eligible specialty foods. The guideline to be used to determine the eligibility of a specific product is the ordinary use of the product.

NOTE: If the product is primarily used as a food or as an ingredient in food, then it is an eligible item; if it is primarily used for medicinal purposes as either a therapeutic agent or a deficiency corrector and only occasionally used as a food, the product is not an eligible item.

d. Snack foods. These substances are food items and, therefore, are usually eligible for the exemption. Typical examples of snack foods are cheese puffs; corn chips; popcorn; peanuts; potato chips and sticks; packaged cookies, cupcakes, and donuts; and pretzels. Alcoholic beverages, candy, and soft drinks are examples of snack foods the sales of which are not exempt from tax; see subrule 231.3(2).

e. Others. There are certain eligible food substances which are normally consumed only after being incorporated into foods sold for ingestion or chewing by humans. Sales of substances which are ingredients of items identical to those which are eligible for exemption when sold as finished products are sales eligible for exemption. Since these substances are food ingredients, their sales are exempt. An example is pectin. Pectin is the generic term for products marketed under various brand names and commonly used as a base in making jams and jellies. When pectin is incorporated into jams or jellies, it becomes part of a food for human consumption and, therefore, is an eligible food item. Other examples are lard and vegetable oils.

f. The following general classifications of food products are also exempt from tax unless taxable as prepared food; see rule 701—231.5(423):

Bread and flour products

Bottled water, unless it is a sweetened bottled water and thus taxable as a soft drink (a change from previous law; reference 701—subparagraph 20.1(3) “b”(1))

Cereal and cereal products

Cocoa and cocoa products, unless taxable in the form of candy as in rule 701—231.4(423)

Coffee and coffee substitutes, unless taxable as soft drinks; see paragraph 231.3(2) “f”

Dietary substitutes, other than dietary supplements; see paragraphs 231.3(1) “c” and 231.3(2) “a”

Eggs and egg products

Fish and fish products

Frozen foods

Fruits and fruit products including fruit juices, unless taxable as soft drinks; see paragraph 231.3(2) “f”

Margarine, butter, and shortening

Meat and meat products

Milk and milk products, including packaged ice cream products

Milk substitutes, such as soy and rice milk substitutes (a change from previous law; reference 701—subparagraph 20.1(3) “b”(2))

Spices, condiments, extracts, and artificial food coloring

Sugar and sugar products and substitutes, unless taxable in the form of candy as in rule 701—231.4(423)

Tea, unless taxable as a soft drink; see paragraph 231.3(2) “f”

Vegetables and vegetable products

231.3(2) Substances excluded from the term “food and food ingredients.” Sales of alcoholic beverages, candy, dietary supplements, food sold through vending machines, prepared food, soft drinks, and tobacco are not sales of “food” and are not exempt from tax by this rule.

a. “Alcoholic beverages” means beverages that are suitable for human consumption and contain one-half of 1 percent or more of alcohol by volume.

b. “Candy.” See rule 701—231.4(423).

c. “Dietary supplement” means any product, other than tobacco, intended to supplement the diet that contains one or more of the following dietary ingredients:

- (1) A vitamin.
- (2) A mineral.
- (3) An herb or other botanical.
- (4) An amino acid.

(5) A dietary substance for use by humans to supplement the diet by increasing the total dietary intake.

(6) A concentrate, metabolite, constituent, extract, or combination of any of the ingredients in subparagraphs (1) through (5) that is intended for ingestion in tablet, capsule, powder, softgel, gelcap, or liquid form, or if not intended for ingestion in such a form, is not represented as conventional food and is not represented for use as a sole item of a meal or of the diet; and is required to be labeled as a dietary supplement, identifiable by the “supplement facts” box found on the label and as required pursuant to 21 Code of Federal Regulations 101.36.

Dietary supplements, as their name indicates, serve as supplements to food or food products rather than as “food,” and, therefore, are not included within the definition of that word. Since these substances serve as deficiency correctors or therapeutic agents to supplement diets deficient in essential nutrition rather than as foods, they are not eligible for the food and food ingredients exemption. In addition to vitamin and mineral tablets or capsules, this category includes substances such as cod liver oil, which is used primarily as a source of vitamins A and D. It is not possible to provide a comprehensive list of other such items which are primarily used for medicinal purposes or as health aids and which may be stocked by authorized firms.

d. “Food sold through vending machines” means food dispensed from a machine or other mechanical device that accepts payment, other than food which would be qualified for exemption if purchased with coupons (commonly known as “food stamps”) issued under the federal Food Stamp Act of 1977, 7 United States Code 2011 et seq. Alcoholic beverages, candy, dietary supplements, prepared food, soft drinks, and tobacco sold through vending machines are sold subject to tax in all instances because they are specifically excluded from this rule’s definition of “foods”; see subrule 231.3(2) generally. This paragraph “*d*” should be interpreted in such a fashion that if the sale of a substance is exempt from tax because it is a sale of “food” when the substance is sold by means other than a vending machine, then the sale of that same substance through a vending machine will also be exempt from tax. Conversely, if the sale of a substance by any means other than through a vending machine is taxable, then the sale of that same substance through a vending machine will also be taxable.

e. “Prepared food.” See rule 701—231.5(423).

f. “Soft drinks” means nonalcoholic beverages that contain natural or artificial sweeteners. Soft drinks may be noncarbonated. “Soft drinks” does not include beverages that contain milk or milk products; soy, rice, or similar milk substitutes; coffee and tea which are not sweetened; effervescent, noneffervescent, and mineral water sold in containers; beverages that contain greater than 50 percent of vegetable or fruit juice by volume. This latter is a change from the law as it existed prior to July 1, 2004, which required a volume of only 15 percent for exemption.

Taxable soft drinks are noncarbonated water and soda water if naturally or artificially sweetened; soft drinks carbonated and noncarbonated including but not limited to colas, ginger ale, near beer, and root beer; bottled and sweetened tea and coffee; lemonade, orangeade, and all other drinks or punches with natural fruit or vegetable juice less than 50 percent by volume.

Beverage mixes and ingredients intended to be made into soft drinks are taxable. Beverage mixes or ingredients may be liquid or frozen, concentrated or nonconcentrated, dehydrated, powdered, granulated, sweetened or unsweetened, seasoned or unseasoned. Sales of beverage mixes to which a sweetener is to be added before drinking are taxable. Concentrates intended to be made into beverages which contain natural fruit or vegetable juice of less than 50 percent by volume are taxable.

Beverages, the sales of which are otherwise exempt, are taxable if sold as prepared food under rule 701—231.5(423).

Nondairy coffee “creamers” in liquid, frozen or powdered form are not beverages. Sugar or other artificial or natural sweeteners sold separately are not taxable as beverage ingredients. Specialty foods that are liquids or that are to be added to a liquid and that are intended to be a substitute in the diet for more commonly used food items are not beverages and are not taxable as beverages. These foods include infant formula.

g. “Tobacco” means cigarettes, cigars, chewing or pipe tobacco, or any other item that contains tobacco.

231.3(3) Other substances which are not food or food ingredients. Various products are not purchased for ingestion or chewing by humans or, if they are, are not consumed for their taste or nutritional value. Therefore, they are not purchased exempt from tax under this rule. They include, but are not limited to, the following:

a. Health aids. Over-the-counter medicines and other products used primarily as health aids or therapeutic agents are not foods since they are consumed for their medicinal value as opposed to their nutritional value or taste. Such products include aspirin, cough drops or syrups and other cold remedies, antacids, and all over-the-counter medicines or other products used as health aids. In addition to these commonly used health aids, any product used primarily for medicinal purposes is ineligible. An example of such products is slippery elm powder, a demulcent which is used to soothe sore throats.

b. Items not exempt. The following general classifications of products are subject to tax:

Cosmetics

Household supplies

Paper products

Pet foods and supplies

Soaps and detergents

Tobacco products

Toiletry articles

Tonics

Lunch counter foods or foods prepared for consumption on the premises of the retailer

This rule is intended to implement Iowa Code subsection 423.3(56).

701—231.4(423) Sales of candy.

231.4(1) Definitions. Sales of candy were excluded from exemption prior to July 1, 2004; however, the definition of “candy” applicable to the exclusion was slightly different from the definition set out in this rule. Reference rule 701—20.1(422,423). This rule and the following definitions apply to sales of candy on or after July 1, 2004.

a. Candy. For the purposes of this rule, “candy” is a preparation of sugar, honey, or other natural or artificial sweeteners in combination with chocolate, fruits, nuts or other ingredients or flavorings in the form of bars, drops, or pieces. “Candy” shall not include any preparation containing flour and shall require no refrigeration. Any preparation to which flour has been added only for the purpose of excluding the candy’s sales from tax and not for any legitimate purpose, culinary or otherwise, shall not be sold exempt from tax under this rule. This definition is intended to be used when a person is trying to determine if a product that is commonly thought of as “candy” is in fact “candy.” For example, the definition would be applied in a situation where a person is trying to determine if a product is “candy” as opposed to a cookie. The definition is not intended to be applied to every type of food product sold. Many products, such as meat products, breakfast cereals, potato chips, and canned fruits and vegetables are not commonly thought of as “candy.” The definition of “candy” is not applicable to products such as these since they are not commonly thought of as candy.

b. Preparation. Candy must be a “preparation” that contains certain ingredients, other than flour. A “preparation” is a product that is made by means of heating, coloring, molding, or otherwise processing any of the ingredients listed in the definition of “candy.” For example, reducing maple syrup into pieces and adding coloring to make maple candy is a form of preparation.

c. Bars, drops or pieces. Candy must be sold in the form of bars, drops, or pieces.

(1) A “bar” is a product that is sold in the form of a square, oblong, or similar form. For example, if Company A sells one-pound square blocks of chocolate, the blocks of chocolate are “bars.”

(2) A “drop” is a product that is sold in a round, oval, pear-shaped, or similar form. For example, if Company B sells chocolate chips in a bag, each individual chocolate chip contains all of the ingredients indicated on the label and the chocolate chips are “drops.”

(3) A “piece” is a portion that has the same makeup as the product as a whole. Individual ingredients and loose mixtures of items that make up the product as a whole are not pieces. EXCEPTION: If a loose

mixture of different items that make up the product as a whole are all individually considered candy and are sold as one product, that product is also candy.

EXAMPLE 1: Company C sells jellybeans in a bag. Each jellybean is made up of the ingredients indicated on the label. Each jellybean is a “piece” or “drop.”

EXAMPLE 2: Company D sells trail mix in a bag. The product being sold (trail mix) is made up of a mixture of carob chips, peanuts, raisins, and sunflower seeds. The individual items that make up the trail mix are not “pieces,” but instead are the ingredients, which, when combined, make up the trail mix. Therefore, the trail mix is not sold in the form of bars, drops, or pieces.

EXAMPLE 3: Company E sells a product called “candy lovers mix.” Candy lovers mix is a product that is made up of a loose mixture of jellybeans, toffee, and caramels. Individually, the jellybeans, toffee, and caramels are all candy. The sale of the mixture is the sale of candy since all of the individual items that make up the product are individually considered to be candy.

EXAMPLE 4: Company F sells cotton candy which is packaged and sold in grocery stores. Cotton candy contains sugar, corn syrup, water, coloring, and flavoring; it does not contain flour. Cotton candy is not “candy” because it is not sold in the form of a bar, drop, or piece. Cotton candy is, however, “prepared food” under Iowa Code section 423.3(57) “f.”

d. Flour. In order for a product to be treated as containing “flour,” the product label must specifically list the word “flour” as one of the ingredients. There is no requirement that the “flour” be grain-based, and it does not matter what the flour is made from. Many products that are commonly thought of as “candy” contain flour, as indicated on the ingredient label and therefore are specifically excluded from the definition of “candy.” Ingredient labels must be examined to determine which products contain flour and which products do not contain flour. Any preparation to which flour has been added only for the purpose of excluding its sales from tax and not for any legitimate purpose, culinary or otherwise, shall not be sold exempt from tax under this rule. For example, a candy bar that contains flour, for a legitimate purpose, is excluded from the definition of “candy.”

EXAMPLE 1: The ingredient list for a breakfast bar lists “flour” as one of the ingredients. This breakfast bar is not “candy” since it contains flour.

EXAMPLE 2: The ingredient list for a breakfast bar lists “peanut flour” as one of the ingredients. This breakfast bar is not “candy” because it contains flour.

EXAMPLE 3: The ingredient list for a breakfast bar that otherwise meets the definition of “candy” lists “whole grain” as one of the ingredients, but does not specifically list “flour” as one of the ingredients. This breakfast bar is “candy” because the word “flour” is not included in the ingredient list.

EXAMPLE 4: Company E sells a box of chocolates that are not individually wrapped. The ingredient list on the label for the box of chocolates identifies flour as one of the ingredients. The box of chocolates is not “candy” since flour is identified as one of the ingredients on the label.

EXAMPLE 5: Company F sells a box of chocolates that are not individually wrapped. The ingredient list on the label for the box of chocolates, which otherwise meets the definition of “candy,” does not identify flour as one of the ingredients. The box of chocolates is “candy.”

EXAMPLE 6: Company G sells high-end licorice—licorice A and licorice B. Licorice A would otherwise be “candy,” but its wrapper lists “flour” as an ingredient. Licorice A is not “candy.” Licorice B is the same as licorice A, except it does not contain “flour.” Licorice B is “candy.”

e. Other ingredients or flavorings. “Other ingredients or flavorings” as used in this rule means other ingredients or flavorings that are similar to chocolate, fruits or nuts. This phrase includes candy coatings such as carob, vanilla and yogurt; flavorings or extracts such as vanilla, maple, mint, and almond; and seeds and other items similar to the classes of ingredients or flavorings. This phrase does not include meats, spices, seasonings such as barbeque or cheddar flavor, or herbs which are not similar to the classes of ingredients or flavorings associated with chocolate, fruits, or nuts, unless the product otherwise meets the definition of “candy.”

EXAMPLE 1: Retailer A sells barbeque-flavored peanuts. The ingredient label for the barbeque-flavored peanuts indicates that the product contains peanuts, sugar and various other ingredients, including barbeque flavoring. Since the barbeque-flavored peanuts contain a combination of sweeteners

and nuts, and flour is not listed on the label and the nuts do not require refrigeration, barbeque-flavored peanuts are “candy.”

EXAMPLE 2: Retailer B sells barbeque potato chips. Potato chips are potatoes, a vegetable, and are not commonly thought of as candy. The barbeque potato chips are “food and food ingredients” and not “candy.” The fact that the ingredient label for the barbeque potato chips indicates that the product contains barbeque seasoning which contains a sweetener does not change the fact that the barbeque potato chips are not commonly thought of as candy.

f. Sweeteners. The term “natural or artificial sweeteners” as used in this rule means an ingredient of a food product that adds a sugary sweetness to the taste of the food product and includes, but is not limited to, corn syrup, dextrose, invert sugar, sucrose, fructose, sucralose, saccharin, aspartame, stevia, fruit juice concentrates, molasses, evaporated cane juice, rice syrup, barley malt, honey, maltitol, agave, and artificial sweeteners.

g. Refrigeration. A product that otherwise meets the definition of “candy” is not “candy” if it requires refrigeration. A product “requires refrigeration” if it must be refrigerated at the time of sale or after being opened. In order for a product to be treated as requiring refrigeration, the product label must indicate that refrigeration is required. If the label on a product that contains multiple servings indicates that it “requires refrigeration,” smaller size packages of the same product are also considered to “require refrigeration.” A product that otherwise meets the definition of “candy” is “candy” if the product is not required to be refrigerated, but is sold refrigerated for the convenience or preference of the customer, retailer, or manufacturer.

EXAMPLE 1: Company A sells sweetened fruit snacks in a bag that contains multiple servings. The label on the bag indicates that after opening, the sweetened fruit snacks must be refrigerated. The sweetened fruit snacks “require refrigeration.”

EXAMPLE 2: Company A sells sweetened fruit snacks in single-serving containers. Other than for packaging, the sweetened fruit snacks are identical to the sweetened fruit snacks in Example 1 above. However, since this container of sweetened fruit snacks only contains one serving, it is presumed that it will be used immediately, and the label does not indicate that after opening, the product must be refrigerated. Even though the label does not contain the statement that after opening the sweetened fruit snacks must be refrigerated, these sweetened fruit snacks are considered to “require refrigeration.”

EXAMPLE 3: Company A sells chocolate truffles. The label on the truffles indicates to keep the product cool and dry, but does not indicate that the product must be refrigerated. Since the chocolate truffles are not required to be refrigerated, even though the label indicates to keep them cool, the chocolate truffles do not “require refrigeration.”

231.4(2) Nonexclusive examples.

a. Taxable candy. Examples of items taxable as candy include, but are not limited to: preparations of fruits, nuts, or other ingredients in combination with sugar, honey, or other natural or artificial sweeteners in the form of bars, drops, or pieces; caramel-coated or other candy-coated apples or other fruit; candy-coated popcorn; hard or soft candies including jellybeans, taffy, licorice not containing flour, marshmallows, and mints; dried fruit leathers or other similar products prepared with natural or artificial sweeteners; candy breath mints; chewing gum; and mixes of candy pieces.

Sales of items which are normally sold for use as ingredients in recipes but which can be eaten as candy are taxable on and after July 1, 2004. Examples of these items include, but are not limited to: sweetened baking chocolate in bars or pieces; white and dark chocolate almond bark; toffee bits; M&M’s, including those sold for baking; candy primarily intended for decorating baked goods; and sweetened baking chips, including mint chips, peanut butter chips, butterscotch chips, and chocolate chips.

b. Nontaxable items. Sales of the following are generally not taxable as candy: jams, jellies, preserves, or syrups; frostings; dried fruits without added sweetener; breakfast cereals; prepared fruit in a sugar or similar base; ice cream or other frozen desserts covered with chocolate or similar coverings; cotton candy; cakes, cookies, and similar products covered with chocolate or other similar coating; and granola bars. However, these and similar items are taxable if sold as prepared food under rule 701—231.5(423).

231.4(3) Bundled transaction including candy. “Bundled transaction” is defined as the retail sale of two or more products, except real property and services to real property, where (1) the products are otherwise distinct and identifiable and (2) the products are sold for one non-itemized price.

a. Candy and food. Products that are a combination of items that are defined as “candy” under this rule and items that are defined as “food and food ingredients” under rule 701—231.3(423) are “bundled transactions” when the items are distinct and identifiable and are sold for one non-itemized price. For example, a bag of multiple types of individually wrapped bars that is sold for one price is two or more distinct and identifiable products sold for one non-itemized price. For purposes of determining whether such a bag of individually wrapped bars is a “bundled transaction,” the following criteria apply:

(1) Ingredients listed separately.

1. If a package contains individually wrapped bars, drops, or pieces and the product label on the package separately lists the ingredients for each type of bar, drop, or piece included in the package, those bars, drops, or pieces that have “flour” listed as an ingredient are “food and food ingredients” and those bars, drops, or pieces which do not have “flour” listed as an ingredient are “candy.” The determination of whether the package as a whole meets the definition of “bundled transaction” is based on the percentage of bars, drops, or pieces that meet the definition of “food and food ingredient” as compared to the percentage of bars, drops, or pieces that meet the definition of “candy.”

2. Determining the percentage. For purposes of determining the percentage of the sales price or purchase price of the bars, drops, or pieces that meet the definition of “candy” as compared to all of the bars, drops, or pieces contained in the package, the retailer may presume that each bar, drop, or piece contained in the package has the same value.

3. Presumption of product amount. A retailer may presume that there is an equal number of each type of product contained in the package, unless the package clearly indicates otherwise.

EXAMPLE 1: Retailer A sells a package that contains 100 total pieces of food and food ingredients. There are ten different types of foods and food ingredients in the package. Eight of the types of food and food ingredients included in the package meet the definition of “candy,” while two of the types included do not meet the definition of “candy.” It is a reasonable presumption that 20 (2/10 times 100) of the pieces are not “candy” and 80 (8/10 times 100) of the pieces are “candy.” Therefore, since 80 percent of the product is “candy,” the retailer shall treat the entire package as a bundled transaction containing primarily “candy.” Sales tax is due on the sales price of the entire package. See Iowa Code section 423.2(8).

EXAMPLE 2: Retailer B sells bulk food and food ingredients by the pound. Each food and food ingredient is in a separate bin or container. Some of the food and food ingredients are “candy” and some of them are not because they contain flour. However, regardless of the items chosen, the retailer charges the customer \$3.49/lb. Customer C selects some items that are “candy” and some that are not and puts them in a bag. Since some of the items in the bag are “candy,” the retailer shall treat the entire package as a bundled transaction containing primarily “candy,” unless the retailer ascertains that 50 percent or less of the items in the bag are “candy.” Even if the retailer ascertains that 50 percent or less of the items in the bag are “candy,” sales tax is due on the sales price of the entire package. See Iowa Code section 423.2(8).

(2) Ingredients listed together. If a package contains individually wrapped bars, drops, or pieces and all of the ingredients for each of the products included in the package are listed together, as opposed to being listed separately by each product included as explained in subparagraph (1) above, and even if the ingredient lists “flour” as an ingredient, the product will be treated as “candy,” unless the retailer is able to ascertain that 50 percent or less of the products are “candy.” Even if the retailer ascertains that 50 percent or less of the items in the bag are “candy,” sales tax is due on the sales price of the entire package. See Iowa Code section 423.2(8).

The retailer may presume that each bar, drop, or piece contained in the package has the same value. The retailer may presume that there is an equal number of each type of product contained in the package, unless the package clearly indicates otherwise.

b. Combination of ingredients. Products whose ingredients are a combination of various unwrapped food ingredients that alone are not “candy,” along with unwrapped food ingredients that alone are “candy,” such as breakfast cereal and trail mix with candy pieces, are considered “food and

food ingredients,” but not “candy.” Sales of these products are not “bundled transactions” because there are not two or more distinct and identifiable products being sold. The combination of the ingredients results in a single product.

This rule is intended to implement 2011 Iowa Code subsection 423.3(57).
[ARC 0281C, IAB 8/22/12, effective 9/26/12; ARC 1664C, IAB 10/15/14, effective 11/19/14]

701—231.5(423) Sales of prepared food. On and after July 1, 2004, sales of “prepared food” are subject to tax as such sales were taxable prior to that date. However, before and after that date, the definitions of “prepared food” differ slightly. Reference rule 701—20.5(423) for a description of the taxation of “prepared food” prior to July 1, 2004.

231.5(1) Prepared food.

a. On and after July 1, 2004, “prepared food” means any of the following:

- (1) Food sold in a heated state or heated by the seller, including food sold by a caterer.
- (2) Two or more food ingredients mixed or combined by the seller for sale as a single item.
- (3) Food sold with eating utensils provided by the seller, including plates, knives, forks, spoons, glasses, cups, napkins, or straws. A plate does not include a container or packaging used to transport food.

The types of retailers who are generally considered to be offering prepared food for sale include restaurants, coffee shops, cafeterias, convenience stores, snack shops, and concession stands including those at recreation and entertainment facilities. Other retailers that often offer prepared food include vending machine retailers, mobile vendors, and concessionaires operating facilities for such activities as education, office work, or manufacturing.

If food is sold for consumption on the premises of a retailer, the food is rebuttably presumed to be prepared food. “Premises of a retailer” means the total space and facilities under control of the retailer or available to the retailer, including buildings, grounds, and parking lots that are made available or that are available for use by the retailer, for the purpose of sale of prepared food and drink or for the purpose of consumption of prepared food and drink sold by the retailer. Availability of self-service heating or other preparation facilities or eating facilities such as tables and chairs and knives, forks, and spoons, indicates that food, food products, and drinks are sold for consumption on the premises of the retailer and are subject to tax as sales of prepared food.

The following examples are intended to show some of the situations in which sales are taxable as sales of prepared food and drink.

EXAMPLE A. A movie theater owner operates a movie theater and a concession stand in the lobby of the theater. There is not a separate area set aside for eating facilities. Sales of prepared food and drink through the concession stand are taxable.

EXAMPLE B. As a convenience to employees, a manufacturer owns and operates several food and drink vending machines located on the premises of the plant. No separate seating or other facilities for eating are provided. Sales of prepared food and drink through the vending machines are taxable.

EXAMPLE C. Mobile vendor units located throughout an office are operated by the owner of the business and are stocked with snack food priced to cover the cost of the items to the employer. No separate eating facilities are provided. Sales of prepared food through the mobile vendors are taxable.

EXAMPLE D. An insurance company hires a caterer to run a cafeteria which provides food, at a low cost, to its employees. The insurance company also pays the caterer an amount, per month, which varies with the number of meals the caterer serves to provide this food service. The caterer does not lease the cafeteria premises; thus the premises remains under the control of the insurance company. In this case, the caterer sells the food in a space made “available to the retailer [caterer],” and the amount which the insurance company pays, on a monthly basis, to the caterer is presumed to be the taxable sales price from the sale of prepared food, as well as the amount paid by the employees to the caterer.

b. “Prepared food,” for the purposes of this rule, does not include food that is any of the following:

- (1) Only cut, repackaged, or pasteurized by the seller.

(2) Eggs, fish, meat, poultry, and foods containing these raw animal foods requiring cooking by the consumer as recommended by the United States Food and Drug Administration in Chapter 3, Part 401.11 of its Food Code, so as to prevent food-borne illnesses.

(3) Bakery items sold by the seller that baked them. The term “bakery items” includes but is not limited to breads, rolls, buns, biscuits, bagels, croissants, pastries, donuts, Danish, cakes, tortes, pies, tarts, muffins, bars, cookies, and tortillas. On and after July 1, 2004, baked goods sold for consumption on the premises by the seller that baked them are sold exempt from tax. This is a change from previous law; reference 701—subrule 20.5(2), Example D.

(4) Food sold in an unheated state as a single item without eating utensils provided by the seller which is priced by weight or volume.

231.5(2) Examples. The following are additional examples of foods that either are or are not “prepared foods,” the sales price of which is taxable.

EXAMPLE A: A supermarket retailer cuts Bibb and romaine lettuce, mixes them together, and places them in a bag for sale. This is food which is only cut and repackaged. Its sale is not the sale of prepared food; thus its sale is exempt from tax.

EXAMPLE B: The same factual situation as Example A above applies, except that the lettuce is mixed with a salad dressing, placed in a container, and sold as a salad which is ready to eat. Sale of the salad is a taxable sale of “prepared food.”

EXAMPLE C: A supermarket retailer slices a roll of cotto salami and a roll of regular salami. The retailer places ten slices of each in the same container and sells the combination as an Italian luncheon meat variety pack. This is, again, the sale of food which is only cut and repackaged. The sale of the salami is exempt from tax.

EXAMPLE D: The same factual circumstances as in Example C apply, except that the retailer takes the sliced salami, places it between two slices of bread, adds some condiments, surrounds the meat, bread, and condiments with plastic, and sells the result as a ready-to-eat sandwich. This is prepared food, “two or more food ingredients . . . combined by the seller for sale as a single item,” and more is done to the ingredients than cutting and repackaging. Sales of the sandwiches are taxable.

This rule is intended to implement 2005 Iowa Code subsection 423.3(56).

701—231.6(423) Prescription drugs, medical devices, oxygen, and insulin. Sales of prescription drugs and medical devices as defined in subrule 231.6(1) and dispensed for human use or consumption in accordance with subrules 231.6(3) and 231.6(4) shall be exempt from sales tax. Rentals of medical devices as defined in subrule 231.6(1) are also exempt from tax. The sales price from the sales of any oxygen or insulin purchased for human use or consumption (whether or not the oxygen or insulin is prescribed) is exempt from tax.

231.6(1) Definitions.

“*Medical device*” means durable medical equipment or mobility enhancing equipment intended to be prescribed by a practitioner for human use. See rule 701—231.8(423) for definitions of those terms.

“*Prescription drug*” means a drug intended to be dispensed to an ultimate user pursuant to a prescription drug order, formula, or recipe issued in any form of oral, written, electronic, or other means of transmission by a duly licensed practitioner, or oxygen or insulin dispensed for human consumption with or without a prescription drug order or medication order.

“*Ultimate user*” means any individual who has lawfully obtained and possesses a prescription drug or medical device for the individual’s own use or for the use of a member of the individual’s household, or an individual to whom a prescription drug or medical device has been lawfully supplied, administered, dispensed or prescribed. The phrase does not include any entity created by law, such as a corporation or partnership.

231.6(2) Tax exemption. The sale of a prescription drug is exempt from tax only if the drug is intended to be prescribed or dispensed to an ultimate user. A drug is intended to be prescribed or dispensed to an ultimate user only if the drug is obtained by or supplied or administered to an ultimate user for placement on or in the ultimate user’s body.

EXAMPLE A: A physician prescribes a tranquilizer for a patient who is chronically nervous. The patient uses the prescription to purchase the tranquilizer at a pharmacy. The purchase is exempt from tax.

For purposes of this subrule, any drug prescribed in writing by a licensed physician, surgeon, osteopath, osteopathic physician or surgeon, or other person authorized by law to an ultimate user for human use or consumption shall be deemed a drug exempt from tax if a prescription is required or permitted under Iowa state or federal law.

EXAMPLE B: A common painkiller is sold over the counter in doses of 200 milligrams per tablet. In doses of 600 milligrams per tablet, federal law requires a prescription before the drug can be dispensed. Sales of 600 milligram tablets by prescription are exempt from tax.

EXAMPLE C: A federal law permits but does not require the painkiller mentioned in Example B to be prescribed by a practitioner in dosages of 200 milligrams per tablet. A practitioner might prescribe the painkiller in the over-the-counter dosage, for example, to impress upon a patient the importance of taking the drug. Sales of 200 milligram tablets by prescription are exempt from tax.

See rules 701—231.7(423) and 701—231.8(423) for examples of medical devices sold without a prescription but exempt from tax.

231.6(3) *Persons authorized to dispense prescription drugs or prescription devices.* In order for a prescription drug or device to qualify for an exemption, it must be dispensed by one of the following persons:

a. Any store or other place of business where prescription drugs are compounded, dispensed or sold by a person holding a license to practice pharmacy in Iowa, and where prescription orders for prescription drugs or devices are received or processed in accordance with pharmacy laws.

b. Persons licensed by the state board of medical examiners to practice medicine or surgery in Iowa.

c. Persons licensed by the state board of medical examiners to practice osteopathic medicine or surgery in Iowa.

d. Persons licensed by the state board of podiatry examiners to engage in the practice of podiatry in Iowa.

e. Persons licensed by the state board of dental examiners to practice dentistry in Iowa.

f. Persons licensed by the state board of optometry examiners as therapeutically certified optometrists.

g. Persons licensed by the state board of chiropractic examiners to practice chiropractic in Iowa, when dispensing in accordance with Iowa Code chapter 151.

h. Persons licensed as advanced registered nurse practitioners by the board of nursing when prescribing and dispensing in accordance with Iowa Code subsection 147.107(8).

i. Any other person authorized under Iowa law to dispense prescription drugs or devices in this state.

j. Any person licensed in another state in a health field in which, under Iowa law, licensees in this state may legally prescribe drugs or devices.

231.6(4) *Disposition of prescription drugs and devices.* Prescription drugs or devices may be dispensed either directly from one of the persons licensed in 231.6(3) who may also prescribe drugs or devices or by a pharmacist upon receipt of a prescription from one of the persons licensed to prescribe. A prescription received by a licensed pharmacist from one of the persons licensed in 231.6(3) who may also prescribe drugs or devices shall be sufficient evidence that a drug or device is exempt from sales tax. When a person who prescribes a drug or device is also the dispenser, the drug or device will not require a prescription by such person, but the drug or device must be recorded as if a prescription would have been issued or required. If this condition is met, the sales price from the sale of the drug or device shall be exempt from sales tax.

231.6(5) *Others required to collect sales tax.* Any person other than those who are allowed to dispense drugs or devices under 231.6(3) shall be required to collect sales tax on any prescription drugs or devices.

231.6(6) Prescription drugs and devices purchased by hospitals for resale. This subrule applies to for-profit hospitals only. Hospitals have purchased prescription drugs or devices for resale to patients and not for use or consumption in providing hospital services only if the following circumstances exist: (a) the drug or device is actually transferred to the patient; (b) the drug or device is transferred in a form or quantity capable of a fixed or definite price value; (c) the hospital and the patient intend the transfer to be a sale; and (d) the sale is evidenced in the patient's bill by a separate charge for the identifiable drug or device. Reference rule 701—18.31(422,423) for a discussion generally of sales for resale by persons performing a service. Also reference rule 701—18.59(422,423) for the exemption applicable to all purchases of goods and services by a nonprofit hospital licensed under Iowa Code chapter 135B.

EXAMPLE A: A hospital purchases a bone saw blade and uses the blade to cut the bone of patient X during hip replacement surgery. This dulls the blade to the point that the blade cannot be used again and is discarded. The hospital bills patient X for "one bone saw blade—\$30." In spite of the separate charge for an identifiable piece of property, the hospital did not purchase the bone saw blade for resale. The blade was used up by the hospital, not transferred to the ownership of X. Since there was no transfer, there was no sale, thus no purchase for resale.

EXAMPLE B: A hospital buys lotion for use in massages given to patients by a nurse's aide. In spite of the fact that one can argue that a transfer of ownership of the lotion from hospital to patient occurred, the lotion was not purchased for resale. No real intent to sell the lotion to patients ever existed; the lotion was not transferred to patients in a quantity capable of a definite price value; and there is no separate charge for the lotion.

A hospital's purchase of a prescription drug for purposes other than resale will still be exempt from tax if a drug is intended to be prescribed to an ultimate user and the hospital's use of the drug is otherwise exempt under 231.6(1).

This rule is intended to implement 2005 Iowa Code Supplement subsection 423.3(60).

701—231.7(423) Exempt sales of other medical devices which are not prosthetic devices. A prescription is not required for sales of the medical devices listed in subrule 231.7(1) to be exempt from tax if those devices are purchased for human use or consumption.

231.7(1) Definitions.

"*Anesthesia trays*" includes, without limit, paracervical anesthesia trays, saddle block anesthesia trays, spinal anesthesia trays, and continuous epidural anesthesia trays.

"*Biopsy*" means the removal and examination of tissue from a living body, performed to establish a precise diagnosis.

"*Biopsy needles*" includes, without limit, needles used to perform liver, kidney, other soft tissue, bone, and bone marrow biopsies. Menghini technique aspirating needles, Rosenthal-type needles, and "J" Jamshidi needles are all examples of biopsy needles.

"*Cannula*" means a tube inserted into a body duct or cavity to drain fluid, insert medication including oxygen, or to open an air passage. Examples are lariat nasal cannulas and ableson cricothyrotomy cannulas.

"*Catheter*" means a tubular, flexible, surgical instrument used to withdraw fluids from or introduce fluids into a body cavity, or for making examinations. Examples are: Robinson/nelaton catheters, all types of Foley catheters (e.g., pediatric and irrigating), three-way catheters, suction catheters, IV catheters, angiocath catheters and male and female catheters.

"*Catheter trays.*" Universal Foley catheter trays, economy Foley trays, urethral catheterization trays and catheter trays with domed covers are nonexclusive examples of these trays.

"*Diabetic testing materials*" means all materials used in testing for sugar or acetone in the urine, including, but not limited to, Clinitest, Tes-tape, and Clinistix; also, all materials used in monitoring the glucose level in the blood, including, but not limited to, bloodletting supplies and test strips.

"*Drug infusion device*" means a device designed for the slow introduction of a drug solution into the human body. The term includes devices which infuse by means of pumps or gravity flow (drip infusion).

"*Fistula*" means an abnormal passage usually between the internal organs or between an internal organ and the surface of the body.

“*Hypodermic syringe*” means an instrument for applying or administering liquid into any vessel or cavity beneath the skin. This includes the needle portion of the syringe if it accompanies the syringe at the time of purchase, and it also includes replacement needles.

“*Insulin*” means a preparation of the active principle of the pancreas, used therapeutically in diabetes and sometimes in other conditions.

“*Kit*” means a combination of medical equipment and supplies used to perform one particular medical procedure which is packaged and sold as a single item.

“*Myelogram*” means a radiographic picture of the spinal cord. A “radiographic picture” is one taken using radiation other than visible light.

“*Nebulizer*” means a mechanical device which converts a liquid to a spray or fog.

“*Other medical device,*” for the purposes of this rule, means medical equipment or supplies intended to be dispensed for human use with or without a prescription to an ultimate user.

“*Oxygen equipment*” means all equipment used to deliver medicinal oxygen including, but not limited to, face masks, humidifiers, cannulas, tubing, mouthpieces, tracheotomy masks or collars, regulators, oxygen concentrators and oxygen accessory racks or stands.

“*Set.*” See “kit” above.

“*Tray.*” See “kit” above.

231.7(2) Sales of the following other medical devices are exempt from tax:

- a. Sales of insulin, hypodermic syringes, and diabetic testing materials.
- b. Sales and rentals of oxygen equipment.
- c. Sales of hypodermic needles, anesthesia trays, biopsy trays and needles, cannula systems, catheter trays, invasive catheters, dialyzers, drug infusion devices, fistula sets, hemodialysis devices, insulin infusion devices, irrigation solutions, intravenous administering sets, solutions and stopcocks, myelogram trays, nebulizers, small vein infusion kits, spinal puncture trays, transfusion sets and venous blood sets, all of which are not taxable.

231.7(3) Component parts. Sales of any component parts of the trays, systems, devices, sets, or kits listed above are taxable unless the sale of a component part, standing alone, is otherwise exempt under these rules. For instance, the sale of a biopsy needle or an invasive catheter will be exempt from tax whether or not it was purchased for use as a component part in a biopsy tray or catheter tray, so long as the needle or catheter will be dispensed for human use to an ultimate user. Conversely, sales of catheter introducers, disposable latex gloves, rayon balls, forceps, and specimen bottles are exempt when those items are sold as part of a catheter tray, but are not exempt when those items are sold individually.

This rule is intended to implement 2005 Iowa Code Supplement subsection 423.3(60).

701—231.8(423) Prosthetic devices, durable medical equipment, and mobility enhancing equipment.

231.8(1) *Prosthetic devices.* Sales or rental of prosthetic devices shall be exempt from sales tax.

231.8(2) *Durable medical equipment and mobility enhancing equipment.* Sales or rental of durable medical equipment and mobility enhancing equipment prescribed for human use which meet the provisions of subrules 231.8(3) and 231.8(4) shall be exempt from sales tax. “Prescribed” refers to a prescription issued in any form of oral, written, electronic, or other means of transmission by any of the persons described in paragraphs “a” through “j” of subrule 231.6(3).

231.8(3) *Definitions.*

a. “*Durable medical equipment*” means equipment, including repair and replacement parts, but does not include mobility enhancing equipment, to which all of the following apply:

1. Can withstand repeated use.
2. Is primarily and customarily used to serve a medical purpose.
3. Generally is not useful to a person in the absence of illness or injury.
4. Is not worn in or on the body.
5. Is for home use only.
6. Is prescribed by a practitioner.

b. "Mobility enhancing equipment" means equipment, including repair and replacement parts, but does not include durable medical equipment, to which all of the following apply:

1. Is primarily and customarily used to provide or increase the ability to move from one place to another and which is appropriate for use either in a home or a motor vehicle.
2. Is not generally used by persons with normal mobility.
3. Does not include any motor vehicle or equipment on a motor vehicle normally provided by a motor vehicle manufacturer.
4. Is prescribed by a practitioner.

c. "Prosthetic device" means a replacement, corrective, or supportive device including repair and replacement parts for the same worn on or in the body to do any of the following:

1. Artificially replace a missing portion of the body.
2. Prevent or correct physical deformity or malfunction.
3. Support a weak or deformed portion of the body.

The term "prosthetic device" includes, but is not limited to, orthopedic or orthotic devices, ostomy equipment, urological equipment, tracheostomy equipment, and intraocular lenses.

The following is a nonexclusive list of prosthetic devices:

Artificial arteries	Drainage bags	Prescription eyeglasses
Artificial breasts	Hearing aids	Stoma bags
Artificial ears	Ileostomy devices	Tracheal suction catheters
Artificial eyes	Intraocular lenses	Tracheostomy care and cleaning starter kits
Artificial heart valves	Karaya paste	Tracheostomy cleaning brushes
Artificial implants	Karaya seals	Tracheostomy tubes
Artificial larynx	Organ implants	Urinary catheters
Artificial limbs	Ostomy belts	Urinary drainage bags
Artificial noses	Ostomy clamps	Urinary irrigation tubing
Artificial teeth	Ostomy cleaners and deodorizers	Urinary pouches
Cardiac pacemakers	Ostomy pouches	
Contact lenses	Ostomy stoma caps and paste	
Cosmetic gloves	Penile implants	
Dental bridges and implants		

d. "Orthotic device" means a piece of special equipment designed to straighten a deformed or distorted part of the human body, such as corrective shoes or braces. An orthotic device is an orthopedic device.

e. "Orthopedic device" means a piece of special equipment designed to correct deformities or to preserve and restore the function of the human skeletal system, its articulations and associated structures. A hot tub or spa is not an orthopedic device.

The following is a nonexclusive list of orthopedic devices:

Abdominal belts	Clavicle splints	Nerve stimulators
Alternating pressure mattresses	Corrective braces	Orthopedic implants
Alternating pressure pads	Corrective shoes	Orthopedic shoes
Anti-embolism stockings	Crutch cushions	Patient lifts
Arch supports	Crutch handgrips	Plaster (surgical)
Arm slings	Crutch tips	Rib belts
Artificial sheepskin	Crutches	Rupture belts
Bone cement	Decubitus prevention devices	Sacroiliac supports
Bone nails	Dorsolumbar belts	Sacrolumbar belts

Bone pins	Dorsolumbar supports	Sacrolumbar supports
Bone plates	Elastic bandages	Shoulder immobilizers
Bone screws	Elastic supports	Space shoes
Bone wax	Exercise devices	Splints
Braces	Head halters	Traction equipment
Canes	Hernia belts	Transcutaneous electrical nerve stimulators (tens units)
Casts	Iliac belts	Trapezes
Cast heels	Invalid rings	Trusses
Cervical braces	Knee immobilizers	Walkers
Cervical collars	Lumbosacral supports	Wheelchairs
Cervical pillows	Muscle stimulators	

f. “Related devices.” Sales or rental of devices which are used exclusively in conjunction with prosthetic, orthotic, or orthopedic devices shall be exempt from tax. *Daw Industries, Inc. v. United States*, 714 F.2d 1140 (Fed. Cir. 1983).

g. “Medical equipment and supplies.” The scope of the term “medical equipment and supplies” is broader than the terms “prescription drugs” or “medical devices.” While all exempt prescription drugs are medical supplies and all exempt medical devices are medical equipment, not all medical equipment and supplies are exempt medical devices or prescription drugs. The following is a nonexclusive list of items which are medical equipment or supplies, but are not prescription drugs or medical devices exempt from tax under subrules 231.6(1), 231.8(1), and 231.8(2) and rule 701—231.7(423). Sales of the following items are generally taxable.

Adhesive bandages	Contact lens solution	Hot water bottles
Aneurysm clips	Convuluted pads	Ice bags
Arterial bloodsets	Corrective pessaries	Ident-a-bands
Aspirators	Cotton balls	Incontinent garments
Athletic supporters	Diagnostic kits	Incubators
Atomizers	Dialysis chairs	Infrared lamps
Autolit	Dialysis supplies	Inhalators
Back cushions	Dietetic scales	Iron lungs
Bathing aids	Disposable diapers	Irrigation apparatus
Bathing caps	Disposable gloves	IV connectors
Bedpans	Disposable underpads	Laminar flow equipment
Bedside rails	Donor chairs	Latex gloves
Bedside tables	Dressings	Leukopheresis pumps
Bedside trays	Dry aid kits for ears	Lymphedema pumps
Bedwetting prevention devices	EKG paper	Manometer trays
Belt vibrators	Ear molds	Massagers
Blood cell washing equipment	Electrodes (other than tens units)	Maternity belts
Blood pack holders	Emesis basins	Medigrade tubing
Blood pack trays	Enema units	Modulung oxygenators
Blood pack units	First-aid kits	Moist heat pads
Blood pressure meters	Foam slant pillows	Myringotomy tubes
Blood processing supplies	Gauze bandages	Nebulizers (hypodermic)
Blood tubing	Gauze packings	Overbed tables
Blood warmers	Gavage containers	Page turning devices

Breast pumps	Geriatric chairs	Pap smear kits
Breathing machines	Grooming aids	Paraffin baths
Cardiac electrodes	Hand sealers	Physicians' instruments
Cardiopulmonary equipment	Hearing aid carriers	Pigskin
Chair lifts	Hearing aid repair kits	Plasma extractors
Clamps	Heart stimulators	Plasma pheresis units
Clip-on ashtrays	Heat lamps	Plastic heat sealers
Commode chairs	Heat pads	Prescribed device repair kits and batteries
Connectors	Hemolators	Respirators
Contact lens cases	Hospital beds	Resuscitators
Sauna baths	Steri-peel	Transfer boards
Security pouches	Stools	Tube sealers
Servipak dialysis supplies	Suction equipment	Underpads
Shelf trays	Sunlamps	Urinals
Shower chairs	Surgical bandages	Vacutainers
Side rails	Surgical equipment	Vacuum units
Sitz bath kit	Suspensories	Vaporizers
Specimen containers	Sutures	Vibrators
Sponges (surgical)	Thermometers	Whirlpools
Stairway elevators	Toilet aids	X-ray film
Staples	Tourniquets	

231.8(4) Power devices. Sales or rental of power devices especially designed to operate prosthetic, orthotic or orthopedic devices shall be exempt from tax. This exemption does not include batteries which can be used to operate a number of devices, but batteries designed solely for use in hearing aids are exempt.

This rule is intended to implement 2005 Iowa Code Supplement subsection 423.3(60).

701—231.9(423) Raffles. The sales price from the sale of tickets for a raffle conducted at a fair pursuant to Iowa Code section 99B.5 is not subject to tax.

This rule is intended to implement 2005 Iowa Code subsection 423.3(61).

701—231.10(423) Exempt sales of prizes. The sales price from sales of tangible personal property which will be given as prizes to players in games of skill, games of chance, raffles, and bingo games as defined in and lawful under Iowa Code chapter 99B is exempt from tax. See department of inspections and appeals' 481—Chapters 100 through 106, Iowa Administrative Code, for a description of the games of skill, games of chance, raffles, and bingo games which are lawful. See rule 481—100.6(99B) for a description of the prizes which may be lawfully awarded. A gift certificate is not tangible personal property. If a person wins a gift certificate as a prize and then redeems the gift certificate for merchandise, tax is payable at the time the gift certificate is redeemed. Reference 701—15.16(422,423).

This rule is intended to implement 2005 Iowa Code subsection 423.3(62).

701—231.11(423) Modular homes. Forty percent of the sales price from the sale of a modular home is exempt from tax. A "modular home" is any structure built in a factory, made to be used as a place for human habitation, which cannot be attached or towed behind a motor vehicle and which does not have permanently attached to its body or frame any wheels or axles.

This rule is intended to implement 2005 Iowa Code subsection 423.3(63).

701—231.12(423) Access to on-line computer service. The sales price from charges paid to a provider for access to an on-line computer service is exempt from tax. An “on-line computer service” is one which provides for or enables multiple users to have computer access to the Internet. Also, the furnishing of any contracted on-line service is exempt from Iowa tax if the information is made available through a computer server. The exemption applies to all contracted on-line services, as long as they provide access to information through a computer server.

This rule is intended to implement 2005 Iowa Code subsection 423.3(64).

701—231.13(423) Sale or rental of information services. The sales price from the service of the sale or rental of information services is exempt from tax. This exemption does not repeal by implication the tax on the performance of the services of investment counseling, service charges of all financial institutions, private employment agencies, test laboratories, detective services, or any other services enumerated by statute. Those services remain taxable; reference 701—Chapter 26 generally.

“Information services” means every business activity, process, or function by which a seller or its agent accumulates, prepares, organizes, or conveys data, facts, knowledge, procedures, and like services to a particular buyer (or its agent) of the information through any tangible or intangible medium. Information accumulated, prepared, or organized for a particular buyer, its agent, a group of buyers, or their agent is an information service even though it may incorporate preexisting components of data or other information.

Information services include, but are not limited to, database files, mailing lists, subscription files, market research, credit reports, surveys, real estate listings, bond rating reports, abstracts of title, bad check lists, broadcasting rating services, wire services, scouting reports, white and yellow page listings, and other similar items of compiled information prepared for a particular customer. The furnishing of artwork (including musical compositions and films), drawings, illustrations, or other graphic material is not the performance of an “information service”; nor does the term include information prepared for general dissemination to the public in the form of books, magazines, newsletters, videotapes or audiotapes, compact discs, or any other medium commonly used to communicate with large numbers of customers. The sale of a book, magazine, or similar item is not the sale of an information service, even if the item contains material of practical use (e.g., in conducting a private, for-profit business) to its purchaser.

The following specific examples illustrate the general principles set out above.

EXAMPLE A. John Doe buys a packaged set of preprinted documents and instructions which anyone may purchase and which is entitled “Legal Eagle.” Mr. Doe prepares his own will by reading the instructions, making choices and filling in the blanks on the preprinted documents. Mr. Doe has purchased tangible personal property and not an information service. His purchase is taxable.

EXAMPLE B. A taxpayer buys a book entitled “Doing Your Own Iowa Individual Income Tax,” which is written by an accountant and is available to any buyer. The taxpayer uses the book to prepare her own IA 1040. Since her purchase contains information prepared for general dissemination to the public in the form of a book, that purchase is a taxable sale of tangible personal property and not an exempt sale of an information service.

EXAMPLE C. The seller provides, for a fee, a weekly bulletin listing information on real estate of use to brokers selling homes in a certain Iowa county. The seller secures the information from a multiple listing service without applying any independent thought during the compiling of that information. The bulletin is useful only to those brokers and not to the general public. Since the bulletin is a “real estate listing” and has been prepared for a particular group of customers and not for the general public, its sale is the sale of an information service rather than the sale of tangible personal property and is thus exempt from tax.

EXAMPLE D. A-1 Corporation sells gourmet meats through the mail. A-1 rents its list of customers to whom it mails its catalog to other retailers that specialize in sales of goods or services to the wealthy. Since the list is a “mailing list” and made available only to a particular group of buyers, its rental is the performance of an exempt information service and not the taxable rental of tangible personal property.

EXAMPLE E. Company E is a tariff bureau which specializes in compiling and preparing tariff schedules. E acquires these schedules from various companies throughout the country. E then provides these schedules to common carriers that subscribe to its service. Its printed tariff schedules are published in bound and loose-leaf form; they may be updated daily. E's providing the schedules is the performance of an exempt information service because the schedules are compiled for a particular group of customers and they are items of compiled information similar to the files, lists, reports, and other information services named above. E's services are not subject to tax.

EXAMPLE F. Company F compiles and prints telephone directories. F purchases white and yellow page listings from various telephone companies and uses those listings to make up its directories. F's purchases of the white and yellow page listings are purchases of an exempt information service. Any sales on F's part of the directories to the general public would be sales of tangible personal property subject to tax.

EXAMPLE G. Company G purchases the assets of four businesses. The primary asset of each of the businesses is a database containing names, addresses, and other customer information of use to G but not to anyone other than a company similar to G. G transfers the lists to its own computers by way of paper or magnetic tape. G has purchased an exempt information service with its purchases of the four databases.

This rule is intended to implement 2005 Iowa Code subsection 423.3(65).

701—231.14(423) Exclusion from tax for property delivered by certain media. A taxable "sale" of tangible personal property does not occur if the substance of the transaction is delivered to the purchaser digitally, electronically, or by utilizing cable, radio waves, microwaves, satellites, or fiber optics. This exclusion from tax is also applicable to the leasing of tangible personal property, since a lease is classified as a "sale" of tangible personal property for the purposes of Iowa sales and use tax law. The exclusion is not applicable to property delivered by any medium other than those listed above. Sales of items such as artwork, drawings, photographs, music, electronic greeting cards, "canned" software (reference 701—subrule 18.34(1)), entertainment properties (e.g., films, concerts, books, and television and radio programs), and all other digitized products delivered as described above are not taxable, except the exclusion does not repeal by implication the tax on the service of providing pay television. Reference rule 701—26.56(422,423). If an order for a product is placed by way of any of the media described above but the product ordered is delivered by conventional, physical means, e.g., the U.S. Postal Service or common carrier, sale of the product is not excluded from tax under this rule.

The department considers delivery of tangible personal property to a purchaser by way of a "load and leave" transaction to be delivery by the use of conventional physical means. The sales price from the purchase of property delivered through a load and leave transaction is not exempt from tax under this rule. "Load and leave" means delivery to the purchaser by use of a tangible storage media where the tangible storage media is not physically transferred to the purchaser.

This rule is intended to implement 2005 Iowa Code subsection 423.3(66) and Iowa Code chapter 423, subchapter IV.

701—231.15(423) Exempt sales of clothing and footwear during two-day period in August. Tax is not due on the sale or use of a qualifying article of clothing or footwear if the sales price of the article is less than \$100 and the sale takes place during a period beginning at 12:01 a.m. on the first Friday in August and ending at 12 midnight of the following Saturday. For example, in the year 2004, this period began at 12:01 a.m. on Friday, August 6, and ended at 12 midnight on Saturday, August 7. Eligible purchases of clothing and footwear are exempt from local option sales taxes as well as Iowa state sales tax.

231.15(1) Definitions. The following words and terms, when used in this rule, shall have the following meanings, unless the context clearly indicates otherwise.

"Accessories" includes, but is not limited to, jewelry, handbags, purses, briefcases, luggage, wallets, watches, cufflinks, tie tacks and similar items carried on or about the human body, without regard to whether worn on the body in a manner characteristic of clothing.

“*Clothing or footwear*” means an article of wearing apparel designed to be worn on or about the human body. For the purposes of this rule, the term does not include accessories or special clothing or footwear or articles of wearing apparel designed to be worn by animals.

“*Eligible property*” means an item of a type, such as clothing, that qualifies for Iowa’s sales tax holiday.

“*Special clothing or footwear*” is clothing or footwear primarily designed for athletic activity or protective use and which is not normally worn except when used for the athletic activity or protective use for which it is designed.

231.15(2) Exempt sales.

a. Required price. The exemption applies to each article of clothing or footwear selling for less than \$100, regardless of how many items are sold on the same invoice to a customer. For example, if a customer purchases two shirts for \$80 each, both items qualify for the exemption even though the customer’s total purchase price (\$160) exceeds \$99.99. The exemption does not apply to the first \$99.99 of an article of clothing or footwear selling for more than \$99.99. For example, if a customer purchases a pair of pants costing \$110, sales tax is due on the entire \$110.

b. Order date and back orders. For the purpose of the sales tax holiday, eligible property qualifies for exemption if: the item is both delivered to and paid for by the customer during the exemption period; or the customer orders and pays for the item and the seller accepts the order during the exemption period for immediate shipment, even if delivery is made after the exemption period. The seller accepts an order when the seller has taken action to fill the order for immediate shipment. Actions to fill an order include placement of an “in date” stamp on a mail order or assignment of an “order number” to a telephone order. An order is for immediate shipment when the customer does not request delayed shipment. An order is for immediate shipment notwithstanding that the shipment may be delayed because of a backlog of orders or because stock is currently unavailable to, or on back order by, the seller.

231.15(3) Taxable sales. This exemption does not apply to sales of the following goods or services:

a. Any special clothing or footwear that is primarily designed for athletic activity or protective use and that is not normally worn except when used for the athletic activity or protective use for which it is designed. For example, golf cleats and football pads are primarily designed for athletic activity or protective use and are not normally worn except when used for those purposes; therefore, they do not qualify for the exemption. However, tennis shoes, jogging suits, and swimsuits are commonly worn for purposes other than athletic activity and qualify for the exemption.

b. Accessories, including jewelry, handbags, purses, briefcases, luggage, umbrellas, wallets, watches, and similar items carried on or about the human body, without regard to whether they are worn on the body in a manner characteristic of clothing.

c. The rental of any clothing or footwear. For example, this exemption does not apply to rentals of formal wear, costumes, diapers, and bridal gowns, but would apply to sales of the above items.

d. Taxable services performed on clothing or footwear, such as garment and shoe repair, dry cleaning or laundering, and alteration services. Sales tax is due on alterations to clothing, even though the alteration service may be performed, invoiced and paid for at the same time as the clothing is being purchased. If a customer purchases a pair of pants for \$90 and pays \$15 to have the pants cuffed, the \$90 charge for the pants is exempt, but tax is due on the \$15 alteration charge.

e. Purchases of items used to make, alter, or repair clothing or footwear, including fabric, thread, yarn, buttons, snaps, hooks, belt buckles, and zippers.

231.15(4) Special situations.

a. Articles normally sold as a unit. Articles that are normally sold as a unit must continue to be sold in that manner if the exemption is to apply; they cannot be priced separately and sold as individual items in order to obtain the exemption. For example, if a pair of shoes sells for \$150, the pair cannot be split in order to sell each shoe for \$75 to qualify for the exemption. If a suit is normally priced at \$225 and sold as a unit on a single price tag, the suit cannot be split into separate articles so that any of the components may be sold for less than \$100 in order to qualify for the exemption. However, components that are normally priced as separate articles (e.g., slacks and sport coats, and suit coats and suit pants

sold separately prior to the two-day period) may continue to be sold as separate articles and qualify for the exemption if the price of an article is less than \$100.

b. Sales of exempt clothing combined with gifts of taxable merchandise. When exempt clothing is sold in a set that also contains taxable merchandise as a free gift and no additional charge is made for the gift, the exempt clothing may qualify for this exemption. For example, a boxed set may contain a tie and a free tie tack. If the price of the set is the same as the price of the tie sold separately, the item being sold is the tie, which is exempt from tax if sold for less than \$100 during the exemption period.

c. Layaway sales. A layaway sale is a transaction in which merchandise is set aside for future delivery to a customer who makes a deposit, agrees to pay the balance of the purchase price over a period of time and, at the end of the payment period, receives the merchandise. Reference rule 701—16.22(422,423) for general information on layaway sales. A sale of eligible property under a layaway sale qualifies for exemption if: final payment on a layaway order is made by, and the property is given to, the purchaser during the exemption period; or the purchaser selects the property and the retailer accepts the order for the item during the exemption period, for immediate delivery upon full payment, even if delivery is made after the exemption period.

d. Returns. For a 60-day period immediately after the sales tax holiday exemption period, when a customer returns an item that would qualify for the exemption, no credit for or refund of sales tax shall be given unless the customer provides a receipt or invoice that shows tax was paid, or the seller has sufficient documentation to show that tax was paid on the specific item. This 60-day period is set solely for the purpose of designating a time period during which the customer must provide documentation that shows that sales tax was paid on returned merchandise. The 60-day period is not intended to change a seller's policy on the time period during which the seller will accept returns.

e. Different time zones. The time zone of the seller's location determines the authorized time period for a sales tax holiday when the purchaser is located in one time zone and the seller is located in another.

231.15(5) *Calculating taxable and exempt sales price—discounts, coupons, buying at a reduced price, and rebates.*

a. Discounts. A discount allowed by a retailer and taken on a taxable sale can be used to reduce the sales price of an item. If the discount reduces the sales price of an item to \$99.99 or less, the item may qualify for the exemption. For example, a customer buys a \$150 dress and a \$100 blouse from a retailer offering a 10 percent discount. After applying the 10 percent discount, the final sales price of the dress is \$135, and the blouse is \$90. The dress is taxable (it is over \$99.99), and the blouse is exempt (it is less than \$99.99). Reference rule 701—15.6(422,423) for a definition of the word “discount” and a description of which retailers' reductions in price are discounts which reduce the taxable sales price of items and which are not.

b. Coupons. When a coupon is issued by a retailer and is actually used to reduce the sales price of any taxable item, the value of the coupon is excludable from the tax as a discount if the retailer is not reimbursed for the coupon amount by a third party. Therefore, a retailer's coupon can be used to reduce the sales price of an item to \$99.99 or less in order to qualify for the exemption. For example, if a customer purchases a pair of shoes priced at \$110 with a coupon worth \$20 off, the final sales price of the shoes is \$90, and the shoes qualify for the exemption. A manufacturer's coupon cannot be used to reduce the sales price of an item. Reference 701—subrule 15.6(3).

c. Buy one, get one free or for a reduced price or “two for the price of one” sales. The total price of items advertised as “buy one, get one free,” or “buy one, get one for a reduced price,” or “two for the price of one” cannot be averaged in order for both items to qualify for the exemption. The following examples illustrate how such sales should be handled.

EXAMPLE 1. A retailer advertises pants as “buy one, get one free.” The first pair of pants is priced at \$120; the second pair of pants is free. Tax is due on \$120. Having advertised that the second pair is free, the store cannot ring up each pair of pants for \$60 in order for the items to qualify for the exemption. However, if the retailer advertises and sells the pants for 50 percent off, selling each pair of \$120 pants for \$60, each pair of pants qualifies for the exemption.

EXAMPLE 2. A retailer advertises shoes as “buy one pair at the regular price, get a second pair for half price.” The first pair of shoes is sold for \$100; the second pair is sold for \$50 (half price). Tax is due on the \$100 shoes, but not on the \$50 shoes. Having advertised that the second pair is half price, the store cannot ring up each pair of shoes for \$75 in order for the items to qualify for the exemption. However, if the retailer advertises the shoes for 25 percent off, thereby selling each pair of \$100 shoes for \$75, each pair of shoes qualifies for the exemption.

EXAMPLE 3. A retailer advertises shirts as “buy two for the price of one” for \$140. Tax is due on \$140. Each shirt cannot be rung up as costing \$70. However, as described in Examples 1 and 2 above, the \$140 cost of each shirt can be discounted to bring the price of each shirt within the exemption’s limitation.

d. Rebates. Rebates occur after the sale and do not affect the sales price of an item purchased. For example, a customer purchases a sweater for \$110 and receives a \$12 rebate from the manufacturer. The retailer must collect tax on the \$110 sales price of the sweater. Reference 701—subrule 15.6(2) for additional information regarding rebates.

e. Shipping and handling charges. Shipping charges separately stated and separately contracted for (reference rule 701—15.13(422,423) for explanation) are not part of the amount used to determine whether the sales price of an item qualifies it for exemption. Handling charges, however, are part of the amount used to make this determination if it is necessary to pay those charges in order to purchase an item.

231.15(6) Treatment of various transactions associated with sales.

a. Rain checks. A rain check allows a customer to purchase an item at a certain price at a later time because the particular item was out of stock. Eligible items purchased during the exemption period using a rain check will qualify for the exemption regardless of when the rain check was issued. However, issuance of a rain check during the exemption period will not qualify an eligible item for the exemption if the item is actually purchased after the exemption period.

b. Exchanges.

(1) If a customer purchases an item of eligible clothing or footwear during the exemption period and later exchanges the item for a similar eligible item (different size, different color, etc.), no additional tax will be due even if the exchange is made after the exemption period.

EXAMPLE. A customer purchases a \$35 shirt during the exemption period. After the exemption period ends, the customer exchanges the shirt for the same shirt in a different size. Tax is not due on the \$35 price of the shirt.

(2) If a customer purchases an item of eligible clothing or footwear during the exemption period and after the exemption period has ended returns the item and receives credit on the purchase of a different item, the appropriate sales tax will apply to the sale of the newly purchased item.

EXAMPLE. A customer purchases a \$35 shirt during the exemption period. After the exemption period ends, the customer exchanges the shirt for a \$35 jacket. Because the jacket was not purchased during the exemption period, tax is due on the \$35 price of the jacket.

(3) If a customer purchases an item of eligible clothing or footwear during the exemption period and later during the exemption period returns the item and purchases a similar but nonexempt item, the purchase of the second item is not exempt from tax.

EXAMPLE. During the exemption period, a customer purchases a \$90 dress that qualifies for the exemption. Later, during the exemption period, the customer exchanges the \$90 dress for a \$150 dress. Tax is due on the \$150 dress. The \$90 credit from the returned item cannot be used to reduce the sales price of the \$150 item to \$60 for exemption purposes.

(4) If a customer purchases an item of eligible clothing or footwear before the exemption period and during the exemption period returns the item and receives credit on the purchase of a different item of eligible clothing or footwear, no sales tax is due on the sale of the new item if it is purchased during the exemption period and otherwise meets the qualifications for exemption.

EXAMPLE. Before the exemption period, a customer purchases a \$60 dress. Later, during the exemption period, the customer exchanges the \$60 dress for a \$95 dress. Tax is not due on the \$95

dress because it was purchased during the exemption period and otherwise meets the qualifications for the exemption.

231.15(7) *Nonexclusive list of exempt items.* The following is a nonexclusive list of clothing or footwear, sales of which are exempt from tax during the two-day period in August:

Adult diapers	Formal clothing—sold not rented	Raincoats and hats
Aerobic clothing	Fur coats and stoles	Religious clothing
Antique clothing	Galoshes	Riding pants
Aprons—household	Garters and garter belts	Robes
Athletic socks	Girdles	Rubber thongs—“flip-flops”
Baby bibs	Gloves—cloth, dress and leather	Running shoes without cleats
Baby clothes—generally	Golf clothing—caps, dresses, shirts and skirts	Safety shoes (adaptable for street wear)
Baby diapers	Graduation caps and gowns—sold not rented	Sandals
Baseball caps	Gym suits and uniforms	Shawls
Bathing suits	Hats	Shirts
Belts with buckles attached	Hiking boots	Shoe inserts and laces
Blouses	Hooded (sweat) shirts	Stockings
Boots—general purpose	Hosiery, including support hosiery	Suits
Bow ties	Jackets	Support hose
Bowling shirts	Jeans	Suspenders
Bras	Jerseys for other than athletic wear	Sweatshirts
Bridal apparel—sold not rented	Jogging apparel	Sweatsuits
Camp clothing	Knitted caps or hats	Swim trunks
Caps—sports and others	Lab coats	Tennis dresses
Chefs’ uniforms	Leather clothing	Tennis skirts
Children’s novelty costumes	Leg warmers	Ties
Choir robes	Leotards and tights	Tights
Clerical garments	Lingerie	Trousers
Coats	Men’s formal wear—sold not rented	Tuxedos (except cufflinks)—sold not rented
Corsets	Neckwear, e.g., scarves	Underclothes
Costumes—Halloween, Santa Claus, etc., sold not rented	Nightgowns and nightshirts	Underpants
Coveralls	Overshoes	Undershirts
Cowboy boots	Pajamas	Uniforms—generally
Diapers—cloth and disposable	Pants	Veils
Dresses	Pantyhose	Vests—general, for wear with suits
Dress gloves	Prom dresses	Walking shoes
Dress shoes	Ponchos	Windbreakers
Ear muffs		Work clothes
Employee uniforms other than those primarily designed for athletic activity or protective use		

231.15(8) *Nonexclusive list of taxable items.* The following is a nonexclusive list of items, sales of which are taxable during the two-day period in August:

Accessories—generally	Fabric sales	Safety clothing
Alterations of clothing	Fishing boots (waders)	Safety glasses
Athletic supporters	Football pads	Safety shoes—not adaptable for street wear
Backpacks	Football pants	Shoes with cleats or spikes
Ballet shoes	Football shoes	Shoulder pads for dresses and jackets
Barrettes	Goggles	Shower caps
Baseball cleats	Golf gloves	Skates—ice and roller
Baseball gloves	Ice skates	Ski boots, masks, suits and vests
Belt buckles sold without belts	In-line skates	Special protective clothing or footwear not adaptable for streetwear
Belts for weight lifting	Insoles	Sports helmets
Belts needing buckles but sold without them	Jewelry	Sunglasses—except prescription
Bicycle shoes with cleats	Key cases and chains	Sweatbands—arm, wrist and head
Billfolds	Knee pads	Swim fins, masks and goggles
Blankets	Laundry services	
Boutonnieres	Life jackets and vests	
Bowling shoes—rented and sold	Luggage	
	Monogramming services	

Bracelets	Pads—elbow, knee and shoulder,	Tap dance shoes
Buttons	football and hockey	Thread
Chest protectors	Patterns	Vests—bulletproof
Clothing repair	Protective gloves and masks	Weight lifting belts
Coin purses	Purses	Wrist bands
Corsages	Rental of clothing	Yard goods
Dry cleaning services	Rental of shoes or skates	Yarn
Elbow pads	Repair of clothing	Zippers
Employee uniforms primarily designed for athletic activities or protective use	Roller blades	

This rule is intended to implement 2005 Iowa Code subsection 423.3(67).

701—231.16(423) State sales tax phase-out on energies. Beginning January 1, 2002, the state sales tax is phased out at the rate of 1 percent per year on the sales price from the sale, furnishing, or service of metered natural gas, electricity and fuels, including propane and heating oils, to residential customers for use as energy for residential dwellings, apartment units, and condominiums for human occupancy.

Local option taxes are not included in the phase-out of the state sales tax.

This phase-out of tax does not impact franchise fees. Franchise fees will continue to be imposed where applicable.

231.16(1) Definitions. The following definitions are applicable to this rule:

“*Energy*” means a substance that generates power to operate fixtures or appliances within a residential dwelling or that creates heat or cooling within a residential dwelling.

“*Fuel*” means a liquid source of energy for a residential dwelling, individual apartment unit, or condominium. “*Fuel*” includes propane, heating fuel, and kerosene. However, “*fuel*” does not include blended kerosene used as motor fuel or special fuel.

“*Metered gas*” means natural gas that is billed based on metered usage to provide energy to a residential dwelling, individual apartment unit, or individual condominium.

“*Residential dwelling*” means a structure used exclusively for human occupancy. This does not include commercial or agricultural structures, nor does it include nonresidential buildings attached to or detached from a residential dwelling, such as an outbuilding. However, a garage attached to or detached from a dwelling that is used strictly for residential purposes will fall within the phase-out provisions. A building containing apartment units is not considered to be qualifying property for purposes of this rule. However, if each apartment has a separate meter, it may qualify for the phase-out if classified as qualifying property by the utility. Also excluded from the phase-out provisions are certain nonqualifying properties that include, but are not limited to, nursing homes, adult living facilities, assisted living facilities, halfway houses, charitable residential facilities, YMCA residential facilities, YWCA residential facilities, apartment units not individually metered, and group homes.

231.16(2) Schedule for phase-out of tax. State sales tax on energies will be phased out at the rate of 1 percent per year based on the following schedule:

a. If the date of the utility billing or meter reading cycle of the residential customer for the sale, furnishing, or service of metered gas and electricity is on or after January 1, 2002, through December 31, 2002, or if the sale, furnishing, or service of fuel for purposes of residential energy and the delivery of the fuel occur on or after January 1, 2002, through December 31, 2002, the rate of state tax is 4 percent of the sales price.

b. If the date of the utility billing or meter reading cycle of the residential customer for the sale, furnishing, or service of metered gas and electricity is on or after January 1, 2003, through December 31, 2003, or if the sale, furnishing, or service of fuel for purposes of residential energy and the delivery of the fuel occur on or after January 1, 2003, through December 31, 2003, the rate of state tax is 3 percent of the sales price.

c. If the date of the utility billing or meter reading cycle of the residential customer for the sale, furnishing, or service of metered gas and electricity is on or after January 1, 2004, through December 31, 2004, or if the sale, furnishing, or service of fuel for purposes of residential energy and the delivery of

the fuel occur on or after January 1, 2004, through December 31, 2004, the rate of state tax is 2 percent of the sales price.

d. If the date of the utility billing or meter reading cycle of the residential customer for the sale, furnishing, or service of metered gas and electricity is on or after January 1, 2005, through December 31, 2005, or if the sale, furnishing, or service of fuel for purposes of residential energy and the delivery of the fuel occur on or after January 1, 2005, through December 31, 2005, the rate of state tax is 1 percent of the sales price.

e. If the date of the utility billing or meter reading cycle of the residential customer for the sale, furnishing, or service of metered gas and electricity is on or after January 1, 2006, or if the sale, furnishing, or service of fuel for purposes of residential energy and the delivery of the fuel occur on or after January 1, 2006, the rate of state tax is 0 percent of the sales price.

231.16(3) Determination of tax rate. Determination of the rate of state tax to be imposed on a transaction depends on the type of energy that is being purchased.

a. Electricity or metered natural gas. If the energy being purchased is either electricity or natural gas, then the rate of tax is governed by either the billing date or meter reading date. For example, ABC natural gas company sends out bills with a billing date of December 31, 2002, to qualifying residential customers. However, the bills to these qualifying customers are not placed in the United States mail until January 2, 2003. Based on the foregoing facts, the state sales tax to be imposed on the bills is 4 percent. Four percent is the tax rate imposed at the time of the billing date on the gas bills sent to the customers.

If a billing for the same usage period needs to be billed more than once due to loss of the original bill or some other error, the billing date of the original bill controls qualification for the phase-out provisions of metered gas or electricity. For example, a utility company issues a billing for metered gas on December 28, 2001, to a customer and the customer loses the billing. The customer calls the utility company on January 10, 2002, to report the lost billing and to request a new billing. The utility company issues a new billing with a billing date of January 12, 2002, to the customer. The original billing date issued to the customer is determinative for the tax rate to be imposed. As a result, a 5 percent state tax rate should be imposed on the billing because the original billing date was prior to January 1, 2002.

b. Fuel and heating oil. The proper rate of tax to be imposed for the sale, furnishing or service of fuel including propane is governed by the date of delivery of the fuel to the customer. Consequently, if a farmer purchases propane for home heating by executing an agreement and paying for the propane in October 2002 but the propane is not delivered to the farmer until January 2003, the rate of state sales tax that should be imposed on the transaction is 3 percent.

231.16(4) Qualifying and nonqualifying usage. Customers that have both qualifying and nonqualifying usage on the same meter or fuel tank are subject to a proration formula to obtain the qualifying portion eligible for the phase-out provisions. In these situations, the percentage of qualifying usage must be determined by the purchaser for the purposes of applying the phase-out tax. Nonqualifying usage would be subject to the full state tax rate. Consequently, a proration of the metered gas, electricity or fuel usage for the qualifying and the nonqualifying usage must be calculated by the purchaser. Reference 701—subrules 15.3(4) and 15.4(5) for guidance on proration of electricity, natural gas and fuels. In addition, the purchaser must furnish an exemption certificate to the supplier with respect to that percentage of metered gas or electricity that is eligible for the phase-out provisions. Reference 701—subrule 15.3(2). The customer may provide a calculation which includes only the usage not subject to phase-out.

The customer must notify the utility provider of the percentage of qualifying and nonqualifying usage and the customer has the burden of proof regarding the percentage. The customer is liable for any mistakes or misrepresentations made regarding the computation or for failure to notify the utility provider in writing of the percentage of qualifying or nonqualifying usage.

Security lights used by customers that are billed as a flat rate tariff will be subject to the phase-out if the customer is classified as a residential customer. However, if a customer uses security lights which are billed as a flat rate tariff and that customer is classified as a commercial customer, the sales price including the usage of the security lights is not subject to the phase-out of state sales tax and is subject to the full state sales tax rate, unless another exemption from state sales tax is applicable.

231.16(5) Reporting over the phase-out period. Sales/use tax returns will be filed on the same basis as they are currently filed. During each phase-out period, the entire sales price from sales should be reported on the return. The appropriate state sales tax rate for the tax period will be applied by claiming the phased-out portion of the tax rate as a deduction on the return.

The sales prices for local option taxes are also to be reported in their entirety and computed by applying the appropriate local option tax rate.

The following are examples regarding how state sales and local option taxes should be reported:

EXAMPLE 1. Reporting of tax by an energy provider:

Sales price for a tax period in 2002	\$100,000
Phase-out (20,000 for the first year, 40,000 for the second year, etc.)	<u>20,000</u>
Taxable sales	80,000
State tax at 5% (to compute state sales tax due)	4,000
Sales price to be reported for local option	100,000
Local option tax rate (assuming a 1% local option tax rate)	<u>× 1%</u>
Local option tax due	1,000
Total tax due (local option and state sales tax)	\$5,000

EXAMPLE 2. Reporting of tax on an individual billing:

Monthly charge during a billing or delivery period in 2002	\$400
State tax rate	<u>× 4%</u>
State tax due	16
Sales price for local option tax	400
Local option tax rate	<u>× 1%</u>
Local option tax due	4
Total tax (local option and state sales tax)	\$20

This rule is intended to implement 2005 Iowa Code section 423.3(68).

CHAPTER 235
REBATE OF IOWA SALES TAX PAID

701—235.1(423) Sanctioned automobile racetrack facilities. Effective July 1, 2005, qualifying rebates of Iowa state sales tax may be made to the owner or operator of a sanctioned automobile racetrack facility as defined in this rule for sales occurring on or after January 1, 2006, and ending June 30, 2016. This rebate program should be viewed as a pilot project as a means to increase tourism in the state. Qualifying rebates are for state sales tax only. Local option taxes are not subject to rebate under this program.

235.1(1) Definitions.

a. For the purpose of this program, prior to July 1, 2009, the following definitions apply:

“Automobile racetrack facility” means a sanctioned automobile racetrack facility located as part of a racetrack and entertainment complex, including any museum attached to or included in the racetrack facility, but excluding any restaurant, and which facility is located, on a maximum of 232 acres, in a city with a population of at least 14,500 but not more than 16,500 residents, which city is located in a county with a population of at least 35,000 but not more than 40,000 residents, and where the construction on the racetrack facility commenced not later than one year following July 1, 2005, and the cost of the construction upon completion was at least \$35 million.

“Change of control” means any of the following:

1. Any change in the ownership of the original or any subsequent legal entity that is the owner or operator of the automobile racetrack facility such that at least 60 percent of the equity interests in the legal entity cease to be owned by individuals who are residents of Iowa, an Iowa corporation, or combination of both.

2. The original owners of the legal entity that is the owner or operator of the automobile racetrack facility shall collectively cease to own more than 50 percent of the voting equity interests of such legal entity or shall otherwise cease to have effective control of such legal entity.

“Iowa corporation” means a corporation incorporated under the laws of Iowa where at least 60 percent of the corporation’s equity interests are owned by individuals who are residents of Iowa.

“Owner or operator” means a for-profit legal entity where at least 60 percent of its equity interests are owned by individuals who are residents of Iowa, an Iowa corporation, or combination of both and that is the owner or operator of an automobile racetrack facility and is primarily a promoter of motor vehicle races.

“Population” means the population based upon the 2000 certified federal census.

b. For the purpose of this program, on and after July 1, 2009, the following definitions apply:

“Automobile racetrack facility” means a sanctioned automobile racetrack facility located as part of a racetrack and entertainment complex, including any museum attached to or included in the racetrack facility, but excluding any restaurant, and which facility is located, on a maximum of 232 acres, in a city with a population of at least 14,500 but not more than 16,500 residents, which city is located in a county with a population of at least 35,000 but not more than 40,000 residents, and where the construction on the racetrack facility commenced not later than one year following July 1, 2005, and the cost of the construction upon completion was at least \$35 million.

“Change of control” means any of the following:

1. Any change in the ownership of the original or any subsequent legal entity that is the owner or operator of the automobile racetrack facility such that less than 25 percent of the equity interests in the legal entity is owned by individuals who are residents of Iowa, an Iowa corporation, or combination of both.

2. The original owners of the legal entity that is the owner or operator of the automobile racetrack facility shall collectively cease to own at least 25 percent of the voting equity interests of such legal entity.

“Iowa corporation” means a corporation incorporated under the laws of Iowa where at least 25 percent of the corporation’s equity interests are owned by individuals who are residents of Iowa.

“*Owner or operator*” means a for-profit legal entity where at least 25 percent of its equity interests are owned by individuals who are residents of Iowa, an Iowa corporation, or combination of both and that is the owner or operator of an automobile racetrack facility and is primarily a promoter of motor vehicle races.

“*Population*” means the population based upon the 2000 certified federal census.

235.1(2) Affidavit by owner or operator. The owner or operator of an automobile racetrack facility seeking a rebate of sales tax imposed and collected by retailers upon sales of any goods, wares, merchandise, or services furnished to purchasers at the automobile racetrack facility must file with the department the following affidavit certifying that qualifications for the rebate have been met:

Iowa Department of Revenue
Sales Tax Rebate Affidavit

NAME OF AFFIANT	*	AFFIDAVIT FOR SANCTIONED
	*	AUTOMOBILE RACETRACK
ADDRESS OF AFFIANT	*	FACILITY
	*	

The undersigned duly swears that the named Automobile Racetrack Facility complies with criteria to be entitled to rebate of sales tax as required in Iowa Code section 423.4 as follows:

- a. The facility is sanctioned as an automobile racetrack facility;
- b. The sanctioned automobile racetrack facility is located as part of a racetrack and entertainment complex, including any museum attached to or included in the sanctioned automobile racetrack facility, but excluding any restaurant;
- c. The sanctioned automobile racetrack facility has not and will not receive any grants under the community attraction and tourism program pursuant to Iowa Code chapter 15F, subchapter II, or the vision Iowa program pursuant to Iowa Code chapter 15F, subchapter III;
- d. The sanctioned automobile racetrack facility is located on a maximum of 232 acres of Iowa land;
- e. The sanctioned automobile racetrack facility is located in a city with a population, as defined by this rule, of at least 14,500, but not more than 16,500;
- f. The city in which the sanctioned automobile racetrack facility is located is in a county with a population, as defined by this rule, of at least 35,000, but no more than 40,000;
- g. Construction of the sanctioned automobile racetrack facility was commenced on or before July 1, 2006;
- h. Cost of construction of the automobile racetrack facility upon completion is at least \$35 million; and
- i. There has not been a “change of control” as defined in the rules governing this program regarding the legal ownership or operation of the automobile racetrack facility.

The undersigned duly swears that he or she is the owner or operator of the sanctioned automobile racetrack facility or that the undersigned is the authorized representative of the sanctioned automobile racetrack facility and has the authority to sign this document. The undersigned swears that he or she has personal knowledge regarding the facts contained in this affidavit and that the statements set forth in this affidavit are true and accurate and that the sanctioned automobile racetrack facility has met all of the requirements as contained herein.

Name of Affiant
Position of Affiant

Date

235.1(3) Notification to the department of revenue. The owner or operator of the automobile racetrack facility will provide the department with the identity of all retailers at the automobile racetrack

facility that will be collecting sales tax and are required to keep the information current. The owner or operator of the automobile racetrack facility will notify the department within ten days of the termination of a retailer from collecting sales tax at the racetrack facility. In addition, the owner or operator of the automobile racetrack facility will notify the department within ten days of the start-up of a retailer collecting sales tax at the automobile racetrack facility.

235.1(4) Limitations. The automobile racetrack facility rebate program applies only to transactions that occur on or after January 1, 2006, but before January 1, 2016, and for which sales tax was collected. Only the state sales tax is subject to rebate. The rebate is limited to 5 percent. Local option taxes paid and collected are not subject to rebate. Rebates of sales taxes to an automobile racetrack facility are not authorized for transactions that occur on or after the date of the change of control of the automobile racetrack facility.

235.1(5) Termination of rebate program. The rebate program for automobile racetrack facilities is a pilot program that terminates on the earliest of the following dates:

- a. June 30, 2016; or
- b. Thirty days following the date on which \$12,500,000 in total rebates have been provided; or
- c. Thirty days following the date of the change of control of the automobile racetrack facility.

235.1(6) Sourcing of sales. Advance ticket and admissions sales shall be considered occurring at the automobile racetrack facility regardless of where the transactions actually occur. Consequently, the state sales tax and any applicable local option tax in effect for the jurisdiction in which the automobile racetrack facility is located must be imposed.

Other types of sales eligible for rebate under this program include, but are not limited to, sales by vendors and sales at concessions, gift shops, and museums. However, sales by a restaurant on facility land are not subject to rebate.

235.1(7) Requirements to obtain a rebate of state sales tax by the racetrack facility.

- a. The rebate request must be submitted to the department on the authorized department form;
- b. The rebate request form must be filed with the department in a timely manner, with the filing requirement being quarterly; and
- c. All the information requested on the rebate request form must be completed.

This rule is intended to implement Iowa Code section 423.4(5).

[ARC 9434B, IAB 3/23/11, effective 4/27/11]

701—235.2(423) Sanctioned baseball and softball tournament facility and movie site. Effective July 1, 2012, qualifying rebates of Iowa state sales tax may be made to the owner or operator of a sanctioned baseball and softball tournament facility and movie site as defined in this rule for sales occurring on or after January 1, 2014, and ending January 1, 2024. Qualifying rebates are for state sales tax only. Local option taxes are not subject to rebate under this program.

235.2(1) Definitions. For the purpose of this program the following definitions apply:

“*Change of control*” means any of the following:

1. Any change in the ownership of the original or any subsequent legal entity that is the owner or operator of the baseball and softball tournament facility and movie site such that more than 51 percent of the equity interests in the legal entity cease to be owned by individuals who are residents of Iowa, an Iowa corporation, or combination of both.

2. The original owners of the legal entity that is the owner or operator of the baseball and softball tournament facility and movie site shall collectively cease to own more than 50 percent of the voting equity interests of such legal entity or shall otherwise cease to have effective control of such legal entity.

“*Department*” means the department of revenue.

“*Iowa corporation*” means a corporation incorporated under the laws of Iowa where at least 51 percent of the corporation’s equity interests are owned by individuals who are residents of Iowa.

“*Owner or operator*” means a for-profit legal entity where at least 51 percent of its equity interests are owned by individuals who are residents of Iowa, an Iowa corporation, or combination of both and that is the owner or operator of a baseball and softball tournament facility and movie site and is primarily a promoter of baseball and softball tournaments.

“Population” means the population based upon the 2010 certified federal census.

“Sanctioned baseball and softball tournament facility and movie site” or “facility” means a baseball and softball tournament complex and tourist destination, which facility is located on a maximum of 279 acres, located inside or within three miles of the city limits of a city with a population of at least 4,000 but not more than 5,500 residents, which city is located in a county with a population of at least 93,000 but not more than 100,000 residents and where the construction on the baseball and softball tournament facility commenced not later than one year following July 1, 2013, and the cost of the construction upon completion was at least \$38 million.

235.2(2) Affidavit by owner or operator. The owner or operator of a baseball and softball tournament facility and movie site seeking a rebate of sales tax imposed and collected by retailers upon sales of any goods, wares, merchandise, admission tickets, or services furnished to purchasers at the facility must file with the department the following affidavit certifying that qualifications for the rebate have been met:

Iowa Department of Revenue
Sales Tax Rebate Affidavit

NAME OF AFFIANT	*	AFFIDAVIT FOR SANCTIONED
	*	BASEBALL AND SOFTBALL
ADDRESS OF AFFIANT	*	TOURNAMENT FACILITY AND
	*	MOVIE SITE

The undersigned duly swears that the named Baseball and Softball Tournament Facility and Movie Site complies with criteria to be entitled to rebate of sales tax as required in Iowa Code section 423.4 as follows:

1. The facility is sanctioned as a baseball and softball tournament facility and movie site;
2. The sanctioned baseball and softball tournament facility and movie site is located on a maximum of 279 acres of Iowa land;
3. The sanctioned baseball and softball tournament facility and movie site is located in a city with a population, as defined by the rules governing this program, of at least 4,000 but not more than 5,500 residents;
4. The city in which the sanctioned baseball and softball tournament facility and movie site is located is in a county with a population, as defined by the rules governing this program, of at least 93,000 but not more than 100,000 residents;
5. Construction of the sanctioned baseball and softball tournament facility and movie site was commenced on or before July 1, 2013;
6. Cost of construction of the sanctioned baseball and softball tournament facility and movie site upon completion is at least \$38 million; and
7. There has not been a “change of control” as defined in the rules governing this program regarding the legal ownership or operation of the baseball and softball tournament facility and movie site.

The undersigned duly swears that he or she is the owner or operator of the sanctioned baseball and softball tournament facility and movie site or that the undersigned is the authorized representative of the sanctioned baseball and softball tournament facility and movie site and has the authority to sign this document. The undersigned swears that he or she has personal knowledge regarding the facts contained in this affidavit and that the statements set forth in this affidavit are true and accurate and that the sanctioned baseball and softball tournament facility and movie site has met all of the requirements as contained herein.

_____ Name of Affiant	_____ Date
_____ Position of Affiant	

235.2(3) Notification to the department of revenue. The owner or operator of the sanctioned baseball and softball tournament facility and movie site shall provide the department with the identity of all retailers at the facility that will be collecting sales tax and shall keep the information current. The owner or operator of the facility shall notify the department within ten days of the termination of a retailer from collecting sales tax at the facility. In addition, the owner or operator of the facility shall notify the department within ten days of the start-up of a retailer collecting sales tax at the facility.

235.2(4) Limitations. The sanctioned baseball and softball tournament facility and movie site rebate program applies only to transactions that occur on or after January 1, 2014, but before January 1, 2024, and for which sales tax was collected. Only the state sales tax is subject to rebate. The rebate is limited to the Iowa sales tax rate. Local option taxes paid and collected are not subject to rebate. Rebates of sales taxes to a facility are not authorized for transactions that occur on or after the date of the change of control of the facility. The amount of sales tax revenues transferred from the general fund to the baseball and softball tournament facility and movie site fund is that portion of sales tax receipts remaining in the general fund after the department transfers, in the order prescribed:

- a. Local option sales taxes to those taxing jurisdictions imposing local option taxes;
- b. If the sales tax rate is increased to greater than 6 percent, an amount of sales tax equal to the amount generated by the increase in the tax rate—limited to 3/8 of 1 percent of the sales tax rate that exceeds 6 percent—to the natural resources and outdoor recreation trust fund; and
- c. One-sixth of the remaining sales tax revenues to the secure an advanced vision for education fund.

235.2(5) Termination of rebate program. The rebate program for the sanctioned baseball and softball tournament facility and movie site terminates on the earliest of the following dates:

- a. January 1, 2024; or
- b. Thirty days following the date on which \$16.5 million in total rebates have been provided; or
- c. Thirty days following the date of the change of control of the facility.

235.2(6) Sourcing of sales. Advance ticket and admissions sales shall be considered occurring at the sanctioned baseball and softball tournament facility and movie site regardless of where the transactions actually occur. Consequently, the state sales tax and any applicable local option tax in effect for the jurisdiction in which the facility is located must be imposed on the purchase price of advance ticket and admissions sales.

Other types of sales eligible for rebate under this program include, but are not limited to, sales by vendors and sales at concessions, gift shops, and museums.

235.2(7) Requirements to obtain a rebate of state sales tax by the sanctioned baseball and softball tournament facility and movie site.

- a. The rebate request must be submitted to the department on the authorized department form;
- b. The rebate request form must be filed quarterly with the department and in a timely manner; and
- c. All the information requested on the rebate request form must be completed.

This rule is intended to implement 2011 Iowa Code Supplement sections 423.2(11) and 423.4 as amended by 2012 Iowa Acts, Senate File 2329.

CHAPTER 236
Reserved

CHAPTER 237
REINVESTMENT DISTRICTS PROGRAM

701—237.1(15J) Purpose. The economic development authority board is authorized by the general assembly and the governor to oversee the implementation and administration of certain provisions of a new economic development program known as the Iowa reinvestment Act, which was enacted in 2013 Iowa Acts, House File 641. The program provides for as much as \$100 million in state hotel and motel and state sales tax revenues from new revenue-generating projects in certain districts to be reinvested within those districts. In general, the economic development authority has the responsibility to evaluate projects and make funding decisions, while the department of revenue has the responsibility for collecting the tax revenues used to fund projects under the program and making payments to municipalities. This chapter sets forth the department of revenue's administration of the calculation of the state sales tax and hotel and motel tax funding and the remittance of such funding to governmental entities. The administrative rules for other aspects of the Iowa reinvestment Act may be found in the economic development authority's rules at 261—Chapter 200.

This rule is intended to implement Iowa Code chapter 15J.
[ARC 1443C, IAB 4/30/14, effective 6/4/14]

701—237.2(15J) Definitions.

"Board" means the economic development authority board established pursuant to Iowa Code section 15.105.

"Commencement date" means the date established for each district by the board under Iowa Code section 15J.4, subsection 3, upon which the calculation of new state sales tax and new state hotel and motel tax revenue for deposit in the fund shall begin.

"Department" means the department of revenue.

"District" means the area within a municipality that is designated a reinvestment district pursuant to Iowa Code section 15J.4.

"Fund" means the state reinvestment district fund created in Iowa Code section 15J.6.

"Governing body" means the county board of supervisors, city council, or other body in which the legislative powers of the municipality are vested.

"Municipality" means a county or an incorporated city.

"New lessor" means a lessor, as defined in Iowa Code section 423A.2, operating a business in the district that was not in operation in the area of the district before the effective date of the ordinance establishing the district, regardless of ownership. "New lessor" also includes any lessor, as defined in Iowa Code section 423A.2, operating a business in the district if the place of business for that business is the subject of a project that was approved by the board.

"New retail establishment" means a business operated in the district by a retailer, as defined in Iowa Code section 423.1, that was not in operation in the area of the district before the effective date of the ordinance establishing the district, regardless of ownership. "New retail establishment" also includes any business operated in the district by a retailer, as defined in Iowa Code section 423.1, if the place of business for that retail establishment is the subject of a project that was approved by the board.

"Project" means a vertical improvement constructed or substantially improved within a district using sales tax revenues and hotel and motel tax revenues received by a municipality pursuant to this chapter. "Project" does not include any of the following:

1. A building, structure, or other facility that is in whole or in part used or intended to be used to conduct gambling games under Iowa Code chapter 99F.
2. A building, structure, or other facility that is in whole or in part used or intended to be used as a hotel or motel if such hotel or motel is connected to or operated in conjunction with a building, structure, or other facility described in paragraph "1" above.

"State hotel and motel tax" means the state-imposed tax under Iowa Code section 423A.3.

“*State reinvestment district fund*” means the fund created in Iowa Code section 15J.6, pursuant to Iowa Code section 423.2, subsection 11, paragraph “b,” and Iowa Code section 423A.6, and described in rule 701—237.4(15J).

“*State sales tax*” means the sales and services tax imposed pursuant to Iowa Code section 423.2.

“*Substantially improved*” means that the cost of the improvements is equal to or exceeds 50 percent of the assessed value of the property, excluding the land, prior to such improvements.

“*Vertical improvement*” means a building that is wholly or partially above grade and all appurtenant structures to the building.

This rule is intended to implement Iowa Code section 15J.2.

[ARC 1443C, IAB 4/30/14, effective 6/4/14]

701—237.3(15J) New state tax revenue calculations.

237.3(1) *State sales tax calculation.* The department shall calculate quarterly the amount of new state sales tax revenues for each district established in the state to be deposited in the state reinvestment district fund, subject to remittance limitations established by the board.

The amount of new state sales tax revenue for purposes of this subrule shall be the product of the amount of sales subject to the state sales tax in the district during the quarter from “new retail establishments,” as defined in rule 701—237.2(15J), multiplied by 4 percent.

237.3(2) *State hotel and motel tax calculation.* Pursuant to Iowa Code section 423A.6, the department shall calculate quarterly the amount of new state hotel and motel tax revenues for each district established in the state to be deposited in the state reinvestment district fund created in Iowa Code section 15J.6, subject to remittance limitations established by the board pursuant to Iowa Code section 15J.4, subsection 3.

The amount of new state hotel and motel tax revenue for purposes of this subrule shall be the product of the amount of sales subject to the state hotel and motel tax in the district during the quarter from “new lessors,” as defined in rule 701—237.2(15J), multiplied by the state hotel and motel tax rate imposed under Iowa Code section 423A.3.

237.3(3) *Identification of new retail establishments and new lessors.* Each municipality that has established a district under this chapter shall assist the department in identifying new retail establishments in the district that are collecting state sales tax and new lessors in the district that are collecting state hotel and motel tax. This process shall be ongoing until the municipality ceases to utilize state sales tax revenue or state hotel and motel tax revenue under this chapter or the district is dissolved.

This rule is intended to implement Iowa Code sections 15J.5, 423.2(11) and 423A.6.

[ARC 1443C, IAB 4/30/14, effective 6/4/14]

701—237.4(15J) State reinvestment district fund.

237.4(1) *Establishment of the fund.* A state reinvestment district fund is established in the state treasury under the control of the department consisting of the new state sales tax revenues collected within each district and deposited in the fund pursuant to Iowa Code section 423.2, subsection 11, paragraph “b,” and the new state hotel and motel tax revenues collected within each district and deposited in the fund pursuant to Iowa Code section 423A.6. Moneys deposited in the fund are appropriated to the department for the purposes of remittance of moneys to municipalities as set forth in subrule 237.4(3). Moneys in the fund shall only be used as set forth in economic development authority rule 261—200.8(15J).

237.4(2) *District accounts.* A district account is created within the fund for each district created by a municipality under Iowa Code chapter 15J.

237.4(3) *Timing of deposits.* The department shall deposit the moneys described in subrule 237.4(1) that were collected in a quarter beginning on or after the district’s commencement date into the appropriate district account in the fund. However, moneys shall not be deposited in the fund before the period for processing returns for the quarter is complete.

237.4(4) *Late-filed returns.* Moneys described in subrule 237.4(1) that are collected from late-filed returns shall be deposited in the fund. Such moneys shall be deposited following the period for processing

returns for the quarter in which the late return is received, subject to the limitations of Iowa Code chapter 15J.

237.4(5) *Reinvestment project fund deposits.* All moneys in each district account within the fund shall be remitted quarterly by the department to the municipality that established the district for deposit in the municipality's reinvestment project fund described in rule 701—237.5(15J).

237.4(6) *Refund claims.* If the moneys described in subrule 237.4(1) are the subject of a refund claim and that claim is granted by the department, the department may offset any refund at a later date against funds remitted to the district in which the new retail establishment or new lessor that had remitted the refunded tax amount is located.

This rule is intended to implement Iowa Code section 15J.6.
[ARC 1443C, IAB 4/30/14, effective 6/4/14]

701—237.5(15J) Reinvestment project fund.

237.5(1) *Reinvestment project fund deposits.* State sales tax revenue and state hotel and motel tax revenue remitted by the department to a municipality pursuant to Iowa Code section 15J.6 shall be deposited in a reinvestment project fund of the municipality and shall be used to fund projects within the district from which the revenues were collected. If the municipality determines that the revenue accruing to the reinvestment project fund exceeds the amount necessary for these purposes, the excess moneys that are remittances received under Iowa Code section 15J.6 and all interest in the fund attributable to such excess amounts shall be remitted by the municipality to the department for deposit in the general fund of the state.

237.5(2) *Other funds.* In addition to the moneys received pursuant to subrule 237.4(1), a municipality may deposit in the reinvestment project fund any other moneys lawfully at the municipality's disposal, including but not limited to local sales and services tax receipts collected under Iowa Code chapter 423B if such use is a purpose authorized for the municipality under Iowa Code chapter 423B.

237.5(3) *Use of funds.* Moneys from any source deposited into the reinvestment project fund shall not be expended for or otherwise used in connection with a project that includes the relocation of a commercial or industrial enterprise not presently located within the municipality.

For the purposes of this subrule, "relocation" means the closure or substantial reduction of an enterprise's existing operations in one area of the state and the initiation of substantially the same operation in the same county or a contiguous county in the state. "Relocation" does not include an enterprise expanding its operations in another area of the state provided that existing operations of a similar nature are not closed or substantially reduced.

237.5(4) *Remittance of unused funds.* Upon dissolution of a district pursuant to rule 701—237.6(15J), if moneys remitted to the municipality pursuant to subrule 237.4(1) remain in the municipality's reinvestment project fund and those moneys are not necessary to support completion of a project in the dissolved district, such amounts and all interest remaining in the fund that was earned on such amounts shall be remitted by the municipality to the department for deposit in the general fund of the state.

Upon dissolution of a district pursuant to rule 701—237.6(15J), moneys remaining in the reinvestment project fund that were deposited pursuant to subrule 237.5(2) and all interest remaining in the fund that was earned on such amounts shall be deposited in the general fund of the municipality.

237.5(5) *Audit of records.* The records of the municipality related to the district and the reinvestment project fund are subject to audit by the department or the auditor of state.

This rule is intended to implement Iowa Code section 15J.7.
[ARC 1443C, IAB 4/30/14, effective 6/4/14]

701—237.6(15J) End of deposits—district dissolution.

237.6(1) *Cessation of deposits.* As of the date 20 years after the district's commencement date, the department shall cease to deposit state sales tax revenues and state hotel and motel tax revenues into the district's account within the fund, unless the municipality dissolves the district by ordinance prior to that date. Once the maximum benefit amount approved by the board for the district has been reached, the

department will cease to deposit new tax revenues into the district's account within the fund. If a district reaches the maximum benefit amount, the department shall notify the municipality and the board within a reasonable amount of time.

237.6(2) District dissolution. If the municipality dissolves the district by ordinance prior to the expiration of the 20-year period, the municipality shall notify the director of revenue of the dissolution by certified mail as soon as practicable after adoption of the ordinance, and the department shall, as of the effective date of dissolution, cease to deposit state sales tax revenues and state hotel and motel tax revenues into the district's account within the fund. If a municipality is notified that its maximum benefit amount has been reached, the municipality shall dissolve the district by ordinance as soon as practicable after notification.

This rule is intended to implement Iowa Code section 15J.8.

[ARC 1443C, IAB 4/30/14, effective 6/4/14]

[Filed ARC 1443C (Notice ARC 1363C, IAB 3/5/14), IAB 4/30/14, effective 6/4/14]

CHAPTER 238
FLOOD MITIGATION PROGRAM

701—238.1(418) Flood mitigation program. The flood mitigation program is a program administered by the flood mitigation board with the assistance of the Iowa department of homeland security and emergency management to assist governmental entities in undertaking projects approved under Iowa Code chapter 418. This chapter sets forth the revenue department's administration of the calculation of sales tax increment funding and the remittance of such funding to governmental entities. The administrative rules for other aspects of the flood mitigation program may be found at 605—Chapter 14.

This rule is intended to implement Iowa Code chapter 418 and section 423.2(11).
[ARC 1103C, IAB 10/16/13, effective 11/20/13]

701—238.2(418) Definitions.

“*Area*” means the area used to determine the sales tax increment as described in subrule 238.3(2).

“*Base year*” means the fiscal year ending during the calendar year in which the governmental entity's project is approved by the flood mitigation board under Iowa Code section 418.1.

“*Board*” means the flood mitigation board as created in Iowa Code section 418.5.

“*Corresponding quarter*” means the quarter in the base year and the quarter in the year in which the increment is measured that end in the same month. For example, if the base year is fiscal year 2013 and the year in which the increment is first measured is 2014, then the quarter ending in September 2012 of the base year would correspond to the quarter ending in September 2014 of the calendar year.

“*Department*” means the Iowa department of revenue.

“*Governmental entity*” means any of the following:

1. A county.
2. A city.
3. A joint board or other legal or administrative entity established or designated in an agreement pursuant to Iowa Code chapter 28E between any of the following:
 - Two or more cities located in whole or in part within the same county.
 - A county and one or more cities that are located in whole or in part within the county.
 - A county, one or more cities that are located in whole or in part within the county, and a drainage district formed by mutual agreement under Iowa Code section 468.142 located in whole or in part within the county.

“*Project*” means the construction and reconstruction of levees, embankments, impounding reservoirs, or conduits that are necessary for the protection of property from the effects of floodwaters and may include the deepening, widening, alteration, change, diversion, or other improvement of watercourses if necessary for the protection of such property from the effects of floodwaters. A project may consist of one or more phases of construction or reconstruction that are contracted for separately if the larger project, of which the project is a part, otherwise meets the requirements of Iowa Code section 418.4.

“*Retail establishment*” means a business operated by a retailer as defined in Iowa Code section 423.1.

“*Sales subject to the tax*” means the sales made by retail establishments in the area that are taxable under Iowa Code section 423.2.

“*Sales tax*” means the sales and services tax imposed pursuant to Iowa Code section 423.2.

This rule is intended to implement Iowa Code section 418.1.
[ARC 1103C, IAB 10/16/13, effective 11/20/13]

701—238.3(418) Sales tax increment calculation.

238.3(1) Sales tax increment calculation formula. The department shall calculate quarterly the amount of increased sales tax revenues for each governmental entity approved to use sales tax increment revenues and the amount of such revenues to be transferred to the sales tax increment fund pursuant to Iowa Code section 423.2(11)“b.” The department shall calculate the amount of the sales tax increment as follows:

a. Determine the amount of sales subject to the tax under Iowa Code section 423.2 in each applicable area specified in subrule 238.3(2) during the corresponding quarter in the base year from retail establishments in such areas. The base year shall be calculated when the period for processing returns for the final quarter in the base year is complete.

b. Determine the amount of sales subject to the tax under Iowa Code section 423.2 in each applicable area specified in subrule 238.3(2) during the corresponding quarter in each subsequent calendar year from retail establishments in such areas.

c. Subtract the base year quarterly amount determined under paragraph 238.3(1)“*a*” from the subsequent calendar year quarterly amount in paragraph 238.3(1)“*b*.”

d. If the amount determined under paragraph 238.3(1)“*c*” is positive, the product of the amount determined under paragraph 238.3(1)“*c*” multiplied by the tax rate imposed under Iowa Code section 423.2 shall constitute the amount of increased sales tax revenue.

e. Only sales that are made by retail establishments in the area are taken into consideration when the sales subject to tax are determined. Sales otherwise sourced to the area are not considered in the calculation.

238.3(2) *Area used to determine the increment.* The area used to determine the sales tax increment shall include:

a. For projects approved for a governmental entity as defined in Iowa Code section 418.1(4)“*a*,” only the unincorporated areas of the county.

b. For projects approved for a governmental entity as defined in Iowa Code section 418.1(4)“*b*,” only the incorporated areas of the city.

c. For projects approved for a governmental entity as defined in Iowa Code section 418.1(4)“*c*,” the incorporated areas of each city that is participating in the chapter 28E agreement, the unincorporated areas of the participating county, and the area of any participating drainage district not otherwise included in the areas of the participating cities or county, as applicable.

238.3(3) *Identification of retailers.* Each governmental entity shall assist the department of revenue in identifying retail establishments in the governmental entity’s applicable area that are collecting sales tax. This process shall be ongoing until the governmental entity ceases to utilize sales tax revenue under this chapter.

This rule is intended to implement Iowa Code section 418.11.
[ARC 1103C, IAB 10/16/13, effective 11/20/13]

701—238.4(418) Sales tax increment fund.

238.4(1) *Establishment of the sales tax increment fund.* A sales tax increment fund is established as a separate and distinct fund in the state treasury under the control of the department. The fund consists of the amount of the increased state sales and services tax revenues collected by the department within each applicable area specified in Iowa Code section 418.11(3) and deposited in the fund pursuant to Iowa Code section 423.2(11)“*b*.” Moneys deposited in the fund are appropriated to the department for the purposes of this rule. Moneys in the fund shall only be used for the purposes of this rule.

238.4(2) *Sales tax increment accounts.* An account is created within the fund for each governmental entity that has adopted a resolution under Iowa Code section 418.4(3)“*d*.”

238.4(3) *Deposits into the sales tax increment fund.* The department shall deposit in the fund the moneys described in subrule 238.4(1) beginning the first day of the quarter following receipt of a resolution under Iowa Code section 418.4(3)“*d*.” However, in no case shall a sales tax increment be calculated under Iowa Code section 418.11 or such moneys be deposited in the fund under this rule prior to January 1, 2014. Additionally, moneys will not be deposited in the fund before the period for processing returns for a given quarter is complete.

238.4(4) *Requests for remittances; limitations.*

a. Upon request of a governmental entity, the department shall remit the moneys in the governmental entity’s account within the fund to the governmental entity for deposit in the governmental entity’s flood project fund. Such requests shall be made not more than quarterly. Requests for remittance shall be submitted on forms prescribed by the department.

b. In lieu of quarterly requests, a governmental entity may submit a certified schedule of principal and interest payments on bonds issued under Iowa Code section 418.4. If such a certified schedule is submitted, the department shall, subject to the remittance limitations of this chapter, remit from the governmental entity's account to the governmental entity for deposit in the governmental entity's flood project fund the amounts necessary for such principal and interest payments in accordance with the certified schedule.

c. Requests for remittance shall be made for the amount of moneys in the governmental entity's account necessary to pay the governmental entity's costs or obligations related to the project, according to the sales tax revenue funding needs specified in the approved project plan. A governmental entity shall not, however, during any fiscal year receive remittances under this rule exceeding \$15 million or 70 percent of the total yearly amount of increased sales tax increment revenue in the governmental entity's applicable area and deposited in the governmental entity's account or the annual maximum amount established by the board pursuant to Iowa Code section 418.9(4), whichever is less.

d. The total amount of remittances during any fiscal year for all governmental entities approved to use sales tax revenues under this chapter shall not exceed, in the aggregate, \$30 million. Remittances from the department of revenue shall be deposited in the governmental entity's flood project fund under Iowa Code section 418.13.

e. Each quarter, the department will transfer into the sales tax increment fund the full amount of the increased sales tax subject to the limitations stated in this rule. The director of the department may adjust the amount transferred during the year if it becomes apparent that the total amount transferred will exceed the limitations stated in this rule. If, when the total of all the transfers made to a governmental entity during the year is calculated at the end of the fiscal year, it is determined that the governmental entity received more than the maximum amount permissible under this rule, the department may withhold funds in the subsequent fiscal year to recoup the excess payments.

f. If the governmental entity has unused funds from a prior quarter in its account within the sales tax increment fund, subject to paragraphs 238.4(4) "a" to "e," those funds will be available in subsequent quarters so long as the amount is necessary for the purposes of this chapter.

238.4(5) *Remittance of funds to the general fund.* If the department determines that the revenue accruing to the fund or accounts within the fund exceeds \$30 million, or exceeds the amount necessary for the purposes of this chapter if the amount necessary is less than \$30 million, then those excess moneys shall be credited by the department for deposit in the general fund of the state. The board shall assist the department in determining whether the fund or accounts within the fund have met the limitations of this rule.

238.4(6) *Reporting requirements.* Each governmental entity approved by the board to use sales tax increment revenues for a project under this chapter shall submit two reports to the board certifying the total amount of nonpublic investment, as defined in Iowa Code section 418.9(2) "d," that has occurred in the governmental entity's area as defined in Iowa Code section 418.11(3). The first report shall be submitted not later than five years after the board approved the project. The second report shall be submitted to the board not later than ten years after the board approved the project.

238.4(7) *Failure to meet nonpublic investment requirements.* If the nonpublic investment requirements of Iowa Code section 418.9(2) "d" are not satisfied, the board shall reduce the governmental entity's amount of sales tax increment revenues eligible to be remitted during the remaining period of time for receiving remittances by an amount equal to the shortfall in nonpublic investment. However, such a reduction shall not be to an amount less than zero.

This rule is intended to implement Iowa Code section 418.12.

[ARC 1103C, IAB 10/16/13, effective 11/20/13]

[Filed ARC 1103C (Notice ARC 0955C, IAB 8/21/13), IAB 10/16/13, effective 11/20/13]

CHAPTER 239
LOCAL OPTION SALES TAX URBAN RENEWAL PROJECTS

701—239.1(423B) Urban renewal project. Only after the county board of supervisors from each county where the urban renewal area from which local option sales and services revenues are to be collected and used to fund urban renewal projects adopts a resolution approving the collection and use of local sales and services tax revenue for urban renewal projects may an eligible city by ordinance of the city council provide for the use of a designated amount of the increased local sales and services tax revenues collected under this chapter which are attributable to retail establishments in an urban renewal area to fund urban renewal projects located in the urban renewal area. The designated amount to be used to fund urban renewal projects may be all or a portion of such increased revenues, subject to the limitations imposed by the resolution adopted by the county board, or boards, of supervisors. This rule applies to any urban renewal project to be funded by a city's collection and use of local option sales and services tax revenues on or after July 1, 2012.

[ARC 7666B, IAB 4/8/09, effective 5/13/09; ARC 0468C, IAB 11/28/12, effective 1/2/13]

701—239.2(423B) Definitions. For purposes of this chapter, unless the context otherwise requires, the following definitions shall apply:

“*Base year*” means the fiscal year during which the ordinance is adopted that provides for funding of an urban renewal project by a designated amount of the increased sales and services tax revenues, as referenced in 239.1(423B).

“*Eligible city*” means:

1. A city in which a local sales and services tax imposed by the county applies; or
2. A city whose corporate boundaries include areas of two counties that may impose by ordinance of their city councils a local sales and services tax if all of the following apply:
 - At least 85 percent of the residents of the city live in one county.
 - The county in which at least 85 percent of the city residents reside has held an election on the question of the imposition of a local sales and services tax and a majority of those voting on the question in the city favored its imposition.
 - The city has entered into an agreement on the distribution of the sales and services tax revenues collected from the area where the city tax is imposed with the county where such area is located, and in which an urban renewal area has been designated.

“*Local sales and services tax*” means the local tax imposed by a jurisdiction pursuant to an election authorized by Iowa Code section 423B.1.

“*Retail establishment*” means a business required to obtain a sales tax permit as required by Iowa Code section 423.36.

“*Retail properties*” means an area of property in which more than one retail establishment is located.

“*Urban renewal area*” means a slum area, blighted area, economic development area, or a combination of such areas, which the local governing body designates as appropriate for an urban renewal project as allowed under Iowa Code chapter 403.

“*Urban renewal project*” may include undertakings and activities of a municipality in an urban renewal area for the elimination and for the prevention of the development or spread of slums and blight, may include the designation and development of an economic development area in an urban renewal area, and may involve slum clearance and redevelopment in an urban renewal area, or rehabilitation or conservation in an urban renewal area, or any combination or part thereof in accordance with an urban renewal program as allowed under Iowa Code chapter 403.

[ARC 7666B, IAB 4/8/09, effective 5/13/09]

701—239.3(423B) Establishing sales and revenue growth. For purposes of establishing the sales amount in the base year and the revenue growth in subsequent fiscal years, the department will calculate sales made by retail establishments located within the urban renewal area.

[ARC 7666B, IAB 4/8/09, effective 5/13/09]

701—239.4(423B) Requirements for cities adopting an ordinance.

239.4(1) Within at least 90 days following the adoption of an ordinance, an eligible city must notify the director of the department of revenue of its intent to pursue funding for an urban renewal project based upon the increase in local sales and services tax revenue. The notification must include the following information:

a. Effective July 1, 2012, a copy of the resolution of the board of supervisors from each county where the urban renewal area from which local sales and services tax revenues are to be collected approving the collection and use of local sales and services tax;

b. A copy of the urban renewal plan and the resolution adopting the city's urban renewal plan;

c. A copy of the adopted ordinance, including:

(1) The current and original, if applicable, purpose or purposes for which the local option sales and services tax was enacted; and

(2) The amount and proportion of revenue that will be redistributed from each current revenue purpose to fund urban renewal within the urban renewal area;

d. The legal description of the urban renewal area covered by the ordinance;

e. A map showing the geographic boundaries of the urban renewal area; and

f. A geographic information system boundary file, if available, showing the geographic boundaries of the urban renewal area.

239.4(2) Each urban renewal area must have its own separate ordinance, and the department shall be notified separately for each urban renewal area. Notification shall be mailed or otherwise submitted to: Director, Iowa Department of Revenue, Hoover State Office Building, 1305 E. Walnut Street, Des Moines, Iowa 50319.

239.4(3) Each urban renewal area must have its own separate resolution of the board of supervisors from each county from which local option sales and services tax revenues will be collected and used for urban renewal projects located within the urban renewal area.

[ARC 7666B, IAB 4/8/09, effective 5/13/09; ARC 0468C, IAB 11/28/12, effective 1/2/13]

701—239.5(423B) Identification of retail establishments. The eligible city shall assist the department of revenue in identifying retail establishments in the urban renewal area that are collecting the local sales and services tax. The department of revenue will identify sales tax permit holders within the urban renewal area using the geographic information system boundary file, if available, provided to the department. If no boundary file is provided, the department will rely upon the map submitted by the eligible city. If any of the urban renewal area boundaries submitted are street centerlines, the information provided to the department shall indicate whether only retail establishments within the bounded area should be considered part of the urban renewal area, or if in addition to the retail establishments within the bounded area, retail establishments immediately adjacent to the bounded area should also be included.

[ARC 7666B, IAB 4/8/09, effective 5/13/09]

701—239.6(423B) Calculation of base year taxable sales amount. The base year taxable sales and services amount will be the total taxable sales and services subject to the local sales and services tax that are made by retail establishments within the urban renewal area during the base year. Taxable sales of tangible personal property and services that are subject to the local sales and services tax that are made by retail establishments or service providers located within the urban renewal area include only those sales that are sourced to the county in which the urban renewal area is located. Those sales made by retail establishments or service providers located within the urban renewal area that are sourced outside of the county are not subject to the local sales and services tax. For sourcing rules, see Iowa Code section 423.15 and 701—Chapter 223.

[ARC 7666B, IAB 4/8/09, effective 5/13/09; ARC 0468C, IAB 11/28/12, effective 1/2/13]

701—239.7(423B) Determination of tax growth increment amount. The local sales and services tax growth increment amount for the urban renewal area will be computed for each fiscal year following the base year. The annual local option sales and services tax growth increment amount is equal to the current year taxable sales and services subject to the local sales and services tax that are made by retail

establishments located in the urban renewal area minus the corresponding base year taxable sales and services amount for the urban renewal area multiplied by the current local sales and services tax rate applicable to the jurisdiction.

[ARC 7666B, IAB 4/8/09, effective 5/13/09]

701—239.8(423B) Distribution of tax base and growth increment amounts. The revenues from the local sales and services tax growth amount for urban renewal areas in jurisdictions that have enacted ordinances pursuant to Iowa Code section 423B.10 shall be determined annually and shall be distributed to the city within 120 days following the end of the fiscal year in which they are collected.

[ARC 7666B, IAB 4/8/09, effective 5/13/09]

701—239.9(423B) Examples. The following examples illustrate the application of the rules in this chapter:

EXAMPLE 1. City A has an urban renewal area that covers a large portion of its downtown. City A and all of its downtown area are located in County B. City A also has in place a 1 percent local sales and services tax. City A's city council wants to enact an ordinance that establishes the urban renewal area as a local sales and services tax increment district which designates 100 percent of the tax growth increment amount to the special city account. Before City A's city council can establish the local sales and services tax district, County B's board of supervisors must adopt a resolution approving City A's local sales and services tax increment district.

The base year taxable sales amount for the urban renewal area will equal the amount of taxable sales made by retail establishments in the urban renewal area for the fiscal year in which the ordinance was adopted. Assume City A's urban renewal area has \$10,050,000 in taxable sales during the 2013-2014 fiscal year.

At the end of the fiscal year following the fiscal year in which the ordinance was adopted (June 30, 2015, in this example), City A's urban renewal area has taxable sales of \$25,000,000. To determine the tax growth increment amount, the department subtracts the base year taxable sales amount from fiscal year two's taxable sales amount then multiplies the remainder by the local sales and services tax rate of 1 percent as follows:

$$\$25,000,000 - \$10,050,000 = \$14,950,000$$

$$\$14,950,000 \times .01 = \$149,500$$

The result is a tax growth increment amount of \$149,500. The department of revenue will deposit \$149,500 into the city's special account no later than November 10 following the end of the fiscal year.

EXAMPLE 2. Same facts as Example 1, but City A's urban renewal area is located in County B and County C. Before City A can enact an ordinance that establishes the urban renewal area as a local sales and services tax increment district, the boards of supervisors from County B and County C must adopt resolutions approving City A's local sales and services tax increment district.

[ARC 7666B, IAB 4/8/09, effective 5/13/09; ARC 0468C, IAB 11/28/12, effective 1/2/13]

701—239.10(423B) Ordinance term. An ordinance under this chapter is repealed when the plan for the urban renewal area expires or terminates or 20 years after adoption of the ordinance, whichever is the earlier.

[ARC 7666B, IAB 4/8/09, effective 5/13/09]

These rules are intended to implement Iowa Code sections 423B.1, 423B.7 and 423B.10.

[Filed ARC 7666B (Notice ARC 7531B, IAB 1/28/09), IAB 4/8/09, effective 5/13/09]

[Editorial change: IAC Supplement 4/22/09]

[Filed ARC 0468C (Notice ARC 0378C, IAB 10/3/12), IAB 11/28/12, effective 1/2/13]

CHAPTER 240
RULES NECESSARY TO IMPLEMENT THE STREAMLINED SALES
AND USE TAX AGREEMENT

701—240.1(423) Allowing use of the lowest tax rate within a database area and use of the tax rate for a five-digit area when a nine-digit zip code cannot be used. Any database maintained by the department which displays tax rates and tax jurisdictional boundaries based on either a five-digit or nine-digit zip code system shall, if an area encompassing one zip code has two or more rates of tax, provide to retailers a means of identifying and applying the lowest rate within the area for use in computing tax due. If a nine-digit zip code designation is not available for a street address or if a seller is unable to determine the nine-digit zip code designation of a purchaser after exercising due diligence to determine the designation, the seller may apply the lowest rate for the five-digit zip code area.

This rule is intended to implement 2005 Iowa Code section 423.55.

701—240.2(423) Permissible categories of exemptions.

240.2(1) Definitions.

“Entity-based exemption” means an exemption based on who purchases the product or who sells the product.

“Product-based exemption” means an exemption based on the description of the product and not based on who purchases the product or how the purchaser intends to use the product.

“Use-based exemption” means an exemption based on the purchaser’s use of the product.

240.2(2) Product-based exemptions. Iowa will enact a product-based exemption without restriction only if the agreement does not have a definition for the product or for a term that includes the product. If the agreement has a definition for the product or for a term that includes the product, Iowa will exempt all items included within the definition but will not exempt only part of the items included within the definition unless the agreement sets out the exemption for part of the items as an acceptable variation.

240.2(3) Entity-based and use-based exemptions. Iowa will enact an entity-based or a use-based exemption without restriction only if the agreement has no definition for the product whose use or purchase by a specific entity is exempt or for a term that includes the product. If the agreement has a definition for the product whose use or specific purchase is exempt, Iowa will enact an entity-based or a use-based exemption that applies to that product only if the exemption utilizes the agreement’s definition of the product. If the agreement does not have a definition for the product whose use or specific purchase is exempt but has a definition for a term that includes the product, Iowa has the power to enact an entity-based or a use-based exemption for the product without restriction.

This rule is intended to implement 2005 Iowa Code chapter 423, subchapter IV.

701—240.3(423) Requirement of uniformity in the filing of returns and remittance of funds. Any model 1, 2, or 3 seller may submit its sales or use tax returns in a simplified format that does not include more data fields than permitted by the governing board. The department will require only one remittance for each return except as otherwise allowed by the agreement. If any additional remittance is required, it will only be required from sellers that have collected more than \$30,000 in sales and use taxes in Iowa during the preceding calendar year. The amount of the additional remittance shall be determined through a calculation method rather than actual collections and shall not require the filing of an additional return.

This rule is intended to implement 2005 Iowa Code chapter 423, subchapter IV.

701—240.4(423) Allocation of bad debts. If a seller is entitled under the provisions of 2005 Iowa Code section 423.21 to deduct bad debts owed to it and those bad debts consist of any sales price or purchase price upon which tax has been paid to the state of Iowa as well as a state or states other than Iowa, then allocation of the bad debt is allowed. The seller must support an allocation of the bad debts between Iowa and the other state or states through the proper accounting of its books and records.

This rule is intended to implement 2005 Iowa Code chapter 423, subchapter IV.

701—240.5(423) Purchaser refund procedures. Iowa law allows a purchaser to seek a return of overcollected sales or use taxes from the seller who collected them. See 2005 Iowa Code subsection 423.45(2). In connection with any purchaser's request of a seller that the seller return sales or use tax alleged to have been overcollected, the seller to whom the request is directed shall be rebuttably presumed to have a reasonable business practice if, in the collection of such sales or use tax, the seller uses either a provider or a system, including a proprietary system, which is certified by this state; and has remitted all taxes collected by the use of that provider system to the department, less any deductions, credits, or collection allowances.

This rule is intended to implement 2005 Iowa Code chapter 423, subchapter IV.

701—240.6(423) Relief from liability for reliance on taxability matrix. Iowa provides and maintains a taxability matrix in a database that is in a downloadable format approved by the governing board. All sellers and certified service providers are relieved from liability to Iowa and any jurisdiction imposing a local option tax under Iowa Code chapter 423B or 423E for having charged and collected the incorrect amount of sales or use tax resulting from the seller's or certified service provider's reliance on erroneous data provided by that taxability matrix.

This rule is intended to implement 2005 Iowa Code chapter 423, subchapter IV.

701—240.7(423) Effective dates of taxation rate increases or decreases when certain services are furnished. Certain taxable services are usually furnished over an extended period of time (e.g., utilities, janitorial, and ministorage services), and the user of such a service is billed at regular intervals (e.g., monthly or quarterly). The beginning date when a rate change is imposed on the sales price of this type of service differs, depending upon whether a rate increase or rate decrease is involved. If the rate of taxation has been increased, the beginning date of the rate change shall be the first day of the first billing period occurring on or after the effective date of the rate increase. If the rate of taxation has been decreased, the new rate shall apply to bills rendered on or after the effective date of the rate decrease.

This rule is intended to implement 2011 Iowa Code chapter 423, subchapter IV.

[ARC 0415C, IAB 10/31/12, effective 12/5/12]

701—240.8(423) Prospective application of defining "retail sale" to include a lease or rental. The definition of "retail sale" which includes leasing or renting (see 701—Chapter 211) is applied only prospectively from the date of July 1, 2004, and will have no retroactive impact on leases or rentals existing prior to that date. This definition of "retail sale" does not impact any Iowa exemption or exclusion in force prior to July 1, 2004, and applicable to a sale-leaseback transaction, nor does the definition preclude this state from adopting a sale-leaseback exemption or exclusion after July 1, 2004.

This rule is intended to implement 2003 Iowa Acts, First Extraordinary Session, chapter 2, section 205.

[Filed 6/3/05, Notice 4/27/05—published 6/22/05, effective 7/27/05]

[Filed ARC 0415C (Notice ARC 0326C, IAB 9/5/12), IAB 10/31/12, effective 12/5/12]

CHAPTER 241
EXCISE TAXES NOT GOVERNED BY THE STREAMLINED SALES AND
USE TAX AGREEMENT

701—241.1(423A,423D) Purpose of the chapter. This chapter sets out the excise taxes the collection of which is governed in all aspects by the provisions of Iowa Code chapter 423 except that portion of the chapter which implements the streamlined sales and use tax agreement.

701—241.2(423A,423D) Director's administration. The director of revenue shall administer the excise taxes set out in this chapter as nearly as possible in conjunction with the administration of the state sales and use tax law, except that portion of the law which implements the streamlined sales and use tax agreement. The director shall provide appropriate forms, or provide on the regular state tax forms, for reporting the sale and use of excise tax liability. All moneys received shall be deposited in or all refunds shall be withdrawn from the general fund of the state. The director may require all persons who are engaged in the business of deriving any sales price or purchase price subject to tax under this chapter to register with the department. The director may also require a tax permit applicable only to taxes imposed under this chapter for any retailer not collecting, or any user not paying, taxes under Iowa Code chapter 423.

Iowa Code section 422.25, subsection 4; sections 422.30, 422.67, and 422.68; section 422.69, subsection 1; sections 422.70, 422.71, 422.72, 422.74, and 422.75; section 423.14, subsection 1; and sections 423.23, 423.24, 423.25, 423.31 to 423.35, 423.37 to 423.42, and 423.47, consistent with the provisions of this chapter, apply with respect to the excise taxes authorized under this chapter, in the same manner and with the same effect as if those excise taxes were retail sales taxes within the meaning of those statutes. Notwithstanding this paragraph, the director shall provide for quarterly filing of returns and for other than quarterly filing of returns both as prescribed in Iowa Code section 423.31. All taxes collected under this chapter by a retailer or any user are deemed to be held in trust for the state of Iowa.

DIVISION I
STATE-IMPOSED HOTEL AND MOTEL TAX

701—241.3(423A) Definitions. For the purposes of this division, unless the context otherwise requires:

“Department” means the department of revenue.

“Lessor” means any person engaged in the business of renting lodging to users.

“Lodging” means rooms, apartments, or sleeping quarters in a hotel, motel, inn, public lodging house, rooming house, or manufactured or mobile home that is tangible personal property, or in a tourist court, or in any place where sleeping accommodations are furnished to transient guests for rent, whether with or without meals. The word “lodging” does not refer to the rental of rooms for purposes other than sleeping or resting, including but not limited to rental of rooms for meetings, conferences, weddings, or banquets.

“Person” means the same as the term is defined in rule 701—211.1(423).

“Renting” or *“rent”* means a transfer of possession or control of lodging for a fixed or indeterminate term for consideration and includes any kind of direct or indirect charge for such lodging or its use.

“Sales price” means the amount of consideration for renting of lodging and means the same as the term is defined in rule 701—211.1(423).

“User” means a person to whom lodging is rented.

For the purposes of this division, all other words and phrases used in this chapter and defined in rule 701—211.1(423) have the meaning set forth in that rule.

[ARC 9434B, IAB 3/23/11, effective 4/27/11]

701—241.4(423A) Imposition of tax. A tax of 5 percent is imposed upon the sales price for the rental of any lodging if the rental occurs in this state. The tax shall be collected by any lessor of lodging from the user of that lodging. The lessor shall add the tax to the sales price of the lodging, and the state-imposed tax, when collected, shall be stated as a distinct item, separate and apart from the sales price of the

lodging and the local tax imposed, if any, under Iowa Code section 423A.4. The rental of a mobile or manufactured home that is tangible personal property is treated as the rental of lodging.
[ARC 9434B, IAB 3/23/11, effective 4/27/11]

701—241.5(423A) Exemptions. The tax described in this division shall not apply:

241.5(1) To lodging furnished to a person if that person contracts to rent any rooms or facility for more than 31 consecutive days. The renter must contract to rent for a single period of more than 31 consecutive days. The renter may not accumulate these days by contracting for two or more rental transactions. The incremental manner in which customers are billed by the hotel, motel, inn, public lodging house, rooming or tourist court, or any place where sleeping accommodations are furnished to transient guests does not influence the accumulation of days that is required to claim the exemption.

241.5(2) To sleeping rooms rented in dormitories and in memorial unions at all universities and colleges located in the state.

241.5(3) To contracts made directly with the federal government.

241.5(4) To lodging rented to the guest of a religious institution located on real property exempt from tax as the property of a religious institution, if the reason for renting the room is to provide a place for a religious retreat or function and not a place for transient guests generally.

[ARC 9434B, IAB 3/23/11, effective 4/27/11]

This division is intended to implement Iowa Code chapter 423A.

DIVISION II
EXCISE TAX ON SPECIFIC CONSTRUCTION MACHINERY AND EQUIPMENT

701—241.6(423D) Definitions. For the purposes of this division, unless the context otherwise requires:
“*Construction*” means new construction, reconstruction, alterations, expansion, or remodeling of real property or structures.

“*Contractor*” includes contractors, subcontractors, and builders, but not owners.

“*Department*” means the department of revenue.

“*Equipment*” means self-propelled building equipment, pile drivers, and motorized scaffolding, including auxiliary attachments which improve the performance, safety, operation, or efficiency of the equipment, and replacement parts and are directly and primarily used by contractors, subcontractors, and builders for new construction, reconstruction, alterations, expansion, or remodeling of real property or structures.

“*Sales price*” or “*purchase price*” means the same as these terms are defined in rule 701—211.1(423).

For the purposes of this division, all other words and phrases used in this division and defined in rule 701—211.1(423) have the meaning set forth in that rule.

701—241.7(423D) Tax imposed. A tax of 5 percent is imposed on the sales price or purchase price of all equipment sold or used in the state of Iowa. This tax shall be collected and paid over to the department by any retailer, retailer maintaining a place of business in this state, or user who would be responsible for collection and payment of the tax if it were a sales or use tax imposed under Iowa Code chapter 423.

701—241.8(423D) Exemption. The sales price on the lease or rental of equipment to contractors for direct and primary use in construction is exempt from the tax imposed by this chapter.

This division is intended to implement 2005 Iowa Code Supplement chapter 423D.
